BIOCON: two hearings, two lawyers

The same case book, the same BIOCON record seat as convict and the same judge. Only the lawyer changes: the Indian market analyst seat, then the SOIC course seat. A simulation built from public filings; not advice and not a SEBI-registered adviser.

Wait, trust 6 of 21

Analyst as lawyer (7 issues, 21 questions, 4 cross questions)

Wait, trust 5 of 21

SOIC seat as lawyer (10 issues, 40 questions, 4 cross questions)

Scores by section

Section	Analyst as lawyer	SOIC seat as lawyer
S1 Guidance against delivery	judge said 2, final 2	judge said 2, final 2
S2 Earnings quality and accounting	judge said 1, final 1	judge said 0, final 0
S3 Cash, receivables, working capital	judge said 2, final 2	judge said 0, final 0
S4 Debt and funding	judge said 1, final 0	judge said 0, final 0
S5 Related parties and group companies	judge said 1, final 0	judge said 1, final 1
S6 Promoter: pledge, selling, succession	judge said 1, final 1	judge said 2, final 2
S7 Board, auditors, independent directors	judge said 1, final 0	judge said 0, final 0

Code caps each score by the states of the deciding question. Analyst hearing: 3 score(s) cut by code (S4, S5, S7). SOIC hearing: 0 cut (none).

Read this before comparing the two

- This is not a controlled test. The Analyst hearing heard 7 issues (I3 to I9) with a fixed three questions each; the SOIC hearing heard all ten issues with four each. Sections with no questions heard score 0, so the totals are not like for like.
- Both hearings end at Wait. Neither lifts BIOCON above the trust bar of 12 for "trust good" or 18 for Buy; the main cause in both is the same: the decisive questions on debt, cash and related parties had no figure in the record.
- The SOIC lawyer cited course sources (23 different ids) for every question; the guard checks the ids exist in its own brain, not that they fit the question.
- The SOIC lawyer's freedom to ask 2 to 5 questions per issue was not used: every issue ended at 4.
- The first SOIC closings were rewritten after they labelled two points answered that the judge scored no data. The judge's final was not re-run afterwards.
- The trust bands (0 to 6, 7 to 11, 12 to 17, 18 to 21) are the seat's own, uncalibrated.

> Pages that follow: (1) the Analyst-as-lawyer hearing report, (2) the SOIC-as-lawyer hearing report, each with every issue opened.

Update 2026-10-31: issues I5, I6 and I7 were heard again after annual report pages (S039, case book chapter 9) were added to the convict's files. Their answers, notes and the final scores below come from that second hearing. Trust is now 6 of 21 because the code cut S4, S5 and S7 to 0 (deciding question: no data). The earlier version is in this page's history.

COURTROOM CASE PAGE

BIOCON

Run date 2026-10-30 | Exchange feed to 2026-10-29

A simulation built from public filings. It is not advice and not a SEBI-registered adviser. The position says only how well the defence held up on the record.

The judge's decision

Position first, reasons next to it, limits stated.

POSITION BY THE COUNCIL'S RULE

• Wait

trust 6 is below the 18 to 21 band, so Buy is not allowed

Trust is 9 of 21 (2+1+2+1+1+1+1), no gate stands, and price (to 2026-10-23) and results (to 2026-06-30) are on file. Buy needs trust 18 to 21, and "Wait: trust good, entry not yet" needs 12 or more, so the rule gives Wait. I did not move it either way. The trust bands and the Buy cap are the seat's own and untested.

Trust 6 of 21, band 0 to 6 (unanswered or declined). seat's own bands, not from any source, uncalibrated.

If you do not own it

Wait. what would change it: filed answers that explain the 24,692 debt gap, show covenant headroom and the 2026-09-30 test, and name the Mylan ceiling would lift trust. A standing gate, for example an adverse reason behind the 2026-08-06 auditor exit, would move this to Avoid.

If you already own it

hold and watch. what would change it: a covenant problem in the next filing, adverse reasons behind the auditor exit, or a standing gate would point to reduce or exit. Nothing in this record on its own points to add.

7 of 7 sections had data. 14 gaps are listed as not in the record. 98 notes from the checks. The bands are the seat's own and untested.

Three triggers at most

↔ **Results, call and deck for the quarter to 2026-09-30 (about mid November 2026, date unchecked).** Check: gross borrowings, the 24,692 note (b) gap on page 404, covenant test at 2026-09-30, operating cash against 19,940, Generics margin on the new basis against 13% to 14% (window to about 2027-02).

↔ **The exchange filing carrying B S R & Co. LLP's reasons for the 2026-08-06 subsidiary exit, with its timestamp.** Check: reasons, receipt date, hours, and which subsidiary.

↔ **The 2025-12-31 EGM notice and the audit committee record for the Mylan approval, plus any related party approval filed after 2026-08-06.** Check: ceiling, running balance, USD 400 million against USD 815 million, and what replaced the lapsed approvals.

Red flags raised

- The only testable guide (Generics EBITDA margin 10% to 12%, said 2025-01-31) came in at 5% for FY26 and was conceded; no group guide exists; the 7% for the quarter to 2026-06-30 is on a new basis `Q1.1` hearing I3 A1, A2, WA2 (S008, S014)
- One-offs not sized after tax: Eris income 10,570 million inside other income 11,345 (quarter to 2024-06-30), 775 unexplained; the 4,029 net loss (year to 2026-03-31) has no tax or minority split, so 7,885 is only a ceiling `Q2.1` hearing I4 A1, A2, WA1, WA2
- The Generics cross charge moved out for the quarter to 2026-06-30 is not on record, so that quarter is not on the same basis as earlier rows `Q1.6` hearing I4 A3; case book ch3 Segments
- Operating cash halved to 19,940 million (year to 2026-03-31); the bridge closes from filed lines, but why stock, payables and other assets moved is not in the record, and free cash was only 1,961 `Q3.1` hearing I5 judge close (S039 p349)
- Capital work in progress aged 2 to 3 years rose to 10,881 from 3,509 million, and overdue projects rose to 19,894 from 6,478 (2026-03-31); no project names, dates or amount into use `Q12.2` hearing I5 judge close (S039 pp365-367)
- 65,476 million falls due within a year on the maturity table against 40,784 current borrowings (2026-03-31); the 24,692 gap has no reason on record and covenant headroom cannot be checked `Q4.3` hearing I6 WA1, XA1, XA2, judge close (S039 p404, p381)
- Management gave no leverage ceiling in turns and the convict declined to name one; the 2026-09-30 covenant test is not on record `Q4.2` hearing I6 A3, judge close (S013, 2026-05-08)
- No ceiling or running balance for the Mylan approval, and nothing replaces the approvals that ended at the AGM of 2026-08-06; the notice says USD 400 million, the agreement USD 815 million `Q5.3` hearing I7 A1, A3, WA1, WA2, judge close (S034, S035, S039 p394)
- Promoter shares rose 57,119 between 2026-03-31 and 2026-06-29 with no trade date, mode or plan; the feed shows 8,786,362 securities allotted on 2026-06-29 and no allottee list is on record `Q6.3` hearing I8 A3, XA3, XA4; case book ch6
- B S R & Co. LLP resigned as auditor of "the material subsidiary" effective 2026-08-06; no reasons, receipt date or filing time are on record `Q10.2`

hearing I9 A1, WA1; case book ch6

What this does not decide

- price against value
- the reader's own situation
- anything after the as-of dates (price to 2026-10-23, results to 2026-06-30, announcements to 2026-10-29, annual report to 2026-03-31)
- the trust bands and the Buy cap are the seat's own and untested
- issues I1, I2 and I10 were not heard, so the profit bridge by quarter, the source of growth and what management declines have no hearing of their own
- D05b: promoter encumbrance declarations were read by eye; FY2022 has no readable text
- D06, D06b, D06c: transactions actually made are not matched to approved ceilings; what replaced approvals after 2026-08-06 is not on record
- D09, D09a: covenant thresholds, actual ratios and undrawn committed lines are not stated; the 2026-09-30 test is not on record
- D10: the quarter to 2025-09-30 has no clean segment source, and the segment measure changed twice
- D11: answer states are one model's reading (23 of 30 agreed, bar 24)
- S039 (chapter 9 pages) has no tier and no page-level check beyond a second model; the Mylan figures were not checked by code
- receivable days, FII and DII flows, minority owners, why stock and payables moved, what Projects 5 and 12 are, and the allottees of the issues of 2025-06-19, 2026-01-05, 2026-01-14 and 2026-06-29 are not on record

`Data pack: BRIEF INCOMPLETE: partial D05b, D06, D06b, D06c, D09, D09a, D10, D11 (see each Partial note)`

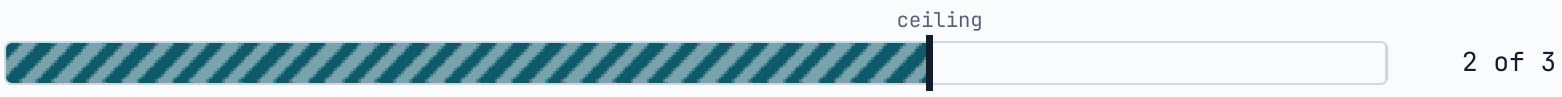

How the defence held up. The defence held better on cash and weaker on debt than last time. After the annual report pages arrived, the cash fall closed from filed lines (I5 judge close, S039 p349), and the 1,961 left after plant purchases was answered (I5 A2). The Mylan price tied to its parts (I7 judge close). The convict also conceded the Generics miss (I3 WA2) and withdrew a wrong reading of the 73,597 notes (XA1). It corrected its promoter-step date (baseline WA3). But the central debt questions stayed open even with page 404 in hand. It gave no covenant limit or ratio, no management ceiling (I6 Q1 and Q3 stay no data), and no reason for the 24,692 gap (I6 WA1, XA2). It gave no Mylan ceiling or replacement (I7 Q1, Q3), no after-tax size for the one-offs (I4 WA1, WA2), no auditor-exit reasons (I9 WA1) and no allottees (XA3, XA4). In XA3 and XA4 it said it held no exchange timeline, though the case book carries the 2026-06-29 allotment row. Some figures lacked dates or a usable id, so I weigh them as weaker. This describes how the defence stood up on the record, not guilt. This is a simulation built from public filings. It is not advice and not a SEBI-registered adviser.

Seven trust sections

Each score is 0 to 3. Code sets a ceiling from the question states. The judge may go lower, never higher.

S1 Guidance against delivery

Management gave no group margin or revenue guide (calls dated 2025-08-08 to 2026-08-06), but it gave dated segment targets, and the Generics guide of 10% to 12% (2025-01-31) was missed at 5% for FY26 and conceded.

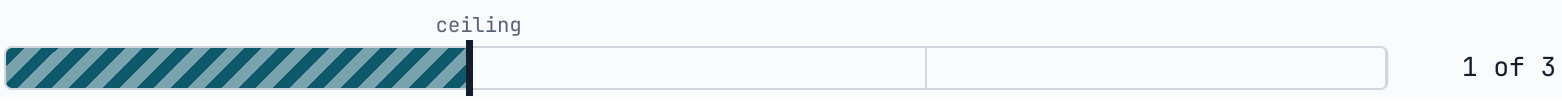

2 of 3

Ceiling 2: states a no-guidance policy and gives another numeric anchor (council ladder, S1 special case)

S2 Earnings quality and accounting

The one-offs are not sized after tax: Eris income of 10,570 million (quarter to

1 of 3

2024-06-30) leaves 775 unexplained, and the 4,029 net loss (year to 2026-03-31) has no tax or minority split.

Ceiling 1: the deciding question got words but no number

S3 Cash, receivables, working capital

Re-heard with annual report pages (S039 p349), the fall in operating cash from 40,612 to 19,940 million is bridged to filed lines and 1,961 is left after plant purchases, but no management date or amount exists for the aged work in progress of 10,881 (2026-03-31).

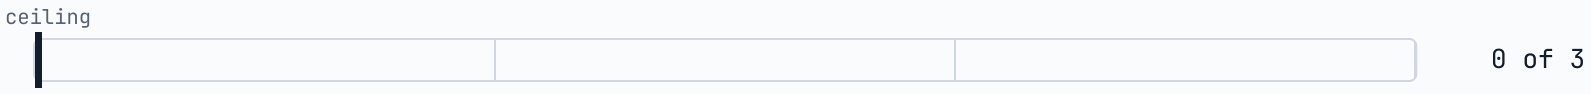

Ceiling 3: every core question answered with a number and a date

---

S4 Debt and funding

Re-heard, covenants are met in words only (year to 2026-03-31), there is no covenant limit, ratio or management ceiling, and the 24,692 gap in one-year debt at 2026-03-31 has no stated reason.

Ceiling 0: the deciding question was no data. **Cut: judge said 1, evidence allows 0, because the deciding question was no data**

S5 Related parties and group companies

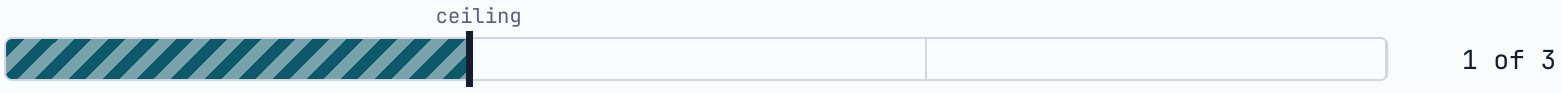

Re-heard, the Mylan price ties to its parts (Rs 73,560 million, S039 p307, p373, p394) and the vote is filed (0.81% against, 2025-12-31), but no ceiling, running balance or replacement for approvals ended 2026-08-06 is on record.

Ceiling 0: the deciding question was no data. **Cut: judge said 1, evidence allows 0, because the deciding question was no data**

S6 Promoter: pledge, selling, succession

Pledge is nil on the flags at 2026-09-30 and the dilution is explained by filed share issues, but the pledged-count cell is blank and the 57,119 promoter share rise to 2026-06-29 is unexplained.

Ceiling 1: the deciding question got words but no number

S7 Board, auditors, independent directors

Five of nine directors were independent at 2026-03-31 and firm tenure is dated, but the auditor's exit from a material subsidiary (effective 2026-08-06) has no reasons, receipt date or filing time. I lift this from 0 last time to 1, because one of three core questions had no data, not all.

Ceiling 0: the deciding question was no data. **Cut: judge said 1, evidence allows 0, because the deciding question was no data**

answered · partial · deflected · no data or unverified · ceiling set by code

Direction of the business

↔ Mixed

1. Profit, down: profit to owners fell from 10,133 to 3,856 million (year to 2025-03-31 against year to 2026-03-31). Segment profit fell 9,393 (17,901 to 8,508) and net one-offs swung from a 965 gain to a 4,029 loss. (hearing B07; case book ch3)
2. Profit, down in Generics: the segment turned to a loss of 1,348 million in the year to 2026-03-31, from a profit of 1,755. Management's own reasons are new-plant costs: Generics EBITDA down 32% for nine months (S012, 2026-02-13), management's figure and not filed. (hearing I3 WA2)

3. Profit, up lately: operating profit was 8,472 million in the quarter to 2026-06-30 against 7,489 a year before (+13.1%), and margin was 19.5% against 19.0%. (case book ch3, filed and derived)
4. Growth, up: revenue rose about 10.9% to 169,270 million in the year to 2026-03-31 and 10.0% to 43,360 in the quarter to 2026-06-30. Biosimilars rose 3,978 to 28,556 in that quarter. (case book ch3)
5. Growth, mixed: Services fell 1,385 million (15.8%) to 7,360 in the quarter to 2026-06-30. The rename did not move the line, and management calls FY27 a transition year for Syngene (S014, 2026-08-06). No FY27 revenue guide exists (S013, 2026-05-08). (baseline WA2; hearing I3 A2)
6. Cash and debt pull apart: operating cash fell 20,672 to 19,940 million (year to 2026-03-31), mostly inventory (9,175), payables and provisions (7,725), and other assets (4,414), derived by the judge from S039 p349. Why they moved is not in the record. Gross borrowings fell 16.5% to 148,247. (hearing I5 judge close)
7. Work in progress is growing: overdue projects rose to 19,894 from 6,478 million at 2026-03-31, and Projects 5 and 12 are 98% of it. What they are is not in the record. (S039 pp365-367)
8. Outside context only, not used for any score: generics and biosimilars were excluded from US Section 232 tariffs at 2026-04-08 (E001). FDA draft guidance of 2026-08-26 is still a draft (E002).

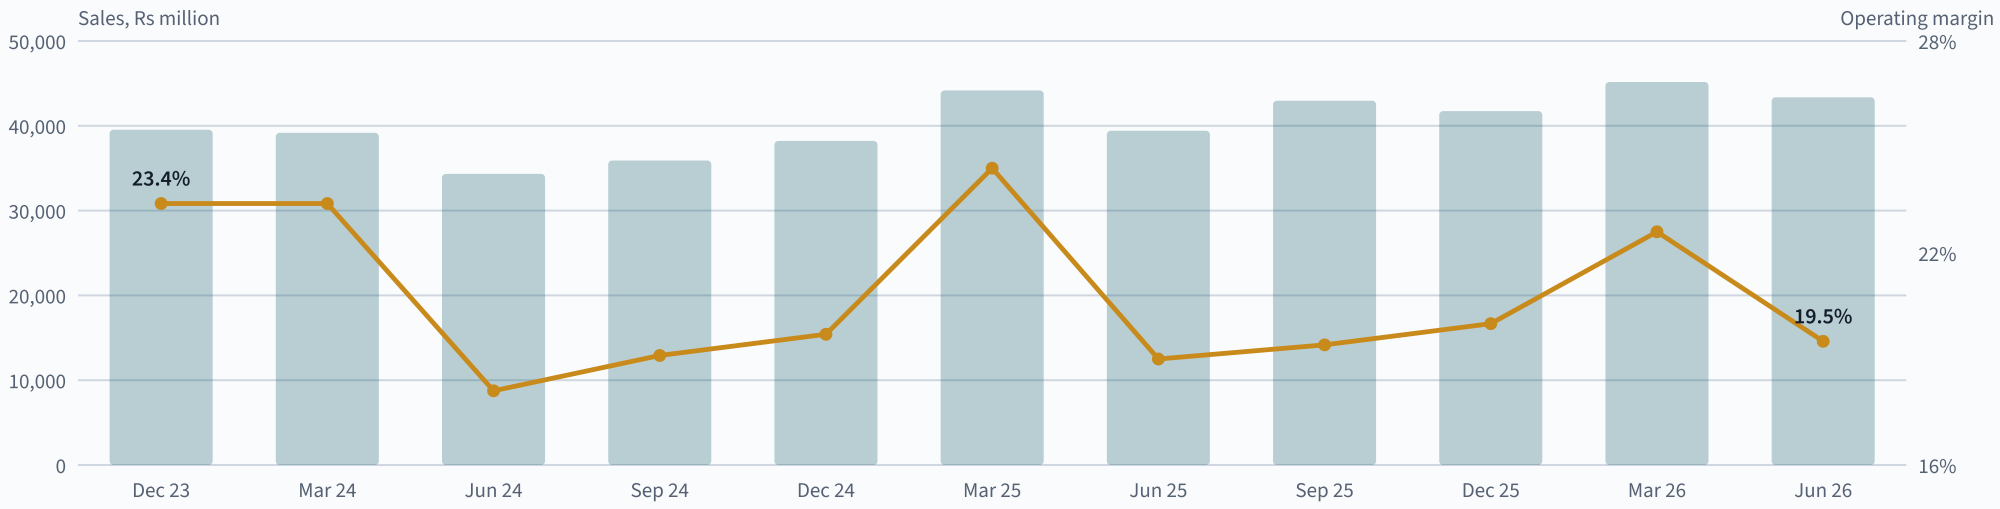

Direction describes the business. It never lifts the position.

Exhibits

Each says what to look at, then shows it. Hover a mark for its number. A missing source says "not in the record" and draws nothing.

EXH 1 Sales and operating margin by filed quarter

Look at: bars are sales, the line is how much of each rupee of sales is left as operating profit. Latest quarter Jun 26: sales 43,360, margin 19.5%. Highest margin 24.4% in Mar 25.

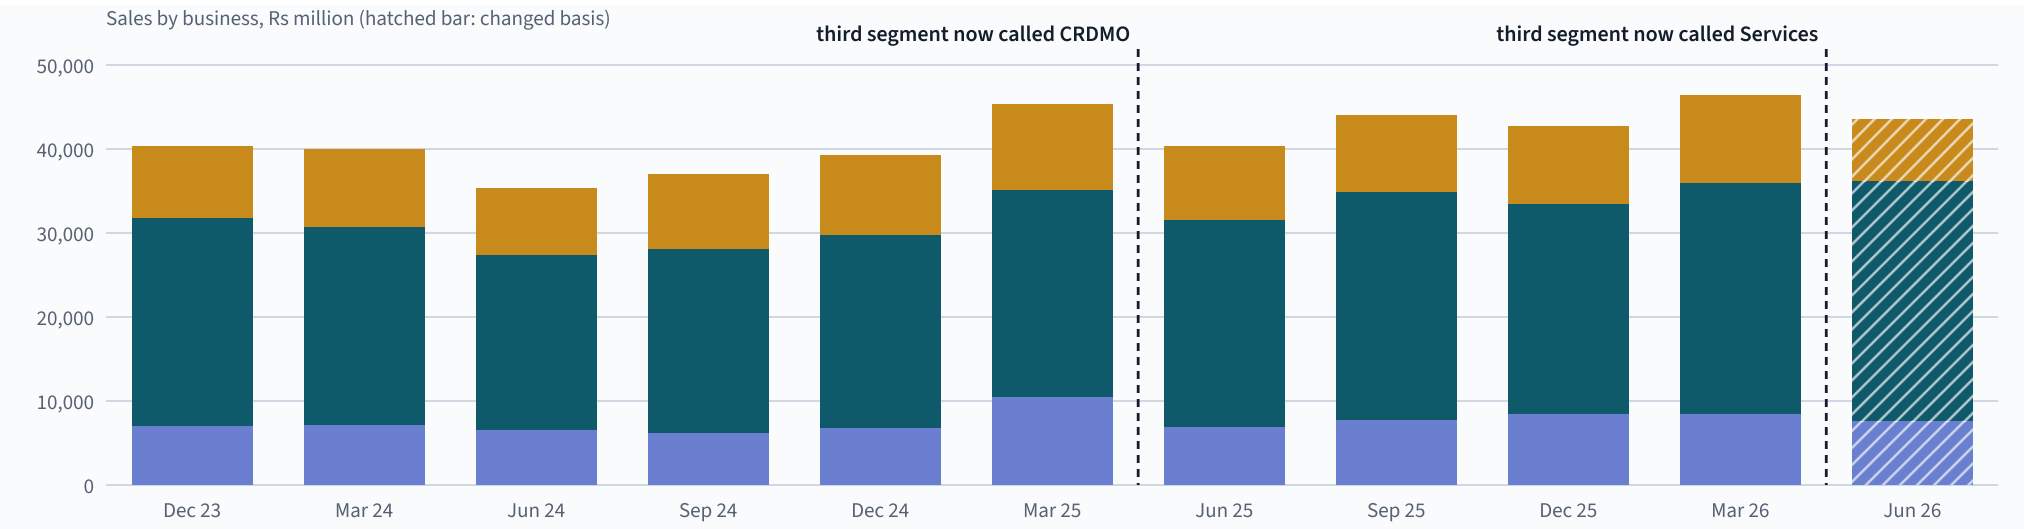

Case book, filed quarters, Rs million, consolidated. Margin is operating profit over revenue, derived.

EXH 2 Where the sales come from

Look at: the three businesses stacked. **Do not compare across a dashed line.** Jun 25: third segment now called CRDMO; Jun 26: third segment now called Services.

Generics Biosimilars Third segment

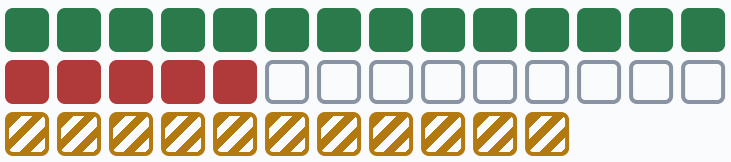

Case book, segments table, Rs million as filed. Do not compare across a dashed line: the segment was renamed or its basis changed.

EXH 3

Promises kept and missed

Look at: 39 statements, one square each. 14 kept, 5 missed, 9 still open, 11 depend on how they are read.

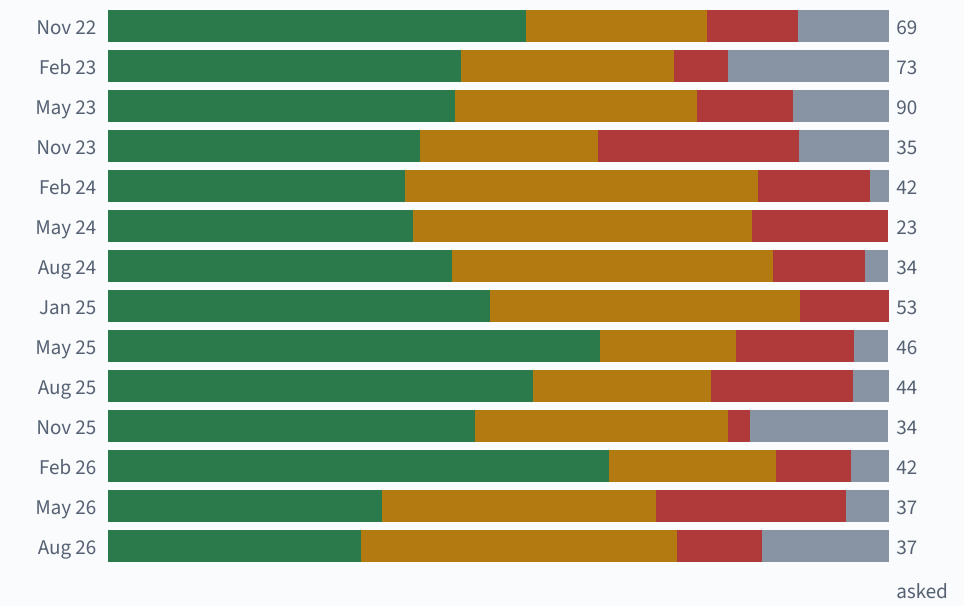

The company seat's scorecard. It counts dated product, segment and capacity statements, not group ranges unless it says so.

EXH 4

How questions on each call were answered

Look at: each row is one call. Of 659 questions on 14 calls, 311 (47%) were answered straight. The rest went around the question.

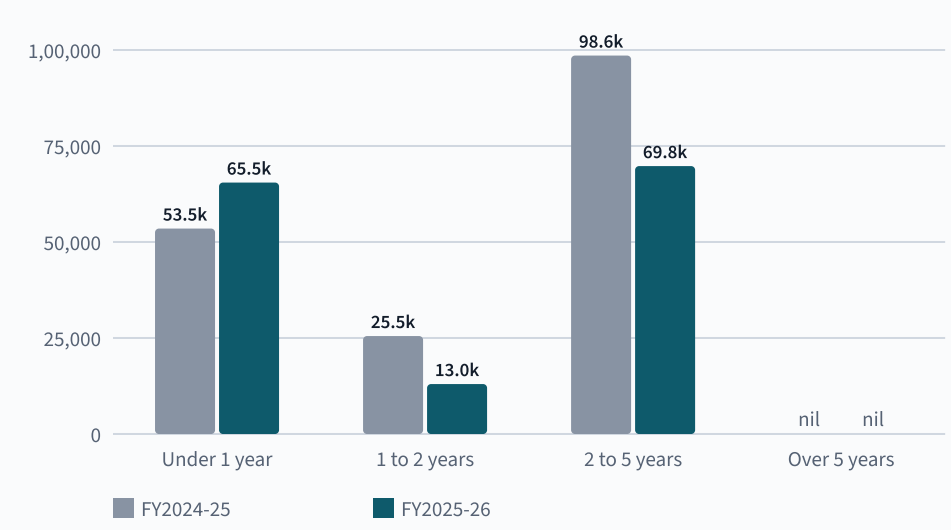

States are one model's reading, checked by a second model on a sample. Read them as a reading, not a finding.

EXH 5

When the borrowings fall due

Look at: the first bar pair is debt due soonest: 53,498 in FY2024-25 against 65,476 in FY2025-26. Totals 1,77,555 then 1,48,246.

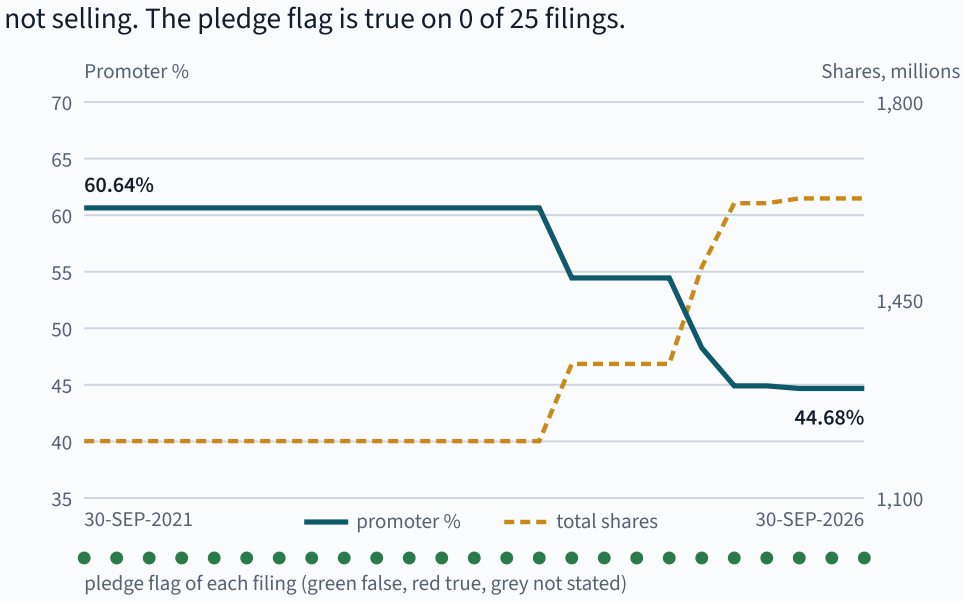

Annual report maturity table, undiscounted, Rs million. Covenant thresholds and unused credit lines are listed as not in the record unless the checks section says otherwise.

EXH 6

Promoter stake against shares in issue

Look at: the promoter stake went from 60.64% to 44.68% while shares in issue went from 1,201 to 1,630 million. A falling percentage with a growing total is not selling. The pledge flag is true on 0 of 25 filings.

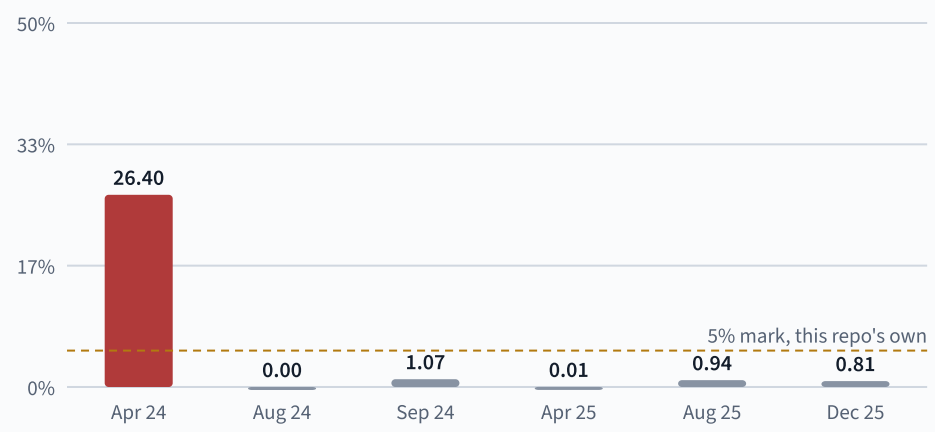

Shareholding filings. The dots on the bottom row are the pledge flag of each filing.

EXH 7

Highest vote against a related-party deal

Look at: the highest vote against was 26.4% at the meeting of 2024-04-23. Percent of votes polled, not of shares.

Voting results annexes. Percent of votes polled, not of shares.

EXH 8

What to watch next

The judge's triggers on a time line. The arrow shows which way each would push the position.

spacing is even, not to a calendar scale

Triggers come only from the not-in-record list and the dated items in the case book and hearing.

EXH 9

Where trust sits against the Buy bar

Look at: trust 6 of 21. Buy needs 18 or more, no gate, and a current price and latest results on file. Gates standing: none. Price on file: yes. Latest results on file: yes.

Trust total across the seven sections, 0 to 21. Bands are the seat's own, untested.

Bands are the seat's own, not from any source, uncalibrated.

The hearing

Every turn as it was written. Open an issue to read it.

- Opening 2 turns

CONVICT

Convict opening

As of 2026-10-30, I stand on calls to 2026-08-06, filed quarters to 2026-06-30, the annual report to 2026-03-31, and announcements to 2026-10-25. Scorecard: kept 14, missed 5, still open 9, depends on reading 11 of 39.

Best defended:
1. Liraglutide UK launch. Said 2025-01-31 (S008), announced 28 Feb 2025.
2. Denosumab US approval. Said 2025-05-09 (S009), approved 17 Sep 2025.
3. Aspart and bevacizumab US launches. Said 2025-08-08 (S010), deck dates Sep and Oct 2025.

Hardest:
1. Liraglutide US approval. Said for 2H 2025, came 24 Feb 2026, 55 days late. I concede the miss.
2. Generics. "Strong double-digit" (S010) against filed +5.0% FY26. The +17% is the deck's own like-to-like figure, so I score first-filed. The margin target is open: 5% FY26, 7% Q1 FY27.
3. Moving dates. Malaysia drug product spans five calls. 11 of 39 outcomes rest on a reading of the wording, not a filed number, so they are less settled.

Not covered: Q1 FY24 and Q2 FY25 call text, why the share price fell, anything after the dates above.

LAWYER

Lawyer opening

I press three issues hardest.

1. I1, why profit fell (Q2.3, decisive; case book ch. 3). FY26 profit to owners was 3,856 against 10,133, while revenue rose 152,617 to 169,270. Segment profit fell 17,901 to 8,508, and Generics turned to a loss of (1,348). I will ask the CFO to walk operating profit to net profit, quarter by quarter. Q3 FY26 shows profit for the period of -518 against 1,438 to shareholders.
2. I5, cash (Q3.1; ch. 3). Cash from operations was 19,940 against 40,612. Closing capital work in progress is up to 46,127, and 2-to-3-year-old work rose from 3,509 to 10,881. I will ask for the cash gap to profit, and why intangibles under development fell 44,067 to 23,740.
3. I6, debt (Q4.3; ch. 3 and 5). 44.2% of borrowings fall due within a year (30.1% before), against cash of 24,165. Covenants are "complied", with no thresholds.

Thin or no record:
- I10 (thin): Q2.6. What disclosure did you stop when the segments were renamed twice and a cross charge moved?
- I7: Q5.3. What actually moved against each approved ceiling?
- I6: no thresholds or undrawn lines are stated. How much headroom, and what was waived?
- I8: FII and DII flows are not in the record. Q6.1: any plan to raise promoter cover?
- I5: receivable days are missing. Ask for them.

- Baseline 9 turns

LAWYER

Lawyer baseline

B01 QUESTION: Revenue from operations was 44,170 in the quarter ended 2025-03-31 and 45,166 in the quarter ended 2026-03-31, up 2.3% (derived), against +12.8% a year earlier; it was 43,360 in the quarter ended 2026-06-30 (39,419 a year before, +10.0%). What slowed growth to 2.3% in the March 2026 quarter, and what took it back to 10.0% in June 2026? | FROM: Ch3 Filed quarters, rows 2025-03-31, 2026-03-31, 2026-06-30 (derived change columns) | IF DEFLECTED: I asked for the cause of a 2.3% against a 10.0%. Give the price, volume and new-launch split of the Rs million change in each quarter, or say it is not disclosed.
B02 QUESTION: Operating profit as filed was 10,782 in the quarter ended 2025-03-31 and 10,203 in the quarter ended 2026-03-31 (-5.4%, derived), then 8,472 in the quarter ended 2026-06-30 against 7,489 a year earlier (+13.1%). Why did it fall in March 2026 while revenue rose, and why did it rise in June 2026? | FROM: Ch3 Filed quarters, same rows | IF DEFLECTED: Which cost line moved, and by how many Rs million? The case book holds no cost lines, so I need your number, not a description.
B03 QUESTION: Operating margin was 24.4% in the quarter ended 2025-03-31 and 22.6% in the quarter ended 2026-03-31 (-1.8 points, derived); it was 19.0% in the quarter ended 2025-06-30 and 19.5% in the quarter ended 2026-06-30. Which cost or mix change moved it, and how many points does each account for? The case book has no cost breakdown, so I ask you for those numbers. | FROM: Ch3 Filed quarters, operating margin % column, 2025-03-31 to 2026-06-30 | IF DEFLECTED: Give the points for each driver, and say whether they add up to the -1.8. If you cannot, say which driver you have not measured.
B04 QUESTION: Profit for the period was 8,618 in the quarter ended 2024-06-30 and 271 in the quarter ended 2024-09-30, as filed, while operating profit was 6,204 and 6,854 and finance costs 2,360 and 2,256. In the quarter ended 2025-12-31 profit for the period was -518 while profit to shareholders was 1,438. Name each one-off item and its Rs million amount in those quarters, and state who holds the minority share and how much it was. | FROM: Ch3 Filed quarters, 2024-06-30, 2024-09-30, 2025-12-31; Ch8 known gaps (minority holders not on record; one-offs on record for some quarters only) | IF DEFLECTED: The one-off amounts are not in the case book. For the quarter ended 2024-09-30, give the single number that takes 6,854 of operating profit down to 271 of profit for the period.
B05 QUESTION: In the quarter ended 2026-06-30 revenue was 43,360 against 39,419 a year earlier (+10.0%) and 45,166 in the quarter ended 2026-03-31; operating profit was 8,472 against 7,489 and 10,203. Profit for the period was 1,368 against 1,986 in the previous quarter, while profit to shareholders was 1,411 against 1,259. Why does profit to shareholders exceed profit for the period in June 2026, and what is seasonal in the sequential fall in revenue and operating profit? | FROM: Ch3 Filed quarters, rows 2025-06-30, 2026-03-31, 2026-06-30 | IF DEFLECTED: Give the minority share in Rs million for the quarter ended 2026-06-30, and name the quarters in the last 3 years where the June quarter was lower than the March quarter.
B06 QUESTION: Generics revenue was 10,475 in the quarter ended 2025-03-31 and 8,467 in the quarter ended 2026-03-31. The third segment was 10,365 in the quarter ended 2026-03-31 and 7,360 in the quarter ended 2026-06-30, after being renamed Services and after a utilities cross charge was moved out of Generics. For the full year, Generics segment profit was (1,348) against 1,755. Give the 2026-06-30 segment rows on the old basis, and say what caused the Generics loss. | FROM: Ch3 Segments table (rows 2025-03-31, 2026-03-31, 2026-06-30, name and basis note) and full-year segment results (PDF p413, p414) | IF DEFLECTED: Restate the quarter ended 2026-06-30 Generics, Biosimilars and Services figures on the same basis as 2026-03-31, or say you cannot. The quarter ended 2025-09-30 has no clean source in the case book, so give that segment row too.
B07 QUESTION: Revenue from operations was 169,270 in FY2025-26 against 152,617 in FY2024-25, while profit attributable to owners was 3,856 against 10,133. Segment profit totalled 8,508 against 17,901. Weighted average basic shares were 1,366,199,012 against 1,197,455,499. Which items take the profit down by 6,277 (derived by me) while revenue rose, and how much is one-off? | FROM: Ch3 Full year table (PDF p347, p394) and segment results (PDF p413, p414) | IF DEFLECTED: State the one-off items and the minority share for FY2025-26 in Rs million, and say how much of the drop in profit attributable you assign to each.
B08 QUESTION: Cash paid for property, plant and equipment was (17,979) in FY2025-26 against (21,366), while closing capital work in progress rose from 41,017 to 46,127 and its two-to-three-year part from 3,509 to 10,881. Intangible assets under development fell from 44,067 to 23,740 with disposals and transfers of (24,798). Name the projects in the 10,881 and their commissioning dates, state where the 24,798 went, and give the Rs million raised by the preferential issue allotted 2026-01-05 and the QIP allotted 2026-01-14, and what each was spent on. | FROM: Ch3 Full year table, CWIP age table (PDF p366), movement table (PDF p367); Ch6 timeline 2026-01-05 and 2026-01-14 | IF DEFLECTED: The case book holds share counts for the two issues but no proceeds. Give the proceeds and the capex they funded, in Rs million.
B09 QUESTION: Net cash from operating activities was 19,940 in FY2025-26 against 40,612 in FY2024-25, while profit attributable to owners was 3,856 against 10,133. What moved operating cash flow, and why was FY2024-25 so much higher than profit? | FROM: Ch3 Full year table (PDF p349,

p347) | IF DEFLECTED: Give the working capital change in Rs million for each year (inventories, receivables, payables), since the case book has the inventory figures only.

B10 QUESTION: Inventories were 60,857 at the end of FY2025-26 against 49,311, while revenue from operations was 169,270 against 152,617. What is in the stock build, and what is the inventory in days for each year? Receivable days are not in the case book: give trade receivables in Rs million at 2026-03-31 and 2025-03-31 and the days. | FROM: Ch3 Full year table (PDF p346, p347); Ch8 known gap (receivable days) | IF DEFLECTED: Give the receivables numbers or say they are not disclosed. Revenue grew by less than inventory in the table above, and I need the product behind it.

B11 QUESTION: Net cash from operating activities was 19,940 and purchase of property, plant and equipment (17,979) in FY2025-26; in FY2024-25 they were 40,612 and (21,366). Additions to intangible assets under development were 1,053 and 2,311. State free cash flow on your own basis for both years, with what you include. The case book holds no free cash flow line. | FROM: Ch3 Full year table (PDF p349) and Ch3 note on intangibles (PDF p367) | IF DEFLECTED: Give the operating cash flow and capital spend, in Rs million, that you subtract, and say whether the intangibles additions are in it.

B12 QUESTION: Gross borrowings were 177,555 at 2025-03-31 (107,463 plus 40,784 at 2026-03-31, i.e. 148,247; the maturity table prints 148,246). Cash and cash equivalents were 24,165 on the balance sheet and 21,115 in the cash flow statement. State net debt at both dates on a stated cash definition, the amount of FY2024-25 borrowings reclassified from non-current to current, and gross borrowings at 2026-06-30, which the case book does not hold. | FROM: Ch3 Full year table and borrowings note (PDF p346, p350, p364, p376, p381); Ch5 | IF DEFLECTED: Which cash figure do you use, 24,165 or 21,115, and what is the one rupee million gap between 148,247 and 148,246?

B13 QUESTION: Finance costs were 8,974 in FY2024-25 and 9,903 in FY2025-26 while gross borrowings fell from 177,555 to 148,247. In the quarter ended 2025-06-30 they were 2,767 and in the quarter ended 2026-06-30 2,132, against operating profit of 8,472. Why did finance costs rise while debt fell, and what is the average rate you pay? The case book has no rate. | FROM: Ch3 Filed quarters (finance costs, operating profit) and Full year table (PDF p347, p385) | IF DEFLECTED: Give the interest paid in cash in Rs million for FY2025-26 and the weighted average rate at 2026-03-31, or say they are not disclosed.

B14 QUESTION: The maturity table shows 65,476 falling due in under 1 year at 2026-03-31 (53,498 a year earlier) and 13,003 in 1 to 2 years, while the balance sheet shows current borrowings of 40,784 of which 5,121 are current maturities of non-current borrowings (18,954 a year earlier). Cash was 24,165. Reconcile 65,476 to 40,784, and state how the 65,476 will be paid or refinanced and how much of it is committed but undrawn lines. | FROM: Ch3 borrowings by due date (PDF p404) and Full year table (PDF p381); Ch5 undrawn lines | IF DEFLECTED: The case book says the word undrawn appears on no page. Give the Rs million of unused committed facilities at 2026-03-31, or say none is held.

B15 QUESTION: The report says the standalone company tested three ratios and the group six, was compliant throughout FY2025-26, and sees no difficulty at the test as at 2026-09-30, but prints no threshold and no actual value. State the required level and the actual value at 2026-03-31 for each of the nine, whether the 2026-09-30 test has been passed, and whether any covenant was waived, reset or amended in the year. | FROM: Ch5 covenants (PDF p309, p310, p377, p378); Ch5 later periods (nothing after 2026-03-31) | IF DEFLECTED: Answer yes or no on any waiver, reset or amendment, and give the headroom in the tightest ratio. A statement that you complied does not give a number.

B16 QUESTION: Promoter shares were 728,024,176 on 31-MAR-2026 and 728,081,295 on 29-JUN-2026, a rise of 57,119 (derived over the five years); promoter percentage was 60.64 on 31-MAR-2025, 54.45 on 19-JUN-2025 and 44.68 on 30-SEP-2026, with total shares going from 1,200,567,573 to 1,629,546,318. The pledged flag is false on all 25 filings. Confirm no promoter sold in that period, say how the 57,119 shares were acquired, and give the wording of the FY2022 encumbrance declaration, whose spreadsheet shows no text. | FROM: Ch4 shareholding table (31-MAR-2025 to 30-SEP-2026) and the annual declaration table (FY2022 row) | IF DEFLECTED: Answer yes or no: did any promoter or promoter group entity sell, pledge or encumber any share between 2021-09-30 and 2026-09-30, and for FY2022 say whether any share was encumbered at any time in the year.

B17 QUESTION: Public holding was 39.15% at 31-MAR-2025 and 55.14% at 30-SEP-2026. The exchange feed records 17,12,79,553 equity shares allotted by preferential issue on 2026-01-05 and 11,26,64,585 securities allotted by QIP on 2026-01-14. Who were the allottees in each, at what price, and which holders now hold more than 1%? The case book holds no investor names, prices or FII and DII flows. | FROM: Ch4 shareholding table; Ch6 timeline 2026-01-05 and 2026-01-14; Ch8 known gap (FII and DII flows) | IF DEFLECTED: Name the five largest non-promoter holders at 2026-09-30 with their percentages, or say the record does not carry them.

B18 QUESTION: EXT. Which demand, interest-rate and growth conditions does your own record say are pressing on the business, with the date of each statement? Borrowings were 148,247 at 2026-03-31 and finance costs 2,132 in the quarter ended 2026-06-30, so which rate does your record say they track? Which outside source would settle it? | FROM: Ch5 and Ch3 Filed quarters for the numbers; the conditions themselves are not in the case book | IF DEFLECTED: Name one dated statement of yours on demand and one on interest rates, and the outside publication (named central bank or industry body release) that would check each.

B19 QUESTION: EXT. Operating margin was 24.4% in the quarter ended 2025-03-31 and 22.6% in the quarter ended 2026-03-31 (-1.8 points). Does your record attribute any of that to raw material or input prices, and with what number and date? The case book has no cost line. Which outside price series would settle it? | FROM: Ch3 Filed quarters, operating margin column; input-price data not in the case book | IF DEFLECTED: Give the points of margin you attribute to input costs, or say the record has none. Name the price index you would use to verify it.

B20 QUESTION: EXT. The annual report prints a foreign currency translation adjustment of 3,418 in the intangible assets under development table for FY2025-26 (PDF p367), and names a USD 40 million short-term facility at one-month SOFR plus 75 basis points and a USD 10 million facility at bank rate plus 0.5%. What does your record say about your net foreign currency exposure and hedge cover, with dates? Which outside source (the rupee dollar rate on the dates) would settle it? | FROM: Ch3 note on intangibles (PDF p367); Ch5 working capital facilities (PDF p381) | IF DEFLECTED: Give the share of revenue and of borrowings in foreign currency, and the hedged share, in Rs million, or say they are not stated in your record.

B21 QUESTION: EXT. Which regulation, tariff or policy change does your record say applies now? The case book says a plant at Cranbury, New Jersey began commercial supplies for the United States market and generic Liraglutide was approved in the United States (AR p15). What does your record say about any change in United States tariff, pricing or approval rules, with date? Which outside source would settle it? | FROM: Ch2 (Generics, AR p15); regulatory conditions are not in the case book | IF DEFLECTED: Name the single rule you consider the largest and the Rs million of revenue it touches, and the official notice that would confirm it.

B22 QUESTION: EXT. Biosimilars segment revenue was 24,578 in the quarter ended 2025-06-30 and 28,556 in the quarter ended 2026-06-30. The report says the insulin range and biosimilar Adalimumab each passed USD 250 million and Biosimilars has 12 commercialized products. What does your record say about price pressure on those products, and which outside source (named market price data) would settle it? | FROM: Ch3 Segments table; Ch2 (AR p14) | IF DEFLECTED: Give the price change and volume change, in numbers, for the two largest products across those two quarters, or say you do not disclose them.

B23 QUESTION: The key audit matters for FY2025-26 are Taxation in the standalone report (AR p272, p273) and Revenue, Chargeback, rebates, returns and related accruals, and Taxation in the consolidated report (AR p338 to p341); no emphasis of matter appears. The Change in Auditors was

filed on 2026-05-07 and 2026-08-06, and the exchange feed shows a resignation of B S R & Co LLP as statutory auditors of the material subsidiary w.e.f. August 06, 2026. Was any of those a resignation before term, and what are the Rs million balances audited under chargeback, rebates and returns? | FROM: Ch4 auditors and key audit matters (AR p201, p272 to p341); Ch6 timeline 2026-05-07 and 2026-08-06 | IF DEFLECTED: Answer yes or no: did the subsidiary auditor leave before the end of its term, and did it give reasons? Give the accrual balance in Rs million, which the case book does not hold.

B24 QUESTION: The auditor names Taxation as a key audit matter in both the standalone and consolidated reports for the year ended 2026-03-31, but the case book holds no tax demand amount. State every tax demand, regulator action and litigation in Rs million with forum and year. Separately, the exchange sought clarification on 2022-06-21 and 2022-06-22 on a news item about a subsidiary, and issued rumour verification on 2025-11-14. I treat those as allegations, not findings: what was the reply, and has any regulator acted? | FROM: Ch4 key audit matters (AR p272, p273, p338 to p341); Ch6 timeline 2022-06-21, 2022-06-22, 2025-11-14 | IF DEFLECTED: Give the total disputed tax in Rs million and the stage of each case, or say no figure is held. The case book has none, so a missing figure is my answer to record.

B25 QUESTION: The CEO and CFO both changed with effect from 2026-04-01: Siddharth Mittal stepped down at close of 2026-03-31 and Shreehas Pradeep Tambe was appointed; Mukesh Kamath stepped down as Interim CFO and Kedar Narayan Upadhye was appointed. The exchange sought clarification on 2026-05-06 about a news item on succession. Give the votes for and against on each related party resolution at the 48th AGM on 2026-08-06 (the case book holds no vote numbers) and say whether any related party approval was replaced after that AGM, since the case book says that is not in the record. | FROM: Ch4 board and executives (AR p188); Ch6 timeline 2026-05-06, 2026-08-06; Ch8 not in the record (D06c) | IF DEFLECTED: Give votes against as a percentage of shares voted for each resolution, and the ceiling in Rs million of each approval still in force today.

B26 QUESTION: The case book holds no list of analyst questions and answers; a second blind model agreed with the first on 23 of 30 sampled items against a bar of 24, so I do not rely on it. From your own record, name each analyst question on the calls to 2026-08-06 that you declined or deferred, the call date, and what you promised to return with. The case book also has no recorded position on share buybacks, executive pay and succession planning, dividend policy, or segment margins by geography or product: state each position. | FROM: Ch8 pack line D11 (as of 2026-08-06) and the Not in the record list | IF DEFLECTED: Give the date by which each deferred item will be answered, and the Rs million number you will give on that date.

CONVICT

Convict baseline 1 `partial`

As of 2026-10-30. Calls to 2026-08-06, filed quarters to 2026-06-30, annual report to 2026-03-31. Files read: _hot.md, numbers.md, segments.md, statements-ar-fy26.md, hearing.md. No external evidence used.

B01 ANSWER: No price, volume or launch split on record. Filed, derived: March quarters Biosimilars +2,922, Generics -2,008 (first filed); June Biosimilars 24,578 to 28,556. | MOVE: not in my record | EVIDENCE: filed segments to 2026-06-30 (S033, segment table in the filing for the quarter ended 30-JUN-2026) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: management's price, volume and launch bridge per quarter.

B02 ANSWER: Quarterly cost lines are not on record. Only dated cause is full-year: "the absence of certain one-off benefits recorded in FY25, including income from Lenalidomide" (S027, p241, management discussion and analysis (management speech)). June cause not on record. | MOVE: cite, not in my record | EVIDENCE: filed operating profit 10,782, 10,203; 8,472 against 7,489, to 2026-06-30 | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: quarterly cost bridge.

B03 ANSWER: I hold no points by driver for the -1.8 (derived), so I cannot say they add up. Full year only: "material costs as a percentage of revenue from operations stood at 34%" (S027, p241, management discussion and analysis (management speech)). | MOVE: concede, not in my record | EVIDENCE: filed margins 24.4% and 22.6%, to 2026-03-31 | STATE I CLAIM: not in my record | WHAT WOULD SETTLE IT: margin points per driver per quarter.

B04 ANSWER: Filed notes: Dec 2025 exceptional items -2,934; Sep 2024 tax includes 199 (indexation). No single bridge from 6,854 to 271 on record. Dec 2025 minority share -1,956 (derived). | MOVE: cite, not in my record | EVIDENCE: filed quarters to 2025-12-31; Biosimilars minority sellers Mylan, Serum, Tata Capital Growth Fund II, Activ Pine (S027, p267, corporate governance report (company filing)) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: quarterly exceptional schedule.

B05 ANSWER: Minority share was -43 (derived: 1,368 less 1,411), a minority loss. June was below March in revenue and operating profit in 2024, 2025 and 2026 (filed). Management's seasonal explanation is not on record. | MOVE: cite, not in my record | EVIDENCE: filed quarters 2024-03-31 to 2026-06-30 | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: management's stated seasonality and the filed minority line.

B06 ANSWER: Old-basis 2026-06-30 rows are not on record, and I cannot restate them. Restated March 2026 Generics 7,760 against 8,467 first filed: 707 lower (derived). Sep 2025: Generics 7,736, Biosimilars 27,211, CRDMO 9,106, comparative column of an OCR-damaged filing. Cause of the loss: not in my record. | MOVE: concede, not in my record | EVIDENCE: filed (S033, segment table in the filing for the quarter ended 30-JUN-2026, column preceding quarter) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: old-basis restatement.

B07 ANSWER: Filed, derived: segment profit before exceptionals fell 9,393; net exceptionals went from +965 to -4,029; tax 4,572 to 791; minority share 4,161 to -168. One-off: the 4,029 net charge. | MOVE: cite | EVIDENCE: "Profit for the year including non-controlling interest stood at ` 3,688 million compared to ` 14,294 million for FY25." (S027, p190, Board's report (company filing)); filed, year to 2026-03-31 | STATE I CLAIM: answered | WHAT WOULD SETTLE IT: none beyond the filed note.

B08 ANSWER: Project names and dates in the 10,881, and where the 24,798 went, are not on record. The 5 Jan 2026 issue raised no cash: shares went "as consideration for acquisition of 261,917,480 Equity Shares of BBL" (S027, p191, Board's report (company filing)). The 14 Jan 2026 QIP: 41,500 filed; its use not on record. | MOVE: cite, not in my record | EVIDENCE: filed CWIP age table, year to 2026-03-31 (S026, PDF p366) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: project list and QIP use schedule.

B09 ANSWER: The working capital bridge is not on record. Derived: operating cash fell 20,672; inventories rose 11,546. Receivables sold without recourse: "Rs 4,740 (March 31, 2025, Rs 7,074) has been derecognized from trade receivables" (S027, p372, notes to the financial statements (company filing)). FY25 cause: not in my record. | MOVE: cite, not in my record | EVIDENCE: filed, year to 2026-03-31 (S026, PDF p346, p349) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: cash flow working capital lines.

B10 ANSWER: Inventory days on revenue (derived, not cost of sales): about 131 against 118. Stock build by product is not on record; filed items: inventory provision of 762 and write-down of 462. Receivable amounts and days are not on record. "Trade receivables from related parties have a credit period of 60 - 120 days." (S027, p396, notes to the financial statements (company filing)). | MOVE: concede, not in my record | EVIDENCE: filed inventories 60,857 and 49,311 (S026, PDF p346) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: receivables note.

B11 ANSWER: Management's own basis is not on record. On mine, derived: operating cash less cash paid for plant, 1,961 against 19,246; after intangibles additions, 908 against 16,935. Stated priority: "every dollar that we generate out of free cash, the first claim is going to be to reduce debt"

(S013, Kedar Upadhye, held 2026-05-08). | MOVE: cite, concede | EVIDENCE: filed cash flow, year to 2026-03-31 (S026, PDF p349, p367) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: management's free cash flow definition.

Unchecked: the March 2025 quarter one-off content, the 2024 and 2025 call text beyond S013, and any call after 2026-08-06.

CONVICT

Convict baseline 2 partial

B12 ANSWER: Gross borrowings 148,247 at 2026-03-31; less cash 24,165 gives 124,082 (derived). 2025 net debt, the reclassified amount and June 2026 gross are not on record. | MOVE: concede | EVIDENCE: the maturity table prints 148,246 (filed, S038, p404, as of 2026-03-31); the one-million gap's cause is unchecked. | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: management's cash definition and the borrowings note.

B13 ANSWER: Full-year finance costs rose to 9,903 from 8,974 (filed, S026); the quarter fell to 2,132 from 2,767, down 22.9% (derived). Why, and the average rate, are not on record. | MOVE: cite, mitigate | EVIDENCE: "every dollar that we generate out of free cash, the first claim is going to be to reduce debt" (S013, Kedar Upadhye, held 2026-05-08) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: cash interest paid and the weighted rate.

B14 ANSWER: 65,476 due within a year (filed, S038, p404, 2026-03-31) against 40,784 current borrowings (filed, S026): a 24,692 gap (derived) the record does not reconcile. Undrawn committed lines: the word appears on no page. | MOVE: concede, not in my record | EVIDENCE: the repayment or refinancing plan is not on record. | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: unused committed facilities at 2026-03-31.

B15 ANSWER: Covenant status is filed: three company ratios, six group, "complied" all year, no difficulty expected at the 2026-09-30 test (S038, notes, pp309, 310, 377, 378). No threshold, actual value, waiver answer or test result is on record. | MOVE: cite, not in my record | EVIDENCE: filed notes, no tier, read by hand. | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: lender compliance certificates.

B16 ANSWER: Promoter shares 728,024,176 to 728,081,295, +57,119 (filed, S032, 2021-09-30 to 2026-09-30); pledged flag false in all 25 filings; no encumbrance declared FY2023 to FY2026 (S037, read by eye). No sale shows in quarterly counts; intra-quarter trades are unchecked. | MOVE: cite, concede | EVIDENCE: how the 57,119 were acquired and FY2022 wording are not on record. | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: the 2022 declaration text and the depository record.

B17 ANSWER: Public holding 39.15% to 55.14% (filed, S032, 2025-03-31 and 2026-09-30); implied total shares 1,200,567,573 to 1,629,546,318 (derived). The step falls in the 2026-01-05 and 2026-01-14 filings. Allottees, prices, holders above 1% and FII/DII flows are not on record. | MOVE: not in my record | EVIDENCE: the filings give no investor names. | STATE I CLAIM: not in my record | WHAT WOULD SETTLE IT: the issue allotment filings and the top-holder list.

CONVICT

Convict baseline 3 partial

B18 ANSWER: Rate, last dated on record: "at current market levels, they are hovering around 7%." (S005, Indranil Sen, held 2024-02-09). Demand: "it's a de-growing market" (S012, Siddharth Mittal, held 2026-02-13), liraglutide only. No 2026 rate basis stated. EXT REQUEST: policy rate and SOFR path to 2026-06-30. | MOVE: cite, not in my record | EVIDENCE: gross borrowings 148,247, filed (S026, 2026-03-31) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: central bank and SOFR releases.

B19 ANSWER: No input-price number on record. Generics EBITDA fell 32% for nine months, "higher costs related to the new facilities we have commissioned in the recent past" (S012, Kiran Mazumdar Shaw, held 2026-02-13). EXT REQUEST: API and key-input price index, March 2025 to March 2026. | MOVE: cite, not in my record | EVIDENCE: that is management's cause, not a filed cost line | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: the input price series.

B20 ANSWER: Hedges were "range forwards or forwards" (S004, Indranil Sen, held 2023-11-10). Later: "we don't hedge our loan book actually." (S013, Kedar Upadhye, held 2026-05-08). Net exposure and hedged share not in my record. EXT REQUEST: rupee-dollar rate on 2025-03-31 and 2026-03-31. | MOVE: cite, not in my record | EVIDENCE: translation adjustment 3,418 is filed (S026, p367) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: the rate series and a hedge note.

B21 ANSWER: On US tariffs on 2026-08-06, Matthew Erick said current law exempts generics and biosimilars (paraphrase, S014). On FDA: "it has reduced the development cost by 50%." (S013, Shreehas Tambe, held 2026-05-08). Revenue touched is not in my record. EXT REQUEST: confirm the Section 232 text and FDA draft status; E001 and E002 are context only. | MOVE: cite | EVIDENCE: S014 and S013 are management speech | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: official notices.

B22 ANSWER: "price erosion is also another thing which is real in a situation in the market which will also happen." (S014, Shreehas Tambe, held 2026-08-06). Earlier: "I think we should budget for some erosion" (S013, Kedar Upadhye, held 2026-05-08). No price-volume split on record. EXT REQUEST: published US average selling price series for insulin and adalimumab. | MOVE: cite, not in my record | EVIDENCE: Biosimilars segment 24,578 to 28,556, filed, quarters ended 2025-06-30 and 2026-06-30 | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: that price series.

B23 ANSWER: Not in my record, and I did not read the auditor sections (T07 to T09) in this call. Positions.md holds no auditor statement. Accrual balances are not on record in the files I read. | MOVE: not in my record | EVIDENCE: none read this call | STATE I CLAIM: not in my record | WHAT WOULD SETTLE IT: Grep T07 to T09 in statements-ar-fy26.md; the 2026-08-06 exchange filing.

B24 ANSWER: Not in my record. Tax demand amounts and litigation sit under heading T14 in statements-ar-fy26.md, which I did not read this call. Replies to the exchange queries of 2022 and 2025-11-14 are not in my record. | MOVE: not in my record | EVIDENCE: none read this call | STATE I CLAIM: not in my record | WHAT WOULD SETTLE IT: Grep T14; the company's exchange replies.

B25 ANSWER: The 48th AGM (2026-08-06) had no related party resolution, so there are no such votes (S036, read by hand, no tier). Approval ceilings run Rs 1,005 to 4,773 crore per pair to the next AGM (S036). Any replacement after the AGM is not in my record. | MOVE: cite, not in my record | EVIDENCE: S036, no tier | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: post-AGM exchange filings.

B26 ANSWER: Declined: "so it is going to be difficult to give you one answer." (S008, management answer), on the size of price erosion, call held 2025-01-31. Deferred: "As we get to the second half, we'll start quantifying it and letting you know" (S014, Shreehas Tambe, held 2026-08-06). Buybacks and executive pay: no recorded position. Dividend: one declaration (S003, held 2023-05-24). Segment margins: "We don't disclose margin by geography or product lines." (S004, M.B. Chinappa, held 2023-11-10). | MOVE: cite, concede | EVIDENCE: qa-states.md, one model's reading (23 of 30 agreed, bar 24) | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: the Q2 FY27 call.

CONVICT

Convict baseline 3b partial

B23 ANSWER: "There has been no resignation of the statutory auditors during the year." (S027, p278, independent auditor's report, the auditor's words, Company, year to 2026-03-31). The parent's second term "ends at the ensuing 48th AGM" (S027, p201, Board's report, company filing). The subsidiary exit of 2026-08-06 and the accrual balance in Rs million are not in my record. | MOVE: cite, not in my record | EVIDENCE: the p339 key audit

matter row carries no balance | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: the 2026-08-06 filing; the accrual note.
B24 ANSWER: "There are no significant and material orders passed during the year by the regulators, courts or tribunals impacting the going concern status" (S027, p203, Board's report, company filing). Claims not acknowledged as debt: 2,715 standalone, 9,284 consolidated, Rs million, filed (S027, p323, p397, 2026-03-31). Total by forum and exchange replies: not in my record. | MOVE: cite, concede | EVIDENCE: notes, filed numbers | STATE I CLAIM: partial | WHAT WOULD SETTLE IT: Appendix 1, p279 to p280; the 2022 and 2025-11-14 replies.

JUDGE

Judge baseline

BASELINE NOTE (judge). notebook.md was empty, so nothing carried over. I read only the case book, the hearing and notebook.md, and no brain.

Code checks: all quotes in the convict's baseline turns passed code verification against the convict's brain, so I treat those ids as verified. The B21 tariff line (S014) is a paraphrase, not a quote, so that check does not cover it. B10 carries numbers with no date in the answer (see B10 below). The lawyer's 6,277 in B07 is 10,133 minus 3,856, both case book cells (ch3 Full year), so the sum is right. It is the lawyer's own derived figure and is not printed in the case book.

STORY SO FAR
1. Revenue rose 10.9% (derived) to 169,270 in FY26, but quarterly growth swung from +2.3% to +19.6%. (case book ch3 Full year, Filed quarters)
2. Profit to owners fell to 3,856 from 10,133 as segment profit halved and net exceptionals turned into a 4,029 charge. (case book ch3; hearing B07)
3. Operating cash roughly halved to 19,940, and borrowings fell 16.5% to 148,247, yet 44.2% of them fall due within a year. (case book ch3, derived)

WHY-CHAIN
1. Profit to owners fell 6,277 (10,133 to 3,856) because segment profit fell 9,393 (17,901 to 8,508) and net exceptionals swung from +965 to -4,029. Lower tax (4,572 to 791) and minority share (4,161 to -168) offset part of it. Check by me: 8,508 - 4,029 - 791 = 3,688, which is the Board's report figure. (case book ch3 Full year; hearing B07; S027 p190, code verified). The exceptionals, tax and minority numbers are the convict's filed-derived figures and are not in the case book.
2. Segment profit fell 9,393 because Generics went from 1,755 to (1,348), Biosimilars from 11,961 to 5,876 and CRDMO from 6,279 to 4,875, while unallocated improved from (2,094) to (895). Only dated causes: Generics EBITDA down 32% for nine months on new-facility costs (S012, held 2026-02-13, management's own figure, not filed). Also the absence of FY25 one-off benefits including Lenalidomide (S027 p241; which segment is not stated). Cause for Biosimilars: not in the record. (case book ch3; hearing B02, B19)
3. Revenue growth was 2.3% in the March 2026 quarter and 10.0% in June 2026. In March, Generics fell 2,008 (10,475 to 8,467) from a spike (6,864 the quarter before), while Biosimilars rose 2,922 (24,634 to 27,556). In June, Biosimilars rose 3,978 (24,578 to 28,556) and Services fell 1,385 (8,745 to 7,360, a changed basis). Price and volume split: not in the record. (case book ch3 Segments, derived; hearing B01)
4. Operating cash fell 20,672 (40,612 to 19,940). Free cash on the convict's basis (operating cash less plant purchases) fell from 19,246 to 1,961. Inventories rose 11,546 (49,311 to 60,857), about 131 days of revenue against 118 (derived). The other 9,126 of the cash gap is not in the record. (case book ch3; hearing B09, B10, B11)
5. For the year, finance costs rose 929 (8,974 to 9,903) while gross borrowings fell 29,308 (177,555 to 148,247). The June quarter cost fell 22.9% (2,767 to 2,132). Cause and rate: not in the record. Quarterly costs of 2,767, 2,722, 2,099 and 2,315 show the fall came after the January 2026 share issues. That is timing only, and no source links the two. The maturity table puts 65,476 under one year, but the balance sheet shows 40,784 current, a gap of 24,692 that is not reconciled. (case book ch3, ch5; hearing B13, B14)

I DID NOT UNDERSTAND
1. The totals of the maturity table (148,246) and the balance sheet (148,247) agree, but their one-year buckets differ by 24,692 in FY26. In FY25 they agreed within 3 (53,498 against 53,501). I do not know what is due early yet counted as non-current. The 44.2% leans on the maturity table; on the balance sheet it is 27.5% (40,784 of 148,247, derived).
2. Services (the third segment) was 7,360 in June 2026 against 8,745 a year earlier, down 15.8% while total revenue rose 10.0%. It was also renamed and its basis changed. Nobody says how much is real and how much is basis.
3. In the June 2024 quarter, profit for the period was 8,618 while operating profit was 6,204 and finance costs 2,360. So profit was above operating profit even after interest. No one-off is named. The September 2024 quarter has the same gap (6,854 down to 271), and the convict gave no bridge.
4. The public holding rose 6.22 points (39.15 to 45.37) at the 19-JUN-2025 filing, about 136 million more implied shares (derived). No allotment that month is in the exchange timeline. The convict said the step falls in the January 2026 filings, which covers only part of the 15.99-point rise.
5. The convict says related party ceilings run "to the next AGM" and that the 48th AGM (2026-08-06) had no related party resolution (S036, no tier). The case book says approvals ran out at that AGM. Both cannot hold, so I do not know what is in force. The ceilings are given in crore (1,005 to 4,773), not million.
6. Two quotes with an unclear "it". "It has reduced the development cost by 50%" (S013, B21) does not say what "it" is (the FDA change?). "We'll start quantifying it" (S014, B26) does not say what is to be quantified.

STATE PROPOSED
B01 partial: no price, volume or launch split. The convict gave segment changes with dates on a different basis.
B02 partial: no quarterly cost lines. One dated full-year cause (S027 p241); the June cause is missing.
B03 partial: no points per driver, as the convict conceded. Material cost of 34% is full year only, a different basis with a number. The convict said "not in my record", but I do not read this as no data.
B04 partial: Dec 2025 exceptional -2,934 and minority -1,956 are given; no bridge for Sep 2024 and nothing for Jun 2024.
B05 partial: minority -43 is given as a number (derived: 1,368 less 1,411). The June-below-March pattern is shown for 2024, 2025 and 2026, and I checked it against ch3. The reason for either is not on record.
B06 partial: the old-basis June rows are conceded as unavailable. Restated March 2026 Generics (7,760) and the Sep 2025 row are given. The cause of the loss is missing.
B07 answered: the profit bridge is given with numbers, a filed year to 2026-03-31 and S027 p190. It sums to the printed 3,688. The one-off is 4,029 net.
B08 partial: 5 Jan 2026 issue raised no cash (shares as consideration for BBL, S027 p191). The QIP is 41,500 filed (the unit is not stated). Projects, the

24,798 and the QIP use are missing.
B09 partial: derived gaps and the receivables sold without recourse (4,740 against 7,074) are given. The working capital bridge and the FY25 cause are not on record.
B10 partial: inventory days of 131 against 118 are derived from dated case book inputs. The 762 and 462 provision and write-down figures and the 60 to 120 day credit period carry no date in the answer. Receivable amounts are not on record.
B11 answered: free cash flow on the convict's stated basis, 1,961 and 19,246 (908 and 16,935 after intangibles), for the filed years. Management's own definition is missing, so the convict's "partial" is stricter than the question.
B12 partial: net debt is given for 2026-03-31 only (124,082). The case book also holds the 2025 inputs (177,555 borrowings, cash 32,271), but the convict did not use them. The reclassified amount and the June 2026 gross are missing.
B13 partial: the numbers are given, but the cause and the rate are not on record. The "reduce debt first" quote (S013, held 2026-05-08) states a priority, not a cause of cost.
B14 partial: the 24,692 gap is derived and the undrawn lines are not on record. The plan to pay or refinance is missing.
B15 partial: filed words that the covenants were met all year and no difficulty is expected at the 2026-09-30 test. No thresholds, actual values, waiver answer or test result.
B16 partial: shares +57,119 (filed), pledged flag false in all 25 filings, no encumbrance FY2023 to FY2026. How the 57,119 were acquired and the FY2022 wording are missing.
B17 no data: allottees, prices, holders above 1% and FII/DII flows are not in the record. The numbers restated are the case book's own, and the Jun 2025 step is left out (see item 4 above).
B18 partial: dated quotes (7% on 2024-02-09; "de-growing market" for liraglutide only, 2026-02-13). No 2026 rate basis.
B19 partial: no input-price number. A different dated cause with a number: Generics EBITDA -32% for nine months (S012, 2026-02-13).
B20 partial: hedge words dated 2023-11-10 and 2026-05-08. No exposure or hedged share.
B21 partial: the tariff statement is a paraphrase, not a quote (S014, 2026-08-06). The FDA quote is dated 2026-05-08, and the revenue touched is missing.
B22 partial: erosion quotes dated 2026-05-08 and 2026-08-06. No price or volume numbers.
B23 partial: the parent's auditor words are cited (S027 p278, p201): no resignation in the year and the term ends at the 48th AGM. The 2026-08-06 subsidiary exit and the accrual balance are not in the record.
B24 partial: the Board's report quote is cited. Claims not acknowledged as debt are 2,715 and 9,284 (filed 2026-03-31), with no split by tax. The forums and replies are missing.
B25 partial: no related party resolution at the 48th AGM (S036, no tier). The ceilings are in crore and no per-ceiling table is given. Any replacement is not in the record.
B26 partial: one decline (2025-01-31) and one deferral (2026-08-06) are cited. Positions on buybacks and pay are none, and the segment margin refusal is cited. The deferral names no item or date.

ASK NEXT
1. Why do the maturity table and the balance sheet put 65,476 against 40,784 under one year at 2026-03-31, when they matched in FY25 (53,498 against 53,501)? Which borrowings make up the 24,692?
2. Why did Services fall to 7,360 in June 2026 from 8,745 a year earlier? How much of that is the rename and cross charge basis change, and how much is real? Why was Generics 10,475 in the March 2025 quarter?
3. Why did the promoter share fall from 60.64% to 54.45% at the 19-JUN-2025 filing? What shares were created then (about 136 million, derived), and who got them?

CONVICT

WA1 Convict partial

ANSWER: As of the annual report for the year ended 2026-03-31, the record shows the gap but not its cause. Two filed tables give two one-year figures for the same total. The maturity table puts 65,476 under one year and the balance sheet puts 40,784 current. Totals agree within 1 (148,246 against 148,247, filed). The balance sheet figure includes 5,121 of current maturities. The report does not say which borrowings are counted as due within a year in one table and as non-current in the other. I will not name them. Both FY25 columns were reclassified, which is why they matched then.

MOVE: not in my record; cite

EVIDENCE:
- "|Borrowings [refer note b]|65,476|13,003|69,767|-|148,246|" (S027, p404, notes to the financial statements (company filing))
- Maturity table is contractual, undiscounted, excluding interest; under one year was 65,476 at 2026-03-31 and 53,498 at 2025-03-31 (filed, S038, PDF page 404).
- Balance sheet current borrowings 40,784 at 2026-03-31 against 53,501 at 2025-03-31; non-current 107,463 against 124,054 as reclassified (filed, S026, PDF pages 346 and 381).
- Current borrowings include current maturities of non-current borrowings of 5,121 at 2026-03-31 and 18,954 at 2025-03-31 (filed, S026, PDF page 381). Nothing in my record gives a similar split for the 65,476.
- "This reclassification has been made retrospectively in accordance with Ind AS 8 – Accounting policies, changes in accounting estimates and errors, and the comparative financial statements as at March 31, 2025 has been reclassified accordingly. Refer Note 13." (S027, p364, notes to the financial statements (company filing))
- "The Notes bear interest at a rate of 6.67% per annum and will mature in October 2029." (S027, p376, notes to the financial statements (company filing)). Senior Secured Notes 73,597 at 2026-03-31 (filed); so this line is not a one-year item on its face (my reading).
- Gap 65,476 minus 40,784 is 24,692 (derived, S026 at 2026-03-31). Due within one year is 44.2% on the maturity table and 27.5% on the balance sheet (derived).
- The report gives no thresholds and no undrawn committed lines (S038, PDF pages 309 to 404). No page in my record reconciles the two buckets.

STATE I CLAIM: partial (the numbers, the 5,121 inside the 40,784 and the FY25 reclassification are on record; the make-up of the 24,692 is not)

WHAT WOULD SETTLE IT: The full note 14 and note 19 borrowing schedules in the FY2025-26 annual report, with the note (b) text under the maturity table on PDF page 404. Management's answer on the next call after the 2026-06-30 quarter, or the 2026-09-30 quarter filing (about mid November 2026, date unchecked), would also settle it. Unchecked: whether the maturity table counts amounts the balance sheet shows as non-current.

CONVICT

WA2 Convict `partial`

ANSWER: As of the quarter ended 2026-06-30, the rename and the utilities change do not explain the Services fall. Services revenue for the quarter ended 2025-06-30 is 8,745 million both in its first filing and in the 2026-06-30 filing, so the basis change did not move this line (derived from two filings). The utilities cross charge came out of Generics, not Services. The fall to 7,360 million is 1,385, or 15.8% (derived). Management's stated cause is reduced demand from one large biologics client; no quarter split is on record. Generics at 10,475 million in the quarter ended 2025-03-31: management called it the strongest Generics quarter of FY25 and a one-time lenalidomide upside. The lenalidomide amount is not on record.

MOVE: cite | concede

EVIDENCE:
- "FY'27, we have clearly indicated, is a transition year for Syngene as it navigates the impact of reduced demand from the large biologics client." (S014, Kiran Mazumdar Shaw, held 2026-08-06)
- "The CRDMO Business grew 3% to 37,387 million, driven by its Discovery Services segment offset largely by significant reduction in demand from a major biologic's client." (S027, p241, management discussion and analysis (management speech)); this is the full year to 2026-03-31, not the quarter.
- Services revenue 8,745 (quarter ended 2025-06-30) and 7,360 (quarter ended 2026-06-30), filed, S033, segment table in the filing for the quarter ended 30-JUN-2026. The same 8,745 is the third-segment figure in the first filing for 2025-06-30 (filed, numbers.md). Segment profit before tax moved from 1,013 to -57 (filed, S033); the record does not say how the cross-charge move affected that result.
- "Excluding cross charge of common utilities that was earlier included within Generics but is now appropriately included under" (S025, deck): Generics for the quarter ended 2025-06-30 reads 6,965 first filed and 6,303 restated (filed, S033; numbers.md), so the restatement hit Generics (derived 662).
- "Q4 has been the strongest quarter for the Generics business in FY'25" (S009, Kiran Mazumdar Shaw, held 2025-05-09)
- "which should be viewed as a onetime upside" (S010, Kiran Mazumdar Shaw, held 2025-08-08)
- Generics 10,475 for the quarter ended 2025-03-31, filed in its own filing and again in the 2026-03-31 filing (S033); the prior quarter was 6,864 (filed, quarter ended 2024-12-31), a rise of 3,611 (derived). The one-time lenalidomide split of that rise is not on record.
- The Services name arrived in the filings for 2026-06-30; the third segment was named CRDMO from 2025-06-30, and "Our Research Services business segment has been renamed as CRDMO" (S010, Kiran Mazumdar Shaw, held 2025-08-08). Naming is not a revenue change.

STATE I CLAIM: partial. The basis question is answered: the rename and the cross charge do not change Services revenue between the two filings, so none of the 1,385 is basis on revenue (derived). The "how much is real" split and the Generics bridge are not in my record.

WHAT WOULD SETTLE IT: the Q1 FY27 segment note and deck (quarter ended 2026-06-30) with a bridge of Services revenue by client and product, and the Q4 FY25 results release giving the lenalidomide revenue amount.

CONVICT

WA3 Convict `partial`

ANSWER: As of the annual report for the year ended 2026-03-31, the record explains it. On 2025-06-19 the Company allotted 136,363,635 equity shares to Qualified Institutional Buyers in a QIP, at Rs 330 a share, raising Rs 45,000 million. The promoter's count stayed at 728,024,176 (filed), so the percentage fell because the total share count rose, not because of any sale. The allottees are described only as Qualified Institutional Buyers; no names are on record. My earlier answer put the step in January 2026 and missed this one, so I correct it. Some 119,620 implied extra shares (derived) are not explained.

MOVE: cite | concede

EVIDENCE:
- "The Company on June 19, 2025 has raised an amount aggregating to ` 45,000 Million through Qualified Institutional Placement by allotment of 136,363,635 equity shares of ` 5 each to the Qualified Institutional Buyers at the issue price of ` 330 per Equity Share" (S027, p267, corporate governance report (company filing))
- Filed pattern for 19-JUN-2025 (filed 23-JUN-2025): promoter 54.45%, public 45.37%, promoter shares 728,024,176, pledged flag false (S032, shareholding filing for the quarter ended 19-JUN-2025). The prior filing for 31-MAR-2025 reads 60.64% promoter, 39.15% public.
- Implied total shares rose from 1,200,567,573 (31-MAR-2025) to 1,337,050,828 (19-JUN-2025), +136,483,255 (derived from S032).
- The QIP is 136,363,635 shares (filed, S027, p267), so 119,620 of the rise is not explained (derived). The record does not say why. I did not read it as employee option exercises.
- Promoter shares are unchanged between the two filings (filed), so promoters took no part in the issue (derived).
- A shareholder resolution of 2025-06-04 covered "Raising of funds in one or more tranches, by issuance of Equity Shares and/or other Securities." (S034, voting results for the meeting dated 2025-06-04, resolution 2; 0.50% of votes against, public holders only).
- The QIP allottees are not named in the record, and no price band or investor breakdown is held (not in my record).

STATE I CLAIM: partial. The cause, the shares and the class of holder are answered. Individual allottees and the 119,620 residual are not.

WHAT WOULD SETTLE IT: the QIP Placement Document and the allotment announcement of 2025-06-19, plus the shareholding pattern of 2025-06-30 with its holder-level detail. Together they would name the allottees and the other share movements in April to June 2025.

LAWYER

Q1 Lawyer
TO: the convict (Biocon management, CEO and CFO)

QUESTION: The case book shows an operating margin of 19.5% filed for the quarter ended 2026-06-30, so what operating margin figure had you stated for that quarter before it was filed, and on what call date did you state it?

WHY I ASK: Q1.1 "Did last quarter's guidance hold?" Core question K1 in _hot.md, first test of the guidance-versus-delivery ledger.

IF DEFLECTED: If you say you gave no figure for that quarter, I will ask you to name the last operating margin figure you did state for any quarter and the call date you stated it on, so I can set it against the filed number for that quarter.

CONVICT

A1 Convict `not in my record`
ANSWER: As of the quarter ended 2026-06-30, my record holds no consolidated operating margin figure stated for that quarter before it was filed, so I cannot give you a date. The 19.5% is filed (derived from filed lines), and no call in the record guides a group operating margin. What the record holds is segment-level wording: Biosimilars "mid-20s" (S014, 2026-08-06), and no EBITDA range for FY27. Management also declined to guide at the Q3 FY26 call and said on 2026-08-06 it had "not guided anything beyond that". Filed operating margin rose from 19.0% a year earlier. The last group-level figure stated for any quarter is not recorded in the files I read.

MOVE: not in my record; mitigate

EVIDENCE:
- filed operating margin 19.5% for the quarter ended 2026-06-30, against 19.0% a year earlier; filed revenue from operations 43,360 million and operating profit 8,472 million (S025 / numbers.md, quarter ended 2026-06-30)
- "I'll refrain from giving any specifics on how the margins are expected to improve." (S012, Shreehas Tambe, held 2026-02-13)
- "I do not think we have guided anything beyond that, Neha, at this point" (S014, Shreehas Tambe, held 2026-08-06)
- "We have always directed this to say we will be in the mid-20s, and it will ramp up." (S014, Shreehas Tambe, held 2026-08-06), said of Biosimilars, not the group
- "we don't want to guide specifically at this stage." (S010, management answer, held 2025-08-08)
- positions.md states: no EBITDA margin range for FY27 is given in any note (inferred from S013, S014, S025)
- Biosimilars full-year FY26 "mid-20s" was scored kept in direction: the deck shows 26% (company deck, FY26; record.md, strength Inferred)
- Q1 FY27 Generics: "EBITDA margin at 7% improved more than 250 basis points over Q4FY'26" (S014, Kiran Mazumdar Shaw, held 2026-08-06); not on one basis with the earlier 8%

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: The Q4 FY26 call transcript text (held 2026-05-08, S013) read in full for any group margin remark, and calls before it, which I did not search line by line this call. Also whether the 19.0% to 19.5% operating margin is the same measure management uses (filed operating profit divided by filed revenue); I have not checked that basis. Nothing else in my corpus would supply a pre-quarter group margin figure.

LAWYER

Q2 Lawyer
TO: the convict (Biocon management, CEO and CFO)

QUESTION: Reading the Q4 FY26 call text held 2026-05-08, what revenue growth rate for the year FY2026-27 did you state against the 169,270 million rupees of revenue from operations filed for FY2026, and on which call date did you state it?

WHY I ASK: Q1.2 "Do your guides agree with each other?" The next core question after Q1.1. The revenue guide is the first number I need before I can test whether the revenue and margin guides add up.

IF DEFLECTED: If the Q4 FY26 call text states no revenue growth rate, I will ask you to name the one FY2026-27 figure that call text does state (revenue, margin or profit) and the date you stated it, so I can set it against the filed FY2026 figure.

CONVICT

A2 Convict `partial`
ANSWER: As of the Q4 FY26 call held 2026-05-08, my record holds no FY2026-27 revenue growth rate stated by management, so I cannot give you a rate or a date. Management said on that call it had "not guided specifically on any numbers". It pointed to launches, with the ramp in the second half. Filed FY2026 revenue from operations was 169,270 million, up about 10.9% on 152,617 million (derived). That is the base, not a guide. The call's stated focus was margin, not growth. I have not read the whole call text line by line, so a growth figure inside it cannot be fully ruled out.

MOVE: concede | cite

EVIDENCE:
- "we don't guide specifically Tushar, but like what Shreehas said, you should budget for incremental growth from new launches more towards second half." (S013, Kedar Upadhye, held 2026-05-08)
- "while we've not guided specifically on any numbers, I think the fact that we've got several products launching in the coming fiscal, which is '27, '28, the ramp-up starts moving from the coming financial year in '27, '28 towards the later part of the year." (S013, management answer, held 2026-

05-08), in reply to the analyst's "how should we think about FY '27, FY '28 given we have had some launches in the back end of '26." (S013, analyst question)
- "The focus for us going forward is very clearly going to be on margin improvement because we built state-of-the-art facilities." (S013, Shreehas Tambe, held 2026-05-08)
- "My guidance would be look at a broader time frame rather than trying to look at this as a quarter-on-quarter immediate launch and an impact on market share kind of a business." (S013, management answer, held 2026-05-08), in reply to "what is the likely share of U.S. business in FY '27 versus FY '26?" (S013, analyst question)
- "our focus is always profitable growth and not necessarily market shares." (S013, management answer, held 2026-05-08)
- qa-states marks the FY27 and FY28 question partial (one model's reading, not a finding).
- filed revenue from operations 169,270 million, year earlier 152,617 million (S026, year to 2026-03-31); growth of about 10.9% is derived by me from those two filed figures.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: A full read of the Q4 FY26 call text (S013, held 2026-05-08) for any group revenue growth figure outside the lines I searched. Also the Q1 FY27 call (S014, held 2026-08-06) and the FY27 filings once they exist, to set any later stated figure against the filed number. The next refresh is about mid November 2026 (date unchecked).

LAWYER

Q3 Lawyer
TO: the convict

QUESTION: You gave Generics EBITDA margin as 7% for Q1 FY27 on the 2026-08-06 call, so what Generics EBITDA margin figure in the result for the quarter ended 2026-09-30 will you hold yourselves to as proof that the 7% holds, the number and the filing date, please?

WHY I ASK: Q1.3 "What in the next filing will show this has normalised?" It follows the ladder step "the number and the date, please" after the "partial" state, with no group figure given in A1 or A2.

IF DEFLECTED: If you will not name a figure, I will ask for the Generics EBITDA margin for that quarter below which you would say the 7% did not hold, and the date you will report it.

CONVICT

A3 Convict not in my record
ANSWER: As of the Q1 FY27 call held 2026-08-06, my record holds no figure that management committed to for Generics EBITDA margin for the quarter ended 2026-09-30, and no filing date for it. I cannot give you a number. The only stated Generics margin target is "closer to 13%, 14% in 1 or 2 years", said 2025-01-31, with a window to about Feb 2027. It is scored still open. The company deck shows 12% in FY25, 5% in FY26 and 7% in Q1 FY27. The 7% and the earlier 8% are not on one basis, because a cross charge moved out of Generics. No FY27 EBITDA margin range is on record. That is a direction, not a quarterly test.

MOVE: concede | cite

EVIDENCE:
- "we will get closer to 13%, 14% in 1 or 2 years" (S008, Siddharth Mittal, held 2025-01-31); scored still open, window to about Feb 2027 (record.md).
- "directionally, what I have guided for is an EBITDA margin of 10% to 12%" (S008, Siddharth Mittal, held 2025-01-31)
- "EBITDA margin at 7% improved more than 250 basis points over Q4FY'26, driven by higher volumes and operating leverage." (S014, Kiran Mazumdar Shaw, held 2026-08-06)
- "EBITDA stood at ₹75 crores. EBITDA margins were at 8%, improved nearly 300 basis points over Q3 of this fiscal" (S013, Kiran Mazumdar Shaw, held 2026-05-08), the quarter ended 2026-03-31.
- "expect gradual rebuild as revenues continue ramping up" (S024, deck), the 2026-05-08 deck: a direction, no number.
- Company deck shows Generics EBITDA margin 12% in FY25, 5% in FY26, 7% in Q1 FY27 (management's own deck figures, record.md). Per the Q1 FY27 deck (S025), a cross charge once in Generics now sits elsewhere, so 8% and 7% are not on one basis (inferred from S013, S014, S025).
- "maybe we'll take it offline, some of those queries, specifically in a detailed manner" (S014, management answer, held 2026-08-06), to a question on the Generics growth trajectory; deferred (qa-states.md, one model's reading).
- Record has no call or filing past 2026-08-06 for the quarter ended 2026-09-30; that quarter is after the last refresh.

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: The Q2 FY27 call and deck for the quarter ended 2026-09-30 and its filed results, none of which are in the record (next refresh about mid November 2026, date unchecked). Also the Q1 FY27 deck (S025), to restate the 8% on the new basis. Management naming a Generics floor figure on a call would settle the "number" half, and none is on record.

JUDGE

Judge note
STORY SO FAR
1. No group margin or FY27 revenue number was stated; management declined specifics on calls dated 2025-08-08 to 2026-08-06. (hearing I3 A1, A2)
2. Numeric anchors are segment ones: Generics EBITDA margin 13% to 14% in 1 or 2 years (2025-01-31), Biosimilars "mid-20s". (hearing I3 A1, A3)
3. Q1 FY27 Generics margin 7% is on a new basis, so it cannot be set against the 8% for Q4 FY26. (hearing I3 A3)

WHY-CHAIN
1. Group margin has no guide to test against, because the convict cites declines dated 2025-08-08, 2026-02-13 and 2026-08-06 (S010, S012, S014,

verified by code) and no group figure. Filed margin was 19.5% (8,472 / 43,360) against 19.0% (7,489 / 39,419), up 0.5 points (case book ch3). The joined id "S025 / numbers.md" is invalid, so I use the case book.
2. Revenue has no FY27 growth guide, only direction, because the Q4 FY26 call (2026-05-08) says "not guided specifically on any numbers" and points to a second-half launch ramp (S013, EVIDENCE line verified by code). FY26 revenue grew 10.9% (169,270 / 152,617, derived). Q1 FY27 grew 10.0% (43,360 / 39,419, case book ch3). Neither is a guide.
3. Generics has the only clearly dated numeric target, and Q1 FY27 sits below it, because management said "closer to 13%, 14% in 1 or 2 years" on 2025-01-31 (S008, verified by code). Q1 FY27 shows 7% (S014, 2026-08-06, management's own figure, not filed). Gap is 6 to 7 points (13 or 14 minus 7), at month 18 of a 12 to 24 month window. The basis may differ.
4. The 7% cannot be checked against the 8%, because the case book says the Q1 FY27 deck (S025) moved a utilities cross charge out of Generics (ch3 Segments). S014 says 7% is "more than 250 basis points" above Q4 FY26, so restated Q4 is under 4.5% (7 minus 2.5, derived), while S013 gave 8% (verified by code). The restated series is not in the record.
5. "Kept in direction" and "still open" are the convict's own scoring, because they come from record.md and qa-states.md, which are not in the case book. A1 and A2 also say the call text was not read line by line. I can check quotes (verified by code) and filed numbers, not those scores. "No figure" holds for what was searched, not the whole call.

I DID NOT UNDERSTAND
1. How "10% to 12%" and "closer to 13%, 14% in 1 or 2 years", both said 2025-01-31 (S008), fit together: one target or two.
2. Why moving a cross charge would take restated Q4 FY26 Generics from 8% to under 4.5% (derived from S013, S014).
3. Which EBITDA the 13% to 14% is on: the case book says a company's EBITDA may not match filed operating profit, and A1 says the basis was not checked.
4. When Biosimilars "mid-20s" was first said: S014 (2026-08-06) says "always", and no earlier date is given.
5. What "that" refers to in "not guided anything beyond that" (S014): the sentence before it is not shown.
6. How the D12 scorecard marked items "kept" or "still open"; its contents are not in the case book.

STATE PROPOSED
Q1.1 partial: no group margin figure. The convict gave segment numbers with dates on a different basis (Biosimilars "mid-20s", said 2026-08-06, after quarter end; Generics 10% to 12% and 13% to 14%, 2025-01-31); move was mitigate. For S1 this points to 2 (no-guidance wording plus dated segment targets), not 1.
Q1.2 partial: words only (no numbers guided, launch ramp in second half, S013, 2026-05-08). The 10.9% is a derived base, not a guide. The convict also did not read the whole call.
Q1.3 partial: no figure or filing date for the quarter ended 2026-09-30, but a dated Generics target with numbers (13% to 14%, 2025-01-31, window to about 2027-02) on a different basis (a 1 to 2 year direction, not a quarterly test). The convict's "not in my record" is stricter than the rule gives.

ASK NEXT
1. Why would moving the cross charge cut Q4 FY26 Generics from 8% to under 4.5%, and what are Q4 FY26 and Q1 FY26 Generics margins on the new basis, so 13% to 14% can be tested on one basis?
2. Why was Generics at 5% for FY26 (deck, record.md) when you guided 10% to 12% on 2025-01-31, and are 10% to 12% and 13% to 14% one target or two?

CONVICT

WA1 Convict `partial`

ANSWER: As of the Q1 FY27 call held 2026-08-06, the record does not explain why 8% would fall to under 4.5%. The record gives no size or direction for the utilities cross charge. The judge's arithmetic is sound only if the 250 basis points sit on the restated Q4 FY26 base. They cannot sit on the 8%, because 8% plus 2.5 points is 10.5%, not 7%. So "under 4.5%" is derived from S014, and the restated Q4 and Q1 FY26 Generics EBITDA margins are not in my record. The filed segment result, a different measure, is on one basis for three quarters (see EVIDENCE).

MOVE: challenge | not in my record

EVIDENCE:
- "EBITDA margin at 7% improved more than 250 basis points over Q4FY'26, driven by higher volumes and operating leverage." (S014, Kiran Mazumdar Shaw, held 2026-08-06)
- "EBITDA stood at ₹75 crores. EBITDA margins were at 8%, improved nearly 300 basis points over Q3 of this fiscal" (S013, Kiran Mazumdar Shaw, held 2026-05-08), quarter ended 2026-03-31.
- The filing for the quarter ended 2026-06-30 "moved cross charges of common utilities from Generics to the unallocable line and restated its comparatives"; no amount and no sign are given (filed, S033, 2026-06-30 filing, Definitions section).
- Filed segment result (profit before tax of the segment, not EBITDA) on the 2026-06-30 filing's basis: Q1 FY26 (quarter ended 2025-06-30) -1,016 on revenue 6,303, derived -16.1%; Q4 FY26 -488 on 7,760, derived -6.3%; Q1 FY27 -309 on 7,597, derived -4.1% (filed, S033, 2026-06-30 filing).
- Derived from the same rows: the segment result margin improved about 220 basis points from Q4 FY26 to Q1 FY27, a different measure from the "more than 250" EBITDA figure.
- Derived: Rs 75 crore divided by filed Q4 FY26 segment revenue of 7,760 million is about 9.7%, not 8%, so the 8% does not reproduce from filed segment revenue; its revenue base is unchecked (S013, S033).
- "we will get closer to 13%, 14% in 1 or 2 years" (S008, Siddharth Mittal, held 2025-01-31); no Generics margin target after this date is on record.
- Management's own deck figures: Generics EBITDA margin 12% in FY25, 5% in FY26, 7% in Q1 FY27; the FY26 and Q1 FY27 figures are not shown to be on the new basis (record.md, S025).

STATE I CLAIM: partial. The 250 basis points are measured against Q4 FY26 on the restated base (derived), but the restated margins are not in my record.

WHAT WOULD SETTLE IT: The Q1 FY27 deck (S025), with the restated Generics EBITDA margin for Q4 FY26 and Q1 FY26 and the size of the cross

charge. Management saying whether the 13% to 14% is on the new basis would settle the rest. Neither is in my record; the next refresh is about mid November 2026 (date unchecked).

CONVICT

WA2 Convict `partial`

ANSWER: As of the Q1 FY27 deck (quarter ended 2026-06-30), the record shows 5% for FY26, so the 10% to 12% guide was not held. I cannot say it was one target. Both quotes are from the same speaker on the same call. Only the "13%, 14%" line is scored, and it is still open to about Feb 2027. The record does not give a window for "10% to 12%". For FY26 management gave reasons, not a restated target. Those are costs from the new facilities and about INR 60 crores a quarter from three new plants. Whether the two figures are one target or two is not on record.

MOVE: concede | not in my record

EVIDENCE:
- "directionally, what I have guided for is an EBITDA margin of 10% to 12%" (S008, Siddharth Mittal, held 2025-01-31)
- "we will get closer to 13%, 14% in 1 or 2 years" (S008, Siddharth Mittal, held 2025-01-31). This is the only one of the two that record.md scores: still open, due by about Feb 2027.
- Deck figures, management's own presented figures: Generics EBITDA margin 12% in FY25 (with one-time lenalidomide sales), 5% in FY26, 7% in Q1 FY27 (S025, deck). The Q1 FY27 deck moved a utilities cross charge out of Generics, so the bases differ (S025, deck).
- "For 9 months FY '26, generics revenue grew at 18% year-on-year, while EBITDA declined by 32%, attributable to higher costs related to the new facilities we have commissioned in the recent past." (S012, Kiran Mazumdar Shaw, held 2026-02-13)
- "The impact is roughly INR 60 crores a quarter." (S010, Siddharth Mittal, held 2025-08-08), said of the three new plants.
- "the margins are going to ramp up, by H2 is when you will see the impact of all these launches coming in" (S010, Siddharth Mittal, held 2025-08-08). Generics revenue for the half to 2026-03-31 was down 2.1% on first-filed numbers (record.md, filed).
- Generics segment result for FY26 (year to 2026-03-31): a loss of 1,348 million rupees, against a profit of 1,755 the year before (filed, S026). This is a segment result, not EBITDA.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The full Q3 FY25 transcript passage (S008, held 2025-01-31) around the "10% to 12%" line, to show which period it covered. A later call or deck that restates the Generics margin target. The Generics EBITDA margin on one basis in the Q2 FY27 deck, due about mid November 2026 (date unchecked).

JUDGE

Judge close

I3 judge note (updated after WA1 and WA2)

Code checks: quotes with ids in WA1 and WA2 were verified by code. The filed Generics segment figures in WA1 (-1,016, 6,303, -488, 7,760, -309) are the convict's S033 readings. Only the 7,597 matches the case book (ch3 Segments). All margins and gaps below are my own arithmetic.

STORY SO FAR
1. No group margin or FY27 revenue number was stated. Management declined specifics on calls dated 2025-08-08 to 2026-08-06. (hearing I3 A1, A2)
2. The one numeric guide I can test was missed. Generics EBITDA margin was guided at 10% to 12% on 2025-01-31 and the deck shows 5% for FY26. The convict conceded it and gave new plant costs as the reason. (hearing I3 WA2)
3. Generics 13% to 14% in 1 or 2 years is still open to about Feb 2027. The 7% for Q1 FY27 cannot be set against Q4 FY26 on one basis yet. (hearing I3 A3, WA1)

WHY-CHAIN
1. There is no group margin guide to test, because the convict cites declines dated 2025-08-08, 2026-02-13 and 2026-08-06 and no group figure (S010, S012, S014, verified by code). Filed margin was 19.5% (8,472 / 43,360) against 19.0% (7,489 / 39,419), up 0.5 points (case book ch3).
2. There is no FY27 revenue growth guide, only direction, because the Q4 FY26 call (2026-05-08) says "not guided specifically on any numbers" and points to a second-half launch ramp (S013, verified by code). FY26 revenue grew 10.9% (169,270 / 152,617, derived) and Q1 FY27 grew 10.0% (case book ch3). Neither is a guide.
3. The Generics 10% to 12% guide did not hold for FY26, because the deck shows 5% for FY26 (S025 deck, management's own figure, not filed). The convict conceded this (hearing I3 WA2).
  - The guide was "directionally, what I have guided for is an EBITDA margin of 10% to 12%" (S008, 2025-01-31, verified by code). The gap is 5 to 7 points.
  - Reasons on record: Generics EBITDA down 32% for nine months while revenue grew 18% (S012, 2026-02-13, verified by code). That 18% checks against ch3 Segments: 23,214 against 19,700, +17.8% (derived).
  - Also "roughly INR 60 crores a quarter" from three new plants (S010, 2025-08-08, verified by code). Four quarters is 2,400 million, which is 7.6% of FY26 Generics revenue of 31,681 (ch3, derived). That is close to the 7 point fall from 12% to 5%. FY25's 12% had one-time lenalidomide sales (WA2), so this is a size check, not a bridge.
  - The "by H2" ramp said on 2025-08-08 (S010) shows in margin: about 5% in Q3 and 8% in Q4 (derived from S013, "nearly 300 basis points"). It is still under 10%. H2 revenue was 16,980 against 17,339, down 2.1% (ch3, derived).
4. The 7% for Q1 FY27 cannot yet be tested against 13% to 14%, because the restated EBITDA series is not in the record.
  - The 250 basis points must sit on the restated Q4 base, since 8 plus 2.5 is 10.5, not 7. So restated Q4 is under 4.5% (derived from S013, S014, verified by code). I accept the convict's correction that my "under 4.5%" depends on that.
  - Size and sign of the moved charge: not in the record. The filing only says it "moved cross charges of common utilities from Generics to the unallocable line and restated its comparatives" (S033, verified by code).
  - Filed segment result on the new basis is a different measure (segment profit before tax, not EBITDA) but is on one basis. Derived margins: -16.1%

for Q1 FY26, -6.3% for Q4 FY26 and -4.1% for Q1 FY27, up about 2.2 points from Q4 to Q1.
  - The restated revenues are lower than the case book rows: Q4 FY26 7,760 against 8,467, and Q1 FY26 6,303 against 6,965 (derived gaps 707 and 662). So the case book rows before 2026-06-30 are not on the new basis, as ch3 says.
5. "Kept in direction" and "still open" are the convict's own scoring from record.md and qa-states.md, which are not in the case book. I can check quotes and filed numbers, not those scores. A1 and A2 also say the call text was not read line by line, so "no figure" holds only for what was searched.

I DID NOT UNDERSTAND
1. Whether the moved cross charge was a cost or an income for Generics. If it was a cost, moving it out should lift the margin, not cut it. The record gives no size or sign (WA1), so I cannot tell why restated Q4 would sit under 4.5%.
2. How S013's "EBITDA ₹75 crores, margin 8%" fits a revenue base. 750 / 7,760 is 9.7% and 750 / 8,467 is 8.9% (derived), and neither is 8%. The convict says the base is unchecked.
3. Which EBITDA the 13% to 14% is on, and whether it is on the new basis (WA1: not in the record).
4. Which period the 10% to 12% covered. The record gives no window (WA2). The two Generics numbers do not clash in value, but whether they are one target or two is not on record.
5. Still open from before: when Biosimilars "mid-20s" was first said (S014 says "always"), what "that" refers to in "not guided anything beyond that" (S014), and how D12 marked items "kept" or "still open".

STATE PROPOSED
- Q1.1 partial (unchanged). No group margin figure exists to give. The convict conceded a segment miss with a number and a date (Generics 5% against 10% to 12%, WA2), but that is a different basis from the group figure asked for. The first dated miss on the ledger is now conceded.
- Q1.2 partial (unchanged). Words only on revenue (launch ramp in H2, S013, 2026-05-08). The 10.9% is a derived base, not a guide. The call was not read in full.
- Q1.3 partial (unchanged). The convict named no figure or filing date for the quarter ended 2026-09-30. WA1 added dated filed segment-result numbers on one basis, and WA2 conceded the miss with reasons. These are a different measure and basis, not the Generics EBITDA figure asked for. So this is not "no data", and the convict's "not in my record" is still stricter than the rule gives.

WATCH
1. The Q1 FY27 deck (S025, held 2026-08-06) would settle the restated Generics EBITDA margins for Q4 FY26 and Q1 FY26, the size and sign of the cross charge, and the 8% against 75 crore. The convict does not hold it, so I need it read.
2. The Q2 FY27 call, deck and filed results for the quarter ended 2026-09-30 (next refresh about mid November 2026, date unchecked) would show the Generics margin on the new basis. I would set it against the segment result margin of -4.1%.
3. The full S008 passage around "10% to 12%" (2025-01-31) would settle which period it covered. A later call or deck restating the Generics target would settle whether 13% to 14% still stands.
4. The Q3 FY27 results (quarter ended 2026-12-31, about Feb 2027, date unchecked) would settle the 13% to 14% window, which ends about Feb 2027 on the convict's scoring.
5. A full read of the Q4 FY26 call (S013, 2026-05-08) would settle whether any group figure sits outside the lines searched.

SCORE THINKING (S1, guidance against delivery)
- Which rule applies: the no-guidance case. Management states a no-guidance stance (S013 "not guided specifically", S014 "not guided anything beyond that"). It also gives dated numeric segment anchors: Generics 10% to 12% and 13% to 14% (S008, 2025-01-31, verified by code) and Biosimilars "mid-20s" (S014, 2026-08-06). So the rule gives 2, not 1.
- What I would score: 2, and not higher. No group figure is guided. The one anchor I can test was missed and conceded, though the reasons given are dated. The 7% cannot be tested on one basis, and the "kept" and "still open" scores are the convict's own.
- Why not 1: dated numeric anchors exist, and the miss was conceded with a number and date.
- Ceiling caveat: all three question states are partial. If code cuts the score to 1 from the partial states, that cut comes from the ladder, not from me.

- I4 Earnings quality and measure changes 10 turns

LAWYER

Q1 Lawyer
TO: Biocon's CFO

QUESTION: Of the Rs 6,597 million profit to shareholders for the quarter ended 2024-06-30, how many Rs million came from one-off items, and on what date did you first state that figure publicly?

WHY I ASK: Q2.1, how much of this quarter is one-off, in rupees.

IF DEFLECTED: If you confirm a one-off exists but give no rupee figure, I will ask for the figure in Rs million, plus the single quarter ended date by which it reverses.

CONVICT

A1 Convict partial
ANSWER: As of the last refresh, my record holds no total one-off figure in Rs million for the quarter ended 2024-06-30, and no date on which management first stated one. It holds one dated management figure: the deck of 2024-08-09 says that quarter includes Eris income of 1,057 crore (derived 10,570 Rs million). The filing read also marks quarter-ended 2024-06-30 other income of 11,345 Rs million as a one-off. Neither is an after-tax cut of the 6,597 profit to shareholders.

MOVE: cite | concede

EVIDENCE:
- Filed: profit to shareholders 6,597 Rs million, quarter ended 2024-06-30, consolidated. It is read from the Sep 2024 filing's comparative column (numbers.md, Filed quarters).
- Filed: other income 11,345 Rs million, quarter ended 2024-06-30. The filing read flags it as a one-off. That is a record note, not management speech (numbers.md).
- "Q1 FY25 Includes income from the strategic collaboration / business transfer agreement with Eris Lifesciences of ₹1,057 Cr" (S017, deck, 2024-08-09).
- Derived: 1,057 crore is 10,570 Rs million for the quarter ended 2024-06-30. I have not reconciled it to the 11,345 other income.
- Not reconciled: four different rupee figures are attached to the Eris dealings (S004 to S007).
- Different period: consolidated exceptional items net were a loss of 4,029 Rs million in the year to 2026-03-31. They were a gain of 965 in the year to 2025-03-31 (S027, PDF page 190, filed table, one reader).
- Different period: exceptional items were -2,934 Rs million in the quarter ended 2025-12-31. They were -172 in the quarter ended 2025-06-30, as re-presented in the Jun 2026 filing (numbers.md notes).

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The results filing for the quarter ended 2024-06-30, which is the quarter's own text, not parsed in my record. It needs the note on exceptional items and other income, plus the tax and minority effect, to get the after-tax Rs million. The Q1 FY25 earnings release or deck would give the first-statement date. The S007 call held 2024-08-09 is in my corpus but I did not read it this call.

LAWYER

Q2 Lawyer
TO: the convict

QUESTION: Without the 4,029 Rs million net exceptional loss, what would the 3,856 Rs million profit attributable to owners have been, as one Rs million figure for the year to 2026-03-31?

WHY I ASK: Q2.1, how much of this period is one-off, in rupees. It moves from the quarter ended 2024-06-30 to the latest full year.

IF DEFLECTED: If you confirm the exceptional items but give no after-tax profit figure, I will ask for the tax and minority effect on the 4,029 Rs million, as one Rs million figure for the year to 2026-03-31.

CONVICT

A2 Convict partial
ANSWER: As of the last refresh, my record holds no after-tax, after-minority figure for the 4,029 Rs million net exceptional loss in the year to 2026-03-31, so I cannot give the single number asked. I hold the bridge to that year's profit. Segment total 8,508 less exceptional 4,029 gives profit before tax 4,479 (derived, year to 2026-03-31). Profit for the year is 3,688 and owners' profit is 3,856. The 4,029 is net before tax and minority. Arithmetic only, with zero tax and zero minority effect on it, owners' profit would be 7,885 (derived, year to 2026-03-31). That is not a finding, because my record does not show the effect is zero.

MOVE: cite | concede

EVIDENCE:
- Filed, year to 2026-03-31, consolidated: segment total 8,508 Rs million. It equals profit before tax and before exceptional items (S026, PDF page 413 for the segment table; PDF page 347 for the profit and loss statement). Exceptional items, net, are a loss of 4,029 on the same page (S027, PDF page 413, one reader).
- Filed, year to 2026-03-31: profit before tax 4,479 (S027, PDF page 408, one reader). Derived: 8,508 minus 4,029 is 4,479, so the bridge ties to the Rs million.
- Filed, year to 2026-03-31: profit for the year including non-controlling interest 3,688 Rs million (S027, PDF page 190, Board's report, company filing). Profit attributable to owners 3,856 (S026, PDF page 347).
- Derived, year to 2026-03-31: tax 4,479 minus 3,688 is 791, if no other line sits between them (not read). Minority share 3,688 minus 3,856 is minus 168, a share of loss. Both are whole-year figures, not split by exceptional item.
- "The effective tax rate before exceptional item is at 21% in FY26, compared to 23% in FY25." (S027, p242, management discussion and analysis (management speech)). It gives no tax figure on the exceptional items.
- The notes show components in different entities: a gain of 1,842 on the derivative remeasurement, a write-off of 1,216 on retired loans and a provision of 762 on inventories, all in the year to 2026-03-31 (S027, PDF page 394 and PDF page 395, company filing). I have not summed or reconciled them to 4,029.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The tax note of the consolidated accounts for the year to 2026-03-31, with the tax effect on each exceptional item. Also the attribution note giving the minority share of those items, and the consolidated profit and loss lines between profit before tax and profit for the year, which my record has not read. Those three give the after-tax, after-minority Rs million figure.

LAWYER

Q3 Lawyer
TO: the convict

QUESTION: How many Rs million of utilities cross charge did the Q1 FY27 deck move out of Generics, so that the quarter ended 2026-06-30 Generics figure of 7,597 is on the new basis?

WHY I ASK: Q1.6, which profit do you mean: the measure changed on the Jun 2026 filing, and the shift in basis is not yet put in rupees.

IF DEFLECTED: If you confirm the move but give no amount, I will ask for the quarter ended 2025-06-30 Generics figure of 6,965 restated on the new basis, as one Rs million figure.

CONVICT

A3 Convict partial

ANSWER: As of the quarter ended 2026-06-30, my record holds no rupee amount for the utilities cross charge moved out of Generics in that quarter. The Generics figure of 7,597 for the quarter ended 2026-06-30 is filed on the new basis. I hold no old-basis figure for that quarter, so I cannot subtract. I do hold one restated pair, as in my earlier answer WA2: Generics for the quarter ended 2025-06-30 is 6,965 first filed and 6,303 restated, so 662 Rs million moved (derived). That is the prior-year comparative, not the amount asked. I will not present 662 as the 2026-06-30 amount.

MOVE: not in my record | cite

EVIDENCE:
- Filed, quarter ended 2026-06-30, consolidated: Generics 7,597 Rs million, on the new basis (numbers.md, Segments, own filing). The table says this row is not on the same basis as earlier rows.
- Filed, quarter ended 2025-06-30: Generics 6,965 Rs million, first filed (numbers.md, Segments, own filing, first filed).
- Restated, quarter ended 2025-06-30: Generics 6,303 Rs million (S033 as filed, per my earlier answer WA2; not re-read this call). Derived: 6,965 minus 6,303 is 662 Rs million.
- "Excluding cross charge of common utilities that was earlier included within Generics but is now appropriately included under" (S025, deck). The line as I hold it is cut off, so it does not name where the charge now sits and gives no amount.
- "EBITDA margin at 7% improved more than 250 basis points over Q4FY'26, driven by higher volumes and operating leverage." (S014, Kiran Mazumdar Shaw, held 2026-08-06). It is in margin points, not Rs million, and does not name the cross charge.
- Not on record: Generics for the quarter ended 2026-06-30 on the old basis, and any bridge from old to new for that quarter.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The Q1 FY27 deck (S025) and the segment note in the filing for the quarter ended 2026-06-30, with the reconciliation of Generics from old basis to new, or Generics for that quarter on the old basis. Either gives the Rs million moved. Also confirm that 662 for the quarter ended 2025-06-30 ties to the restated column in that filing, which I have not re-read this call.

JUDGE

Judge note

STORY SO FAR:
1. June 2024 quarter: profit to owners 6,597, but Eris income of 10,570 was included. No after-tax one-off figure. (hearing I4 A1)
2. Year to 2026-03-31: owners earned 3,856 after a 4,029 net exceptional loss. Plain adding back gives 7,885, a ceiling only. (hearing I4 A2)
3. Generics cross charge moved out in June 2026 has no rupee amount on record. Only the prior-year pair gives 662. (hearing I4 A3)

WHY-CHAIN:
1. Claim: the June 2024 quarter holds a large one-off, but its size after tax is not on record. Because the deck says the quarter includes Eris income of 1,057 crore (S017, held 2024-08-09, management's own figure), which is 10,570 Rs million (1,057 x 10). Profit to shareholders was 6,597 (case book ch3). Evidence: hearing I4 A1.
2. Claim: without the Eris income, owners' profit for that quarter may have been below zero. Because 1 - 6,597/10,570 = 37.6%, so tax on it would need to exceed about 38% to keep the rest positive (my arithmetic; assumes all 10,570 sits in the 6,597). Tax and minority share on it: not in the record. Evidence: hearing I4 A1.
3. Claim: in FY26, exceptional items plus tax come to 4,820, and the split rests on the convict's 4,029. Because segment total 8,508 minus profit for the year 3,688 is 4,820 (case book ch3; the quarters 892+1,328-518+1,986 sum to 3,688). The 791 tax is only the remainder. I could not check 4,029. Evidence: hearing I4 A2.
4. Claim: 7,885 is a ceiling, not the answer. Because it adds back all 4,029. Management's 21% tax rate before exceptional items (S027 p242) on 8,508 gives 1,787, against total tax 791. So exceptionals may carry a credit near 996 (my estimate). Then 3,856 + (4,029 - 996) = 6,889, before any minority share. Evidence: hearing I4 A2.
5. Claim: the June 2026 amount is not on record; earlier quarters give only a size clue. Because Generics for June 2025 fell 662 on restating (6,965 - 6,303), and 707 for March 2026 (8,467 - 7,760, my I3 note). The 6,303 and 7,760 are not in the case book and I could not check them. Same-basis growth 7,597/6,303 is +20.5%, not +9.1% (7,597/6,965). Evidence: hearing I4 A3.

I DID NOT UNDERSTAND:
1. The other income of 11,345 flagged as one-off is 775 above the Eris 10,570 (11,345 - 10,570). Nobody has tied the two, or the four Eris figures in S004 to S007.
2. The 4,029 is cited to S027 PDF p190 in A1 and p413 in A2. I do not know if S026 and S027 are one report under two ids.
3. The convict's three items (gain 1,842, write-off 1,216, provision 762) net to -136 (1,842 - 1,216 - 762). That leaves 3,893 of the 4,029 unitemised, if all three are exceptional.
4. Why is the FY26 minority share -168 when profitable Syngene has outside owners? December 2025 alone shows -1,956 (-518 - 1,438, case book). How much of the 4,029 fell on minority holders is not in the record.
5. A cost moved out of Generics should lift Generics, yet the Generics figures I compare are revenue and fell on restating. Which line did the charge sit in, and where did it go? A3 says the deck line is cut off. The S033 line I verified in I3 says "unallocable".

6. What is the first public date for the Eris figure? S017 is only the earliest the convict holds. The results filing for the quarter ended 2024-06-30 is not read.

STATE PROPOSED:
Q1 partial: a different basis with a number and date (Eris income 10,570, quarter ended 2024-06-30, S017 held 2024-08-09, before tax, one part only). There is no after-tax rupee figure inside the 6,597 and no proven first date.
Q2 partial: the profit bridge is dated and ties to 3,688, but no after-tax, after-minority figure exists. The convict rightly refused to call 7,885 a finding.
Q3 partial: no June 2026 amount, but a prior-year pair with numbers and dates (662 for the quarter ended 2025-06-30), so not no data.

ASK NEXT:
1. Why did the June 2024 quarter carry Eris income of 10,570 against other income of 11,345, and what tax and minority share fell on it?
2. Why is the 4,029 FY26 loss only partly itemised, and how much of its after-tax amount belongs to minority holders and how much to owners?

CONVICT

WA1 Convict `partial`

ANSWER: As of the last refresh, my record holds management's own reason for the label, but no reconciliation and no tax figure. Management said the Eris proceeds were "classified as other income" (S007, Peter Bains, held 2024-08-09). That explains why the Eris income sits inside other income. It does not explain the gap between the two figures. Other income was 11,345 Rs million (filed, quarter ended 2024-06-30) and the Eris income was 10,570 (derived from 1,057 crore, quarter ended 2024-06-30). The gap is 775 (derived). My record does not say what that 775 is. It holds no tax or minority amount on the Eris income.

MOVE: cite | not in my record

EVIDENCE:
- Management's classification: "classified as other income" (S007, Peter Bains, held 2024-08-09). The deck carries the same 1,057 crore Eris figure, for Q1 FY25 (S017, deck, 2024-08-09).
- Filed, quarter ended 2024-06-30, consolidated: other income 11,345 Rs million. The filing note calls it a one-off. It is a record note, not speech (numbers.md). The quarter's own filing text was not parsed.
- Derived: 11,345 less 10,570 is 775 Rs million, quarter ended 2024-06-30. Nothing on record labels it.
- Filed, quarter ended 2024-06-30: profit for the period 8,618, profit to shareholders 6,597. The difference is 2,021 (derived), a whole-quarter minority share. It is not split by item and I do not attribute it to Eris.
- Tax for that quarter is not on record in any file I hold. I hold only the year-level tax comment on the next line.
- "Eris business one time gain" (S027, p242, management discussion and analysis (management speech)). It describes the year to 2025-03-31 as having a high tax rate. It gives no rupee tax on the gain.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The results filing for the quarter ended 2024-06-30, which my record has not parsed. It needs the other income note, the tax line and the profit attribution note, which give the tax on the Eris income and the share of it that belongs to minority holders.

CONVICT

WA2 Convict `not in my record`

ANSWER: As of the year to 2026-03-31, my files do not say why the 4,029 Rs million net exceptional loss is itemised only in parts. My record holds no minority/owner split of its after-tax amount, so I will not give one. The notes list items by event and by entity, with no table that adds up to 4,029. My earlier three items were a sample, not the full list. Other filed lines sit beside them, and I have not summed or reconciled any of them. The only tax figure on an exceptional item is standalone, not consolidated.

MOVE: cite | not in my record

EVIDENCE:
- Filed, year to 2026-03-31, consolidated: exceptional items, net, loss 4,029 Rs million (S027, PDF page 413, filed table, one reader).
- Year to 2026-03-31, the Group notes say it "recorded a gain of Rs 1,842 as an “exceptional item”" (S027, PDF page 394, notes to the financial statements).
- Filed lines in the same notes, year to 2026-03-31, not summed: a gain of 1,136, expenses of 2,102 and 1,372, Syngene termination benefits of 304 (S027, PDF page 394 and PDF page 395, notes to the financial statements).
- Filed lines, year to 2026-03-31, not summed: a settlement of 291, a write-off of 1,216 and a provision of 762 (S027, PDF page 395, notes to the financial statements). I do not know whether these overlap each other or the 4,029.
- Tax: standalone expenses of 1,341 carry a tax impact of 222, year to 2026-03-31 (S027, PDF page 337, notes to the financial statements). I hold no consolidated tax split.
- Minority: profit for the year including non-controlling interest 3,688 against owners' 3,856, year to 2026-03-31 (S027, PDF page 394 and PDF page 190). I hold no minority share of any exceptional item. The Biocon Biologics minority stake was bought out after the Board's approval of 2025-12-06 (S027, PDF page 213, Board's report), so the minority share changed during the year.

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: The consolidated exceptional-items note with every line and its tax effect, and the attribution note giving the non-controlling share of profit for the year to 2026-03-31, split by entity. The Biocon Biologics holding percentage for each month of that year would also be needed.

JUDGE

Judge close

STORY SO FAR:

1. June 2024 quarter: owners' profit of 6,597 included Eris income of 10,570, classified as other income. After-tax size: not in the record. (hearing I4 WA1)
2. Year to 2026-03-31: owners earned 3,856 after a 4,029 net exceptional loss. Adding it all back gives 7,885, a ceiling only. (hearing I4 A2)
3. The Generics cross charge moved in June 2026: amount not in the record. Only a prior-year pair gives 662. (hearing I4 A3)

WHY-CHAIN:

1. Claim: management's own label explains where the Eris money sits, not how big the one-off is after tax. Because Peter Bains said it was "classified as other income" (S007, held 2024-08-09). Other income was 11,345 and Eris 10,570; the 775 gap has no label (derived). Tax: not in the record. Evidence: hearing I4 WA1.
2. Claim: without Eris, the quarter's owners' profit was probably small or negative; not proven. Because the quarters either side earned 1,355 and -160 (case book ch3), and Eris before tax, 10,570, exceeds 6,597. Tax: not in the record. Minority share, 2,021 for the whole quarter (derived), is not split by item. Evidence: hearing I4 A1, WA1.
3. Claim: for the year to 2026-03-31, the listed items do not tie to 4,029. Because gains 1,842 and 1,136 less costs 2,102, 1,372, 304, 291, 1,216 and 762 net to -3,069, 960 short of 4,029 (my sum, signs assumed). The convict does not know if they overlap or sit inside it (S027 p394-395). Evidence: hearing I4 WA2.
4. Claim: 7,885 stays a ceiling for the year to 2026-03-31. Because the only filed tax on an exceptional item is standalone: 222 on 1,341 of expenses, 16.6% (derived; S027 p337). Consolidated tax and minority split: not in the record. My earlier 6,889 estimate has no filed support; I drop it. Evidence: hearing I4 A2, WA2.
5. Claim: the June 2026 cross charge amount is not on record; the convict refused to pass 662 off as it. Because 662 is the June 2025 pair (6,965 first filed, 6,303 restated, S033 as the convict holds it, not in the case book). The deck line is cut off (S025). Evidence: hearing I4 A3.

I DID NOT UNDERSTAND:

1. What is the 775 between other income (11,345) and Eris (10,570)? It could be ordinary other income, a second one-off or part of the Eris money. The four Eris figures in S004 to S007 are also still untied.
2. The year to 2025-03-31 is called a high tax year (S027 p242), yet its rate before exceptional items was 23%. What tax rate did the Eris gain bear?
3. Minority share was 2,021 in the June 2024 quarter and -168 in FY26. Which company earned the Eris income, and do its outside owners share it? The Biocon Biologics stake changed during FY26 (S027 p213).
4. Costs 2,102, 1,372, 304 and 291 add to 4,069, within 40 of 4,029. Is that a coincidence or the real list? Is the 291 settlement a cost?
5. The 4,029 is cited to p190 in A1 and p413 in A2. The case book calls the annual report S026, A2 cites S027. I think it is one report under two ids, but nothing confirms it.
6. Is 2024-08-09 the first public date? S007 and S017 are both held that day, but the results filing text is unread.

STATE PROPOSED:

Q1 partial (unchanged): Eris 10,570 before tax, one part only, held 2024-08-09 (S007, S017); WA1 adds the label's reason but no after-tax rupees, no total and no proven first date.
Q2 partial (unchanged): the dated bridge ties (8,508 less 4,029 is 4,479; 3,688; 3,856) and 7,885 is only a ceiling. WA2's "not in my record" is right for the after-tax split, but the bridge is a different basis with numbers, so not no data.
Q3 partial (unchanged): WA1 and WA2 did not touch it; the only number is the prior-year 662 for the quarter ended 2025-06-30, a different basis.

WATCH:

1. Q1: the consolidated results filing for the quarter ended 2024-06-30 (about 2024-08-09, date unchecked): the other income note, the tax line and the profit attribution note. They would give the tax and minority share of Eris and the 775. The convict holds the S007 call and S017 deck, so reading them for the 775 and the first-statement date is a cheap next step.
2. Q2: the FY26 annual report (filed 2026-07-15): the consolidated exceptional-items note with every line and its tax effect, plus the attribution note by entity. The Biocon Biologics holding by month would settle the minority share.
3. Q3: the Q1 FY27 deck (S025) reconciliation of Generics from the old basis to the new, or the filing for the quarter ended 2026-06-30 with Generics on the old basis. Also check that 662 ties to the restated column in S033. The Q2 FY27 results (about mid November 2026, date unchecked) would show the next quarter on the new basis.

- I5 Cash and working capital 10 turns

LAWYER

Q1 Lawyer

TO: the convict

QUESTION: Net cash from operating activities fell from 40,612 to 19,940 million rupees in the year ended 2026-03-31, while inventories rose from 49,311 to 60,857 million. How many million rupees of that fall came from the inventory build, for the year ended 2026-03-31?

WHY I ASK: Q3.1, why is cash from operations below the earlier level; I want the driver and a number, not a pointer to operating profit before working capital changes.

IF DEFLECTED: Then give the total working capital outflow line in the year-ended 2026-03-31 cash flow statement, in rupees million.

CONVICT

A1 Convict answered

ANSWER: As of the year ended 2026-03-31, the inventory line moved by 9,175 million rupees (derived). That is the cash flow line of -9,178 for the year to 2026-03-31 less -3 for the year to 2025-03-31. It is 44% of the 20,672 fall (derived: 40,612 for the year to 2025-03-31 less 19,940 for the year to 2026-03-31). The balance sheet rise is 11,546 (derived: 60,857 at 2026-03-31 less 49,311 at 2025-03-31). It is not the cash figure, and the pages I hold do not reconcile the two. The whole working capital swing is 20,552 (derived), and operating profit before working capital changes fell 2,290 (derived).

MOVE: cite

EVIDENCE:
- Increase in inventories: -9,178 for the year to 2026-03-31 and -3 for the year to 2025-03-31 (S039, PDF page 349, filed).
- Operating profit before changes in operating assets and liabilities: 33,688 for the year to 2026-03-31 and 35,978 for the year to 2025-03-31 (S039, PDF page 349, filed).
- Total working capital lines: -11,322 for the year to 2026-03-31 (derived: -9,178 + 6,244 - 6,471 - 1,917, each for the year to 2026-03-31).
- Total working capital lines: +9,230 for the year to 2025-03-31 (derived: -3 + 5,482 - 2,057 + 5,808, each for the year to 2025-03-31).
- Income taxes paid, net of refunds: -2,426 for the year to 2026-03-31 and -4,596 for the year to 2025-03-31, a 2,170 smaller outflow (derived; S039, PDF page 349, filed).
- Cash generated from operations: 22,366 for the year to 2026-03-31 and 45,208 for the year to 2025-03-31 (S039, PDF page 349, filed).

STATE I CLAIM: answered

WHAT WOULD SETTLE IT: The notes that reconcile the balance sheet inventory rise of 11,546 (derived, year to 2026-03-31) to the cash flow line of -9,178 (year to 2026-03-31). They would cover currency translation, acquisitions and non-cash items. They are not in the pages I hold.

LAWYER

Q2 Lawyer
TO: the convict

QUESTION: Net cash from operating activities was 19,940 million rupees and cash paid for property, plant and equipment was 17,979 million rupees in the year ended 2026-03-31; how many million rupees of operating cash were left after that capex, for that year?

WHY I ASK: Q12.2, cash-flow statement beside the next capex; I am leaving Q3.1 because the convict's record holds no cash-flow working capital line, and receivable days (Q3.2) are not in the record.

IF DEFLECTED: Then state net cash from operating activities as a multiple of the 3,856 million rupees profit attributable to owners, for the year ended 2026-03-31.

CONVICT

A2 Convict answered
ANSWER: As of the year ended 2026-03-31, 1,961 million rupees of operating cash were left after capex (derived: 19,940 net cash from operating activities, year ended 2026-03-31, less 17,979 cash paid for property, plant and equipment, year ended 2026-03-31, both filed). The year to 2025-03-31 shows 40,612 operating cash against 21,366 capex, so 19,246 left (derived). Working capital explains much of the drop. Inventories rose by 9,178 in the year ended 2026-03-31 (filed). The report does not say whether the 17,979 is the whole capex. It prints no free cash flow line. I make no claim beyond the arithmetic.

MOVE: cite

EVIDENCE:
- Net cash from operating activities 19,940 in the year ended 2026-03-31, and 40,612 in the year ended 2025-03-31, filed (S039, PDF page 349).
- Cash generated from operations 22,366 in the year ended 2026-03-31, and 45,208 in the year ended 2025-03-31, filed (S039, PDF page 349).
- Income taxes paid, net of refunds, 2,426 in the year ended 2026-03-31, filed (S039, PDF page 349).
- Increase in inventories 9,178 in the year ended 2026-03-31, filed (S039, PDF page 349).
- Purchase of property, plant and equipment 17,979 in the year ended 2026-03-31, and 21,366 in the year ended 2025-03-31, filed (S026, PDF page 349).
- Derived: 19,940 less 17,979, year ended 2026-03-31, is 1,961. Derived: 40,612 less 21,366, year ended 2025-03-31, is 19,246.
- Closing capital work in progress 46,127 at 2026-03-31, and 41,017 at 2025-03-31, filed (S039, PDF page 365).

STATE I CLAIM: answered

WHAT WOULD SETTLE IT: A check that the 17,979 (year ended 2026-03-31) is the only capex line, with intangibles and leases checked. The report's own cash flow statement, PDF page 349, would show that. Unchecked: the quarterly pattern within the year.

LAWYER

Q3 Lawyer
TO: the convict

QUESTION: Capital work in progress aged two to three years rose from 3,509 to 10,881 million rupees at 2026-03-31; how many million rupees of that 10,881 does management expect to put into use by 2027-03-31?

WHY I ASK: Q12.2, how the next capex is funded. The 1,961 left after capex sits beside the 10,881 of aged work in progress. Q3.4 and Q3.2 are skipped because the case book holds no receivable provision figure and no receivable days.

IF DEFLECTED: Then give the amount of capital work in progress moved into use during the year ended 2026-03-31, in million rupees.

CONVICT

A3 Convict partial

ANSWER: As of the annual report for the year ended 2026-03-31, the record holds no management figure for how much of the 10,881 million rupees (aged two to three years, at 2026-03-31) goes into use by 2027-03-31. The deflection question has a filed answer. Disposals or transfers out of capital work in progress were 17,012 million rupees in the year to 2026-03-31 (21,983 in the year to 2025-03-31), all ageing bands together (S039, PDF pages 365 to 367). That line says transfers, not "into use". No split of it by age band is printed.

MOVE: not in my record, cite

EVIDENCE:
- Capital work in progress aged 2 to 3 years: 10,881 at 2026-03-31, filed (3,509 at 2025-03-31), total 46,127 at 2026-03-31, filed (S039, PDF pages 365 to 367).
- Disposals or transfers: -17,012 for the year to 2026-03-31, filed (-21,983 for the year to 2025-03-31), additions 21,003 for the year to 2026-03-31, filed (S039, PDF pages 365 to 367).
- Overdue projects in Biosimilars and CRDMO: 19,894 at 2026-03-31, filed, of which 19,637 is due within 1 year; 6,478 at 2025-03-31. The page prints time buckets, not calendar dates, and names projects only by number (S039, PDF pages 365 to 367).
- Generics on-going projects of 12,386 at 2026-03-31, filed, carry no pre-determined completion dates (S039, PDF pages 365 to 367).
- "Margins were impacted by the commissioning of new facilities and associated start-up costs and are expected to improve as utilization ramps up." (S027, p31, message from the chairperson or chief executive (management speech)). This has no rupee amount and no date.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: A table or sentence from management giving rupees to be capitalised by 2027-03-31, split by ageing band. Failing that, a transfer-out line by age band, or calendar completion dates for the overdue projects. Neither is in the record as of 2026-03-31. Management's capitalisation plan after that date is unchecked.

JUDGE

Judge note

STORY SO FAR:
Cash from operations fell from 40,612 to 19,940 million in the year to 2026-03-31. The working capital lines swung by about 20,552 million (S039 p349).
Cash left after capex was only 1,961 million, against 19,246 million a year earlier (S039 p349, S026 p349).
Management gave no figure for what part of the old work in progress goes into use by 2027-03-31 (not in the record).

STATE PROPOSED:
Q1 answered. Q2 answered. Q3 partial.

ASK NEXT:
1. Why did trade payables, other liabilities and provisions swing from +5,808 to -1,917 (S039 p349), and was it timing or a change in payment terms?
2. Why did overdue projects in Biosimilars and CRDMO rise from 6,478 to 19,894 (S039 pp365 to 367), and what do Projects 5 and 12 (13,947 within 1 year) cover?

CONVICT

WA1 Convict partial

ANSWER: The swing is filed. The cause is not in my record. The cash flow line "Increase or decrease in trade payables, other liabilities and provisions" reads -1,917 for the year to 2026-03-31 and 5,808 for the year to 2025-03-31 (S039, PDF page 349, filed). The difference is 7,725 (derived from -1,917, year to 2026-03-31, and 5,808, year to 2025-03-31). I cannot say whether it was timing or a change in payment terms. I found no sentence in the pages I hold, and no matching entry in positions.md, that gives a reason or mentions payment terms.

MOVE: concede | mitigate

EVIDENCE:
- Trade payables, other liabilities and provisions: -1,917 (year to 2026-03-31) and 5,808 (year to 2025-03-31), filed (S039, PDF page 349).
- Increase in inventories: -9,178 (year to 2026-03-31) and -3 (year to 2025-03-31), filed (S039, PDF page 349).
- Increase in other assets: -6,471 (year to 2026-03-31) and -2,057 (year to 2025-03-31), filed (S039, PDF page 349).
- Cash generated from operations: 22,366 (year to 2026-03-31) and 45,208 (year to 2025-03-31), filed (S039, PDF page 349).
- Net cash from operating activities: 19,940 (year to 2026-03-31) and 40,612 (year to 2025-03-31), filed (S039, PDF page 349).
- The report prints no separate line for provisions, so the line cannot be split into payables and provisions (S039, PDF page 349).

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: A payables ageing or days-payable figure at 2025-03-31 and 2026-03-31, a note splitting the line into payables, other liabilities and provisions, or a management sentence on payment terms in the management discussion. None is in my record.

CONVICT

WA2 Convict partial

ANSWER: The rise is filed, and the project split is filed. The reason is not in my record. Overdue projects in Biosimilars and CRDMO total 19,894 at 2026-03-31 against 6,478 at 2025-03-31 (S039, PDF pages 365 to 367, filed). The rise is 13,416 (derived from 19,894, 2026-03-31, less 6,478, 2025-03-

31). Project 5 is 5,540 within 1 year and Project 12 is 13,947 within 1 year, both at 2026-03-31 (S039, PDF pages 365 to 367, filed). Together they are 19,487 (derived from 5,540 and 13,947, both at 2026-03-31). The page names projects only by number. What Projects 5 and 12 cover is not in my record.

MOVE: concede | cite

EVIDENCE:
- Overdue total, Biosimilars and CRDMO: 19,894 at 2026-03-31 and 6,478 at 2025-03-31, filed (S039, PDF pages 365 to 367).
- Project 5: 5,540 within 1 year, at 2026-03-31, filed (S039, PDF pages 365 to 367).
- Project 12: 13,947 within 1 year, at 2026-03-31, filed (S039, PDF pages 365 to 367).
- Project 9: 407 in total at 2026-03-31, of which 150 within 1 year at 2026-03-31, filed (S039, PDF pages 365 to 367).
- Capital work in progress closing: 46,127 at 2026-03-31 and 41,017 at 2025-03-31, filed (S039, PDF pages 365 to 367).
- Ageing of that work in progress, 2 to 3 years: 10,881 at 2026-03-31 and 3,509 at 2025-03-31, filed (S039, PDF pages 365 to 367).
- The report states no work in progress is temporarily suspended at 2026-03-31 or 2025-03-31 (S039, PDF pages 365 to 367).

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: A note or management sentence that names Projects 5 and 12, says which products or sites they are, and gives the reason for the overdue status and the calendar completion dates. None is in my record. Also not checked: whether the overdue schedule is the same measure in both years, since I hold only the two totals.

JUDGE

Judge close
STORY SO FAR:
Operating cash fell 20,672 million to 19,940 in the year to 2026-03-31. Filed lines explain it (S039 p349, derived by me).
Cash left after plant purchases was 1,961 million, against 19,246. Overdue projects rose to 19,894 from 6,478 at 2026-03-31 (S039 pp365-367).
Why stock, payables and other assets moved, what Projects 5 and 12 are, and when old work goes into use: not in the record.

WHY-CHAIN:
1. Cash fell 20,672 because working capital swung 20,552 (derived by me from S039 p349 lines, years to 2026-03-31 and 2025-03-31). Add 2,290 lower profit before working capital, less 2,170 lower tax paid: 20,552 + 2,290 - 2,170 = 20,672. The bridge closes from filed lines. (S039 p349)
2. Three lines carry the fall (derived by me, share of 20,672, S039 p349). Inventory is 9,175 (44%). Payables and provisions are 7,725 (37%). Other assets are 4,414 (21%). Receivables helped by 762. Shares pass 100% because lower tax paid and receivables offset. Why these moved: not in the record.
3. Free cash is thin. 19,940 less 17,979 is 1,961. 40,612 less 21,366 is 19,246 (S039 p349, years to 2026-03-31 and 2025-03-31, derived). Capex fell 15.9% while operating cash fell 50.9% (20,672 / 40,612, derived by me). So the drop came from operations, not lower spending. Whether 17,979 is all capex: unchecked.
4. Unfinished work moved two ways. Work in progress rose 41,017 to 46,127. Intangibles under development fell 44,067 to 23,740. Combined: 85,084 to 69,867, down 15,217 (derived by me, 2025-03-31 to 2026-03-31, S039 pp346, 365-367). Projects 5 and 12 are 19,487, 98% of the overdue 19,894 (derived). What they are: not in the record.
5. Into-use timing is unknown. Work aged 2 to 3 years rose 3,509 to 10,881. Transfers out were 17,012 in the year to 2026-03-31 (21,983 before), with no age split, and the line says transfers, not use (S039 pp365-367). Management says margins improve as utilization ramps up, with no rupees or date (S027 p31, unchecked by code). Amount into use by 2027-03-31: not in the record.

I DID NOT UNDERSTAND:
1. Balance sheet inventory rose 11,546, but the cash flow line is 9,178. The gap is 2,368 (derived by me). The convict says the pages do not reconcile it.
2. Payables, other liabilities and provisions swung 7,725 in one printed line. I cannot tell payables from provisions, or timing from new payment terms.
3. Other assets took 6,471 of cash. No note read says what they are.
4. Why Projects 5 and 12 are overdue. The page gives time buckets, not calendar dates.
5. Whether transfers out of work in progress means put into use. In FY25 transfers equal PPE additions (21,983 both). In FY26 they differ: 17,012 against 17,574, by 562 (derived by me, S039 p365, case book ch3).
6. Why intangibles under development lost 24,798 to transfers or disposals. No turn asked it, and no cause is in the record.

STATE PROPOSED:
Q1 answered: 9,175 inventory, 44% of 20,672, with filed lines and dates (S039 p349). The cause of the build is a separate gap.
Q2 answered: 1,961 and 19,246, both dated. Whether 17,979 is all capex is unchecked.
Q3 partial: no management figure or date for the 10,881. The filed 17,012 is a different basis with a number, so not no data.

WATCH:
1. FY26 annual report notes on inventories, trade payables, other assets and trade receivables ageing. They would settle items 1 to 3 and the 2,368 gap, and give receivable days (still not in the record).
2. The note under the overdue work in progress schedule, and the Q2 FY27 results and call (about mid November 2026, date unchecked). They would name Projects 5 and 12 and give completion dates.
3. The cash flow for the half year to 2026-09-30 (about mid November 2026, date unchecked). It would show whether operating cash recovered and whether transfers out of work in progress rose. The intangibles note would explain the 24,798.

- I6 Debt, maturities and covenants 10 turns

LAWYER

Q1 Lawyer
TO: the convict (Biocon management, answering for the CFO)

QUESTION: Your annual report says the group complied with every borrowing covenant throughout the year, so by how many turns of EBITDA did the consolidated net debt to EBITDA ratio sit inside the level your lenders require at the test as at 2026-03-31?

WHY I ASK: Q4.3 (which covenants are breached and by how much); the report gives no threshold and no actual ratio for any covenant (case book section 5), so "complied" cannot be checked without this figure.

IF DEFLECTED: If you will not give the headroom, give me the lender's required level for consolidated net debt to EBITDA and the date it was last tested.

CONVICT

A1 Convict `partial`
ANSWER: As of the annual report for the year ended 2026-03-31, the group states it complied with its covenants throughout the year. It names six ratios, net debt to EBITDA among them, tested annually and semi-annually. It prints no required level and no actual ratio for any of them. I cannot give the headroom in turns of EBITDA, the lender's required level, or the date of the last test. The report says only that no difficulty is indicated at the next test as at 2026-09-30. The result of that test is not in my record.

MOVE: cite; not in my record

EVIDENCE:
- Consolidated covenants, six ratios, tested annually and semi-annually, complied with throughout the year to 2026-03-31, no threshold printed (S038 and S039, filed note, PDF pages 377 and 378).
- Company-only covenants, three ratios, complied with throughout the year to 2026-03-31, no threshold printed (S038, filed note, PDF pages 309 and 310).
- Both notes say no indication of difficulty at the next test as at 2026-09-30 (S038, S039, filed notes).
- Group borrowings due within one year were 65,476 Rs million at 2026-03-31 (S039, filed, PDF page 404).
- Group borrowings in total were 148,246 Rs million at 2026-03-31 (S039, filed, PDF page 404). The due-within-one-year share is 44.2% at 2026-03-31 (S038, derived), against 30.1% at 2025-03-31.
- The report states no undrawn committed lines, so the record cannot show how much of the facilities was available at the year end 2026-03-31 (S038).

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The facility agreements or a lender compliance certificate. They would give the required level for net debt to EBITDA and the actual ratio at the test as at 2026-03-31. The covenant test result as at 2026-09-30 would also help, and it falls after this record's as-of date.

LAWYER

Q2 Lawyer
TO: the convict

QUESTION: Noted that the facility agreements or a lender compliance certificate would hold the covenant headroom, and moving on, given gross borrowings of 148,247 million rupees at 2026-03-31, what gross borrowings figure in Rs million does management commit to reach, and by what date?

WHY I ASK: Q4.1 (why debt is not coming down, and what the debt-reduction plan is); a straight answer is a figure and a date, and the record holds the 2026-03-31 starting point but no target.

IF DEFLECTED: If you will not commit to a target, give me the consolidated gross borrowings figure in Rs million at 2026-09-30.

CONVICT

A2 Convict `partial`
ANSWER: As of the annual report year ended 2026-03-31, I find no gross borrowings figure and no date that management commits to. The record holds a direction only. Gross borrowings were 148,247 Rs million at 2026-03-31, filed, down from 177,555 at 2025-03-31, filed (S026). The 2026-09-30 gross borrowings figure is not in my record. The filed quarters run only to 2026-06-30, and I did not read a borrowings figure for that date. The group covenant test as at 2026-09-30 is also not in my record.

MOVE: cite; not in my record

EVIDENCE:
- "every dollar that we generate out of free cash, the first claim is going to be to reduce debt" (S013, Kedar Upadhye, held 2026-05-08). It is a priority, with no figure or date.
- Gross borrowings were 148,247 Rs million at 2026-03-31, filed, against 177,555 at 2025-03-31, as reclassified (S026).
- Due within one year, contractual and undiscounted: 65,476 at 2026-03-31; 13,003 for 1 to 2 years at 2026-03-31; 69,767 for 2 to 5 years at 2026-03-31, filed (S039, PDF page 404).
- Senior Secured Notes mature October 2029, with a carrying value of 73,597 Rs million at 2026-03-31, filed (S039, PDF page 376).

- Covenants were complied with throughout the year to 2026-03-31. The notes expect no difficulty at the 2026-09-30 test and give no thresholds (S038, PDF pages 377 and 378).

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: A management statement of a gross borrowings figure and a date. Failing that, the consolidated balance sheet at 2026-09-30, from the filing for the quarter ended 2026-09-30 (not yet in the record; refresh expected about mid November 2026, date unchecked).

LAWYER

Q3 Lawyer
TO: the convict

QUESTION: Noted that no gross borrowings target or date is in your record, so with 65,476 million rupees due within one year against cash of 24,165 million at 2026-03-31, what consolidated net debt to EBITDA level in turns is management's own hard ceiling, separate from the lender covenant, and from what date does it bind?

WHY I ASK: Q4.2 (is the leverage target a ceiling, and what could break it); the case book shows the covenant ratios but no management ceiling, so I want the figure and the date it applies from.

IF DEFLECTED: If you will not call any level a ceiling, give me the consolidated net debt to EBITDA ratio in turns that management states for 2026-09-30.

CONVICT

A3 Convict `not in my record`
ANSWER: As of the record (calls to 2026-08-06, annual report to 2026-03-31), no management-set ceiling on consolidated net debt to EBITDA in turns, and no date it binds from, is on record. I will not name a number. The filed covenants are named but carry no threshold: six group ratios, tested annually and semi-annually, complied with through the year to 2026-03-31, no difficulty indicated for the 2026-09-30 test (S039, PDF pages 377 and 378). Management speaks of debt in dollars and direction only. The 2026-09-30 test result is not in the record.

MOVE: not in my record

EVIDENCE:
- "every dollar that we generate out of free cash, the first claim is going to be to reduce debt, and we are pretty serious about it." (S013, Kedar Upadhye, held 2026-05-08)
- "in March '25, including structured instruments, we had, in fact, more than $1.5 billion of net debt. That's down to $1.1 billion now." (S013, Kedar Upadhye, held 2026-05-08)
- "We remain committed to improving free cash flow generation, further reducing leverage and driving sustained improvement in return ratios." (S014, Kiran Mazumdar Shaw, held 2026-08-06)
- Filed, consolidated maturity table at 2026-03-31, Rs million: borrowings due under 1 year 65,476, 1 to 2 years 13,003, 2 to 5 years 69,767, total 148,246 (S039, PDF page 404).
- Filed: covenant thresholds are not printed on PDF pages 377 and 378 (S039, year to 2026-03-31); no headroom can be computed (S038, year to 2026-03-31).
- I cannot confirm your cash figure of 24,165 at 2026-03-31 from the pages I hold.

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: A management statement of a net debt to EBITDA level in turns with a date, in the Sep 2026 quarter call (about mid November 2026, date unchecked), or the facility agreements' covenant levels. Neither is in this record.

JUDGE

Judge note
STORY SO FAR:
Group borrowings fell from 177,555 to 148,247 Rs million, but 65,476 (44.2%) now falls due within one year (S039 p404).
The report says every covenant was met all year, but prints no limit and no actual ratio (S038, S039 p377-378).
Management says debt reduction comes first, with no target figure or date.

STATE PROPOSED:
Q1 no data. Q2 partial. Q3 no data.

ASK NEXT:
1. Why is the maturity table 24,692 above the balance-sheet current borrowings (65,476 less 40,784), and which loans are counted as due early under the "earliest date the Group can be required to pay" basis?
2. What does that earliest-date basis imply for the covenant risk, given that 44.2% of borrowings sit in the under-one-year bucket and cash is 24,165?

CONVICT

WA1 Convict `partial`
ANSWER: The report does not say why. The maturity table has 65,476 due in under 1 year at 2026-03-31 (filed, PDF page 404, S039). The balance sheet has current borrowings of 40,784 at 2026-03-31 (filed, PDF page 381, S039). The gap is 24,692 at 2026-03-31 (derived: 65,476 at 2026-03-31 minus 40,784 at 2026-03-31). The report also does not say which loans are counted as due early. That is not in my record.

MOVE: concede | mitigate

EVIDENCE:
- Table at 2026-03-31, filed, PDF page 404 (S039): under 1 year 65,476; 1 to 2 years 13,003; 2 to 5 years 69,767; over 5 years nil; total 148,246.
- Balance sheet at 2026-03-31, filed, PDF page 381 (S039): current borrowings 40,784, of which current maturities of non-current borrowings 5,121.
- A year earlier the table's under-1-year bucket was 53,498 at 2025-03-31 and current borrowings were 53,501 at 2025-03-31 (both filed, as reclassified; difference 3, derived).
- Note (b), filed, PDF page 404 (S039): non-convertible debentures tied to lender put options were nil at 2026-03-31 and 20,913 at 2025-03-31. They cannot explain the gap at 2026-03-31.
- Note (d), filed, PDF page 376 (S039): Senior Secured Notes mature October 2029 with carrying value 73,597 at 2026-03-31. The 2-to-5-year bucket is 69,767 at 2026-03-31. The report does not reconcile the two.
- S039 states the report has no sentence on why any borrowing moved between current and non-current.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: A loan-by-loan schedule showing each facility's classification and earliest-payment date at 2026-03-31. Or a reconciliation line in notes 14 and 19. I have not read those notes beyond the S039 pages.

CONVICT

`WA2 Convict` **partial**

ANSWER: The record does not show covenant risk from the earliest-date basis. The covenant ratios are tested separately, and the report gives no thresholds or actual values. The basis does show a liquidity question. Borrowings due within one year were 44.2% of the total at 2026-03-31 (derived from the PDF page 404 table, S038), against 30.1% at 2025-03-31 (derived, S038). I cannot confirm the cash figure of 24,165 at 2026-03-31. It is not in the files I read, so it is not in my record.

MOVE: concede | cite

EVIDENCE:
- Covenants, filed, PDF pages 309 and 310 (company) and 377 and 378 (group) (S038): three ratios for the company and six for the group, including net debt to EBITDA. They are tested annually and semi-annually. No thresholds are printed.
- Same pages (S038): the notes say the covenants were complied with throughout the reporting period to 2026-03-31. They also say there are no indications of difficulty at the next test, as at 2026-09-30.
- The 2026-09-30 test result is not in my record.
- The report states no undrawn committed lines (S038), so I cannot say how much headroom there is at 2026-03-31.
- Operating cash flow was 19,940 for the year to 2026-03-31, against 40,612 for the year to 2025-03-31 (filed, PDF page 349, S039).
- Under-1-year borrowings were 65,476 at 2026-03-31 (filed, PDF page 404, S039).

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The covenant thresholds and actual ratios at 2026-03-31. The result of the 2026-09-30 test. The committed undrawn facilities. A cash and bank balance line from the balance sheet, which I have not read.

JUDGE

`Judge close`

STORY SO FAR:
Gross borrowings fell from 177,555 to 148,247 Rs million, but 65,476 now falls due within one year (S039 p404; case book ch3, ch9).
The notes say every covenant was met all year. No limit or actual ratio is printed, so headroom is not in the record (S038, S039 p377-378).
Management says free cash repays debt first. It gives no target, ceiling or date (S013, held 2026-05-08). The 24,692 gap has no reason on record.

WHY-CHAIN:
1. Covenants: compliance is on the record only as words. Because the notes name six group ratios and three company ratios, say "complied throughout" to 2026-03-31, and print no threshold or value. Headroom: `not in the record`. (S038 p309-310, 377-378; S039; hearing A1, WA2). The 2026-09-30 test result: `not in the record`.
2. One-year debt: 44.2% is 65,476 / 148,246 at 2026-03-31, against 30.1% a year earlier (derived by me, S039 p404). On the balance sheet it is 27.5%: 40,784 / 148,247 (derived by me, S039 p381). The gap is 24,692 (65,476 minus 40,784, derived by me). Cause: `not in the record` (hearing WA1).
3. The same amount appears on the other side. Balance-sheet non-current is 107,463. The table's 1-to-2 and 2-to-5 buckets add to 82,770 (13,003 + 69,767). The difference is 24,693 (derived by me, 2026-03-31). So the table seems to move about 24,692 from later into under one year. Why: `not in the record`. This is my reading of the numbers, not a stated fact.
4. Cash: operating cash flow fell from 40,612 to 19,940 (S039 p349). Cash and cash equivalents on the balance sheet were 24,165 at 2026-03-31 (case book ch3, PDF p346). The convict said it could not confirm that cash figure, but the case book holds it. Cash covers 0.37 of the 65,476 due within a year (24,165 / 65,476, derived by me).
5. Rough leverage: net debt is 148,247 minus 24,165, which is 124,082 (derived by me, 2026-03-31). Four filed quarterly operating profits (2025-06-30 to 2026-03-31) sum to 34,381. That gives about 3.6 turns (derived by me). It is not the covenant ratio, because the facility agreements define those terms. Target or ceiling: `not in the record`.

I DID NOT UNDERSTAND:
1. Why the maturity table puts 24,692 more under one year than the balance sheet does, when the two matched within 3 a year earlier.
2. What "earliest date the Group can be required to pay" covers, and which loans it pulls forward.
3. How the Senior Secured Notes (carrying 73,597, due October 2029) sit against a 2-to-5-year bucket of only 69,767.
4. How the six covenant ratios are defined, for example adjusted EBITDA, cash flow cover and gearing.

5. What "structured instruments" mean inside management's $1.1 billion net debt, and how that ties to the rupee borrowings (S013).
6. Why finance costs rose (8,974 to 9,903, a rise of 929, derived) while gross borrowings fell by 29,308.

STATE PROPOSED:
Q1 (headroom in turns) no data: the notes give words on compliance only. The facility agreements would settle it. The why answers added nothing on headroom.
Q2 (borrowings target and date) partial: there is a priority quote and filed levels, but no figure and no date.
Q3 (management's own ceiling in turns) no data: no ceiling is on record. The convict declined to name a number.

WATCH:
- The 24,692 gap: note (b) under the p404 table and the note 13 reclassification text, or a loan-by-loan schedule at 2026-03-31. Both are in the FY2025-26 annual report but unread.
- Covenant headroom and the 2026-09-30 test: a lender compliance certificate, the facility agreements, or the Sep 2026 quarter filing and call (about mid November 2026, date unchecked).
- Gross borrowings at 2026-09-30 and any net debt to EBITDA level in turns: the same filing and call.
- Undrawn committed lines: notes 14 and 19, which are unread.

- I7 Related parties and group structure 11 turns

LAWYER

Q1 Lawyer
TO: Audit committee chair, Bobby Kanubhai Parikh, with the CFO, Kedar Narayan Upadhye

QUESTION: For the year ended 2026-03-31, what was the total amount in Rs million actually paid or received under the Mylan Inc. related party approval, as the audit committee's running balance against that approval's ceiling stood at that date?

WHY I ASK: Q5.3, What was the approval ceiling, and what actually moved?

IF DEFLECTED: If the answer is that the transaction was in the ordinary course of business, I will ask again for the Rs million running balance as at 2026-03-31, because the rules as applied in the 2026-05-12 SEBI order made no exception for the ordinary course.

CONVICT

A1 Convict not in my record
ANSWER: I cannot give the Rs million running balance against the Mylan Inc. approval ceiling as at 2026-03-31. The annual report pages I hold print no ceiling and no balance (S039, PDF pages 200 and 267). They do show the purchase itself: Rs 36,242 million cash consideration, filed for the year ended 2026-03-31 (S039, PDF pages 307 and 373). That is a purchase payment, not the audit committee's running balance against a ceiling. The record does not show how the two relate.

MOVE: not in my record; cite

EVIDENCE:
- Filed, year ended 2026-03-31: the Mylan Inc. share purchase agreement of 2025-12-06 is for consideration of Rs 73,560 million (USD 815 million) (S039, PDF page 394).
- Filed, year ended 2026-03-31: cash consideration of Rs 36,242 million, plus shares issued to Mylan Inc. for consideration other than cash (S039, PDF pages 307 and 373).
- Filed, year ended 2026-03-31: the related party transactions table has no Mylan Inc. row and no total row (S039, PDF page 396).
- Filed, year ended 2026-03-31: no sentence on audit committee or omnibus approval, and no ceiling or running balance (S039, PDF pages 200 and 267).
- Filed, resolution 6 of the meeting dated 2025-12-31: material related party transactions with Mylan Inc. drew 0.81% of votes against (S034, voting results for the meeting dated 2025-12-31, resolution 6). The approval ceiling is not in the votes file.

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: The audit committee's approval record for Mylan Inc. and its running balance as at 2026-03-31. Alternatively, the 2025-12 EGM notice's ceiling figure set against a related party note that names Mylan Inc.

LAWYER

Q2 Lawyer
TO: the convict

QUESTION: The notes record 292,726,366 BBL shares bought from Mylan Inc. and the Board's report records 14,36,69,382; which total share count did the annual report's related party list tie to as at 2026-03-31?

WHY I ASK: Q5.2, does the annual report's related-party list match what the audit committee approved?

IF DEFLECTED: If the answer is that the two figures cover different steps of one deal, I will ask for the single share count that the 2025-12-31 notice approved. If the convict cannot give it, I will move on to Q5.7 and record this one as unanswered.

CONVICT

A2 Convict `partial`

ANSWER: As at 2026-03-31, the related party list ties to neither count. The list on PDF page 396 (S039, year ended 2026-03-31) names Mylan Inc. as an investor with significant influence until 2026-01-21. It has no Mylan row and no total row. The 292,726,366 count comes from the agreement dated 2025-12-06 on PDF page 394, not from the list. The figure 14,36,69,382 is not in the pages I hold. Nor is the share count the 2025-12-31 notice approved, so I cannot give it.

MOVE: concede; cite

EVIDENCE:
- PDF page 396 (S039, year ended 2026-03-31): the related party list names Mylan Inc. until 2026-01-21. The transactions table has no row naming Mylan Inc. and no total row.
- PDF page 394 (S039, agreement dated 2025-12-06): 292,726,366 Biocon Biologics shares, consideration Rs 73,560 million (USD 815 million), as filed.
- PDF pages 307 and 373 (S039, year ended 2026-03-31): 91,967,019 company shares allotted to Mylan Inc. at Rs 405.78 a share, plus cash of Rs 36,242 million, as filed.
- PDF page 267 (S039, allotment of 2026-01-05): 171,279,553 company shares were allotted to four holders for 261,917,480 Biocon Biologics shares, as filed. The pages do not reconcile the two share counts.
- PDFs 200 and 267 (S039, year ended 2026-03-31): no sentence on audit committee approval, no approval ceiling and no running balance.
- Mylan Inc. resolution (S034, voting results for the meeting dated 2025-12-31, resolution 6): 0.81% of votes against, as filed. The notice's share count is not in the files I read.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The Board's report page carrying 14,36,69,382 and the 2025-12-31 notice's stated share count for the Mylan Inc. purchase. A related party row or total on PDF page 396 tying to either would also settle it.

LAWYER

Q3 Lawyer

TO: the convict

QUESTION: Which Rs million ceiling, in the resolution that replaced the intra-group related party approvals that ran out at the 48th AGM on 2026-08-06, was approved, and on what date did the shareholders pass it?

WHY I ASK: Q5.3, what was the approval ceiling, aimed at the case book's open gap on what replaced the approvals after 2026-08-06.

IF DEFLECTED: If the answer is that it is not in the record or that the approvals were renewed in the ordinary course, I will ask for a yes or no on whether any intra-group related party approval was in force on 2026-08-07. I will then record the replacement ceiling as unanswered and move to Q5.7.

CONVICT

A3 Convict `not in my record`

ANSWER: Not in my record. As of 2026-10-31, I hold no replacing resolution. The 48th AGM of 2026-08-06 had nine resolutions and none was a related party item (S034, voting results for the meeting dated 06-AUG-2026, resolutions 1 to 9). The 2025 AGM approvals ran "until the 48th AGM" by the notices' own wording (S036), so I can give no ceiling and no passing date. The record does not show whether another route was used. I cannot say that no approval was in force on 2026-08-07. I can only say I have not read one.

MOVE: not in my record

EVIDENCE:
- Meeting of 2026-08-06: 9 resolutions, none a related party item, filed (S034, voting results for the meeting dated 06-AUG-2026, resolutions 1 to 9).
- Latest related party votes in my record: the meeting of 2025-12-31, resolution 6, Mylan Inc. only, 0.81% against, filed (S034, voting results for the meeting dated 31-DEC-2025, resolution 6).
- The 2025 AGM held 2025-08-08 approved ten pair ceilings, from Rs 1,122 crore to Rs 4,773 crore, valid until the 48th AGM (S036, hand-read, no tier).
- The notices do not say whether another route was used after 2026-08-06 (S036).
- The annual report year ended 2026-03-31 has no approval ceiling or running balance (S039, PDF pages 200 and 267).
- S039 lists the Mylan approval ceiling and running balance as not found.

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: A voting result or postal ballot notice dated after 2026-08-06. Failing that, the related party section of the 2026 AGM notice, or a statement of the route used after 2026-08-06. None of these is in my record.

JUDGE

Judge note

JUDGE

Judge note

STORY SO FAR:
Biocon bought Mylan Inc.'s Biocon Biologics shares for Rs 73,560 million, part cash and part new shares (S039 p394, p307, p373). The annual report prints no approval limit.
The report's related party table has no Mylan row and no total, so nothing links the deal to an approval (S039 p396, p200, p267).

Nothing in the record shows what replaced the approvals that ran out at the 2026-08-06 AGM (S034, S036; case book I7 gap).

WHY-CHAIN:
1. Claim: the approval ceiling and what moved cannot be matched. Because: the report gives the deal values but no ceiling or running balance. Evidence: S039 p200, p267, p394; case book ch.9 "Still not in the annual report".
2. Claim: the Rs 73,560m deal price is consistent with its parts. Because: 91,967,019 shares x Rs 405.78 = about Rs 37,318m, plus cash Rs 36,242m = about Rs 73,560m. I worked this out myself from the figures; the Rs 73,560m total is as filed, the share-part split is my derivation. Evidence: S039 p307, p373, p394.
3. Claim: the two share counts are not tied. Because: 292,726,366 is the agreement count (p394) and 171,279,553 allotted shares went to four holders for 261,917,480 Biocon Biologics shares (p267). The case book says they are not reconciled. Evidence: S039 p267, p394; A2.
4. Claim: no approval was shown after 2026-08-06. Because: the convict says the AGM had nine resolutions, none a related party item. Evidence: A3 citing S034. The case book has no replacement either (I7 gap, D06c).
5. Claim: a stated limit is hard to test. Because: the ten pair ceilings (Rs 1,122 to 4,773 crore) are hand-read, no tier. Evidence: A3 citing S036; case book D06c.

I DID NOT UNDERSTAND:
- "Significant influence" over a subsidiary until 2026-01-21: why Mylan stops being a related party then, and whether that affects the approval.
- "Consideration other than cash": paying by new shares, but I do not know how the approval ceiling would count that part.
- Why the Board's report share count (14,36,69,382, Indian digit grouping) is a different step from the notes' 292,726,366.
- "Omnibus approval": my plain reading is a standing approval for a class of deals. I could not check this in the pages.
- "Running balance": how much of a ceiling has been used so far.
- Whether a company can renew these approvals without an AGM vote.

STATE PROPOSED:
Q1 no data: the convict gave the deal values with dates and page ids, but not the ceiling or balance asked. The record has nothing on either; the audit committee approval record would settle it.
Q2 partial: the convict conceded the list ties to neither count and gave dated numbers with pages. 14,36,69,382 and the notice's count are not in the record; I could not check either.
Q3 no data: the convict says nothing replaced the approvals in the record and named what would settle it (a post-2026-08-06 vote, notice or statement of route). The case book has the same gap.

Figures I checked against the case book or ch.9: Rs 73,560m, USD 815m, 292,726,366, 91,967,019, Rs 405.78, Rs 36,242m, 171,279,553, 261,917,480, 2026-01-21, 2026-01-05, 2025-12-06. All match.
Figures I could not check (not in the case book text): 0.81% against (S034), the nine resolutions at the 2026-08-06 meeting, the ten pair ceilings and "until the 48th AGM" (S036), 14,36,69,382, and the PDF page 396 claim beyond what ch.9 says.

ASK NEXT:
1. Why does the annual report say transactions were approved "as per the policy" but print no approval, ceiling or balance for the biggest one, the Mylan purchase?
2. Why did the shareholders' 2025-12-31 vote cover Mylan Inc. only, when no related party item came up at the 2026-08-06 AGM and the group approvals had run out?

CONVICT

WA1 Convict `partial`

ANSWER: The reason for the wording is not in my record. The seat can only say what the pages show. On the FY2025-26 annual report pages I read (year to 2026-03-31), the Board's report says related party transactions were approved as per the policy. Those pages print no approval route, no ceiling and no running balance for the Mylan Inc. purchase. The shareholder approval for that purchase is a separate filing, the voting result of the meeting dated 2025-12-31. So the approval exists in the record, but not in the annual report pages I read.

MOVE: cite | concede

EVIDENCE:
- Board's report pages, (S039, PDF page 200 and PDF page 267): no materially significant related party transactions, ordinary course, arm's length, approvals obtained as per the policy. No sentence on omnibus approval, audit committee approval or shareholder approval, and no ceiling or balance.
- (S039, PDF page 396, year ended 2026-03-31): Mylan Inc. is listed as an investor with significant influence over a subsidiary until 2026-01-21. The transactions table has no row naming Mylan Inc. and no total row.
- (S039, PDF page 394): the Share Swap and Share Purchase Agreement dated 2025-12-06 covers 292,726,366 Biocon Biologics shares for Rs 73,560 million (USD 815 million), as filed.
- Shareholder vote, (S034, voting results for the meeting dated 2025-12-31, resolution 6): 0.81% against, 2,888,343 votes against out of 355,697,530 polled, as filed.
- Notice size, (S035, notice for the 2025-12 meeting): the Mylan Inc. purchase was USD 400 million (hand-read, no tier). That does not match USD 815 million on PDF page 394 (agreement dated 2025-12-06). No page I read reconciles the two.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The full related party note and the audit committee section of the FY2025-26 report, to see whether a ceiling or balance is printed anywhere. For the why, only the company's own explanation would settle it, and none is in my record.

CONVICT

WA2 Convict partial

ANSWER: The record shows one reason, which is my reading. The 2025 AGM approvals (held 2025-08-08) covered pairs of group companies and did not name Mylan Inc. They were still valid on 2025-12-31, by the notices' own tenure of until the 48th AGM. Mylan Inc. was an outside party that was related, so it needed its own approval, and that was resolution 6. That is inferred from S034 and S036, not stated by anyone. For the 2026-08-06 meeting, the record shows no related party resolution. It does not show why none was brought, or what the group relied on afterwards.

MOVE: cite | concede

EVIDENCE:
- Meeting dated 2025-12-31, (S034): 1 related party resolution of 6 resolutions, resolution 6, on Mylan Inc. Resolutions 1 to 5 were share capital, limits, preferential issue, fund raising and investor rights, not related party items.
- Pairs approved at the 2025 AGM held 2025-08-08, (S036): BBL, BBUK, BNCL, Biocon Sdn. Bhd., BBUS, BCIL, Global PLC and others. Mylan Inc. is not among them. Validity runs from 2025-08-08 until the 48th AGM.
- 48th AGM held 2026-08-06, (S034): 9 resolutions, none a related party resolution. By the notices' tenure the 2025 approvals therefore ended on 2026-08-06.
- (S036) does not show whether the company relied on another route after that, such as transactions below the materiality threshold or an approval in a document I have not read.
- Mylan Inc. was a related party until 2026-01-21, (S039, PDF page 396).

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The explanatory statement in the notice of 2025-12-31, the notice of the 2026-08-06 meeting, and any related party approval filed after 2026-08-06. None of these is in my record.

JUDGE

Judge close

STORY SO FAR:
Biocon paid Mylan Inc. Rs 36,242m cash plus 91,967,019 new shares for Biologics shares, Rs 73,560m in all (S039 p307, p373, p394). Unchecked by code.
Shareholders voted on Mylan Inc. on 2025-12-31, with 0.81% against (S034 res. 6). The annual report prints no ceiling or running balance (S039 p200, p267).
Nothing in the record shows what replaced the group approvals after 2026-08-06 (S034, S036). The notice size, USD 400m, does not match the USD 815m filed (S035, S039 p394).

WHY-CHAIN:
1. Claim: a shareholder approval for Mylan exists, but its ceiling is unknown. Because: the vote is filed, but the notice's ceiling and share count are not read. Evidence: S034 res. 6; WA1; Q1 `no data`. Unchecked by code.
2. Claim: the price fits its parts. Because: 91,967,019 x Rs 405.78 is Rs 37,318m, plus cash Rs 36,242m is Rs 73,560m (derived by me, filed 2026-03-31 figures). Evidence: S039 p307, p373, p394.
3. Claim: the deal size is unsettled. Because: the notice says USD 400m (hand-read, no tier), the agreement dated 2025-12-06 says USD 815m. Nothing reconciles them. Evidence: S035; S039 p394; WA1.
4. Claim: group approvals probably ended on 2026-08-06. Because: they ran until the 48th AGM, which had nine resolutions, none related party. Evidence: S036; S034. The replacement is `not in the record`.
5. Claim: why Mylan needed its own vote is the convict's inference. Because: the 2025 pair list leaves Mylan out. Evidence: WA2; S036. Not stated by anyone. Unchecked.

I DID NOT UNDERSTAND:
- Why the vote count is a different thing from the audit committee's running balance, and which one limits the deal.
- How "consideration other than cash" (shares) counts against a ceiling. Not in the record.
- Why the notice says USD 400m and the agreement says USD 815m.
- Whether the 2025-12-31 vote included Mylan's own shares. 2,888,343 against out of 355,697,530 polled is 0.81% (derived by me, S034). Unchecked.
- Why the 14,36,69,382 count differs from 292,726,366. Not in the record.
- Whether the lowest group ceiling is Rs 1,122 crore or 1,005 crore. I cannot say which is right.

STATE PROPOSED:
Q1 no data: the Mylan approval ceiling and running balance as at 2026-03-31 are not in the record; WA1 gave the vote but no ceiling.
Q2 partial: the convict conceded the list ties to neither count and gave dated figures with pages. 14,36,69,382 and the notice count are still unseen.
Q3 no data: no replacing resolution is in the record. WA2 gave a reading, but it is inferred and not a ceiling.

WATCH:
- The 2025-12-31 notice's explanatory statement: ceiling, share count, and the USD 400m against USD 815m gap. Already filed, not yet read.
- The audit committee's Mylan approval record and balance as at 2026-03-31, in the related party note or committee section of the FY2025-26 report. Unread.
- Any related party approval filed after 2026-08-06, such as a postal ballot or the 2026 AGM notice. None found as of 2026-10-31.

- **I8 Promoter holding, pledge, dilution and pay** 10 turns

LAWYER

Q1 Lawyer
TO: the convict

QUESTION: As a percentage of the 728,081,295 promoter shares reported at 30-SEP-2026, how much was pledged or otherwise encumbered on that date, and what is the date of the depository record you read it from?

WHY I ASK: Q6.1, how much of the promoter stake is pledged, and why. The case book's pledged flag reads false, but a flag is not a percentage with a dated source.

IF DEFLECTED: If you answer only that no pledge exists, I will ask you to state the figure as 0% or give the percentage, and to name the date of the FY2026 declaration that covers the year ended 2026-03-31.

CONVICT

A1 Convict partial
ANSWER: As I read the filed record, 0% of the 728,081,295 promoter shares was pledged or encumbered at 30-SEP-2026. The filing for that date carries the pledged flag "false", the non-disposal undertaking flag "false" and the other encumbrance flag "false". The count cell for pledged or encumbered shares is blank, though, so 0% is my reading of the flags, not a figure the filing prints. I have not read a depository record, so I cannot give its date. The promoter group's declaration for the year ended 2026-03-31 says no encumbrance during that year. It is dated 2026-04-01 and reached the exchange feed on 2026-06-15.

MOVE: concede, cite

EVIDENCE:
- Filed pledged flag false, non-disposal undertaking flag false, other encumbrance flag false, pledged or encumbered shares cell blank (S032, shareholding filing for the quarter ended 30-SEP-2026, filed 21-OCT-2026).
- Filed promoter shares 728,081,295, promoter 44.68%, implied total shares 1,629,546,318 (derived), 30-SEP-2026 (S032, shareholding filing for the quarter ended 30-SEP-2026).
- Derived 0% is 0 divided by 728,081,295, taken from the false flags. It is not a filed percentage.
- Filed pledged flag false in all 25 filings, 30-SEP-2021 to 30-SEP-2026. Pledged shares are printed as 0 in the filings up to 19-JUN-2025 and left blank after that (S032).
- Filed promoter-group declaration under Regulation 31(4): no encumbrance on shares directly or indirectly held at any time during the year ended 2026-03-31. Signed 2026-04-01, exchange feed date 2026-06-15, file name carries 2026-04-23 (S037, read by eye from a scanned letter, no tier).
- The declarations for the years ended 2023-03-31, 2024-03-31 and 2025-03-31 say the same (S037). The year ended 2022-03-31 has no readable wording.
- The declaration wording is wider than a pledge. It is the promoters' own statement and has not been tested against a depository record (S037).
- A declaration dated 2026-04-01 says nothing about events after that date (S037).

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The depository (NSDL or CDSL) beneficiary position or pledge record for the promoter group as at 30-SEP-2026, which is not in my record. The full 30-SEP-2026 shareholding filing with its encumbrance table, to show whether the blank count cell means nil. A promoter declaration covering the year ending 2027-03-31, which would come after my as-of dates.

LAWYER

Q2 Lawyer
TO: the convict

QUESTION: Leaving aside the depository date you have not read, and taking your 0% as a reading of the flags and not a filed figure, what is the largest number of the 728,081,295 promoter shares that any lender could invoke under any agreement in force, and as at what date is that number stated?

WHY I ASK: Q6.2, what happens if the lender invokes the pledge. The straight answer is a quantity (and a trigger price and cover, if any exist). The case book shows the pledged flag false in all 25 filings and a blank count cell after 19-JUN-2025, so a stated quantity with a date is what is missing.

IF DEFLECTED: If you answer only that nothing is pledged, I will ask you to state the quantity as 0 shares and name the filing or declaration, with its date, that you rely on for it.

CONVICT

A2 Convict partial
ANSWER: On the filed flags, the figure is 0 shares of the 728,081,295 promoter shares as at 30-SEP-2026. That filing carries the pledged flag, the non-disposal undertaking flag and the other encumbrance flag all as "false". This is a reading of flags, not a printed quantity: the pledged or encumbered count cell is blank. The record does not hold any lender agreement, security document or promoter undertaking. So I cannot state what any lender could invoke under an agreement, and I name no trigger price or cover. I will not turn "nothing filed" into "nothing exists".

MOVE: concede, not in my record

EVIDENCE:
- Filed pledged flag false, non-disposal undertaking flag false, other encumbrance flag false, pledged or encumbered shares cell blank (S032, shareholding filing for the quarter ended 30-SEP-2026, filed 21-OCT-2026).
- Filed promoter shares 728,081,295, promoter 44.68% (S032, shareholding filing for the quarter ended 30-SEP-2026).

- Derived 0 shares is 0 out of 728,081,295, taken from the three false flags. It is not a filed quantity.
- Filed pledged or encumbered shares printed as 0 up to 19-JUN-2025 and blank from 30-JUN-2025 to 30-SEP-2026; the pledged flag is false in all 25 filings from 30-SEP-2021 to 30-SEP-2026 (S032).
- Filed promoter-group declaration under Regulation 31(4): no encumbrance on shares directly or indirectly held at any time during the year ended 2026-03-31, signed 2026-04-01, exchange feed date 2026-06-15 (S037, read by eye from a scanned letter, no tier).
- The same wording appears in the declarations for the years ended 2023-03-31, 2024-03-31 and 2025-03-31. The year ended 2022-03-31 has no readable wording (S037).
- The declaration covers the year to 2026-03-31 only. It says nothing about 2026-04-01 to 30-SEP-2026. For that period only the quarterly flags speak (S032, S037).

STATE I CLAIM: partial. A quantity of 0 with its source and date is given. It rests on the company's own flags and the promoters' own declaration, and it is not tested against a lender document or a depository record.

WHAT WOULD SETTLE IT: The lenders' security and facility documents, and any promoter undertaking or guarantee given to a lender, with their dates. The depository (NSDL or CDSL) pledge and beneficiary record for the promoter group at 30-SEP-2026. The encumbrance table of the full 30-SEP-2026 shareholding filing, to show whether the blank count cell means nil. None of these is in my record.

LAWYER

Q3 Lawyer

TO: the convict

QUESTION: Promoter shares rose by 57,119, from 728,024,176 at 31-MAR-2026 to 728,081,295 at 29-JUN-2026, so what is the trade date of that purchase, taken from the insider-trading disclosure it was filed under?

WHY I ASK: Q6.3, who traded in the quarters, under what plan, and did anyone buy. The case book shows promoter shares moving only by this net +57,119 over five years, and it does not say how or when they were bought or sold.

IF DEFLECTED: If you say the date or the plan is not in your record, I will ask you to state in one line whether any trading plan was filed with the exchange for that purchase, giving the date of that filing or the word "none".

CONVICT

A3 Convict `not in my record`

ANSWER: The trade date is not in my record. I hold no insider-trading disclosure and no trading-plan filing, so I cannot give a date, a plan or the word "none". The shareholding filings show the promoter count at 728,024,176 for the pattern dated 31-MAR-2026. They show 728,081,295 in the event-driven pattern dated 29-JUN-2026. That puts the change between those two dates, which is the only bound I have. The filings do not say the +57,119 was a purchase. I do not accept the word "purchase" as established.

MOVE: not in my record, challenge

EVIDENCE:
- Filed promoter shares 728,024,176, promoter 44.91%, shareholding filing for the quarter ended 31-MAR-2026, filed 21-APR-2026 (S032).
- Filed promoter shares 728,081,295, promoter 44.68%, shareholding filing for 29-JUN-2026, filed 01-JUL-2026. The filing is dated mid-quarter, so it is an event-driven pattern, not a quarter end (S032).
- Derived +57,119 shares between the two filings. The filings give no reason, no mode of acquisition and no trade date (S032).
- Derived implied total shares 1,621,073,650 at 31-MAR-2026 and 1,629,546,318 at 29-JUN-2026, up 8,472,668. The promoter percentage fell while its count rose, because the total rose more (S032). The filings do not say why the total rose.
- Filed promoter count 728,081,295 in the filings for 30-JUN-2026 and 30-SEP-2026. No further change in the count after 29-JUN-2026 (S032).
- The promoter group's Regulation 31(4) declaration covers encumbrance only, for the year ended 2026-03-31. It does not cover purchases or plans, and it was read by eye with no tier (S037).

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: The SEBI insider-trading (PIT) disclosure filed with the exchange for the promoter or promoter-group trade between 31-MAR-2026 and 29-JUN-2026. It would give the trade date, the mode, and whether a trading plan was filed. The other source is the explanatory notes to the full 29-JUN-2026 shareholding filing. Neither is in my record.

JUDGE

Judge note

JUDGE NOTE ON I8 (Promoter holding, pledge, dilution and pay). I read the case book, work/I8.md, notebook.md and work/baseline-extra.md. No brain.

Code checks: every quote with an id in the convict's I8 turns was matched to the convict's brain by code (verified by code). The 57,119 in A3 has no date within 80 characters. The dates sit in the same answer's evidence lines (31-MAR-2026, 29-JUN-2026), and I check them against case book ch4 myself: 728,081,295 minus 728,024,176 is 57,119. A3's facts come from S032, which is filed, but the "+57,119" itself is the lawyer's and convict's derived figure, not a filed cell.

STORY SO FAR
1. Promoter shares moved only +57,119 in five years, but the promoter percentage fell 60.64 to 44.68 because total shares rose 35.7% (case book ch4, derived).
2. Pledged flag is false in all 25 filings, but the count cell is blank since 30-JUN-2025, so 0% is a reading (hearing I8 A1).

3. No lender agreement, depository record or insider-trading disclosure is in the record, and pay is not covered in these turns: not in the record.

WHY-CHAIN
1. Promoter percentage fell 60.64 to 44.68 because the total share count rose, not because the promoter sold. Total: 1,200,567,573 (30-SEP-2021) to 1,629,546,318 (30-SEP-2026), +35.7% (derived). Promoter count 728,024,176 to 728,081,295. (case book ch4 shareholding table; S032)

2. The big step at the 19-JUN-2025 filing (60.64 to 54.45, public 39.15 to 45.37) came from a share issue to institutions. S027 p267 (verified by code): 136,363,635 shares at Rs 330, raising Rs 45,000 million (136,363,635 x 330 = about 44,999.99 million, derived). Promoter count unchanged at 728,024,176. Implied total rose 1,200,567,573 to 1,337,050,828, +136,483,255, so 119,620 shares are unexplained (derived). Allottees: not in the record. (hearing WA3; S032)

3. Two more steps came in January 2026. Promoter % went 54.45 to 48.27 (05-JAN-2026) to 44.91 (14-JAN-2026). Implied total went 1,337,050,828 to 1,508,233,221 to 1,621,073,650, +284,022,822 (derived). The 05-JAN issue raised no cash, as the shares were the price paid for BBL (hearing B08, S027 p191). Cause of the 14-JAN step: not in the record. (case book ch4)

4. Nothing is pledged on the flags, but the evidence is thin. Pledged flag false in 25 filings (30-SEP-2021 to 30-SEP-2026). The pledged-share count is printed 0 up to 19-JUN-2025 and blank from 30-JUN-2025. Non-disposal and other-encumbrance flags are false from 30-JUN-2025. The promoters' own declaration covers the year to 2026-03-31 only, read by eye with no tier. It says nothing for 2026-04-01 to 30-SEP-2026. (hearing I8 A1, A2; S032; S037)

5. The +57,119 rise is bounded but not explained. Promoter count was 728,024,176 on 31-MAR-2026 and 728,081,295 on 29-JUN-2026. The percentage still fell 44.91 to 44.68 because total shares rose 8,472,668 (1,621,073,650 to 1,629,546,318, derived). Cause, mode, trade date and any plan: not in the record. I accept the convict's challenge that "purchase" is not established. (hearing I8 A3; S032)

I DID NOT UNDERSTAND
1. Why is the pledged-share count blank after 19-JUN-2025? Is blank nil, not applicable, or not filled? The filing shape changed at 30-JUN-2025, when two new flags appeared.
2. What triggers an "event-driven" shareholding filing dated mid-quarter (19-JUN-2025, 05-JAN-2026, 14-JAN-2026, 29-JUN-2026)?
3. What does a "non-disposal undertaking" mean in plain words, and who is it given to?
4. The convict calls the Regulation 31(4) wording "wider than a pledge". I do not know in what way.
5. What explains the 119,620 extra shares in June 2025? The convict said he did not read it as employee options, so I do not know what it is.
6. The I8 title includes pay. Nothing in Q6.1 to Q6.3 or the I8 answers covers pay. I do not know if it was asked elsewhere.

STATE PROPOSED
Q6.1 partial: 0% is derived from false flags at 30-SEP-2026 (S032, filed 21-OCT-2026), and the count cell is blank. The basis is the company's flags plus the promoters' own declaration to 2026-03-31. No depository record or date was given.
Q6.2 partial: a quantity of 0 shares is given for 30-SEP-2026, but on the same flag basis. The lender agreements, any trigger price and any cover are not in the record. The convict rightly refused to turn "nothing filed" into "nothing exists".
Q6.3 partial: the basis is shareholding filings that bound the change between 31-MAR-2026 and 29-JUN-2026. The trade date, mode and any trading plan are not in the record (no insider-trading disclosure held). It is only a window, not the date asked for, and the core of the question is unanswered.

ASK NEXT
1. Why did promoter shares rise 57,119, and why did total shares rise 8,472,668, between 31-MAR-2026 and 29-JUN-2026? Was either an allotment, a transfer or a gift, and which filing says so?
2. Why did total shares rise from 1,508,233,221 to 1,621,073,650 (+112,840,429) at the 14-JAN-2026 filing, and who got the shares?

CONVICT

WA1 Convict partial

ANSWER: The record does not say what caused either rise. The filings give no reason, mode or trade date for the promoter's +57,119 (derived), and none says allotment, transfer or gift. For the total, the Board's report records only that on 07-MAY-2026 the Board approved a preferential allotment, against BBL shares held by current and former BBL employees. That is an approval, not an allotment. It gives no share count and no allottee list. Whether it explains the +8,472,668 is my inference. The employee trust's percentage also fell, from 0.09 to 0.05 (filed). I will not call the promoter rise a purchase.

MOVE: cite | not in my record

EVIDENCE:
- Filed promoter shares 728,024,176, 44.91%, filing for the quarter ended 31-MAR-2026, filed 21-APR-2026 (S032).
- Filed promoter shares 728,081,295, 44.68%, filing for 29-JUN-2026, filed 01-JUL-2026. Derived +57,119 promoter shares and implied total 1,621,073,650 to 1,629,546,318, +8,472,668. No reason is given (S032).
- "On May 07, 2026, the Board of Directors of the Company approved the issue and allotment of equity shares of the Company on preferential basis, for consideration other than cash i.e. swap of equity shares of the Company against the equity shares of BBL held by current and erstwhile employees of BBL, as a part of integration of BBL as a wholly owned subsidiary of the Company, subject to requisite approvals." (S027, p420, notes to the financial statements (company filing))
- Same event, repeated in the standalone notes at p337 (S027). Neither page states the number of shares, the allotment date or the allottees.
- Filed employee trust 0.09% on 31-MAR-2026 and 0.05% on 29-JUN-2026, filed 01-JUL-2026 (S032). Derived from rounded percentages, so the trust's share count is not established.
- Filed promoter count 728,081,295 at 30-JUN-2026 and 30-SEP-2026, so no later change (S032).
- The voting results in votes.md show no resolution on the swap in the lines I searched; that search was partial (S034).

STATE I CLAIM: partial. The window and a candidate cause for the total are on record; the cause of the promoter's +57,119 and the filing type are not.

WHAT WOULD SETTLE IT: The company's allotment intimation to the exchanges for the BBL employee swap, with its date and share count. The notes or remarks to the full 29-JUN-2026 shareholding filing. The insider-trading (PIT) disclosure, or a transfer or gift record, for the promoter group's +57,119 between 31-MAR-2026 and 29-JUN-2026.

CONVICT

WA2 Convict partial

ANSWER: As of the 14-JAN-2026 filing, the record shows the rise is mostly the January 2026 QIP. The annual report says 112,664,585 equity shares of Rs 5 were allotted on January 14, 2026 to Qualified Institutional Buyers. It does not name the buyers. That is 112,664,585 of the 112,840,429 added (derived). The remaining 175,844 shares are not explained in my record. The promoter's count stayed at 728,024,176, so its percentage fell from 48.27 to 44.91 through dilution, not sales. The separate 05-JAN-2026 step was the preferential allotment to Mylan Inc., Serum Institute Life Sciences, Tata Capital Growth Fund II and Activ Pine LLP.

MOVE: cite; not in my record

EVIDENCE:
- "The Company on January 14, 2026 has raised an amount aggregating to ` 41,500 Million through Qualified Institutional Placement by allotment of 112,664,585 equity shares of ` 5 each to the Qualified Institutional Buyers at the issue price of ` 368.35 per Equity Share" (S027, p267, corporate governance report (company filing))
- Implied total shares, filed pattern for the quarter ended 05-JAN-2026: 1,508,233,221. Pattern dated 14-JAN-2026: 1,621,073,650, a rise of 112,840,429 (derived from filed share counts and percentages) (S032, shareholding filing for the quarter ended 14-JAN-2026)
- Placement allotment 112,664,585 against the 112,840,429 rise leaves 175,844 shares, derived. No filing in my record gives a cause (S027, p267)
- Promoter shares 728,024,176, filed, in both the 05-JAN-2026 and 14-JAN-2026 patterns. Promoter percentage 48.27 then 44.91, filed (S032, shareholding filing for the quarter ended 14-JAN-2026)
- Public percentage 51.63 then 54.99, filed (S032, shareholding filing for the quarter ended 14-JAN-2026)
- "The Company on January 05, 2026 has allotted 171,279,553 Equity Shares of ` 5 each on a preferential basis to (a) Mylan Inc.; (b) Serum Institute Life Sciences Private Limited; (c) Tata Capital Growth Fund II; and (d) Activ Pine LLP" (S027, p267, corporate governance report (company filing))
- "That we successfully raised nearly USD 1 billion through two successive Qualified Institutions Placements (QIPs) is a reflection of the growing confidence that you have shown in the business and the management." (S027, p23, message from the chairperson or chief executive (management speech))
- Pledged flag "false" in the 14-JAN-2026 filing, filed (S032, shareholding filing for the quarter ended 14-JAN-2026)

STATE I CLAIM: partial. The main allotment and its class of recipient are on record. The 175,844 residual and the buyers' names are not.

WHAT WOULD SETTLE IT: The company's allotment intimation to the exchanges dated 2026-01-14, and the Reg 31 shareholding pattern's share-capital note for the quarter ended 2026-03-31. The allottee list, and any ESOP or RSU allotments in that window, would be in those documents. I have not read either.

JUDGE

Judge close

JUDGE NOTE ON I8 (Promoter holding, pledge, dilution and pay), CLOSE. Updated after WA1 and WA2. I read the case book, work/I8.md and notebook.md. No brain.

Code checks: every quote with an id in the convict's I8 turns, including WA1 and WA2, was matched to the convict's brain by code (verified by code). That covers the quotes only: S027 p420 and p337 (BBL swap approval), S027 p267 (QIP of 112,664,585 shares at Rs 368.35 and the 05-JAN preferential allotment of 171,279,553 shares), S027 p23. The 57,119 in A3 has no date within 80 characters. Its dates sit in the evidence lines (31-MAR-2026, 29-JUN-2026), and 728,081,295 minus 728,024,176 is 57,119 against case book ch4. It is a derived figure, not a filed cell. Every other sum below is derived by me or the convict from filed counts and rounded percentages. Code did not verify those.

STORY SO FAR
1. Promoter shares moved only +57,119 in five years, yet promoter % fell 60.64 to 44.68 because the total rose 35.7%, mostly through three share issues, not promoter sales (case book ch4, derived; hearing I8 WA2).
2. Pledged flag is false in all 25 filings, but the pledged-share count is blank since 30-JUN-2025, so "0%" is a reading of flags (hearing I8 A1, A2).
3. What the lenders hold, who bought or sold the +57,119, and the pay of the promoter family: not in the record.

WHY-CHAIN
1. Promoter % fell because the total grew, not because the promoter sold. Promoter count 728,024,176 on 30-SEP-2021 and 728,081,295 on 30-SEP-2026. Implied total 1,200,567,573 to 1,629,546,318, +35.7% (derived). (case book ch4; S032)
2. The 19-JUN-2025 step (60.64 to 54.45) came from an issue to institutions: 136,363,635 shares at Rs 330, Rs 45,000 million (S027 p267, verified by code; derived product). Implied total rose 136,483,255, so 119,620 differ. My check: the filings print percentages to two decimals. At 54.45% that rounding alone moves the implied total by about 120,000 either way (derived). So the 119,620 is probably rounding, not extra shares. Allottees: not in the record. (hearing WA3; S032)
3. The 05-JAN-2026 step (54.45 to 48.27) was the preferential allotment of 171,279,553 shares to Mylan Inc., Serum Institute Life Sciences, Tata Capital Growth Fund II and Activ Pine LLP (S027 p267, verified by code). It raised no cash because the shares paid for BBL (hearing B08, S027 p191). Implied total rose 171,182,393 (derived), within rounding of the filed share count.
4. The 14-JAN-2026 step (48.27 to 44.91) was the QIP: 112,664,585 shares at Rs 368.35, Rs 41,500 million (S027 p267, verified by code; derived product). Implied total rose 112,840,429, so 175,844 differ (derived). At 44.91% the rounding band is about 180,000, so this residual is also probably

rounding. Promoter count stayed 728,024,176. Buyers' names: not in the record. (WA2; S032)
5. Pledge is nil on flags only. Pledged flag false in 25 filings. The count was printed 0 to 19-JUN-2025 and is blank from 30-JUN-2025. The two new flags are false from 30-JUN-2025. The promoters' own declaration covers the year to 2026-03-31 only, read by eye, no tier (S037). Nothing covers 2026-04-01 onward except the flags (S032 filed 21-OCT-2026). No lender document or depository record: not in the record.
6. The +57,119 promoter rise is bounded (31-MAR-2026 to 29-JUN-2026) but not explained. The total rose 8,472,668 (derived). A candidate cause for the total is the BBL employee swap the Board approved on 07-MAY-2026 (S027 p420, verified by code). That is an approval, with no share count or allotment date, and the link to the 8,472,668 is the convict's inference. Employee trust % fell 0.09 to 0.05 (filed). I accept that "purchase" is not established. Cause of the +57,119, trade date, mode, plan: not in the record.

I DID NOT UNDERSTAND
1. Is a blank pledged-count cell nil, not applicable, or not filled? The shape changed at 30-JUN-2025.
2. What is a "non-disposal undertaking" in plain words, and who is it given to?
3. In what way is the Regulation 31(4) wording "wider than a pledge"?
4. The mid-quarter filings of 05-JAN-2026 and 14-JAN-2026 line up with allotment dates in S027 p267, so they look allotment-driven. I still do not know what triggered 19-JUN-2025 or 29-JUN-2026.
5. Do the 119,620 and 175,844 mean anything, or is it only rounding? My rounding check is my own derived estimate, not confirmed by any filing.
6. Pay is in the I8 title, but Q6.1 to Q6.3 do not ask about it and no I8 answer covers it. Not in the record.

STATE PROPOSED
Q6.1 partial (unchanged): 0% is derived from false flags at 30-SEP-2026 (S032, filed 21-OCT-2026), the count cell is blank, and no depository record or date was read. WA1 and WA2 add only a false flag at 14-JAN-2026, which does not reach 30-SEP-2026.
Q6.2 partial (unchanged): 0 shares at 30-SEP-2026, on the same flag basis. Lender documents, trigger price and cover are not in the record. Refusing to turn "nothing filed" into "nothing exists" was right.
Q6.3 partial (unchanged, and the weakest of the three): the asked item, the trade date, is not in the record. The 31-MAR-2026 to 29-JUN-2026 window is a different basis with numbers and dates, so it is not no data. WA1 explained the total (a candidate cause, an approval only) but not the promoter's +57,119, so it does not lift the state.

WATCH
1. The promoter insider-trading (PIT) disclosure, or a transfer or gift record, for the +57,119 between 31-MAR-2026 and 29-JUN-2026. It would give the trade date, mode and any plan, and settle Q6.3.
2. The NSDL or CDSL promoter-group pledge record at 30-SEP-2026, the full 30-SEP-2026 shareholding filing's encumbrance table (does blank mean nil?), and the lender security documents. They would settle Q6.1 and Q6.2. The promoter declaration for the year to 2027-03-31 comes after the as-of dates.
3. The company's allotment intimations for 14-JAN-2026 and the BBL employee swap, and the notes to the 29-JUN-2026 filing. They would give allottees, the 175,844 and 8,472,668 causes, and share counts.

SCORE THINKING (S6 promoter): All three core states are partial, so the ladder gives 1 (partial, or a flag with no stated reason). 2 needs answered numbers with a dated source, and none of Q6.1 to Q6.3 reaches that. I would score S6 at 1. No red flag fires: the dilution is explained with dated, filed share counts and promoter shares did not fall. The 1 is a firm one because the gaps are missing documents (depository, lender, PIT), not evasion. The code ceiling is 1 and I do not go above it.

- I9 Board, auditors and independent directors 10 turns

LAWYER

Q1 Lawyer
TO: the convict

QUESTION: The exchange feed shows B S R & Co. LLP resigning as statutory auditor of the material subsidiary, effective 2026-08-06; how many hours passed between the board receiving the auditor's written reasons and Biocon filing them with the exchange, and on what date did the board receive them?

WHY I ASK: Q10.2, why the auditor resigned early, tested against the 24-hour rule for filing the reasons (S053).

IF DEFLECTED: If the answer names no receipt date and no hours, I will ask for the date printed on B S R & Co. LLP's resignation letter and the date of the exchange filing that carried its reasons.

CONVICT

A1 Convict `not in my record`
ANSWER: As of the annual report year ended 2026-03-31, my record holds no filing of the auditor's written reasons, no board receipt date and no filing timestamp. I cannot give hours or a date. I also hold no copy of the exchange feed item for 2026-08-06, so the 24-hour test cannot be run from here. What the record does show: the parent's auditor reported that "There has been no resignation of the statutory auditors during the year." (S027, p278, independent auditor's report (the auditor's words)). The parent's own second term was due to end at the 48th AGM, held 2026-08-06 per the hot sheet. The Board's report records a recommended successor.

MOVE: not in my record; mitigate

EVIDENCE:
- "Accordingly, their second term ends at the ensuing 48th AGM." (S027, p201, Board's report (company filing)). This is a term end, not a resignation,

and it concerns the parent.
- The same page records the Audit Committee and Board recommending a successor firm for five years to the 53rd AGM. I do not quote the line; it is in the Board's report (S027, p201).
- The governance report's subsidiary table lists B S R & Co. LLP as auditor of Biocon Biologics Limited and of Syngene International Limited (filed table, S027, p268, not quoted). It does not say which is the material subsidiary meant, and it carries no resignation.
- A search of all my files for "resign" and "BSR" found no subsidiary auditor resignation, and no 24-hour rule text. S053 is not in my brain.
- The latest annual report is for the year ended 2026-03-31, so the event on 2026-08-06 falls after it. changes.md, which covers exchange announcements to 2026-10-25, carries no such item.

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: the exchange filing carrying the auditor's reasons, with its timestamp. Also the date printed on the B S R & Co. LLP letter, and the board minute or intimation giving the receipt date. Unchecked here: which subsidiary the feed item names, and whether the filing met the 24-hour rule.

LAWYER

Q2 Lawyer
TO: the convict

QUESTION: The annual report's attendance table lists 9 directors; how many of them are independent directors, and as of what date is that count taken?

WHY I ASK: Q10.4, are the independent directors independent: a table of ties, tenure and attendance, starting with their share of the board (S046).

IF DEFLECTED: If the answer gives no count or no date, I will ask how many Audit Committee meetings Nicholas Robert Haggar attended in the year ended 2026-03-31, given his 10 of 12 board meetings (83.33%).

CONVICT

A2 Convict answered
ANSWER: Five of the 9 are independent directors, counted as of March 31, 2026, the year-end of the annual report. The Board's report and the governance report both give the same split: 2 executive, 2 non-executive non-independent, 5 independent. The attendance table at PDF page 253 lists the 9 names but gives no role column. Naming the five is my inference by elimination: Parikh, Kidwai, Menon, Haggar, Dhawan. Four of them are independently confirmed by other pages; Menon is by elimination only. The count is not as of today. Five more independent appointments were recommended from August 1, 2026, after that date.

MOVE: cite | mitigate

EVIDENCE:
- "As on March 31, 2026, the Board of Directors comprised of 9 (nine) Members, consisting of 2 (two) Executive Directors, 2 (two) Non-Executive Non-Independent Directors and 5 (five) Independent Directors." (S027, p199, Board's report (company filing))
- "As on March 31, 2026, the Board comprised of 9 (nine) Members, consisting of 2 (two) Executive Directors, 2 (two) Non-Executive Non-Independent Directors, and 5 (five) Independent Directors." (S027, p249, corporate governance report (company filing))
- "Based on the declarations received from the Independent Directors, the Board of Directors has confirmed that all the Independent Directors meet the criteria of independence as mentioned under Section 149 of the Act and Regulation 16(1)(b) of the SEBI Listing Regulations and that they are independent of the management." (S027, p250, corporate governance report (company filing)). This is the board's own confirmation, not an outside test.
- Audit Committee table, PDF page 256, filed: Parikh, Haggar and Dhawan are marked as independent directors. Kidwai is Lead Independent Director per PDF page 249. Ravi and Eric Mazumdar are non-executive non-independent per the PDF page 253 shareholding table. Siddharth Mittal is named as stepping down as MD and CEO at March 31, 2026 (PDF page 199).
- The follow-up you flagged: the Audit Committee table at PDF page 256 gives Haggar 5 of 5 meetings, filed, for the year ended 2026-03-31. His board attendance is 10 of 12 (83.33%) at PDF page 253.
- Not in my record: ties, tenure and other-directorships for any of the five. Independence here rests on declarations (S027, p198, Board's report).

STATE I CLAIM: answered

WHAT WOULD SETTLE IT: a role column on the attendance table, or the skills matrix, naming the fifth independent director. That would confirm Menon rather than leaving her to elimination. For the ties and tenure test, the appointment dates and any related-party or consulting links of the five. Unchecked: the board composition after August 1, 2026.

LAWYER

Q3 Lawyer
TO: the convict

QUESTION: For how many consecutive years has the partner who signed B S R & Co. LLP's report for the year ended 2026-03-31 signed Biocon's audit, counted from which date of first signing?

WHY I ASK: Q10.3, how long the audit firm and partner have been in place, tenure of firm and partner (S046).

IF DEFLECTED: If the answer gives no count or no date, I will ask on what date the signing partner last changed, given B S R & Co. LLP's second term began at the 43rd AGM held on July 23, 2021.

CONVICT

A3 Convict | not in my record

ANSWER: As of the annual report year ended 2026-03-31, I cannot give a count of consecutive years or a first-signing date for the signing partner. The partner is not named in my record. The extracted auditor's report has no signature block, so no name, membership number or signing date. What I can show is firm tenure. B S R & Co. LLP's second term began at the 43rd AGM held 2021-07-23 and was due to end at the 48th AGM. Derived: the year ended 2026-03-31 is the fifth audit of that term. The first term's start is not in my file. Partner tenure and firm tenure are different counts.

MOVE: not in my record | mitigate

EVIDENCE:
- "Subsequently, B S R & Co. LLP, Chartered Accountants were re-appointed as the Statutory Auditors of the Company for a second term of 5 (five) consecutive years, to hold office from the conclusion of the 43rd AGM held on July 23, 2021, till the conclusion of the 48th AGM to be held in financial year 2026." (S027, p201, Board's report (company filing))
- "Accordingly, their second term ends at the ensuing 48th AGM." (S027, p201, Board's report (company filing)). The same page records a recommended successor firm for 5 years. I do not quote that line.
- The auditor's report for the year ended 2026-03-31 is unmodified, per the Board's report (S027, p201, not quoted). That is about the opinion, not about the partner.
- A search of my FY26 statements for partner, membership number, UDIN and first signing found nothing. No partner rotation statement is in my T08 section on auditors.
- Not in my record: the engagement partner's name, first-signing date, any rotation date, or the Companies Act limit on partner tenure. This is a company-level question, since the sixth row of the governance subsidiary table at PDF page 268 shows Syngene's auditor is also B S R & Co. LLP, but I hold no partner data for it either.

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: the signature block of the auditor's report for the year ended 2026-03-31, with partner name, membership number and UDIN. Then the same block from each earlier year, to find the first year that partner signed. The date of the audit committee or board note on partner rotation would also settle it. Unchecked here: whether the partner changed in the second term, and whether the new successor firm's partner is a continuation.

JUDGE

Judge note

STORY SO FAR:
1. BSR's subsidiary-auditor resignation was announced 2026-08-06; reasons, receipt date and hours are not in the record. (case book ch6; A1)
2. Five of nine directors were independent at 2026-03-31, and all three Audit Committee members are independent. (case book ch4; A2)
3. BSR's parent term ends at the 48th AGM; the signing partner's name and tenure are not in the record. (ch4 AR p201; A3)

WHY-CHAIN:
1. Claim: the exit has a filing date, but no reasons, receipt date or hours. Because the feed row dated 2026-08-06 says BSR resigned as auditor of "the material subsidiary" w.e.f. 2026-08-06, names no subsidiary and gives no time (case book ch6). The convict holds no copy (hearing I9 A1). The 24-hour test needs two timestamps; none is on record.
2. Claim: the parent's auditor change is a term end, not a resignation. Because the second BSR term runs from the 43rd AGM (2021-07-23) to the 48th AGM (2026-08-06), and a successor was recommended for five years (case book ch4 AR p201; ch8 I7). Whether the same-day subsidiary exit is linked: not in the record.
3. Claim: 5 of 9 directors were independent at 2026-03-31, which is 55.6% (5 / 9, derived). Because the Board's and governance reports both say 2 executive, 2 non-executive non-independent, 5 independent (hearing I9 A2, S027 p199, p249, code verified), and the printed list names five (case book ch4, AR p188). Menon is named there, so no elimination is needed.
4. Claim: independence rests on the board's own declarations, but some start dates are visible. Because S027 p250 is the board confirming its own directors (hearing A2). The feed shows appointments: Kidwai 2022-04-28, Menon 2023-07-26, Haggar announced 2023-09-01, Dhawan 2024-05-16 (case book ch6). The convict held none. Parikh's start, ties and pay: not in the record.
5. Claim: the firm has served two five-year terms, ten years, but partner tenure is unknown. Because BSR was appointed at the 38th AGM in 2016 for five years, then again from 2021-07-23 (case book ch4, AR p201): 2016 to the 2026 AGM is ten years (derived). FY26 is the fifth audit of the second term (derived, convict agrees).

I DID NOT UNDERSTAND:
1. Which subsidiary: the feed row says only "the material subsidiary"; the convict's table lists BSR for Biocon Biologics and Syngene (A1, S027 p268), so I do not know which is meant or why it is "material".
2. What the separate "Change in Auditors" row dated 2026-08-06 is, beside the resignation row that same day (case book ch6). Not in the record.
3. What the 24-hour rule says and when its clock starts. S053 is not in the record, so I could not check it.
4. A2's "five more independent appointments recommended from August 1, 2026": no id, and the feed shows only two unnamed director-change rows (2026-07-22, 2026-08-06). I could not check it.
5. A2's "Haggar 5 of 5 Audit Committee meetings" is not in the case book, which holds only his 10 of 12 board meetings. I could not check it.
6. How partner rotation differs from firm rotation, and the legal limit on each. Not in the record.

STATE PROPOSED:
Q1 no data: no receipt date, filing time or hours are on record, and the convict named the settling documents (the exchange filing with its

timestamp, the BSR letter, the board minute). The parent term-end facts concern a different company and give no hours, so this is not partial.
Q2 answered: 5 of 9, as of 2026-03-31, with quotes (S027 p199, p249) that agree with the printed list in case book ch4. Independence rests on the board's own declarations; ties and tenure are not tested.
Q3 partial: the asked item (partner years, first-signing date) is not in the record. The convict gave firm tenure on a different basis with dates: second term from 2021-07-23, FY26 the fifth audit of it (derived, I agree). The convict said the first term's start is not in its file, but the case book prints 2016 (ch4 AR p201).

ASK NEXT:
1. Why did BSR resign as auditor of the material subsidiary on 2026-08-06, the same day as the 48th AGM, and which subsidiary was it? What reasons did BSR give, and on what date did the board get them?
2. Why does your extract of the FY26 auditor's report have no signature block? What name and first-signing year show in the signed report and in the earlier years' reports?

CONVICT

WA1 Convict `not in my record`

ANSWER: As of the exchange feed row dated 2026-08-06, my record does not say why B S R & Co. LLP resigned. It does not say which subsidiary was meant, what reasons were given, or when the board received them. The case book row says only that Biocon told the exchange of the resignation of B S R & Co. LLP as statutory auditor of "the material subsidiary", effective 2026-08-06. It names no subsidiary and gives no reasons. My annual report year ended 2026-03-31, so this event falls after it. I cannot say whether the resignation and the 48th AGM on the same day are linked.

MOVE: not in my record | concede

EVIDENCE:
- Feed row dated 2026-08-06, read from the case book, not quoted: it gives no subsidiary name, no reasons and no time. A separate "Change in Auditors" row carries the same date and no detail.
- "There has been no resignation of the statutory auditors during the year." (S027, PDF page 278, independent auditor's report, the auditor's words). This covers the parent, for the year ended 2026-03-31, and so predates the event.
- The governance table lists B S R & Co. LLP as auditor of Biocon Biologics Limited and of Syngene International Limited (filed table, S027, PDF page 268, not quoted). It does not say which one is "material".
- Searches of statements-ar-fy26.md, votes.md and qa-states.md for resign, BSR and auditor found no subsidiary auditor resignation, no reasons and no board receipt date. In votes.md, auditor matches for the 48th AGM meeting dated 2026-08-06 are cost auditors only (filed table, not quoted).

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: The exchange filing that carried B S R & Co. LLP's reasons, with its timestamp. Also the date printed on the firm's resignation letter, and the board minute or intimation giving the receipt date. Unchecked here: the subsidiary's identity, and any link to the parent's term end at the 48th AGM.

CONVICT

WA2 Convict `not in my record`

ANSWER: As of the annual report year ended 2026-03-31, my record holds no signature block, no partner name and no first-signing year, for FY26 or for earlier years. I cannot say why the block is missing. My FY26 file is a set of 485 statements picked from the report's prose (as of that year end). It is not the full text of the signed report. So the block may be on the page and simply not in my file. I cannot tell which. I have not seen the signed report.

MOVE: not in my record | concede

EVIDENCE:
- FY26 file (S027), searched for partner, membership, UDIN, signed by and signature: no hit in the auditor's report. The only registration number is the recommended successor firm's, in the Board's report (S027, PDF page 201, company filing, not quoted).
- FY25 file (S031) and FY24 file (S030), searched for partner, membership, UDIN and signed by: no auditor-partner name in either. Hits are about "partner" in a business sense and directors retiring by rotation.
- The FY25 and FY24 files each have a heading on auditor name, tenure, fees and rotation (S031 and S030). The searches found no partner name under either.
- I did not read the FY22 or FY23 files (S028, S029) in this call. They are unchecked for partner names.

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: the signed auditor's report in the annual report for the year ended 2026-03-31, last page of the report, with partner name, membership number and UDIN. Then the same page from each earlier report, to find the first year that name appears. Unchecked here: whether the block is in the PDF and was dropped by the extract, and the partner's first-signing year.

JUDGE

Judge close

STORY SO FAR:
1. BSR resigned as auditor of an unnamed material subsidiary on 2026-08-06; reasons, receipt date and hours: not in the record. (ch6; I9 WA1)
2. Five of nine directors were independent at 2026-03-31, as were all three Audit Committee members. (ch4 AR p188; I9 A2)
3. BSR has been Biocon's auditor for ten years in two terms; the signing partner is not in the record. (ch4 AR p201; I9 WA2)

WHY-CHAIN:
1. Claim: the exit is dated but unexplained. Because the feed row dated 2026-08-06 says BSR resigned as auditor of "the material subsidiary", with

the year cut off in the text, no name and no time (ch6). The convict gives no reasons or receipt date (I9 A1, WA1). The 24-hour test needs two timestamps: not in the record.
2. Claim: the parent's auditor change is a planned term end. Because BSR's second term runs from the 43rd AGM (2021-07-23) to the 48th AGM, and a successor was recommended for five years (ch4 AR p201). Feed rows headed "Change in Auditors" are dated 2026-05-07 and 2026-08-06 (ch6). Link to the subsidiary exit: not in the record.
3. Claim: 5 of 9 directors were independent at 2026-03-31, 55.6% (derived). Because the Board's and governance reports both say 2 executive, 2 non-executive non-independent, 5 independent (I9 A2; S027 p199, p249, code-matched), and the printed list names five, including Menon (ch4 AR p188). The "149" in A2 is a Companies Act section number, not a figure.
4. Claim: independence rests on the board's own word; start dates are partly visible. Because S027 p250 is the board confirming its directors (I9 A2). The feed shows Kidwai appointed 2022-04-28, Menon 2023-07-26, Haggar 2023-09-01 (announced), Dhawan 2024-05-16 (ch6). Parikh's start, ties and pay: not in the record.
5. Claim: firm tenure is ten years; partner tenure is not known. Because BSR was appointed in 2016 for five years, then again from 2021-07-23 (ch4 AR p201): ten years, and FY26 is the fifth audit of the second term (both derived). The convict's file is 485 picked statements, not the signed report (WA2). Partner: not in the record.

I DID NOT UNDERSTAND:
1. Which subsidiary "the material subsidiary" is, and why it counts as material. The convict's table lists BSR for both Biocon Biologics and Syngene (S027 p268).
2. What the second "Change in Auditors" row, dated 2026-08-06, is, beside the resignation row of the same day. I also cannot tell whether the 2026-05-07 row is the successor recommendation. Not in the record.
3. What the 24-hour rule says and when its clock starts. S053 is not in the record, so I could not check it.
4. A2's "five more independent appointments recommended from August 1, 2026" and Haggar's 5 of 5 Audit Committee meetings. Neither has an id I can check, and neither is in the case book. The feed shows only two unnamed director-change rows (2026-07-22, 2026-08-06).
5. How partner rotation differs from firm rotation, and the legal limit for each. Not in the record.
6. Whether the missing signature block was dropped by the convict's extract or is absent from the report. WA2 says it cannot tell.

STATE PROPOSED:
Q1 no data (unchanged): no receipt date, filing time or hours are on record. WA1 gave no new basis and conceded; the parent term-end dates concern another company and give no hours.
Q2 answered (unchanged): 5 of 9 at 2026-03-31, with code-matched quotes (S027 p199, p249) that agree with the printed list in ch4. Independence rests on the board's declarations; ties and tenure are untested, and the post-August 2026 count is not in the record.
Q3 partial (unchanged): partner years and first-signing date are not in the record, and WA2 confirms the convict's file cannot show them. Firm tenure is given on a different basis with dates (second term from 2021-07-23, FY26 the fifth audit). The convict says the first term's start is not in its file, but ch4 prints 2016.

WATCH:
1. The exchange filing that carried BSR's reasons for the 2026-08-06 exit, with its timestamp. Also the date on BSR's letter, the board minute giving the receipt date, and the 24-hour rule text (S053). These would settle Q1. The feed already runs to 2026-10-29, but the document behind the row has not been read.
2. The signature block of the FY26 auditor's report (partner name, membership number, UDIN), then the same block for FY22 to FY25. This would settle Q3. The successor firm's first signing comes after the 48th AGM (2026-08-06), and its date is not in the record.
3. The documents behind the "Change in Director(s)" rows of 2026-07-22 and 2026-08-06, the skills table at AR p35, and Parikh's appointment record. They would test the "five more independent appointments" claim and the ties and tenure of the five. Q2 stays answered either way, because it asked only for the count.

LAWYER

X1 Lawyer
TO: the convict

QUESTION: In Baseline WA1 you cite the 6.67% Senior Secured Notes, 73,597 at 2026-03-31, maturing October 2029, and read them as not a one-year item. The case book maturity table (PDF p404, undiscounted) puts 2 to 5 years at 69,767 and over 5 years at nil, so these notes alone are larger than the whole 2-to-5-year bucket. Which stands: that all 73,597 sits outside the 65,476 due within one year, or that part of it is counted under one year in the maturity table?

WHY I ASK: Baseline WA1, the evidence line citing S027 p376 (notes mature October 2029, Senior Secured Notes 73,597, "not a one-year item on its face (my reading)"), against case book section 3, "Borrowings by when they fall due" (2 to 5 years 69,767, over 5 years nil), and section 5 maturity paragraph. It also bears on the 24,692 you left unexplained in I6 WA1.

IF DEFLECTED: If you say the note (b) text under the p404 table is not in your record, answer in one line: is any part of the 73,597 in the under-1-year figure of 65,476, yes or no? If you cannot say, state which of your two readings (your October 2029 reading in Baseline WA1, or the case book table) you withdraw until the note is read.

CONVICT

XA1 Convict partial
ANSWER: As of the annual report to 2026-03-31, I cannot say yes or no. The two filed figures cannot both hold on one basis. 73,597 is 3,830 above the 2-to-5-year bucket of 69,767 (derived, 2026-03-31). So at least 3,830 of the notes would sit in another bucket. Over 5 years is nil, so that would be

under 1 year or 1 to 2 years. I withdraw my reading that all 73,597 sits outside the 65,476. I keep October 2029 as the filed maturity date. The carrying value may differ from the undiscounted table, and note (b) is not in my record.

MOVE: concede; not in my record

EVIDENCE:
- "|Senior Secured Notes 2029 ("Notes") [refer note (d) below]|73,597|66,954|" (S027, p376, notes to the financial statements (company filing))
- "The Notes bear interest at a rate of 6.67% per annum and will mature in October 2029." (S027, p376, notes to the financial statements (company filing))
- "|Borrowings [refer note b]|65,476|13,003|69,767|-|148,246|" (S027, p404, notes to the financial statements (company filing))
- Maturity table is contractual, undiscounted, excluding interest; at 2026-03-31 the buckets are 65,476, 13,003, 69,767 and nil over 5 years (filed, S038, PDF page 404).
- 73,597 less 69,767 is 3,830 (derived, 2026-03-31).
- At 2025-03-31 the notes were 66,954 (filed, S027, p376) against a 2-to-5-year bucket of 98,551 (filed, S038), so no overlap problem arose then (derived).
- The note (b) text under the p404 table is not in my record.

STATE I CLAIM: partial (the arithmetic conflict is on record; which bucket holds the 3,830 and whether part of the notes is under 1 year is not)

WHAT WOULD SETTLE IT: The note (b) text under the maturity table on PDF page 404, and note (d) on the Senior Secured Notes at PDF page 376, in the FY2025-26 annual report. The 2026-09-30 quarter filing (about mid November 2026, date unchecked) would also help.

LAWYER

X2 Lawyer
TO: the convict

QUESTION: Of the 24,692 by which the 65,476 due within one year in the maturity table exceeds the 40,784 of current borrowings on the balance sheet at 2026-03-31, how many Rs million are Senior Secured Notes, how many of those are the 3,830 you could not place in a bucket, and on what date does each amount fall due?

WHY I ASK: I6 WA1 left the make-up of the 24,692 unexplained. XA1 withdrew "all 73,597 sits outside the 65,476" and left the 3,830 unplaced. Case book section 3 ("Borrowings by when they fall due") and section 5 (maturity paragraph) hold both tables but no reconciliation. A due date for the notes ties the two answers together.

IF DEFLECTED: If note (b) is not in your record, answer in one line: is the 3,830 inside the 24,692, yes, no or not in my record, and which due date in the maturity table (under 1 year or 1 to 2 years) do you assume for it.

CONVICT

XA2 Convict partial
ANSWER: As of the annual report to 2026-03-31, my record cannot split the 24,692 (derived: 65,476 less 40,784). I hold no note (b) text, no per-bucket make-up of the Senior Secured Notes and no day-level due date. The notes total 73,597 and the filed maturity is "October 2029" only. Whether the 3,830 (derived: 73,597 less the 69,767 bucket) is inside the 24,692 is not in my record. I assume the under-1-year bucket, because only that bucket holds the excess over the balance sheet. That is my reading, not a filed fact. I cannot say how many Rs million of the 24,692 are notes.

MOVE: not in my record; concede

EVIDENCE:
- "|Senior Secured Notes 2029 ("Notes") [refer note (d) below]|73,597|66,954|" (S027, p376)
- "The Notes bear interest at a rate of 6.67% per annum and will mature in October 2029." (S027, p376)
- "|Borrowings [refer note b]|65,476|13,003|69,767|-|148,246|" (S027, p404)
- Maturity table is contractual, undiscounted, excluding interest. At 2026-03-31 the buckets are 65,476, 13,003, 69,767 and nil over 5 years (filed, S038, PDF page 404).
- Current borrowings 40,784, of which 5,121 are current maturities of non-current borrowings, at 2026-03-31 (filed, S026, PDF page 381).
- 24,692 and 3,830 are derived from the filed cells above (2026-03-31). The notes' carrying value (73,597) against the undiscounted table bucket (69,767) is a basis difference I cannot reconcile.
- Nothing in debt-covenants.md or numbers.md splits the 65,476 by instrument. The report gives no undrawn committed lines (S038, 2026-03-31).

STATE I CLAIM: partial (the arithmetic conflict is on record; the make-up of the 24,692, the notes' share and the 3,830's bucket are not)

WHAT WOULD SETTLE IT: The note (b) text under the maturity table on PDF page 404 and note (d) on the Senior Secured Notes on PDF page 376 of the FY2025-26 annual report. Failing that, the lender schedule behind notes 14 and 19, or the quarter filing to 2026-09-30 (about mid November 2026, date unchecked).

LAWYER

X3 Lawyer
TO: the convict

QUESTION: In I8 WA1 you said the filings and the Board's 07-MAY-2026 approval give "no share count" and "no allotment date" for the issue that may explain the rise in total shares of 8,472,668 (1,621,073,650 at 31-MAR-2026 to 1,629,546,318 at 29-JUN-2026), and in I8 A3 you said the filings do not say why the total rose. The case book exchange timeline, row 2026-06-29, records "allotment of 8786362 securities pursuant to Preferential Issue at

its meeting held on Jun 29, 2026", on the same day as the shareholding filing dated 29-JUN-2026 that shows the promoter's 728,081,295. Which stands: that no allotment count or date for that window is on record, or that 8,786,362 securities were allotted on 2026-06-29?

WHY I ASK: I8 WA1 (and I8 A3) against case book ch6 timeline row 2026-06-29. The case book figure is larger than the 8,472,668 rise you derived from the filings. Your answers treat the link between the approval and the rise as "my inference" and leave the 29-JUN-2026 filing without a trigger. The case book holds an allotment on that exact date. Only the convict can say whether it is the same event, and the judge's note on I8 lists "what triggered 29-JUN-2026" as not understood.

IF DEFLECTED: If you say the allotment intimation is not in your record, I will ask for one line: yes, no or not in my record, on whether any of the 8,786,362 securities went to a promoter or promoter group entity, given that the promoter count moved from 728,024,176 to 728,081,295 between the same two filings.

CONVICT

XA3 Convict `partial`

ANSWER: As of 2026-10-30, the 2026-06-29 allotment intimation is not in my record. I hold no exchange timeline, so I cannot confirm or deny 8,786,362 securities allotted on that date. It is plausibly the event behind the filing dated 29-JUN-2026, which is event-driven, but I cannot say it is the same event as the rise in total shares. The case-book figure is 313,694 above my derived rise of 8,472,668 (derived), and I cannot explain the gap. I keep "no count or date on record" as a statement about my files. I withdraw "no allotment date" as a statement about the world.

MOVE: not in my record; concede

EVIDENCE:
- Promoter shares 728,024,176 at 31-MAR-2026 and 728,081,295 at 29-JUN-2026, +57,119 (filed, S032, shareholding filings for those dates).
- Implied total shares 1,621,073,650 (31-MAR-2026) and 1,629,546,318 (29-JUN-2026), up 8,472,668 (derived, S032).
- The 29-JUN-2026 filing was filed 01-JUL-2026 and is dated mid-quarter, so it is an event-driven pattern. The total is unchanged at 1,629,546,318 in the 30-JUN-2026 and 30-SEP-2026 filings (filed, S032).
- A resolution to issue shares "on preferential basis for consideration other than cash" was voted on in the postal ballot with results dated 2026-06-08 (S034, voting results for the meeting dated 2026-06-08, resolution 3). That is a vote, not an allotment. It gives no share count and no allottee.
- Allottee names, promoter-group participation in any allotment, and the allotment date: not in my record.

STATE I CLAIM: partial

WHAT WOULD SETTLE IT: The exchange intimation of allotment dated 2026-06-29. Also the Board's allotment minutes and the explanatory notes to the 29-JUN-2026 shareholding filing. These would give the count, the allottees, and whether any went to a promoter group entity.

LAWYER

X4 Lawyer

TO: the convict

QUESTION: Of the 8,786,362 securities the case book records as allotted by preferential issue on 2026-06-29, how many, if any, went to a promoter or promoter group entity, and is the 57,119 rise in promoter shares (728,024,176 on 31-MAR-2026 to 728,081,295 on 29-JUN-2026) part of that number, with the date those shares were acquired?

WHY I ASK: XA3 left "promoter-group participation in any allotment" and the allotment date as not in your record, and B16 left "how the 57,119 were acquired" open, with the state "partial". Case book ch4 (shareholding table, promoter shares at 31-MAR-2026 and 29-JUN-2026) and ch6 (timeline row 2026-06-29, 8786362 securities) hold both figures on the same date, so I need the number and the date, or an explicit statement that you hold neither.

IF DEFLECTED: If the intimation is not in your record, answer in one line: yes, no or not in my record, did the 57,119 shares come from an allotment rather than a purchase, and name the one document that would show the allottee and the date.

CONVICT

XA4 Convict `not in my record on the number and the date`

ANSWER: As of 2026-10-30, my files hold no allottee list, no promoter count and no date for the 2026-06-29 issue. I cannot say how many of the 8,786,362 securities went to a promoter or promoter group entity, or that the 57,119 are part of that number. On the IF DEFLECTED line: did the 57,119 come from an allotment rather than a purchase? Not in my record. The rise first shows in the filing dated 29-JUN-2026, filed 01-JUL-2026. That is a filing date, not an acquisition date. One partial lead: the 2026-06-08 postal ballot annex flags the promoter group as interested in the preferential issue resolution. That is a flag on a vote, not an allottee.

MOVE: not in my record; cite

EVIDENCE:
- Promoter shares 728,024,176 at 31-MAR-2026 and 728,081,295 at 29-JUN-2026, +57,119 (filed, S032, shareholding filings for those dates).
- Total shares 1,621,073,650 to 1,629,546,318, up 8,472,668 (derived, S032, same dates). That is 313,694 below the case book's 8,786,362, and I cannot explain the gap.
- Promoter count is 728,081,295 again in the filing for the quarter ended 30-JUN-2026 (filed, S032), so the 29-JUN-2026 filing is the only change.
- Preferential issue resolution "for consideration other than cash": promoter group interested flag is "Yes", 0.00% against (filed, S034, voting results for the meeting dated 2026-06-08, resolution 3). The 2025-12-31 resolution 3 carries "No" (S034, voting results for the meeting dated 2025-12-31, resolution 3).
- Caution on that flag: promoter votes polled read 721,793,134 on the 2026-06-08 row, not the 0 the file's convention gives for an interested group

(S034, same resolution). So I do not read the flag as showing a promoter allottee (inferred).
- The filings give no reason for the rise (S032). Pledge flag false on all 25 filings (filed, S032, 2021-09-30 to 2026-09-30).
- Allottee names, share counts per allottee, price and acquisition date: not in my record.

STATE I CLAIM: not in my record on the number and the date; partial on the context above.

WHAT WOULD SETTLE IT: the exchange intimation of allotment dated 2026-06-29 (I hold no id for it). It names the allottees and counts. The 29-JUN-2026 shareholding pattern's holder-level detail would show whether the promoter group count rose by allotment.

- Closing 2 turns

CONVICT

Convict closing

Promoters' shares rose only 57,119, to 728,081,295, between 2021-09-30 and 2026-09-30, and the pledge flag was false in all 25 filings (S032). Their share fell from 60.64% to 44.68% because new shares were issued, not because anyone sold. The Services fall to 7,360 in the quarter ended 2026-06-30 was not the renaming: the 2025-06-30 quarter's 8,745 is the same in both filings (S033). Borrowings fell to 148,247 at 2026-03-31 (S026, PDF page 381), and the notes say loan rules were met all year.

I conceded Generics: a 5% margin for FY26 against the 10% to 12% said on 2025-01-31 (S008). I also conceded US liraglutide approval, 55 days late.

I could not explain why 65,476 falls due within a year when only 40,784 is current at 2026-03-31. The note under the table, PDF page 404, would settle it. Who got the 57,119 shares is open too; the 2026-06-29 allotment notice would show it.

LAWYER

Lawyer closing

The convict gave a number and a date twice. In baseline WA3 it said 136,363,635 shares went to big funds on 2025-06-19 at Rs 330, which is why the promoter's percentage fell. In I8 A1 it said 0% was pledged at 30-SEP-2026, but called that a reading of flags, not a printed figure.

It conceded two things. It gave no group margin or revenue guide (I3 A1, A2). And in XA1: "I withdraw my reading that all 73,597 sits outside the 65,476."

It could not answer four things:
- Loan covenant headroom: a lender compliance certificate would settle it.
- What makes up the 24,692 gap in debt due within a year: note (b) on page 404.
- When the 57,119 extra promoter shares were gained: the insider-trading disclosure.
- Whether any of the 8,786,362 shares allotted on 2026-06-29 went to promoters: the exchange allotment notice.

The storyline and the words I had to learn

Ten plain lines, each ending in an evidence id or "not in the record".

Storyline

1. Biocon reports three segments, Biosimilars, Generics and CRDMO, with total income of 172,695 million rupees in the year to 2026-03-31. (case book ch2, AR p6)
2. Revenue rose to 169,270 from 152,617 million, but profit to owners fell to 3,856 from 10,133 (year to 2026-03-31). (case book ch3)
3. Segment profit halved to 8,508 million, Generics fell to a loss of 1,348, and net one-offs were a 4,029 loss. (hearing B07)
4. Management gave no group margin or FY27 revenue guide, and the Generics guide of 10% to 12% (2025-01-31) came in at 5% for FY26, which was conceded. (hearing I3 A1, A2, WA2)
5. In the quarter to 2026-06-30 revenue grew 10.0% and margin was 19.5%, but Services fell 15.8% on a changed basis. (case book ch3; baseline WA2)
6. Operating cash fell to 19,940 from 40,612 million, mostly from stock, payables and other assets, leaving 1,961 after plant purchases (year to 2026-03-31). (hearing I5 judge close, S039 p349)
7. Overdue projects rose to 19,894 from 6,478 million at 2026-03-31, and what they are is not on record. (hearing I5 judge close, S039 pp365-367)
8. Gross borrowings fell 16.5% to 148,247 million, yet 65,476 falls due within a year against 40,784 current, a 24,692 gap with no reason

Glossary

Consolidated — the whole group added together, the company and the companies it controls.

Operating margin — operating profit divided by sales, shown as a percentage.

Guidance — a number or range a company says it expects to reach.

No-guidance rule — a company that gives no group number can still score 2 if it gives dated numeric targets for parts of the business.

Segment — one main business inside a company, with its own numbers.

Biosimilar — a medicine made from living cells that is highly

on record. (hearing I6 WA1, judge close, S039 p404)

9 Biocon paid Mylan Inc. Rs 73,560 million (Rs 36,242 million cash plus shares), with 0.81% of votes against on 2025-12-31, but no ceiling or running balance is on record. (hearing I7 judge close, S039 p394, S034)

10 The promoter stake fell from 60.64% to 44.68% by 2026-09-30 because shares were issued, pledge flags are false in 25 filings, 57,119 extra promoter shares are unexplained, and B S R & Co. LLP left a material subsidiary on 2026-08-06 with no reasons on record. (case book ch4, ch6; hearing I8 XA4, I9 WA1)

	similar to an existing biologic medicine.
CRDMO (called Services from 2026-06-30)	the Syngene business doing research, development and manufacturing for other companies.
Cross charge	a shared cost, such as utilities, split between segments; moving it changes each segment's result.
One-off (exceptional) item	a gain or cost not expected to repeat.
Minority share	the part of group profit that belongs to outside owners of subsidiaries.
Working capital	money tied up in day-to-day running, such as stock and unpaid bills.
Free cash (convict's basis)	operating cash less cash paid for plant and equipment; management has not given its own definition.
Capital work in progress	the cost of things still being built that are not yet in use.
Overdue project	a build that has passed its planned time; the report gives time buckets, not calendar dates.
Maturity table	a table showing how much debt falls due in each period.
Covenant	a promise to a lender, such as keeping debt below a limit; breaking it can let the lender demand money early.
Undrawn line	a loan facility the bank has agreed but the company has not yet used.
Preferential issue and QIP	new shares sold to chosen buyers, or to large institutions.
Dilution	a promoter's percentage falling because more shares were created, not because the promoter sold.
Pledge	shares put up as security for a loan.
Related party	a person or company closely linked to the

	company, such as an investor with influence.
Ceiling (related party)	the most a shareholder or committee approval allows for deals with a related party.
Independent director	a board member outside management and the owner group.
Key audit matter	an area the auditor found most important or difficult in the audit.
Gate	a serious red flag in this court's rule; a standing gate overrides the score.
Not in the record	the sources read for this case do not say it; it is a gap, not a finding.

Checks and gaps

What the code checks found, and what the record does not hold.

Checks that need a look

- judge-ceiling: S4: judge said 1, evidence allows 0, because the deciding question was no data
- judge-ceiling: S5: judge said 1, evidence allows 0, because the deciding question was no data
- judge-ceiling: S7: judge said 1, evidence allows 0, because the deciding question was no data
- FAIL lawyer-number Lawyer baseline: 6277 is in neither the case book nor an earlier turn
- FAIL number-date Convict baseline 1: 131 has no date, quarter or as-of word anywhere on its baseline line: B10 ANSWER: Inventor
- FAIL number-date Convict baseline 1: 118 has no date, quarter or as-of word anywhere on its baseline line: B10 ANSWER: Inventor
- FAIL number-date Convict baseline 1: 762 has no date, quarter or as-of word anywhere on its baseline line: B10 ANSWER: Inventor
- FAIL number-date Convict baseline 1: 462 has no date, quarter or as-of word anywhere on its baseline line: B10 ANSWER: Inventor
- FAIL number-date Convict baseline 1: 120 has no date, quarter or as-of word anywhere on its baseline line: B10 ANSWER: Inventor
- FAIL number-date Convict baseline 1: 60857 has no date, quarter or as-of word anywhere on its baseline line: B10 ANSWER: Inventor
- FAIL number-date Convict baseline 1: 49311 has no date, quarter or as-of word anywhere on its baseline line: B10 ANSWER: Inventor
- FAIL number-date WA1 Convict: 65476 has no date, quarter or as-of word within 80 characters
- FAIL number-date WA1 Convict: 40784 has no date, quarter or as-of word within 80 characters
- FAIL number-date WA1 Convict: 148246 has no date, quarter or as-of word within 80 characters
- FAIL number-date WA1 Convict: 148247 has no date, quarter or as-of word within 80 characters
- FAIL number-date WA1 Convict: 5121 has no date, quarter or as-of word within 80 characters
- FAIL number-date WA1 Convict: 13003 has no date, quarter or as-of word within 80 characters
- FAIL number-date WA1 Convict: 69767 has no date, quarter or as-of word within 80 characters
- FAIL number-date WA2 Convict: 7360 has no date, quarter or as-of word within 80 characters

Not in the record

- D05b Promoter annual encumbrance declarations, FY2022 to FY2026 (read by eye): scanned letters read by eye, no tier; FY2022 has no readable declaration
- D06 Related parties: policy, approvals, material transactions: annual report notes only; there is no separate related party filing in the exchange feed after 2023-11-10; see D06a and D06b for the votes and the latest approved values
- D06b Approved limits and the Mylan Inc. related party transaction (EGM notice, read by hand): read by hand from one notice, no tier
- D06c Earlier intra-group related party approvals: parties, ceilings, validity (notices, read by hand): read by hand from five notices, no tier; the transactions actually made against these ceilings are not matched to them, and whether any approval was replaced after the 48th AGM (2026-08-06) is not in the record
- D09 Debt, leverage, refinancing and rating (words): the report gives no covenant thresholds and states no undrawn committed lines (see D09a); nothing is later than 2026-03-31
- D09a Covenants, borrowings maturity and facilities (annual report FY2025-26, read by hand): read by hand, no tier; no covenant thresholds and no undrawn committed lines are stated in the report
- D10 Segment profit by quarter on a stated basis: quarter ended 2025-09-30 has no clean source (its filing is a scan with a corrupted text layer); the result measure and the segments changed over the period, and each row names the filing it is printed in
- D11 Analyst questions on the calls and how each was answered: states are one model's reading (a second blind model agreed on 23 of 30 sampled items, bar 24); only the not-fully-answered items are listed in qa-states.md
- Subject with no recorded position in the convict's record: Share buybacks
- Subject with no recorded position in the convict's record: Executive pay and succession planning
- Subject with no recorded position in the convict's record: Dividend policy
- Subject with no recorded position in the convict's record: Segment margins by geography or product
- Subject with no recorded position in the convict's record: Calls for the June 2023 and September 2024 quarters
- Subject with no recorded position in the convict's record: Analyst questions

COURTROOM CASE PAGE

BIOCON

Run date 2026-11-01 | Exchange feed to 2026-10-29

A simulation built from public filings. It is not advice and not a SEBI-registered adviser. The position says only how well the defence held up on the record.

The judge's decision

Position first, reasons next to it, limits stated.

POSITION BY THE COUNCIL'S RULE

• Wait

trust 5 is below the 18 to 21 band, so Buy is not allowed

No gate stands and a current price and the latest results are on file, but my seven scores sum to a trust of 5, below the 12 that `Wait: trust good, entry not yet` needs and the 18 that Buy needs, so the council's rule gives Wait; the trust bands are the council seat's own and untested.

Trust 5 of 21, band 0 to 6 (unanswered or declined). seat's own bands, not from any source, uncalibrated.

If you do not own it

Wait. what would change it: the decisive questions in S2, S3, S4 and S7 being answered from the annual report notes and the 2026-08-06 resignation filing, enough to lift trust toward 18 with no gate; an improving business never lifts it by itself.

If you already own it

hold and watch. what would change it: toward reduce if the subsidiary auditor's letter gives a reason other than a planned change of firm, or the covenant test as at 2026-09-30 is not reported as met; toward add only if the open decisive questions close with filed numbers.

7 of 7 sections had data. 14 gaps are listed as not in the record. 7 notes from the checks. The bands are the seat's own and untested.

Three triggers at most

- ↔ **Results filing for the quarter ended 2026-09-30 (about mid November 2026 per the convict, date unchecked, hearing I5 A1).** Check: the half-year cash flow, whether the covenant test as at 2026-09-30 was met, and quarterly finance costs against 2,132 for the quarter ended 2026-06-30.
- ↔ **The exchange filing under Resignation dated 2026-08-06 with the subsidiary auditor's letter (case book ch6).** Check: which subsidiary, and whether the exit was a planned change of firm or a reason of its own.
- ↔ **Any related party notice, postal ballot or vote dated on or after 2026-08-06, read with the FY2025-26 related party notes at PDF pages 321 and 396 with headers (hearing I7 A4, I7 Judge close).** Check: what replaced the ceilings that ran out at the 2026-08-06 AGM, the total moved, and whether 7,245 of guarantees is a balance.

Red flags raised

- Generics was guided to strong double-digit growth on 2025-08-08 and filed 5.0% for the year to 2026-03-31; no call on record withdrew the guide, and the second half shrank 2.1% while management spoke of growth traction `Q1.93` hearing I3 A4, I3 Judge note
- Management's like-to-like 13% growth has no rupee bridge to the filed 10.9%, and no filing states what it removes `Q2.1` hearing I4 A1, I4 A2
- Operating cash fell from 40,612 to 19,940 while profit before working capital fell only 6.4%; stock took 9,178 of cash and part of the stock is written down or set aside to liquidate (462, 762, 1,841) `Q3.1` case book ch9 PDF p349; hearing I5 A1, I5 WA2
- No covenant limit, actual ratio or unused credit line is printed, while 65,476 of borrowings fall due within one year against balance sheet cash of 24,165 at 2026-03-31 `Q4.3` case book ch5, ch9 PDF p404; hearing I6 A1, I6 A2
- The rise in finance costs is mostly less interest capitalised (5,884 in the year to 2025-03-31 against 1,597 in the year to 2026-03-31), so the two years' interest lines are not on one basis `Q4.92` hearing XA2
- No total of related party deals; guarantees given for a related party rose from 5,980 to 7,245 with no beneficiary named; 48.24% of public institutions' votes went against raising loan and guarantee limits on 2025-12-31 `Q5.3` hearing I7 A1, I7 WA2
- The Executive Chairperson's pay is not in the record, and 21.30% of institutions' votes went against its revision on 2026-06-08 `Q6.91` hearing I8 A2
- B S R & Co. LLP resigned as statutory auditor of a material subsidiary effective 2026-08-06; which subsidiary and why are not in the record `Q10.2` case book ch6; hearing I9 A1, I9 WA1

What this does not decide

- price against value
- the reader's own situation
- anything after the as-of dates (case book built 2026-10-30, announcements to 2026-10-29, calls to 2026-08-06, filed quarters to 2026-06-30, price week ending 2026-10-23)
- the data pack is marked BRIEF INCOMPLETE: partial D05b, D06, D06b, D06c, D09, D09a, D10, D11

- profit to owners with one-offs removed, and the tax and minority share on the one-offs (hearing I1 A1, A2)
- why the minority share lost 1,956 in the quarter ended 2025-12-31 (hearing I1 WA2)
- what the 11,345 other income in the quarter ended 2024-06-30 was (hearing I1 WA1)
- the like-to-like bridge in rupees and the Biosimilars split between units and price (hearing I2 A3, I4 A1)
- where the 24,798 moved out of intangible assets under development went (hearing I4 WA1)
- the stock split, the other assets items and trade payables (hearing I5 A1 to A4, WA1)
- covenant limits, actual ratios, headroom, unused lines and the 2026-09-30 test result (hearing I6 A1, A2)
- the related party total, the Mylan amount put to shareholders, and the approvals after 2026-08-06 (hearing I7 A1 to A4)
- the Executive Chairperson's pay and any link to the share price (hearing I8 A2 to A4, WA2)
- what created the 136,483,255 shares first counted on 2025-06-19 (hearing I8 WA1)
- the subsidiary auditor's reason, and who held the CFO seat from 2024-03-14 (hearing I9 A1, A4)
- the answer states on the calls are one model's reading, below its own check bar (case book ch8)

```
Data pack: BRIEF INCOMPLETE: partial D05b, D06, D06b, D06c,
D09, D09a, D10, D11 (see each Partial note)
```

How the defence held up. The defence held where the filings print the answer: it itemised the exceptional items to the 4,029 total (I1 A1, I4 A3), showed from filed counts that the promoter added zero shares and pledged none (I8 A1), and conceded the Generics miss plainly (Convict opening, I3 A4). It did not hold on most decisive questions: the like-to-like bridge (I4 A1), the stock split (I5 A1), the covenant limit (I6 A1), the related party total (I7 A1) and the subsidiary auditor's reason (I9 A1) all came back not in its record, often because a note or filing it named was not opened that turn. Three times it denied holding a file and then conceded it did hold it, the S024 deck (XA1), changes.md (XA4) and the finance cost basis (XA2), which corrected its own I6 A3. The SOIC lawyer's method shaped what was found: its risks-first order put cash, debt and related parties ahead of growth (Lawyer opening), its forensic gates (the cash conversion band, the 10% related party bar, the auditor amber flag) asked for figures the filings do not print, so several decisive questions could only end in not in the record (I5 Lawyer review, I7 Q1, I9 Q1), and its value chain and volume check found no split of units against price for Biosimilars (I2 Q3, I2 A3); its deleveraging check in cross produced the hearing's largest correction (X2, XA2). This is not a verdict on guilt, it is how well the defence held up on the record. This is a simulation built from public filings. It is not advice and not a SEBI-registered adviser.

Seven trust sections

Each score is 0 to 3. Code sets a ceiling from the question states. The judge may go lower, never higher.

S1 Guidance against delivery

The company says it does not guide yet gave dated numeric anchors (a mid-20s biosimilars margin band on the call held 2026-02-13, a normalised 24% on the call held 2025-08-08), and its one firm size guide, Generics strong double-digit, missed at a filed 5.0% with a stated reason, so the Chair's numeric no-guidance case sets 2; I10's follow-up questions share the ids Q2.91 to Q2.93 with I4, so they are listed once, under S2,

and in I10 they read partial, no data and no data.

Ceiling 2: states a no-guidance policy and gives another numeric anchor (council ladder, S1 special case)

S2 Earnings quality and accounting

The decisive question, the rupee bridge from filed 10.9% growth to management's like-to-like 13%, has nothing in the record, though the exceptional items total (a 4,029 loss against a 965 gain) was answered with ids and dates.

Ceiling 0: the deciding question was no data

S3 Cash, receivables, working capital

Operating cash halved and no split of the stock build, the other assets line or payables came back, so the decisive question has no data.

Ceiling 0: the deciding question was no data

S4 Debt and funding

No covenant limit or actual ratio is printed anywhere in the record, so the decisive question has no data and the stated compliance cannot be checked.

Ceiling 0: the deciding question was no data

S5 Related parties and group companies

No total of related party deals exists, only separate dated lines on two bases, so the decisive question is partial and the course's 10% test could not run.

Ceiling 1: the deciding question got words but no number

S6 Promoter: pledge, selling, succession

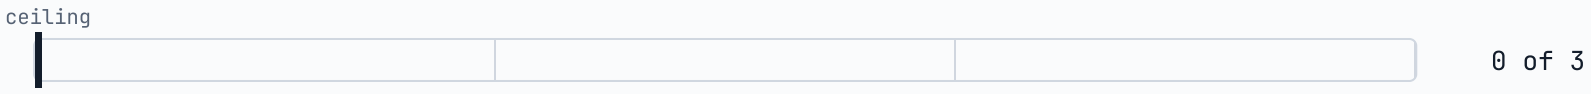

Filed counts show the promoter added zero shares in both January 2026 raises and pledged nothing, but the Executive Chairperson's pay is not in the record.

Ceiling 2: the deciding question was answered but Q6.91, Q6.92, Q6.93 was not

S7 Board, auditors, independent directors

Why the statutory auditor of a material subsidiary resigned effective 2026-08-06, and which subsidiary it was, is not in the record.

Ceiling 0: the deciding question was no data

answered · partial · deflected · no data or unverified · ceiling set by code

Direction of the business

↔ Mixed

Sales grew: revenue from operations rose from 152,617 (year to 2025-03-31) to 169,270 (year to 2026-03-31), +10.9%, filed, derived by me (case book ch3; hearing I2 A1). Biosimilars carried most of it, its four quarters adding to 104,312 against 90,174, +15.7%, derived by me (case book ch3 segments; hearing I2 Judge close). Generics looked flat at +5.0% because the year-ago quarter ended 2025-

03-31 held one-time lenalidomide sales, about 3,000 by management's own adjusted figure, no source id (hearing I3 WA1, I2 WA1). Profit fell: profit to owners went from 10,133 to 3,856, filed (case book ch3, PDF p347), because profit before tax and one-offs fell from 17,901 to 8,508 and a 4,029 one-off loss replaced a 965 gain (hearing I4 A3). Every segment result fell, Biosimilars 11,961 to 5,876, Generics 1,755 to a loss of 1,348, CRDMO 6,279 to 4,875, filed (case book ch3, PDF p413, p414); why each fell is not in the record. Part of the fall is a base effect: the year to 2025-03-31 carried other income of 11,345 in the quarter ended 2024-06-30, no source id, and without it pre-one-off profit rose from 6,556 to 8,508, derived (hearing I1 WA1). Operating profit from four filed quarters rose from 31,358 to 34,381, +9.6%, derived by me (case book ch3). Finance costs rose from 8,974 to 9,903 mostly because less interest was moved to the balance sheet, 5,884 capitalised against 1,597 (hearing XA2, S027 p386, verified by code). Cash went the other way: net cash from operations halved from 40,612 to 19,940 as working capital took 11,322 after releasing 9,230, derived (case book ch9, PDF p349; hearing I5 Judge close). The latest quarter, ended 2026-06-30, shows revenue 43,360 against 39,419, +10.0%, and operating profit 8,472 against 7,489, +13.1%, filed, on a changed segment basis (case book ch3). Growth up, profit down, cash down: mixed. Outside evidence (E001, E002) is context only and moves nothing here.

Direction describes the business. It never lifts the position.

How the SOIC lawyer asked

Every question names the course source and check it came from. The lawyer could stop an issue at 2 to 5 questions. In this run it asked 4 on every issue: its own rule allowed an early stop only once the decisive question was answered, and on no issue was it, so the freedom to ask fewer or more was not used.

40	10	4 on every issue	23	44
questions in the ten issues	issues heard	questions per issue	different SOIC source ids cited	lawyer turns incl. cross-examination

Most-cited sources: S001 (8), S066 (8), S055 (6), S052 (6), S445 (5), S039 (4).

▼ I1 Why profit rose or fell

Q1

Profit to shareholders was 10,133 million rupees in the year to 2025-03-31 and 3,856 million in the year to 2026-03-31. What was it for the year to 2026-03-31 with every one-off item removed? Give the number in Rs million and the date of the document that states it.

`S055` and `S001` , the one-offs check: read the results footnotes for fees, write-offs and impairments and strip them before reading growth. The course says an anomaly left in "inevitably guarantee a severe derating once the anomaly passes" (`S001` , HOWH 00:32:09). It applies here because the case book shows profit for the period of 8,618 against operating profit of 6,204 in the quarter ended 2024-06-30, and a loss of 518 against profit to shareholders of 1,438 in the quarter ended 2025-12-31, so the filed profit line moves apart from the operating line. The course gives no number for how large a one-off may be (checks.md entry 5 examples are EXAMPLE class, PERISHABLE). I have not checked which items were one-off; the case book holds them for some quarters only, and the holders of the minority share are not on record. DECISIVE: yes

Q2

You could not state profit to owners with one-offs removed, and said the tax on the exceptional items is not in the pages you hold. Name the document and page that print the tax on the net exceptional loss of 4,029 million rupees for the year to 2026-03-31, and give that document's date.

`S055` and `S001` , checks.md entry 5 on one-offs: strip exceptional items before reading growth, and the profit line that matters is the one the owners keep. It applies here because the filed 8,508 million before exceptional items cannot be set against the 3,856 million to owners until the tax on the exceptional items and the minority share are known. The course gives no number for how large a one-off may be. I have not checked whether the consolidated statement of profit and loss at PDF page 347 splits the tax that way; the case book holds the owners line there and no split. DECISIVE: no

Q3

You gave a net exceptional loss of 4,029 million rupees for the year to 2026-03-31. The case book shows the quarter ended 2025-12-31 with a loss for the period of 518 million against profit to shareholders of 1,438. How much of the 4,029 million was booked in that quarter? Give Rs million and the date of the filing that prints it.

`S055` and `S037` , checks.md entry 5, one-offs: read the results footnotes and strip write-offs and impairments before reading growth. I read the course as saying a year's one-offs are found quarter by quarter in those footnotes. Your last two answers were not in my record on the year's profit with one-offs removed, so my ladder step moves to the quarterly filing that would print the item. It applies here because the loss for the period and the profit to shareholders in that quarter have opposite signs, which a one-off in the loss line could explain. The course gives no number for how large a one-off may be. I have not checked which quarter carried the item, and the holders of the minority share are not on record. DECISIVE: no

Q4

You placed 2,934 million rupees of the 4,029 million exceptional loss in the quarter ended 2025-12-31 and 172 million in the quarter ended 2025-06-30, leaving 923 million for two quarters. How much exceptional loss did the filing for the quarter ended 2026-03-31 book? Give the number in Rs million and the filing date.

`S055` and `S037` , checks.md entry 5, one-offs: read the results footnotes and strip write-offs and impairments before reading growth; the green flag is growth that survives with the one-off removed. Your last answer was answered, so my ladder step is the next thing the method checks: every one-off of the year placed in a quarter, until the profit to owners can be read without them. It applies here because 923 million of the 4,029 million is still unplaced between two quarters, and the case book holds the quarter ended 2026-03-31 as an own filing with profit to shareholders of 1,259. The course gives no number for how large a one-off may be. I have not checked that filing's exceptional items line, and the holders of the minority share are not on record. DECISIVE: no

▼ I2 Where growth came from

Q1

The annual report prints total income of 172,695 million rupees and growth of 14% on a like-to-like basis, while filed revenue from operations was 169,270 million against 152,617 million. What was the like-to-like base for the year to 2025-03-31, in Rs million, and what is the date of the document that states it?

`S039` and the volume against price check (checks.md entry 7): split growth into units and realisation before trusting it. The course says "Volume is more important than value" (`S039` , MODULA 01:00:39). It applies here because the growth figure the report leads with is the company's own adjustment, not a filed number, and the case book shows the third segment renamed twice and a utilities cross charge moved between segments, so the base can move with the label. The course gives no number for how much adjustment is acceptable. I have not checked what was adjusted, how much of the growth was volume against price and mix, or whether acquisitions sit inside it; the case book holds none of these, and the quarter ended 2025-09-30 has no clean segment result. DECISIVE: yes

Q2

You do not hold the like-to-like base for the year to 2025-03-31, and the filed base gives 10.9% growth against the 14% the report leads with. Name the one document that prints the Rs million base for that year. Give its title, the page number where the base appears, and the date it was filed.

`S039` and checks.md entry 7, volume against price: split growth into units and realisation, and find where that data sits, which the course places in investor presentations and calls, not on the income statement (`S039`). It applies here because the growth figure the report leads with is the company's own adjustment, not a filed number, and your first answer says the base is not in your record. The course gives no number for how much adjustment is acceptable, so the base has to come from a named document. I have not checked what was adjusted, or how much of the growth was volume against price and mix. DECISIVE: no

Q3

Biosimilars brought in 104,312 million rupees in the year to 2026-03-31. For that segment and year, what percent of its revenue growth came from units sold, as against price and mix? Give the percent and the date of the document that states it.

`S039` and the volume against price check (checks.md entry 7): split growth into units and realisation. The course says "Volume is more important than value" (`S039` , MODULA 01:00:39), and puts the data in investor presentations and calls, not on the income statement. It applies here because your last two answers leave the like-to-like base open, so that figure cannot be tested yet; the unit and price split can be asked on its own, and Biosimilars is the largest segment in the case book. Entry 7 states no volume bar for a medicines company, so I name none. I have not checked how much of the growth was units, and the quarter ended 2025-09-30 has no clean segment result. DECISIVE: no

Q4

You hold no Biosimilars unit growth figure for the year to 2026-03-31. The case book shows page 6 of the annual report prints 104,312 million rupees for that segment. On which page of that report does the management discussion give Biosimilars volume or unit growth, and what is the date on the report's cover letter?

`S039` and the volume against price check (checks.md entry 7): split growth into units and realisation. The course says "Volume is more important than value" (`S039` , MODULA 01:00:39). Your last answer was not in my record, so my ladder step is to ask which document would hold the figure. You named the results presentation or the annual report management discussion but gave no page. It applies here because the report leads with a segment total and the 14% like-to-like growth, and neither is a unit count. Entry 7 states no volume bar for a medicines company, so I name none. I have not checked any page of the report for units sold. DECISIVE: no

▼ I3 Guidance against delivery

Q1

For the year to 2026-03-31, name the one numeric target you stated most firmly on a call. Give the measure, the figure you gave and the date of the call.

`S066` and checks.md entry 52, guidance against outcome: compare what management said with what happened. The course puts it as "whether they are walking the talk or not" (`S066` , MODULE 00:19:20, lesson date 2026-07-27). It applies here because the case book holds the outcome (revenue from operations 169,270 million rupees against 152,617, profit to shareholders 3,856 against 10,133) but holds no management guidance, so the promise has to come from you first. The course states no number for how much a miss may be, and I have not checked what was guided or whether it was met. DECISIVE: yes

Q2

You gave an EBITDA margin of 22% to 23% on the call held 2025-01-31 and named no year. If that covered the year to 2025-03-31, what margin did the company report for that year on the same measure? Give the figure and the date of the document that prints it.

`S066` and checks.md entry 52, guidance against outcome: compare what management said with what happened, over several years, not one year only. The course puts it as "whether they are walking the talk or not" (`S066` , MODULE 00:19:20, lesson date 2026-07-27). It applies here because your first answer covered the year to 2026-03-31 only, and a single kept year cannot show a pattern. The course states no number for how far a miss may run, and I have not checked what was guided or delivered for the year to 2025-03-31. DECISIVE: no

Q3 The 26% biosimilars EBITDA margin for the year to 2026-03-31 has no named document in your record. Which document prints it? Give its title and its release date, so a reader can set it beside the mid-20s you guided on the call held 2026-02-13.

`S066` and checks.md entry 52, guidance against outcome: compare what management said with what happened, and take the outcome from a document that can be found. The course puts it as "whether they are walking the talk or not" (`S066` , MODULE 00:19:20, lesson date 2026-07-27). It applies here because your Q2 answer left the year to 2025-03-31 not in your record, so the one guided year with an outcome rests on a deck figure that the case book does not hold and your record does not name. The course states no number for how far a miss may run, and I have not checked the deck. DECISIVE: no

Q4 On the call held 2025-08-08, management guided Generics to strong double-digit growth for the year to 2026-03-31. The filed figure is +5.0%. On which call did management first say that guide would not be met? Give the growth figure it gave instead and the date of that call.

`S066` and checks.md entry 52, guidance against outcome: compare what management said with what happened, over several years, and the course puts it as "whether they are walking the talk or not" (`S066` , MODULE 00:19:20). The check's red flag is guidance missed, and its green flag is guidance that was met. It applies here because your answers on the biosimilars margin left the outcome document and the year to 2025-03-31 not in your record, so the one guided year I can still test rests on a deck figure I cannot find. The Generics pair is already in your opening: a guide, a date and a filed outcome. The course states no number for how far a miss may run, and I have not checked whether management revised the guide. DECISIVE: no

▼ I4 Earnings quality and measure changes

Q1 The annual report prints total income of 172,695 million rupees, up 14% like-to-like. Filed revenue from operations moved from 152,617 to 169,270. What amount in Rs million separates the filed basis from the like-to-like basis, and what is the date of the document that states it?

`S005` and `S010` , checks.md entry 6, adjusted or normalised figures: test any adjusted number for a stated basis. The green flag in that entry is an adjustment that can be traced to a filed line; the entry is class EXAMPLE and PERISHABLE for its cases and gives no haircut percentage. It applies here because the case book shows the headline growth is a like-to-like figure, which its glossary calls the company's own choice and not a filed number, and shows the third segment renamed twice (Research services, CRDMO, Services) with a utilities cross charge moved in the quarter ended 2026-06-30. I have not checked what the like-to-like basis removes; the report pages read do not say. DECISIVE: yes

Q2 You said the page that defines like-to-like is not in your record. Which one document lists what the 13% operating revenue and the 14% total income like-to-like figures remove, in Rs million? Give its name, its page and its filing date.

`S005` and `S010` , checks.md entry 6, adjusted or normalised figures need a disclosed basis. I read the course as saying: an adjusted figure is only as good as the filed line it can be traced to, and the entry is class EXAMPLE, PERISHABLE for its cases, with no haircut percentage stated. Your last state was not in my record, so my ladder step is to ask which document would hold it. It applies here because the case book prints 14% on total income of 172,695 and your answer holds 13% on operating revenue, two growth figures for one year, while filed revenue from operations moved from 152,617 to 169,270. I have not read any document that states the basis. DECISIVE: no

Q3 Profit before tax and before exceptional items was 8,508 million for the year to 2026-03-31, down from 17,901, while profit to owners was 3,856 against 10,133. What total of exceptional items did the statement of profit and loss charge for the year to 2026-03-31, in Rs million? Give the date of the document that prints it.

`S037` and `S055` , checks.md entry 5, one-offs booked in revenue, other income or exceptional items: read the results footnotes and strip the one-offs before reading growth or profit. I read the course as saying: lawsuit compensation, write-offs and impairments skew the bottom line and need a manual adjustment (`S037`). The entry is class EXAMPLE and PERISHABLE for its cases, and the course states no cut for how large a one-off may be. Your last state was not in my record on the like-to-like bridge, and I have asked which document holds it twice, so I apply the same ladder step to the next thing the method checks. It applies here because the case book shows the segment total equals profit before exceptional items, and does not print the exceptional line itself. The gap between 8,508 and 3,856 also includes tax and other lines, so I do not read it all as one-offs. I have not checked the statement. DECISIVE: no

Q4 Additions to intangible assets under development were 1,053 million in the year to 2026-03-31, against 2,311 a year earlier. How much of the 1,053 was product development cost taken to the balance sheet instead of through research and development expense? Give Rs million and the date of the document that prints it.

`S051` and `S415` , checks.md entry 10, expense capitalisation: read how much development cost is capitalised against how much is expensed. I read the course as treating capitalised research and development as aggressive and favouring cost expensed upfront; the entry states no numeric cut. Your last state was answered (the exceptional items total), so my ladder step is the next check on this issue. It applies here because the case book shows research and development expense after recovery of 9,821 million for the year to 2026-03-31, and shows additions to intangible assets under development without a label saying what they were. Borrowing cost capitalised is also nil against 1,782 the year before. The like-to-like bridge from my first question is still not in your record, so I cannot rest on this issue. I have not read the note that splits the additions. DECISIVE: no

▼ I5 Cash and working capital

Q1 Net cash from operating activities fell from 40,612 million rupees in the year to 2025-03-31 to 19,940 million in the year to 2026-03-31, and inventories took 9,178 million of cash against 3 million the year before. How much of that 9,178 million is stock built for products not yet on sale? Give the number in Rs million and the date of the document that states it.

`S001` and `S348` , the cash conversion check (checks.md entry 1) and the inventory build warning. The course sets the cash gate as operating cash flow against EBITDA at about 70 percent for consumer-facing businesses and 60 percent for B2B (`S001` , MODULB 01:58:04, RULE, dated 2026-07-28), and treats a falling trend as the early warning. It also warns: "cash flow from operations turned negative because inventories increase drastically" (`S348` , AGROCG 00:14:43). It applies here because operating profit before changes in working capital moved only from 35,978 to 33,688 while cash generated from operations moved from 45,208 to 22,366, so the drop sits in working capital. I have not checked the year's EBITDA, so I do not state a ratio. The course gives no receivable days bar for normal (rules.md B4 asks for a peer comparison), and receivable days are not in the record, so I cannot test that leg and ask only about stock. DECISIVE: yes

Q2

You said the split of the inventory build is not in your record. Which document would print inventories at 2026-03-31 split into raw materials, work in progress and finished goods? Give its PDF page number and the date it was filed.

`S050` and `S036` , checks.md entry 24 (the working-capital cycle) beside entry 1 (cash conversion, `S001`). I read the course as saying: look at inventory days with receivable and payable days, and treat a fall in operating cash with an inventory build as a red flag (`S348`). The course gives no inventory days bar, only dated examples marked perishable. It applies here because your answer shows inventories at 60,857 million at 2026-03-31 against 49,311 million at 2025-03-31, a rise of 11,546 million, and also write-downs. Only the split tells a reader whether the stock is for launches or may not sell. Receivable days are not in the record, so I do not ask about that leg. DECISIVE: no

Q3

You gave the document but not the figure. Of the inventories of 60,857 million at 2026-03-31, how many million rupees were finished goods? Give that one number and the date of the document that prints it.

`S050` and `S348` , the working-capital cycle (checks.md entry 24) beside cash conversion (checks.md entry 1). I read the course as saying: a fall in operating cash with an inventory build is a red flag, and only the make-up of the stock shows whether it is saleable. Your last answer was partial: you named the annual report for the year to 2026-03-31 but gave no split and no page. Inventories rose by 11,546 million between 2025-03-31 and 2026-03-31 (your own derived figure), so finished goods is the one line that bears most on whether the build is stock waiting for sale. The course gives no inventory days bar, and receivable days are not in the record, so I ask about stock only. DECISIVE: no

Q4

Increase in other assets took 6,471 million of cash in the year to 2026-03-31, against 2,057 million the year before. What was the largest single item in that 6,471 million? Give it in Rs million and the date of the document that prints it.

`S050` and `S055` , the working-capital cycle (checks.md entry 24) beside cash conversion (checks.md entry 1). I read the course as saying: a fall in operating cash is a major red flag when profit before working capital holds up, and every working-capital line that absorbed cash must be explained, including loans slipped into operating items, which the course says are found in footnotes. It applies here because you have now said three times (A1, A2, A3) that the split of the 9,178 million inventory build is not in your record, so I do not ask a fourth time and I leave that leg open. The other large drag on cash in the year is other assets, up from 2,057 to 6,471 million, and nothing yet explains it. Receivable days are not in the record, so I do not ask about that leg. I have not checked what the item is. DECISIVE: no

▼ I6 Debt, maturities and covenants

Q1

Your annual report says the group complied with its debt covenants all year and sees no difficulty at the next test as at 2026-09-30, but prints no limit. What is the highest net debt to EBITDA ratio your lenders allow at that test?

`S001` (F38 TVGP, risks first: debt against EBITDA) and `S445` (checks.md 20, a debt claim must be matched to measured figures). The case book names six covenant ratios, net debt to EBITDA first, with no limit and no actual value, so "complied" cannot be checked and headroom cannot be worked out. The course gives no covenant limit of its own, so the limit has to come from the facility agreements. DECISIVE: yes

Q2

You said the highest net debt to EBITDA ratio your lenders allow sits in the facility agreements, which are not in your record. Which filed document, such as a rating letter or a lender certificate, states it? Give the filing date and the page.

`S445` (checks.md entry 20) and `S001` (F38 TVGP, risks first: debt against EBITDA). A debt claim has to be matched to measured figures, and "no difficulty at the next test" cannot be matched without the limit and the actual ratio. Your last state was not in my record, so my ladder step is to ask which document would hold it. The case book lists credit rating events in the exchange feed, for example on 2025-12-16, only as one-line summaries; I have not checked whether any of those documents states a limit. DECISIVE: no

Q3

Gross borrowings fell from 177,555 to 148,247 million, yet finance costs rose from 8,974 to 9,903 million. What was the cash paid to repay borrowings, as the cash flow statement prints it for the year to 2026-03-31, in Rs million, as one number?

`S445` (checks.md entry 20, deleveraging claims: interest, borrowings and repayment must agree) and `S001` (F38 TVGP, risks first: debt against EBITDA). Your last two answers left the covenant limit not in your record, so I move to the check the filed figures can settle. The case book shows the debt fall and the interest rise but no repayment outflow, so the claim cannot be matched. I have not checked whether the fall came from repayment, conversion or exchange rates. DECISIVE: no

Q4

You said the repayment of borrowings line is not in your record and that the cash flow statement sits on PDF page 349. Which filed document prints the financing section of that statement for the year to 2026-03-31? Give the filing date of that document and the page number of the repayment line.

`S445` (checks.md entry 20, deleveraging claims: interest, borrowings and repayment must agree) and `S001` (F38 TVGP, risks first: debt against EBITDA). Your last answer was not in my record, so my ladder step is to ask which document would hold it. The fall in gross borrowings from 177,555 to 148,247 million cannot be matched to a repayment outflow without that line, and the covenant limit is also still open from your first two answers. I have not checked what the financing section prints. DECISIVE: no

▼ I7 Related parties and group structure

Q1

Your record names approved ceilings for related party deals, but a ceiling is not an amount moved, and PDF page 396 has no total row. What was the total value of related party transactions actually made in the year ended 2026-03-31, in Rs million, as one number?

Related-party check, rules.md B2 (RULE, lesson date 2026-07-27): "Anything more than 10% should be viewed with suspicion." (`S066` , MODULJ 00:11:24). The bar is set against sales, and the course's second bar is against profit after tax (`S068` , MODULJ 00:11:01). Both need the amount actually moved. Here the record holds ceilings and revenue from operations of 169,270 but no matched amount, so the 10% test cannot be run. DECISIVE: yes

Q2 Mylan Inc. is on the related party list at PDF page 396 until 2026-01-21, but that table has no Mylan row. What amount in Rs million does the annual report for the year ended 2026-03-31 record as transacted with Mylan Inc. as a related party, and as of what date?

Related-party check, checks.md entry 12 and rules.md B2 (RULE, lesson date 2026-07-27): "Anything more than 10% should be viewed with suspicion." (`S066` , MODULJ 00:11:24). The method says to walk the related-party note line by line. Your last answer was partial: no total, and the one large line you left out of any sum is not yet tied to a named party. The Mylan Inc. purchase of 2025-12-06 is the largest flow in the record with a party the report itself names as related, and it is settled in cash of 36,242 million plus an allotment of shares. The 10% test needs the amount moved set against sales. I have not decided whether this purchase counts as a transaction for that test, and I have not checked the Mylan figure against any filing. DECISIVE: no

Q3 Resolution 6 at the meeting dated 2025-12-31 put the Mylan Inc. related party transaction to a vote. What amount in Rs million did the explanatory statement in that notice give for it, and what was the date of the notice?

Related-party check, checks.md entry 12 and rules.md B2 (RULE, lesson date 2026-07-27): "Anything more than 10% should be viewed with suspicion." (`S066` , MODULJ 00:11:24), with the second bar against profit after tax (`S068` , MODULJ 00:11:01). Your last answer was partial: the filed note prints no Mylan amount, and the nearest figures are the share purchase price of 73,560 million and cash of 36,242 million. My method asks for the number and the date, and the notice is the document that should hold the amount put to shareholders. I have not read the notice, and I have not decided whether this purchase counts for the 10% test. DECISIVE: no

Q4 The approvals you listed ran out at the 48th AGM held 2026-08-06, and you named no document for what replaced them. Which filing holds the related party ceilings in force after that meeting, and what is its date?

Related-party check, checks.md entry 12 and rules.md B2 (RULE, lesson date 2026-07-27): "Anything more than 10% should be viewed with suspicion." (`S066` , MODULJ 00:11:24). The method walks the related-party record line by line, and the 10% test needs a ceiling and an amount moved that are both in force. Your last answer was not in my record for the Mylan Inc. amount, so I ask which document would hold the next gap: the ceilings that followed the ones that ended on 2026-08-06. I have not seen that document and I have not decided what it shows. DECISIVE: no

▼ I8 Promoter holding, pledge, dilution and pay

Q1 The promoter group's stake fell from 60.64% on 2025-03-31 to 44.91% on 2026-03-31, with its share count unchanged at 728,024,176. How many shares did the promoter group buy or subscribe for in cash in the 2026-01-05 preferential issue or the 2026-01-14 qualified institutional placement? Give the number and the date.

`S467` and the course's check on promoter buying, selling, warrants and incentives (checks.md entry 34). The course reads a promoter taking part in a raise as a favourable sign: "to show confidence in the company and to infuse more money" (`S467` , SOICD3 01:06:17). It applies here because the case book shows the promoter percentage falling only because the total share count grew, and the 171,279,553 shares allotted on 2026-01-05 went to four named holders. The pledge part is already covered: the pledged flag reads false in all 25 filings that carry one, and the annual declarations for FY2023 to FY2026 say no encumbrance. The course states no cut for a stake change and treats participation as a green flag, not a requirement. I have not checked any route other than these two raises, the FY2022 declaration has no readable text, and FII and DII flows are not in the record. DECISIVE: yes

Q2 The case book names Kiran Mazumdar-Shaw, a promoter, as Executive Chairperson. What was her total remuneration for the year to 2026-03-31, in Rs million, and on what date was the document that prints it filed?

`S434` and checks.md entry 34, promoter buying, selling, warrants and incentives: read the promoter's pay beside the stake. The course lists pay tied to market cap as a red flag that can lead to "fudging of numbers" (`S434`). It applies here because your last answer shows the promoter group put in no shares in either raise, so its stake fell to 44.91% by dilution alone, and what keeps it aligned is its pay, which the case book does not hold. The course states no cut for pay. I have not checked the pay, how it is set, or FII and DII flows (E13, not in the record). DECISIVE: no

Q3 You said Kiran Mazumdar-Shaw's total pay for the year to 2026-03-31 is not in your record. Name the one document that prints it, with the section or page where the table sits, and give the date that document was filed with the exchange.

`S434` and checks.md entry 34, promoter buying, selling, warrants and incentives: the course lists pay tied to market cap as a red flag that can lead to "fudging of numbers" (`S434`). Your last answer was not in my record, so my method asks which document would hold it. It applies here because the promoter group's stake fell by dilution alone, so pay is the one alignment signal still open. The case book names the annual report, with a cover letter dated 2026-07-15, and the vote of 2026-06-08, but I have not read either. The course states no cut for pay. FII and DII flows are not in the record, and the FY2022 declaration has no readable text. DECISIVE: no

Q4 You named the annual report for the year to 2026-03-31 as the place for Kiran Mazumdar-Shaw's pay, but gave no amount. The shareholder vote dated 2026-06-08 revised that pay. What is the revised amount of her remuneration, in Rs million, and what is the date of the notice that states it?

`S434` and checks.md entry 34, promoter buying, selling, warrants and incentives: read the promoter's pay beside the stake. The course lists pay tied to market cap as a red flag that can lead to "fudging of numbers" (`S434`). Your last answer was partial: you named the document but gave no amount, so my method asks for the number and the date. It applies here because the promoter group put no shares into either raise and its stake fell by dilution alone, so pay is the one alignment signal still open. The course states no cut for pay or for a stake change. I have not read the notice or the annual report. FII and DII flows are not in the record, and the FY2022 declaration has no readable text. DECISIVE: no

▼ I9 Board, auditors and independent directors

Q1 Give the written reason B S R & Co. LLP gave when it resigned as statutory auditor of the material subsidiary, effective 2026-08-06, and the date your audit committee received that letter.

`S052` , the auditor and key-management exits check (checks.md entry 13, rules.md B6): a mass exodus of auditors or key managers is an "amber flag" (`S052` , MODULE 00:01:10). Class RULE for the flag colour; the entry I read gives no lesson date and no count. Here the record shows the parent's own auditor term ending at the 48th AGM, a new auditor proposed, a CEO, CFO and company secretary all changed in the last year, and now this exit on the same date as the AGM. The course says to read the cause, so this reason decides how far the board's oversight can be trusted. I have not checked the letter itself. DECISIVE: yes

Q2 You said the auditor's letter and the audit committee minute are not in your record. Name the one exchange filing that would hold the resignation letter of B S R & Co. LLP: its category as the exchange feed lists it, and its filing date.

`S052` , the auditor and key-management exits check (checks.md entry 13, rules.md B6): an exit is an "amber flag" (`S052` , MODULE 00:01:10), class RULE for the flag colour, no count given. Your last answer was not in my record, so my method asks which document would hold it. The case book lists two entries dated 2026-08-06 on this exit, one under Change in Auditors and one under Resignation, and the resignation entry names only a material subsidiary. I have not read either filing. DECISIVE: no

Q3 Count the people who held the CFO role from the resignation filing of 2024-03-14 to 2026-04-01, and give the date the first of them took over.

`S052` and `S116` , the auditor and key-management exits check (checks.md entry 13, rules.md B6): track resignations of the auditor, CFO, MD and independent directors over several years; an exit pattern is an "amber flag" (`S052` , MODULE 00:01:10), and a CFO resigning three times in a year plus an auditor resignation was called "very risky" (`S116` , FRAMEA 00:48:05). Class RULE for the flag colour; the entry gives no count and no lesson date. Your last two answers were not in my record on the auditor's letter, and you named the exchange announcement list as the place it sits, so I leave that open and move to the next thing my method checks. The case book shows a CFO resignation filed on 2024-02-08, another on 2024-03-14, an interim CFO who stepped down on 2026-03-31, and a new CFO from 2026-04-01. I am not saying the `S116` case matches this one. DECISIVE: no

Q4 The annual report shows Mukesh Kamath as Interim CFO until 2026-03-31, after the CFO resignation filed on 2024-03-14. Name the document that states the date he took the interim role, and give that start date.

`S052` and `S116` , the auditor and key-management exits check (checks.md entry 13, rules.md B6): the course reads a run of senior exits as an amber flag, class RULE for the flag colour, and sets a CFO leaving repeatedly beside an auditor exit as a case it called very risky. The entry gives no count and no lesson date. Your last answer was partial: you gave the end of the interim term but not its start, so my method asks for the date in my own words. The start date fixes how long the CFO seat was filled on an interim basis, which is the part of the pattern still open. I am not saying the `S116` case matches this one. I have not read any filing. DECISIVE: no

▼ I10 What management declines, defers or will not disclose

Q1 On the calls up to 2026-08-06, name the one analyst question where management gave no number, though a number was asked for. State the figure the analyst asked for, in Rs million or per cent, and the date of that call.

`S283` and `S417` , checks.md entry 53, disclosure gaps: notice what the company stopped saying or would not say. The course says to "take everything that the management says with the bucket full of salt" (`S283`), so a declined number counts for more than a given one. It applies here because the case book shows the annual report prints no covenant threshold and no undrawn committed line, so I want to know what was asked and not answered on the calls. The course states no count for how many declined answers is too many. I have not checked any call text; the case book holds no management answer, and the answer states in the record are one model's reading. DECISIVE: yes

Q2 On the 2025-01-31 call an analyst asked for the amount that could be put back within FY 2026, and management gave no quantification. State the unit and any figure the analyst named in that question, and give the call date.

`S283` and `S417` , checks.md entry 53, disclosure gaps: notice what management would not say. Your last answer was partial, so my method asks for the number and the date. The course states no count of declined answers that is too many. The case book shows borrowings that were tied to lender put options, 20,913 at 2025-03-31 and nil at 2026-03-31, but I do not know whether the analyst meant those, and I have not read the call text. DECISIVE: no

Q3 Management gave no quantification on the call held 2025-01-31. On which later call, up to 2026-08-06, did management first state any figure for borrowings that lenders could require back early under put options? Give the figure in Rs million and the call date.

`S283` and `S417` , checks.md entry 53, disclosure gaps: notice what the company stopped saying, and whether a gap was later closed. Your last two answers were partial, so my method asks for the number and the date. The case book shows borrowings tied to lender put options of 20,913 at 2025-03-31 and nil at 2026-03-31, which are filed annual report figures, not management words. The course states no count of declined answers that is too many. I have not read any call text. DECISIVE: no

Q4 You say no call up to 2026-08-06 carries a management figure for borrowings that lenders could require back under put options. Which one document would hold that figure: its name, its exact date, and the figure in Rs million that it should show?

`S283` and `S417` , checks.md entry 53, disclosure gaps: notice what the company stopped saying, and where a gap could be closed. Your last answer was not in my record, so my method asks which document would hold it. You named the transcript of the call held 2025-01-31 and the borrowings note of the annual report for the year ended 2026-03-31. I want the one you would open first, and its date. The case book prints 20,913 at 2025-03-31 and nil at 2026-03-31 for debentures tied to lender put options, as filed figures and not as management words. The course states no count of declined answers that is too many. I have not read any call text. DECISIVE: no

▼ Cross

X1 In I4 A1 and A2 you said you hold no id for the Q4 FY26 deck and no like-to-like line beyond the 13%, yet in I2 WA1 you named that deck as S024, held 2026-05-08, excluding one-time lenalidomide sales. Which stands, and what Rs million does S024 remove from the year to 2025-03-31?

I4 A1 and I4 A2 against I2 WA1. I4 A1 and A2 put the Q4 FY26 results deck outside the record (id not held) and said the only like-to-like line held is the 13% on operating revenue, with no amount; I2 WA1 cites `S024` as the Q4 FY26 deck held 2026-05-08, carrying an exclusion of one-time lenalidomide sales, and sizes it at about Rs 300 crore for the year to 2025-03-31 from record.md with no source id (also I2 A1). The SOIC check this breaks is checks.md entry 6, normalised against reported figures needs a disclosed basis (`S005` and `S010` , lesson date 2026-07-14, class EXAMPLE, PERISHABLE for its cases, no haircut percentage stated): I read its green flag as an adjustment that traces to a filed line, and its red flag as an adjusted figure taken at face value. Today the like-to-like 13% has no traced amount, and the one named item rests on a deck the convict both cites and says it does not hold. I have not read `S024` ; whether it prints an amount is unchecked. DECISIVE: no

X2

In I6 A3 you took the rise in finance costs from 8,974 to 9,903 as interest on debt; the case book prints borrowing cost capitalised at 1,782 for the year to 2025-03-31 and nil a year later. Which reading stands? Give the group's total borrowing cost capitalised that year, in Rs million, and its filing date.

I6 A3 against the case book's chapter 9 line on intangible assets under development (borrowing cost capitalised nil for the year to 2026-03-31, 1,782 for the year to 2025-03-31, PDF pages 365 to 367), read with I4 A4. In I6 A3 you accepted the full-year rise from 8,974 to 9,903 as real interest and put the saving in FY27; in I4 A4 you answered only on the 1,053 of additions, and the 1,782 that I4 Q4 named was not addressed. The SOIC check this gap breaks is checks.md entry 20 (`S445` , note dated 2026-07-27, class EXAMPLE for its one stated case, no number given for the test itself): a deleveraging reading needs interest cost, borrowings and repayment to move the same way, and that comparison only works if the two years' interest lines are on one basis. If part of the year to 2025-03-31 interest went to the balance sheet, the 8,974 understates that year's cost, and the year-on-year rise is partly a change in treatment, not in debt. The same reading sits under checks.md entry 10 (`S051` and `S415` , notes dated 2026-07-27 and 2026-07-26), which flags profit lifted by moving cost to the balance sheet and states no numeric cut; that entry names research and development and pre-operating cost, not borrowing cost, so applying it here is my reading, not a course line. A second reason the bases differ: in I4 A3 you quoted a note placing bridge financing cost and additional finance cost to settle lenders inside the 2,102 of exceptional items, outside the finance costs line, with no amount for those two parts. I have not read the borrowing costs note or the capital work in progress note, so whether any borrowing cost was capitalised outside intangibles under development is unchecked. DECISIVE: no

X3

In I2 A3 you quote Kedar Upadhye on the call held 2025-01-31, yet in I9 A4 and WA2 you say no file you hold names who held the CFO role between 2024-03-14 and 2026-03-31. Which stands? Give the role your call record prints for him, the number of calls you hold him on, and the earliest call date.

I2 A3 against I9 A4 and I9 WA2. I2 A3 cites `S008` with Kedar Upadhye speaking on the call held 2025-01-31, and I3 A2 and I10 A1 cite him on the call held 2025-08-08. I9 A4 says none of its files names who held the CFO role in that window, and I9 WA2 says no CFO appointment or resignation is dated in it. The SOIC check this gap breaks is checks.md entry 13 with rules.md B6: track the CFO, MD, auditor and independent directors over several years; a run of exits is an "amber flag" (`S052` , MODULE 00:01:10), class RULE for the flag colour only, note dated 2026-07-27, and the course states no count. The same entry's green flag is a stable CFO and senior directors across a decade (`S298` , note dated 2026-07-28, no number given). Both tests need the CFO run, and I9 Q3 stayed partial for want of it. If your own call record puts a finance officer on the calls inside that window, the window is not empty in your record. I am not saying he held the parent's CFO role: I9 A3 quotes the report naming him CFO of BBL when he was appointed to the parent's role from 2026-04-01. I have not read any call text or its speaker list.

X4

In I9 A2 you say your changes.md logs announcements to 2026-10-25; in I9 WA2 you say you hold no exchange feed. Which stands? If changes.md stands, how many auditor entries does it list from 2026-05-07 to 2026-08-06, and on what date was the subsidiary auditor's resignation filed?

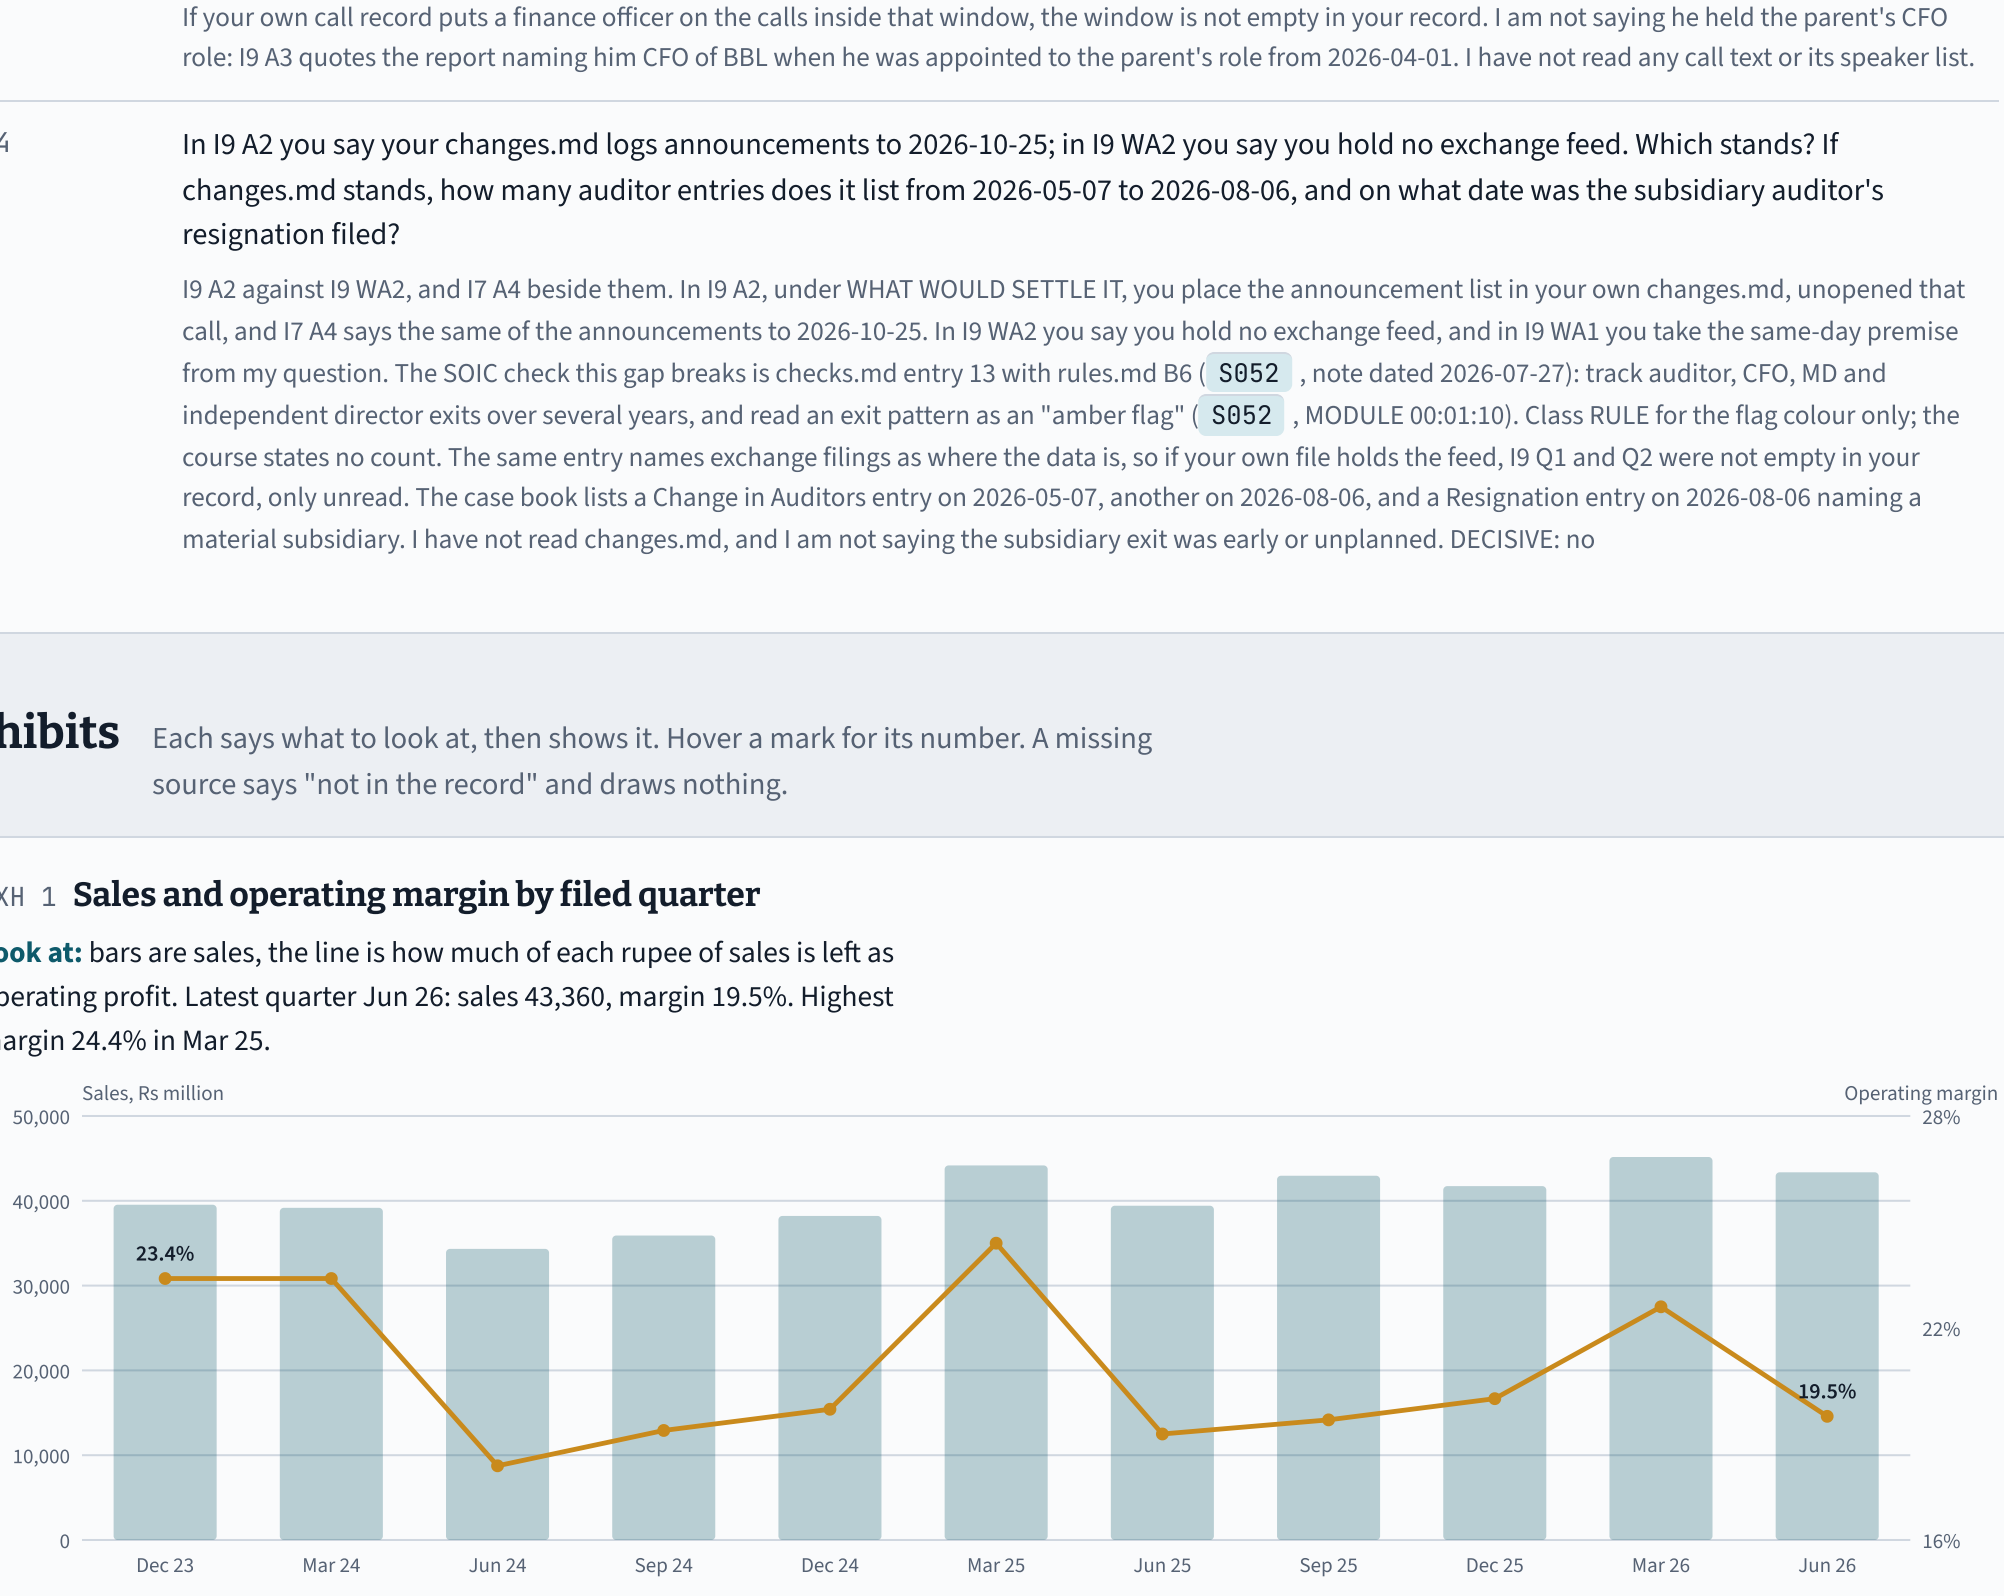

I9 A2 against I9 WA2, and I7 A4 beside them. In I9 A2, under WHAT WOULD SETTLE IT, you place the announcement list in your own changes.md, unopened that call, and I7 A4 says the same of the announcements to 2026-10-25. In I9 WA2 you say you hold no exchange feed, and in I9 WA1 you take the same-day premise from my question. The SOIC check this gap breaks is checks.md entry 13 with rules.md B6 (`S052` , note dated 2026-07-27): track auditor, CFO, MD and independent director exits over several years, and read an exit pattern as an "amber flag" (`S052` , MODULE 00:01:10). Class RULE for the flag colour only; the course states no count. The same entry names exchange filings as where the data is, so if your own file holds the feed, I9 Q1 and Q2 were not empty in your record, only unread. The case book lists a Change in Auditors entry on 2026-05-07, another on 2026-08-06, and a Resignation entry on 2026-08-06 naming a material subsidiary. I have not read changes.md, and I am not saying the subsidiary exit was early or unplanned. DECISIVE: no

Exhibits

Each says what to look at, then shows it. Hover a mark for its number. A missing source says "not in the record" and draws nothing.

EXH 1 **Sales and operating margin by filed quarter**

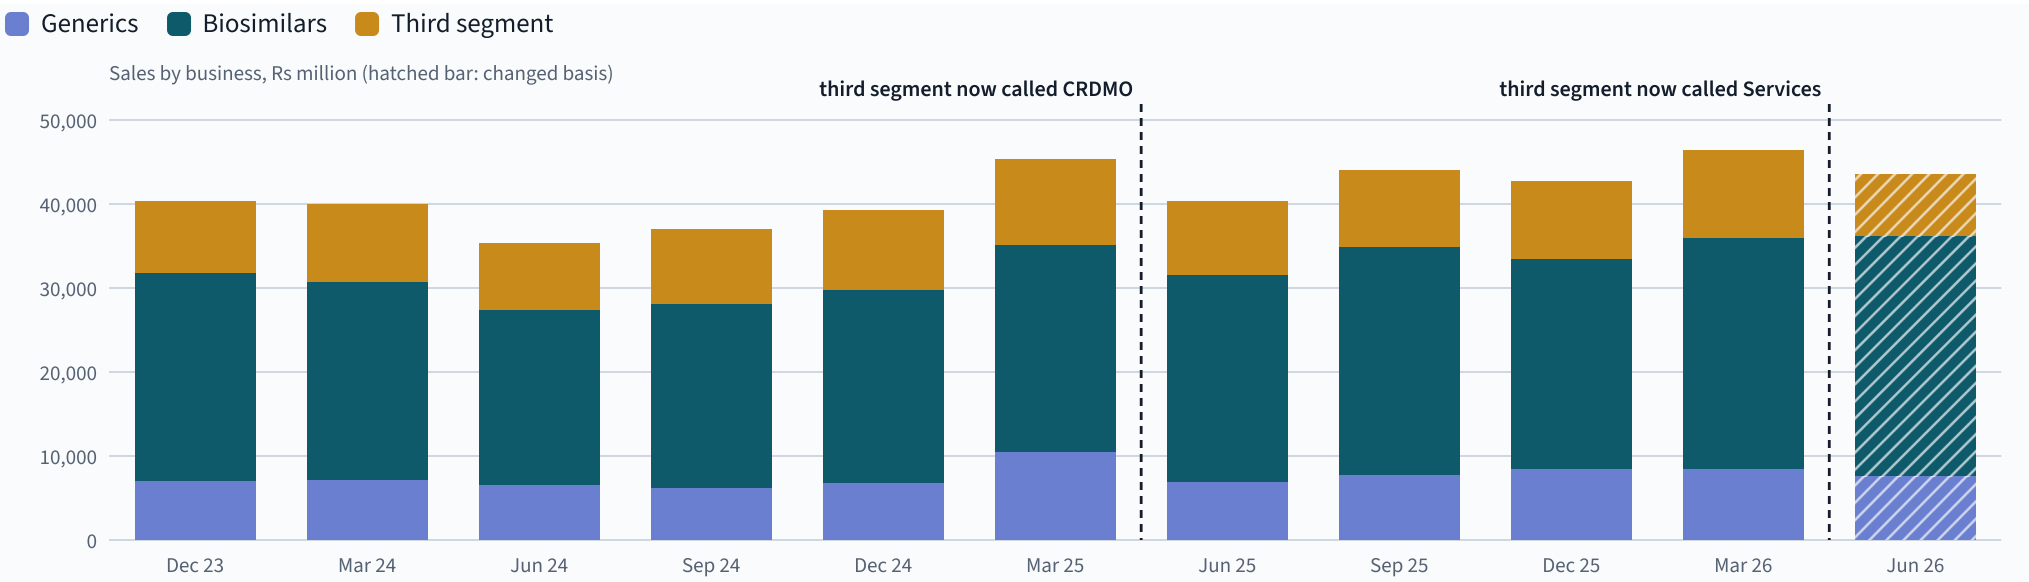

Look at: bars are sales, the line is how much of each rupee of sales is left as operating profit. Latest quarter Jun 26: sales 43,360, margin 19.5%. Highest margin 24.4% in Mar 25.

Case book, filed quarters, Rs million, consolidated. Margin is operating profit over revenue, derived.

EXH 2 **Where the sales come from**

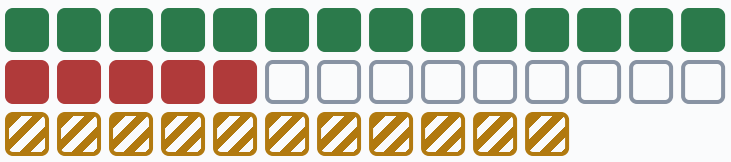

Look at: the three businesses stacked. **Do not compare across a dashed line.** Jun 25: third segment now called CRDMO; Jun 26: third segment now called Services.

Case book, segments table, Rs million as filed. Do not compare across a dashed line: the segment was renamed or its basis changed.

EXH 3 Promises kept and missed

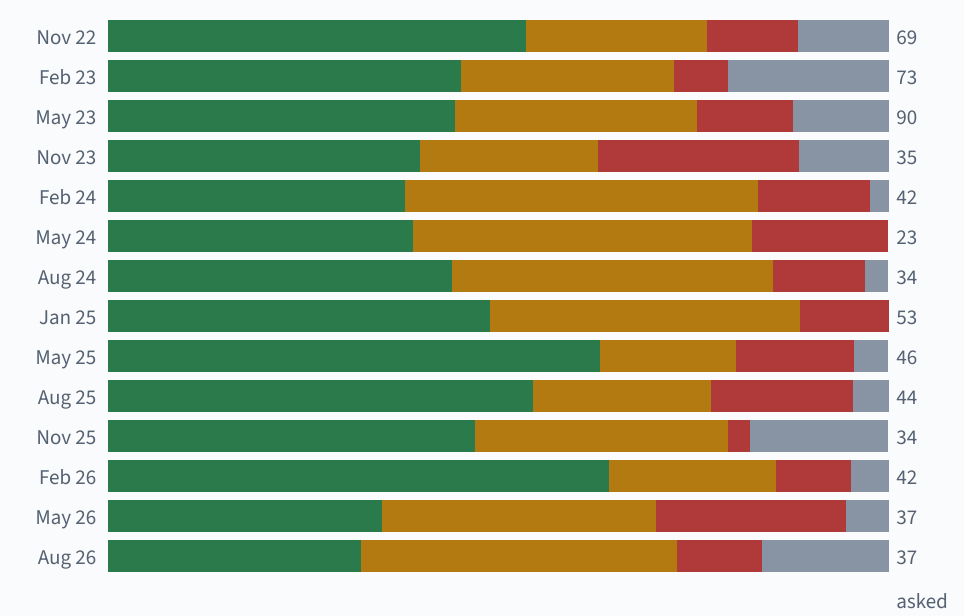

Look at: 39 statements, one square each. 14 kept, 5 missed, 9 still open, 11 depend on how they are read.

The company seat's scorecard. It counts dated product, segment and capacity statements, not group ranges unless it says so.

EXH 4 How questions on each call were answered

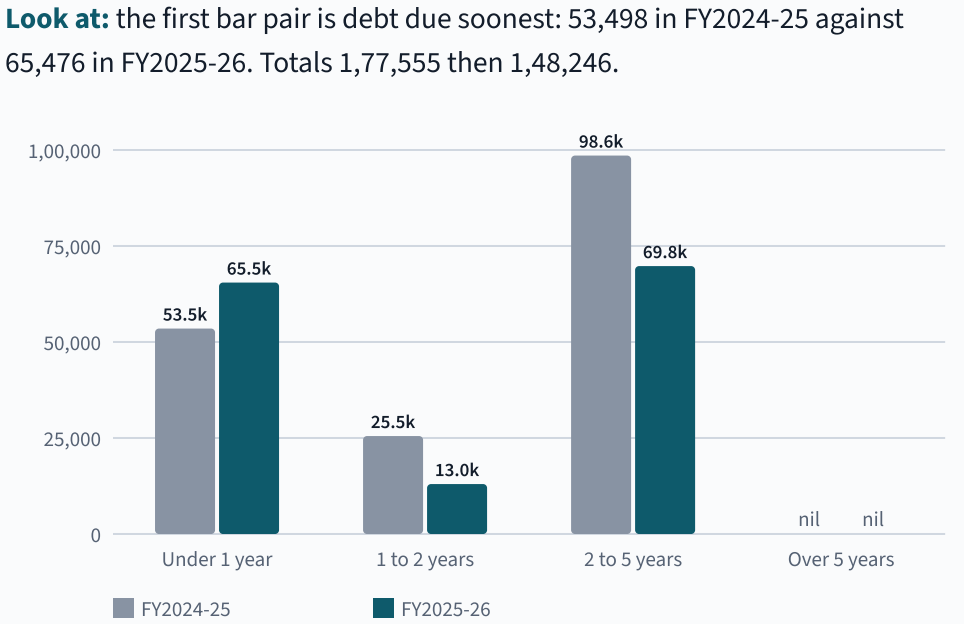

Look at: each row is one call. Of 659 questions on 14 calls, 311 (47%) were answered straight. The rest went around the question.

States are one model's reading, checked by a second model on a sample. Read them as a reading, not a finding.

EXH 5 When the borrowings fall due

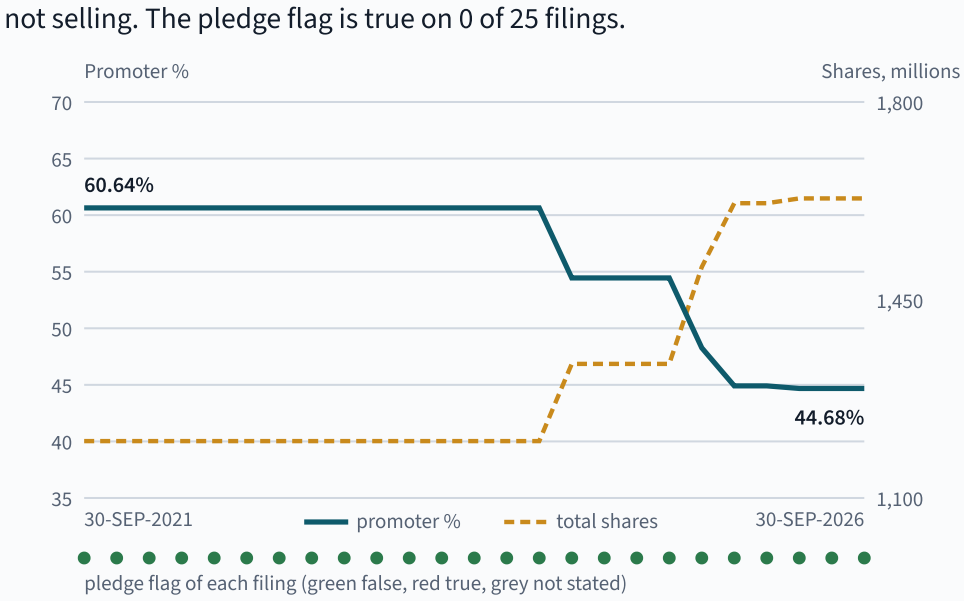

Look at: the first bar pair is debt due soonest: 53,498 in FY2024-25 against 65,476 in FY2025-26. Totals 1,77,555 then 1,48,246.

Annual report maturity table, undiscounted, Rs million. Covenant thresholds and unused credit lines are listed as not in the record unless the checks section says otherwise.

EXH 6 Promoter stake against shares in issue

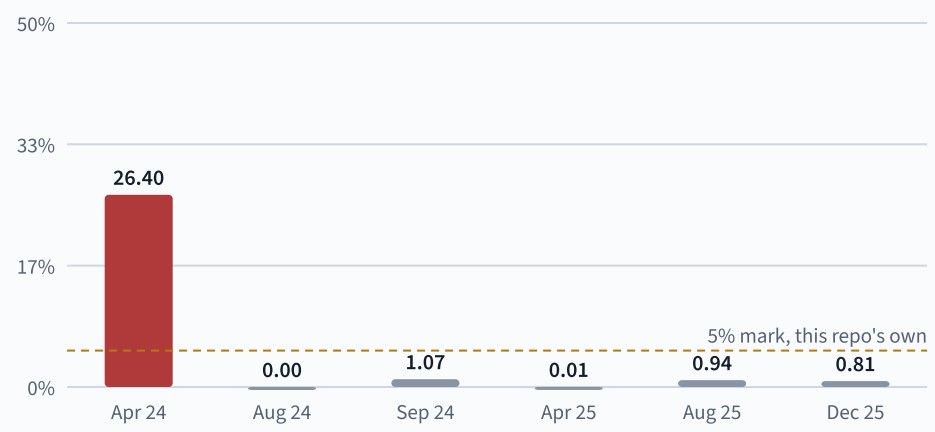

Look at: the promoter stake went from 60.64% to 44.68% while shares in issue went from 1,201 to 1,630 million. A falling percentage with a growing total is not selling. The pledge flag is true on 0 of 25 filings.

Shareholding filings. The dots on the bottom row are the pledge flag of each filing.

EXH 7 Highest vote against a related-party deal

Look at: the highest vote against was 26.4% at the meeting of 2024-04-23. Percent of votes polled, not of shares.

Voting results annexes. Percent of votes polled, not of shares.

EXH 8 **What to watch next**

The judge's triggers on a time line. The arrow shows which way each would push the position.

spacing is even, not to a calendar scale

Triggers come only from the not-in-record list and the dated items in the case book and hearing.

EXH 9 **Where trust sits against the Buy bar**

Look at: trust 5 of 21. Buy needs 18 or more, no gate, and a current price and latest results on file. Gates standing: none. Price on file: yes. Latest results on file: yes.

Trust total across the seven sections, 0 to 21. Bands are the seat's own, untested.

Bands are the seat's own, not from any source, uncalibrated.

The hearing

Every turn as it was written. Open an issue to read it.

LAWYER

Lawyer opening

I press six issues, risks and forensic gates first (F38, S001).

I5, cash: rules.md A8, the veto-class cash conversion gate, CFO "should ideally be around 70% for consumer-facing B2C businesses and 60% for B2B businesses" (S036, MODULB 01:58:04). Filed operating cash fell from 40,612 to 19,940.

I6, debt and covenants: A7, debt to equity (S451); no covenant threshold is printed.

I7, related parties: B2, "Anything more than 10% should be viewed with suspicion." (S066, MODULJ 00:11:24).

I9, auditors: B6, an auditor exit is an "amber flag" (S052, MODULE 00:01:10).

I3, guidance: check 52, "whether they are walking the talk or not" (S066, MODULE 00:19:20).

I8, dilution: E13, promoter signals (S467).

I10 is thin; I still ask what was declined.

CONVICT

Convict opening

As of: calls to 2026-08-06, filed quarters to 2026-06-30, annual report year ended 2026-03-31, price week ending 2026-10-23.

Best defended: the scorecard, kept 14, missed 5, still open 9, depends on reading 11 of 39 (record.md). Filed biosimilars revenue 28,556 million in the quarter ended 2026-06-30, against 24,578 million in the quarter ended 2025-06-30 (S033). Gross borrowings 148,247 million at 2026-03-31, against 177,555 million at 2025-03-31 (S026, PDF page 346).

Hardest: generics. "strong double-digit" (S010, Siddharth Mittal, held 2025-08-08), filed +5.0% for FY26; I concede the size. Profit to owners 3,856 million, year to 2026-03-31, against 10,133 million, year to 2025-03-31 (S026, PDF page 347); I concede the fall. Borrowings due within a year 65,476 million at 2026-03-31 (S026, PDF page 404).

Not covered: call text for Q1 FY24 and Q2 FY25, anything after those dates, and the 11 outcomes resting on a reading.

- I1 Why profit rose or fell 14 turns

LAWYER

Q1 Lawyer

TO: the convict

QUESTION: Profit to shareholders was 10,133 million rupees in the year to 2025-03-31 and 3,856 million in the year to 2026-03-31. What was it for the year to 2026-03-31 with every one-off item removed? Give the number in Rs million and the date of the document that states it.

WHY I ASK: S055 and S001, the one-offs check: read the results footnotes for fees, write-offs and impairments and strip them before reading growth. The course says an anomaly left in "inevitably guarantee a severe derating once the anomaly passes" (S001, HOWH 00:32:09). It applies here because the case book shows profit for the period of 8,618 against operating profit of 6,204 in the quarter ended 2024-06-30, and a loss of 518 against profit to shareholders of 1,438 in the quarter ended 2025-12-31, so the filed profit line moves apart from the operating line. The course gives no number for how large a one-off may be (checks.md entry 5 examples are EXAMPLE class, PERISHABLE). I have not checked which items were one-off; the case book holds them for some quarters only, and the holders of the minority share are not on record. DECISIVE: yes

IF DEFLECTED: Then name each one-off item for the year to 2026-03-31 with its amount in Rs million and the filing that prints it.

CONVICT

A1 Convict not in my record

ANSWER: The exact number is not in my record. The report prints no profit to owners with one-offs removed. It does print profit before tax and before exceptional items of 8,508 million for the year to 2026-03-31, against 17,901 million for the year to 2025-03-31, and net exceptional items of a loss of 4,029 million for the year to 2026-03-31. Both are before tax and before the minority share, so they cannot be turned into a figure comparable with the 3,856 million for the year to 2026-03-31. The tax on the exceptional items is not in the pages I hold. Management also names one-off gains in the year to 2025-03-31 that I cannot size.

MOVE: mitigate | not in my record

EVIDENCE:

- filed profit before tax and before exceptional items, consolidated, 8,508 million for the year to 2026-03-31 and 17,901 million for the year to 2025-03-31 (S026, PDF page 413)
- filed exceptional items, net, consolidated, a loss of 4,029 million for the year to 2026-03-31 (S027, p413, notes to the financial statements) and a gain of 965 million for the year to 2025-03-31 (S027, p414, notes to the financial statements)
- filed profit attributable to owners 3,856 million for the year to 2026-03-31 and 10,133 million for the year to 2025-03-31 (S026, PDF page 347)
- "The Group incurred expenses towards advisory and legal consultancy services, premium paid on hedges taken for settlement of foreign currency payments, bridge financing cost in respect of commercial papers, additional finance cost towards settlement of certain lenders and settlement against outstanding receivables from Mylan Inc, aggregating Rs 2,102 for the year ended March 31, 2026." (S027, p394, notes to the financial statements (company filing))
- "Collectively, these items are non-recurring in nature and do not reflect the underlying operating performance of the Group." (S027, p242, management discussion and analysis (management speech))
- derived by me from the report's items, not printed as a reconciliation: a gain of 1,842 (year to 2026-03-31) less costs of 2,102 (year to 2026-03-31), 1,372 (year to 2026-03-31), 762 (year to 2026-03-31), 965 (year to 2026-03-31), 304 (year to 2026-03-31), 291 (year to 2026-03-31) and 75 (year to 2026-03-31) nets to a loss of 4,029 (year to 2026-03-31), which equals the filed net (S027, pages 190 to 191 and 394 to 395)

STATE I CLAIM: not in my record

WHAT WOULD SETTLE IT: the tax and minority share on the exceptional items in the consolidated statement of profit and loss (PDF page 347 of the annual report for the year ended 2026-03-31), or management's own core or normalised profit in the results release or deck for the quarter ended 2026-03-31 (document named, id not on file here).

LAWYER

Q2 Lawyer

TO: the convict

QUESTION: You could not state profit to owners with one-offs removed, and said the tax on the exceptional items is not in the pages you hold. Name the document and page that print the tax on the net exceptional loss of 4,029 million rupees for the year to 2026-03-31, and give that document's date.

WHY I ASK: S055 and S001, checks.md entry 5 on one-offs: strip exceptional items before reading growth, and the profit line that matters is the one the owners keep. It applies here because the filed 8,508 million before exceptional items cannot be set against the 3,856 million to owners until the tax on the exceptional items and the minority share are known. The course gives no number for how large a one-off may be. I have not checked whether the consolidated statement of profit and loss at PDF page 347 splits the tax that way; the case book holds the owners line there and no split. DECISIVE: no

IF DEFLECTED: Then say yes or no whether any filing or management release for the year to 2026-03-31 prints profit to owners before exceptional items, and name it.

CONVICT

A2 Convict not in my record

ANSWER: As of the annual report for the year ended 2026-03-31 (cover letter dated 2026-07-15, statements signed 2026-05-07), no page I hold prints the tax on the consolidated net exceptional loss of 4,029 million for the year to 2026-03-31. The nearest filed page is PDF page 408. It prints total tax expense of 791 million for the year to 2026-03-31 and profit before tax of 4,479 million for the year to 2026-03-31, after the exceptional loss. A rough tax effect can be derived from management's tax rate, but it is not printed and is not a reconciliation.
MOVE: not in my record | mitigate
EVIDENCE:
- filed tax expense for the year 791 million for the year to 2026-03-31 and 4,572 million for the year to 2025-03-31 (S027, p408, notes to the financial statements (company filing))
- filed profit before tax 4,479 million for the year to 2026-03-31 (S027, p408, notes to the financial statements (company filing)); derived, it equals 8,508 million for the year to 2026-03-31 less the exceptional loss of 4,029 million for the year to 2026-03-31, so I read the page as consolidated (inferred)
- filed profit for the year including non-controlling interest 3,688 million for the year to 2026-03-31 (S027, p190, Board's report (company filing)); derived, 4,479 million for the year to 2026-03-31 less 791 million for the year to 2026-03-31 gives the same figure
- "The effective tax rate before exceptional item is at 21% in FY26, compared to 23% in FY25." (S027, p242, management discussion and analysis (management speech))
- derived by me, rounded and not printed: 21% of 8,508 million for the year to 2026-03-31 is about 1,787 million for the year to 2026-03-31, so 791 million for the year to 2026-03-31 implies a tax credit of about 996 million for the year to 2026-03-31 on the exceptional items; if the 21% is anywhere from 20.5% to 21.5%, the credit runs from 953 to 1,038 million for the year to 2026-03-31 (inferred, assumes the 21% is the group rate)
- filed tax impact of 222 million on the company-only exceptional costs of 1,341 million, both for the year to 2026-03-31 (S027, p337, notes to the financial statements (company filing)); this is the standalone company, not the group's net loss of 4,029 million for the year to 2026-03-31
- derived by me: the 3,688 million for the year to 2026-03-31 including minorities less the 3,856 million for the year to 2026-03-31 to owners (S026, PDF page 347) leaves a minority loss of 168 million for the year to 2026-03-31; how much of it comes from the exceptional items is not printed
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the income tax note in the consolidated notes of the annual report for the year ended 2026-03-31 (a page near PDF page 408 that I did not read, if it splits tax on exceptional items), or the results release for the quarter ended 2026-03-31 giving tax before and after exceptional items (document named, id not on file here).

LAWYER

Q3 Lawyer

TO: the convict
QUESTION: You gave a net exceptional loss of 4,029 million rupees for the year to 2026-03-31. The case book shows the quarter ended 2025-12-31 with a loss for the period of 518 million against profit to shareholders of 1,438. How much of the 4,029 million was booked in that quarter? Give Rs million and the date of the filing that prints it.
WHY I ASK: S055 and S037, checks.md entry 5, one-offs: read the results footnotes and strip write-offs and impairments before reading growth. I read the course as saying a year's one-offs are found quarter by quarter in those footnotes. Your last two answers were not in my record on the year's profit with one-offs removed, so my ladder step moves to the quarterly filing that would print the item. It applies here because the loss for the period and the profit to shareholders in that quarter have opposite signs, which a one-off in the loss line could explain. The course gives no number for how large a one-off may be. I have not checked which quarter carried the item, and the holders of the minority share are not on record. DECISIVE: no
IF DEFLECTED: Then say yes or no whether the filing for the quarter ended 2025-12-31 names any exceptional item, and give its amount in Rs million.

CONVICT

A3 Convict answered

ANSWER: As of the filed quarters to 2026-06-30, my record holds an exceptional loss of 2,934 million for the quarter ended 2025-12-31, read from that quarter's results filing. Against the 4,029 million net exceptional loss for the year to 2026-03-31, that is 72.8% for the quarter ended 2025-12-31 (derived by me). The filing date is not on file here, only the quarter end. That quarter's row carries repairs on two other cells, not on this one. I have not checked the 2,934 million for the quarter ended 2025-12-31 against a second source, and the year's other items by quarter are not in my record.
MOVE: cite | mitigate
EVIDENCE:
- filed exceptional items, consolidated, a loss of 2,934 million for the quarter ended 2025-12-31 (results filing for the quarter ended 2025-12-31, no source id on file)
- filed net exceptional items, consolidated, a loss of 4,029 million for the year to 2026-03-31 (S027, p413, notes to the financial statements (company filing))
- derived by me: 2,934 million for the quarter ended 2025-12-31 divided by 4,029 million for the year to 2026-03-31 is 72.8% for the quarter ended 2025-12-31
- filed exceptional items, consolidated, a loss of 172 million for the quarter ended 2025-06-30, as re-presented in the filing for the quarter ended 2026-06-30 (results filing, no source id on file); the first-filed row for the quarter ended 2025-06-30 does not show it
- derived by me, mixed bases and inferred: 4,029 million for the year to 2026-03-31 less 2,934 million for the quarter ended 2025-12-31 less 172 million for the quarter ended 2025-06-30 leaves 923 million for the quarters ended 2025-09-30 and 2026-03-31 together, which I cannot split
- derived by me: loss for the period of 518 million for the quarter ended 2025-12-31 less profit to shareholders of 1,438 million for the quarter ended 2025-12-31 leaves 1,956 million for the quarter ended 2025-12-31 outside the shareholders' line (inferred to be the minority share; the cause is not printed in my record)
- filed list of the year's exceptional items by amount for the year to 2026-03-31, with no quarter named for any item (S027, p394, notes to the financial statements (company filing))

STATE I CLAIM: answered
WHAT WOULD SETTLE IT: the results filing for the quarter ended 2025-12-31 itself, for its filing date and its exceptional items line (document named, id not on file here), and the filings for the quarters ended 2025-09-30 and 2026-03-31 to place the remaining 923 million for those two quarters together.

LAWYER

Q4 Lawyer
TO: the convict
QUESTION: You placed 2,934 million rupees of the 4,029 million exceptional loss in the quarter ended 2025-12-31 and 172 million in the quarter ended 2025-06-30, leaving 923 million for two quarters. How much exceptional loss did the filing for the quarter ended 2026-03-31 book? Give the number in Rs million and the filing date.
WHY I ASK: S055 and S037, checks.md entry 5, one-offs: read the results footnotes and strip write-offs and impairments before reading growth; the green flag is growth that survives with the one-off removed. Your last answer was answered, so my ladder step is the next thing the method checks: every one-off of the year placed in a quarter, until the profit to owners can be read without them. It applies here because 923 million of the 4,029 million is still unplaced between two quarters, and the case book holds the quarter ended 2026-03-31 as an own filing with profit to shareholders of 1,259. The course gives no number for how large a one-off may be. I have not checked that filing's exceptional items line, and the holders of the minority share are not on record. DECISIVE: no
IF DEFLECTED: Then say yes or no whether the filing for the quarter ended 2026-03-31 prints an exceptional items line, and give its amount in Rs million.

CONVICT

A4 Convict `not in my record`
ANSWER: As of the filed quarters to 2026-06-30, the exceptional loss for the quarter ended 2026-03-31 is not in my record. My row for that quarter has no exceptional items cell. It shows profit for the period of 1,986 million for the quarter ended 2026-03-31 and profit to shareholders of 1,259 million for the quarter ended 2026-03-31. The filing date is not on file here. The only figure I can derive is 923 million, for the quarters ended 2025-09-30 and 2026-03-31 together. It is a net sum, so it does not bound either quarter, and I will not split it.
MOVE: not in my record | mitigate
EVIDENCE:
- filed profit for the period 1,986 million for the quarter ended 2026-03-31, consolidated (results filing for the quarter ended 2026-03-31, no source id on file); the row has no exceptional items cell
- filed profit to shareholders 1,259 million for the quarter ended 2026-03-31, consolidated (results filing for the quarter ended 2026-03-31, no source id on file)
- filed exceptional items, consolidated, a loss of 2,934 million for the quarter ended 2025-12-31 (results filing for the quarter ended 2025-12-31, no source id on file)
- filed exceptional items, consolidated, a loss of 172 million for the quarter ended 2025-06-30, as re-presented in the filing for the quarter ended 2026-06-30 (results filing, no source id on file)
- filed net exceptional items, consolidated, a loss of 4,029 million for the year to 2026-03-31 (S027, p413, notes to the financial statements (company filing))
- derived by me, mixed bases and inferred: 4,029 million for the year to 2026-03-31 less 2,934 million for the quarter ended 2025-12-31 less 172 million for the quarter ended 2025-06-30 leaves 923 million for the quarters ended 2025-09-30 and 2026-03-31 together
- filed gain of 1,842 million for the year to 2026-03-31 on a derivative liability, and costs of 2,102 million for the year to 2026-03-31, with no quarter named for either (S027, p394, notes to the financial statements (company filing)); gains and losses can sit in either quarter, so 923 million for the quarters ended 2025-09-30 and 2026-03-31 together is not a ceiling for one
- the filing for the quarter ended 2025-09-30 has a text layer too damaged to read, so I hold no exceptional items line for the quarter ended 2025-09-30 either (results filing for the quarter ended 2025-09-30, no source id on file)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the results filing for the quarter ended 2026-03-31 itself, for its filing date and its exceptional items line (document named, id not on file here), and the filing for the quarter ended 2025-09-30 to place the rest of the year's exceptional loss.

LAWYER

Lawyer rest
REST: five questions are used, so I must stop; my method's checks on this issue are not all covered, because the exceptional loss line for the quarter ended 2026-03-31 stayed not in record after A4 and the profit to minority holders is not on record, so both go to the issue review as open.

LAWYER

Lawyer review
COVERED:
- The fall itself, on the owners' line: profit to owners 10,133 million for the year to 2025-03-31 against 3,856 million for the year to 2026-03-31 (I1 Q1, I1 A1, matching the case book).
- The one-offs check, checks.md entry 5 (S055 and S037, both dated 2026-07-27; S001 dated 2026-07-28): the convict put a net exceptional loss of 4,029 million on the year to 2026-03-31 against a net gain of 965 million for the year to 2025-03-31, and profit before tax and before exceptional items of 8,508 million against 17,901 million (I1 A1). It named the cost items, the largest 2,102 million, and a gain of 1,842 million, and derived that they net to 4,029 (I1 A1, I1 A4). The course's reason for the check: an anomaly left in will "inevitably guarantee a severe derating once the anomaly passes" (S001, HOWH 00:32:09). Entry 5 gives no size limit for a one-off; its figures are EXAMPLE class and PERISHABLE.
- Tax on the year: total tax 791 million for the year to 2026-03-31 against 4,572 million, profit before tax 4,479 million and profit including the minority share 3,688 million (I1 A2). The convict's tax credit of about 996 million on the exceptional items is its own derivation from management's 21% rate, not a filed figure (I1 A2).
- Placement by quarter: 2,934 million of the exceptional loss in the quarter ended 2025-12-31 and 172 million in the quarter ended 2025-06-30 as re-presented, leaving 923 million across the quarters ended 2025-09-30 and 2026-03-31 that the convict would not split (I1 A3, I1 A4).

OPEN:

- Profit to owners with one-offs removed, for either year: not in record (I1 A1, I1 A2). The tax and the minority share on the exceptional items are not printed in the pages the convict holds. Document: the income tax note of the consolidated accounts in the annual report for the year ended 2026-03-31, near PDF page 408, or the results release for the quarter ended 2026-03-31.
- The minority share: the convict derives a minority loss of 168 million for the year to 2026-03-31 (I1 A2) but 1,956 million outside the owners' line in the quarter ended 2025-12-31 alone, where the loss for the period was 518 million and profit to shareholders 1,438 million (I1 A3). Who holds that share and why it swings is not on record, which the case book also lists as a known gap. The course warns that a consolidated multiple can be the "very, very wrong metric to look at" when minority losses consolidate (S413, MODERF 00:25:53, dated 2026-07-26). Document: the non-controlling interest note of the consolidated annual report.
- The exceptional line for the quarter ended 2026-03-31, and for the quarter ended 2025-09-30, whose filing text is damaged: not in record (I1 A4). Document: the results filings for those two quarters.
- The base year's one-offs: the convict says management names one-off gains in the year to 2025-03-31 that it cannot size (I1 A1), and the case book shows profit for the period of 8,618 million against operating profit of 6,204 million in the quarter ended 2024-06-30. What lifted that quarter was never asked. Document: the results filing for the quarter ended 2024-06-30.
- A figure to check: in I1 A1 the convict lists 965 both as a cost inside the year to 2026-03-31 and as the net exceptional gain of the year to 2025-03-31. That may be two items of the same size or a misread year. Document: annual report PDF pages 394 and 414.
- The larger part of the fall, never asked. Profit before tax and exceptional items roughly halved, from 17,901 to 8,508 million, a bigger move than the exceptional swing from a gain of 965 to a loss of 4,029. All four questions went to the smaller part. Below the consolidated number (checks.md entry 32, S413, 2026-07-26), the case book's segment result table shows Biosimilars 11,961 to 5,876, Generics 1,755 to a loss of 1,348 and CRDMO 6,279 to 4,875. And by my sum of the case book's quarterly table, operating profit for the four quarters of the year to 2026-03-31 is higher than for the year before, so the fall sits below the operating line: finance costs rose from 8,974 to 9,903 million, and depreciation and other income are not in the case book (checks.md entries 10 and 31, S037, 2026-07-27; neither entry states a numeric cut). Document: the consolidated statement of profit and loss, PDF page 347, and the depreciation note.

WEAK QUESTION:
- I1 Q2: asked for a document, its page and its date in one ask, three items where the prompt allows one number and one date.
- I1 Q3 and I1 Q4: on method, but narrow. After I1 A2 the decisive gap was the tax and minority share on the one-offs; placing the loss by quarter could not close it, and it used two of four questions on the smaller part of the fall.
- I1 rest turn: it says five questions were used; four were asked (I1 Q1 to I1 Q4), so the rest rule was applied on a wrong count.

EXTRA:
TO: the convict
QUESTION: Operating profit in the four filed quarters of the year to 2026-03-31 adds to more than the year before, yet profit before tax and exceptional items fell from 17,901 to 8,508 million rupees. What was depreciation and amortisation for the year to 2026-03-31, in Rs million, and what is the date of the document that prints it?
WHY I ASK: S037 and checks.md entry 31, the margin ladder, read with entry 10 on depreciation changes: find what moved between operating profit and the bottom line before reading the fall. It applies here because finance costs rose only from 8,974 to 9,903 million, so most of the gap between a rising operating line and a halving pre-exceptional profit is unexplained in the record. Neither entry states a numeric cut. I have not checked depreciation, amortisation or other income for either year. DECISIVE: no
IF DEFLECTED: Then give other income for the year to 2026-03-31 in Rs million and name the page that prints it.

CONSOLIDATION:
- What the method asked: strip the one-offs and read the profit the owners keep (checks.md entry 5, S055, S037, S001), through tax, the minority share and the quarter each item was booked in (I1 Q1 to I1 Q4).
- What the record answered: a net exceptional loss of 4,029 million against a gain of 965 million the year before, itemised to the total; pre-exceptional profit of 8,508 against 17,901 million; tax of 791 million; 2,934 million of the loss placed in the quarter ended 2025-12-31 and 172 million in the quarter ended 2025-06-30 (I1 A1 to I1 A4).
- What is still open: profit to owners with one-offs removed, the tax and minority share on the one-offs, the minority holders and their swing, the exceptional lines for the quarters ended 2025-09-30 and 2026-03-31, the base year's gains, the doubled 965 in I1 A1, and above all why pre-exceptional profit halved while operating profit rose, which was never asked (I1 A1 to I1 A4).
- What a reader should check: the consolidated profit and loss statement at PDF page 347, the depreciation, tax and non-controlling interest notes, and the segment result table, before reading the fall in profit to owners as a story about one-offs. The record so far explains the smaller part of the fall, not the larger one.

JUDGE

Judge note
STORY SO FAR:
1. Profit to owners fell from 10,133 to 3,856 million rupees, year to 2026-03-31 against the year before, filed, down 61.9% derived by me (case book ch 3, PDF p347).
2. Sales rose, 152,617 to 169,270 filed, yet profit before tax and one-offs halved, 17,901 to 8,508 filed (case book ch 3, PDF p347, p413).
3. One-off items swung from a 965 gain to a 4,029 loss, year to 2026-03-31; the record explains this smaller part best (hearing I1 A1).

WHY-CHAIN:
1. Profit before tax and one-offs fell from 17,901 (year to 2025-03-31) to 8,508 (year to 2026-03-31), filed, because every segment result fell: Biosimilars 11,961 to 5,876, Generics 1,755 to a loss of 1,348, CRDMO 6,279 to 4,875 (case book ch 3, segment results, PDF p413, p414). Why each segment fell: not in the record.
2. The operating line went the other way. Four filed quarters of operating profit add to 34,381 for the year to 2026-03-31 against 31,358 (7,489+8,354+8,335+10,203 against 6,204+6,854+7,518+10,782, +9.6%, derived by me, case book ch 3). Finance costs rose only 929, 8,974 to 9,903 filed (case book ch 3, PDF p347). What fills the rest of the gap: not in the record.
3. One-offs moved from a net gain of 965 (year to 2025-03-31) to a net loss of 4,029 (year to 2026-03-31), filed per the convict (hearing I1 A1, S027

p413, p414), because of named costs including advisory, hedges, bridge financing, lender settlement and Mylan receivables, 2,102, against a 1,842 gain (quote S027 p394, verified by code). Swing 4,994, derived by me: smaller than the 9,393 fall before one-offs.
4. Tax fell from 4,572 to 791, filed, year to 2026-03-31 against the year before (hearing I1 A2, S027 p408), because pre-tax profit fell to 4,479 and, by the convict's own sum, about 996 of tax credit came on the one-offs. That 996 is derived from management's 21% rate, not filed (hearing I1 A2).
5. Minority holders took a loss. Profit for the period less profit to owners, by quarter of the year to 2026-03-31: 578, 483, minus 1,956, 727, summing to minus 168 (derived by me, case book ch 3 quarters), matching the convict's 168 (hearing I1 A2). Why the quarter ended 2025-12-31 swung: not in the record.

I DID NOT UNDERSTAND:
- Minority share (non-controlling interest): who holds it is not in the record; the case book shows Mylan had influence over a subsidiary until 2026-01-21 (case book ch 9, PDF p396), but no link to the swing is stated.
- Why operating profit rose about 9.6% while profit before tax and one-offs halved: depreciation and other income are not in the case book, and I cannot tell if the case book's operating profit and the segment result share a basis.
- The 965 in hearing I1 A1: it is listed as a cost in the year to 2026-03-31 and also as the net gain of the year to 2025-03-31. By my check the cost list nets to 4,029 only if 965 counts in the year to 2026-03-31; I cannot see the page.
- The 2,934 (quarter ended 2025-12-31) and 172 (quarter ended 2025-06-30) rest on results filings with no source id, not in the case book; I could not check them.
- Derivative liability gain: I do not know what a derivative liability is or why removing it is a gain.
- The quotes from S027 p394 and p242 are verified by code, but "non-recurring" is management's own word; whether the items truly will not repeat I cannot tell.

STATE PROPOSED:
- Q1 partial: the convict said not in my record, but gave dated numbers on a different basis, before tax and before the minority share (8,508 and a 4,029 loss, year to 2026-03-31), not the owners' line asked for. Move: mitigate, not in my record.
- Q2 partial: no page prints group tax on the 4,029 loss; the convict gave a standalone basis instead (222 tax on 1,341, year to 2026-03-31, S027 p337) and a derived 996, not filed. Move: not in my record, mitigate.
- Q3 partial: a number came, 2,934 for the quarter ended 2025-12-31, but with no source id and no filing date, which the question asked for, so I could not check it. The convict claimed answered. Move: cite, mitigate.
- Q4 no data: the exceptional line for the quarter ended 2026-03-31 is not in the record; the 923 is the convict's own net of two quarters, not a figure for one. Settled by the results filing for the quarter ended 2026-03-31. Move: not in my record, mitigate.

ASK NEXT:
1. Why did profit before tax and one-offs halve while operating profit rose: what were depreciation and other income for the year to 2026-03-31, with the page? This is the lawyer's EXTRA question, not asked under the cost cap, and it covers the larger part of the fall; watch item: PDF p347 and the depreciation note.
2. Why did the minority share take a loss of 1,956 in the quarter ended 2025-12-31 when the whole year's minority loss was 168, and who are the minority holders? Watch item: the non-controlling interest note of the consolidated annual report.

CONVICT

WA1 Convict `partial`

ANSWER: As of the annual report for the year ended 2026-03-31: depreciation and other income are not printed in the files I hold, so I give no page. I can derive their net. Operating profit less finance costs less profit before tax and exceptional items leaves 15,970 million for the year to 2026-03-31, against 4,483 million for the year to 2025-03-31 (derived, inferred). That swing of 11,487 million, year to 2025-03-31 to year to 2026-03-31, is larger than the 9,393 million fall in profit before tax and exceptional items over those two years. The quarter ended 2024-06-30 carried a filed other income of 11,345 million, noted as a one-off.
MOVE: not in my record | mitigate
EVIDENCE:
- "Operating revenue and EBITDA grew at 13% and 25%, respectively, on a like-to-like basis" (S027, p21, message from the chairperson or chief executive (management speech))
- "partly offset by depreciation during the year" (S027, p243, management discussion and analysis (management speech)); the only mention of depreciation in the report statements I hold, and it gives no amount
- derived by me, inferred to be depreciation and amortisation less other income plus any other item below operating profit (the basis of operating profit is not printed in my files): filed operating profit 34,381 for the year to 2026-03-31 (four filed quarters: 7,489 for the quarter ended 2025-06-30, 8,354 for the quarter ended 2025-09-30, 8,335 for the quarter ended 2025-12-31 and 10,203 for the quarter ended 2026-03-31; filed quarters table, results filings, no source id on file) less finance costs 9,903 for the year to 2026-03-31 (S026, PDF page 347) less profit before tax and exceptional items 8,508 for the year to 2026-03-31 (S027, p241, management discussion and analysis (management speech)) leaves 15,970 for the year to 2026-03-31
- derived by me, same method for the year to 2025-03-31: filed operating profit 31,358 for the year to 2025-03-31 (6,204 for the quarter ended 2024-06-30, 6,854 for the quarter ended 2024-09-30, 7,518 for the quarter ended 2024-12-31 and 10,782 for the quarter ended 2025-03-31; filed quarters table, no source id on file) less finance costs 8,974 for the year to 2025-03-31 (S026, PDF page 347) less profit before tax and exceptional items 17,901 for the year to 2025-03-31 (S027, p241, management discussion and analysis (management speech)) leaves 4,483 for the year to 2025-03-31
- filed other income of 11,345 for the quarter ended 2024-06-30, marked a one-off in the record's note on that quarter (the quarter's own filing text was not parsed; the figure matches XBRL sales and profit only, no second source on the other income cell; no source id on file)
- derived by me, inferred, assumes the 11,345 for the quarter ended 2024-06-30 sits inside the 17,901 for the year to 2025-03-31: 17,901 less 11,345 leaves 6,556 for the year to 2025-03-31, so 8,508 for the year to 2026-03-31 is up 1,952, or 29.8%; the gap to the operating line (3,023 up less 929 more finance cost, 2,094 for the year to 2026-03-31 against the year to 2025-03-31) leaves 142 unexplained
- filed Biosimilars result before tax and finance costs 10,648 for the quarter ended 2024-06-30, against 169 for Generics for the quarter ended 2024-06-30 (S033, segment table in the filing for the quarter ended 30-Jun-2024, XBRL); a different measure from the later filings, so read it as where the item sits, not as a size

- filed movement in intangible assets under development: disposals and transfers of (24,798) for the year to 2026-03-31, with the balance 44,067 at 2025-03-31 and 23,740 at 2026-03-31 (S026, PDF page 367); where it was transferred, and whether amortisation began, is not printed in the tables I hold (a lead only, inferred)
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the consolidated statement of profit and loss (PDF page 347) of the annual report for the year ended 2026-03-31, with its depreciation and amortisation note and its other income note; I hold the page of the statement but not the lines or the note pages. Also the results filing for the quarter ended 2024-06-30, to confirm the 11,345 for the quarter ended 2024-06-30 and what it was (document named, id not on file here).

CONVICT

WA2 Convict `partial`

ANSWER: As of the filed quarters to 2026-06-30, why the minority share lost 1,956 million in the quarter ended 2025-12-31 is not in my record. I hold no minority line; I derive it as profit for the period less profit to shareholders. The record does name the outside holders of Biocon Biologics Limited (BBL) who sold to Biocon in January 2026: Mylan Inc., Serum Institute Life Sciences, Tata Capital Growth Fund II and Activ Pine LLP. It does not size their stakes before that sale, and it does not name Syngene's outside holders. Any link to the exceptional loss of 2,934 million in the quarter ended 2025-12-31 would be my inference, so I do not draw it.
MOVE: not in my record | mitigate
EVIDENCE:
- derived by me, minority share as profit for the period less profit to shareholders, consolidated, as filed: a gain of 578 for the quarter ended 2025-06-30 (892 for the quarter ended 2025-06-30 less 314 for the quarter ended 2025-06-30); a gain of 483 for the quarter ended 2025-09-30 (1,328 for the quarter ended 2025-09-30 less 845 for the quarter ended 2025-09-30); a loss of 1,956 for the quarter ended 2025-12-31 (a loss of 518 for the quarter ended 2025-12-31 less 1,438 for the quarter ended 2025-12-31); a gain of 727 for the quarter ended 2026-03-31 (1,986 for the quarter ended 2026-03-31 less 1,259 for the quarter ended 2026-03-31) (results filings, no source id on file; the 2025-09-30 figures come from a comparative column and the 2025-12-31 row carries two cells repaired by identity, which two is not named)
- derived by me: these four net to a loss of 168 for the year to 2026-03-31, which equals profit including non-controlling interest of 3,688 for the year to 2026-03-31 less profit to owners of 3,856 for the year to 2026-03-31 (S027, p190, Board's report (company filing); S026, PDF page 347)
- filed exceptional items, consolidated, a loss of 2,934 million for the quarter ended 2025-12-31 (results filing for the quarter ended 2025-12-31, no source id on file)
- "the Company remeasured the derivative liability recorded earlier in relation to investment in BBL by Mylan Inc" (S027, p394, notes to the financial statements (company filing)); the gain on it was 1,842 million for the year ended 2026-03-31, with no quarter named
- "(a) Mylan Inc.; (b) Serum Institute Life Sciences Private Limited; (c) Tata Capital Growth Fund II; and (d) Activ Pine LLP (‘Selling Shareholders’)" (S027, p191, Board's report (company filing)), sellers of BBL shares to Biocon in January 2026
- "requires recognition of a gross obligation liability with a corresponding derecognition of non-controlling interest balance in its consolidated financial statements" (S027, p379, notes to the financial statements (company filing)); my reading, inferred: part of the minority balance may already have been removed before the buy-out, but the notes do not say how that affected the quarter ended 2025-12-31
- "Non-controlling interest decreased primarily due to the acquisition of additional stake in Biosimilars business, partly offset by the share of profit, other comprehensive income and dividends attributable to non-controlling interests in subsidiaries." (S027, p244, management discussion and analysis (management speech)); this is the balance sheet for the year to 2026-03-31, not the quarterly profit split
- filed BBL consolidated net loss of 7,719 million for the year ended 2026-03-31 against a net profit of 8,896 million for the year ended 2025-03-31 (S027, p193, Board's report (company filing)); this is BBL's whole result, not the minority's share, and not by quarter
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the non-controlling interest note of the consolidated annual report for the year ended 2026-03-31, giving profit share by subsidiary, or the results filing for the quarter ended 2025-12-31 with its profit attributable to non-controlling interests line (document named, id not on file here).

JUDGE

Judge close

STORY SO FAR:
- Profit to owners fell from 10,133 (year to 2025-03-31) to 3,856 million rupees (year to 2026-03-31), filed (case book ch3, PDF p347).
- The year to 2025-03-31 carried a one-off other income of 11,345 in the quarter ended 2024-06-30, per the convict, with no source id (hearing I1 WA1).
- One-offs swung from a 965 gain (year to 2025-03-31) to a 4,029 loss (year to 2026-03-31). Why minority holders swung: not in the record (hearing I1 A1, WA2).

WHY-CHAIN:
- Profit before tax and one-offs fell from 17,901 (year to 2025-03-31) to 8,508 (year to 2026-03-31), filed. Because: the base year held the 11,345 (quarter ended 2024-06-30), no source id. Without it, 6,556 against 8,508 is +29.8%, the convict's sum, which I re-did and it holds (hearing I1 WA1). It fits the case book: profit 8,618 beat operating profit 6,204 that quarter (ch3).
- Operating profit rose from 31,358 to 34,381, years to 2025-03-31 and 2026-03-31, +9.6%, derived by me from four filed quarters each year (case book ch3). The gap below it grew from 4,483 to 15,970: 31,358 less 8,974 less 17,901, and 34,381 less 9,903 less 8,508, derived (hearing I1 WA1). It is depreciation less other income, inferred. Depreciation itself: not in the record.
- Every segment result fell, years to 2025-03-31 against 2026-03-31, filed: Biosimilars 11,961 to 5,876, Generics 1,755 to minus 1,348, CRDMO 6,279 to 4,875 (case book ch3, PDF p413, p414). The 11,345 may sit in Biosimilars, whose result was 10,648 for the quarter ended 2024-06-30 on a different measure (hearing I1 WA1, S033). Other causes: not in the record.
- One-offs moved from a net gain of 965 (year to 2025-03-31) to a net loss of 4,029 (year to 2026-03-31), filed per the convict (S027 p413, p414). Named costs of 2,102 sat against a 1,842 gain, year to 2026-03-31 (S027 p394, quote verified by code). Of the loss, 2,934 fell in the quarter ended 2025-12-31, no source id (hearing I1 A1, A3).
- Minority holders lost 1,956 in the quarter ended 2025-12-31 but only 168 over the year to 2026-03-31, derived (case book ch3; hearing I1 WA2). The subsidiary Biocon Biologics went from a profit of 8,896 (year to 2025-03-31) to a loss of 7,719 (year to 2026-03-31), filed (S027 p193). Why that one

quarter swung: not in the record.

I DID NOT UNDERSTAND:
- The 11,345 for the quarter ended 2024-06-30: what it was, and whether it sits inside the 17,901 (year to 2025-03-31). The convict assumes so. It has no source id and is not in the case book.
- Depreciation and amortisation: no amount anywhere. A transfer of 24,798 out of intangibles under development (year to 2026-03-31, PDF p367, case book ch9) may have started amortisation. That is the convict's lead only.
- Minority share: what derecognising a minority balance means (S027 p379, quote verified by code), and how it touched the quarter ended 2025-12-31.
- The 965 in hearing I1 A1: listed as a cost in the year to 2026-03-31 and as the net gain of the year to 2025-03-31. WA1 and WA2 did not clear it up.
- The quarterly one-offs of 2,934 (quarter ended 2025-12-31) and 172 (quarter ended 2025-06-30): no source id, not in the case book, so I could not check them.
- "like-to-like" EBITDA growth of 25%, year to 2026-03-31 (S027 p21, quote verified by code): which items were removed is not stated. A derivative liability I now get a little better: it was tied to Mylan Inc.'s stake in Biocon Biologics (S027 p394, verified by code).

STATE PROPOSED:
- Q1 partial, unchanged: still no profit to owners with one-offs removed. WA1 adds another different basis, pre-tax profit without the 11,345 (6,556 against 8,508, derived, no source id), not the owners' line. Moves: mitigate, not in my record.
- Q2 partial, unchanged: no page prints group tax on the 4,029 loss (year to 2026-03-31); the why answers did not return to it. Moves: not in my record, mitigate.
- Q3 partial, unchanged: the 2,934 for the quarter ended 2025-12-31 still has no source id and no filing date. The convict claimed answered. Moves: cite, mitigate.
- Q4 no data, unchanged: the one-off line for the quarter ended 2026-03-31 is still not in the record; the 923 remains a net of two quarters. Moves: not in my record, mitigate.

WATCH:
- Depreciation, amortisation and other income for both years: consolidated profit and loss, PDF p347, and its notes, annual report for the year ended 2026-03-31 (cover letter 2026-07-15). This was the lawyer's EXTRA question, not asked under the cost cap. I put it as a why question; WA1 gave only the net.
- The 11,345: the results filing for the quarter ended 2024-06-30. If it is a one-off inside the 17,901, most of the pre-tax fall is a base effect, not a slump.
- Profit to owners with one-offs removed: the income tax note near PDF p408 and the non-controlling interest note, or the results release for the quarter ended 2026-03-31.
- One-off lines for the quarters ended 2025-09-30 and 2026-03-31: those results filings (the first has a damaged text layer).
- The doubled 965: PDF pages 394 and 414.
- The minority loss of 1,956 (quarter ended 2025-12-31): that filing's line for profit attributable to non-controlling interests.

Also noted: code ran over every I1 turn with 0 problems. Every convict quote was found word for word with its id, so quotes are verified by code, and every figure of three digits or more carries a date. I still cannot tell how far "non-recurring" (S027 p242, verified by code) holds in later years. My notebook held nothing for this issue.

- I2 Where growth came from 14 turns

LAWYER

Q1 Lawyer
TO: the convict
QUESTION: The annual report prints total income of 172,695 million rupees and growth of 14% on a like-to-like basis, while filed revenue from operations was 169,270 million against 152,617 million. What was the like-to-like base for the year to 2025-03-31, in Rs million, and what is the date of the document that states it?
WHY I ASK: S039 and the volume against price check (checks.md entry 7): split growth into units and realisation before trusting it. The course says "Volume is more important than value" (S039, MODULA 01:00:39). It applies here because the growth figure the report leads with is the company's own adjustment, not a filed number, and the case book shows the third segment renamed twice and a utilities cross charge moved between segments, so the base can move with the label. The course gives no number for how much adjustment is acceptable. I have not checked what was adjusted, how much of the growth was volume against price and mix, or whether acquisitions sit inside it; the case book holds none of these, and the quarter ended 2025-09-30 has no clean segment result. DECISIVE: yes
IF DEFLECTED: Then state the Rs million amount removed from the year to 2025-03-31 to reach the like-to-like base, and name what it was.

CONVICT

A1 Convict `not in my record`
ANSWER: As of the record's dates (calls to 2026-08-06, annual report to the year ended 2026-03-31), I do not hold the like-to-like base for the year to 2025-03-31 in Rs million, and I do not hold the document date that states it. I can give the filed base: revenue from operations of 152,617 million for the year to 2025-03-31, against 169,270 million for the year to 2026-03-31, which is up 10.9% (derived). Whatever the 14% removes or adds sits between that filed line and the company's own adjusted line. I hold no total income line for the year to 2026-03-31 in the files read, so I cannot test the 172,695.
MOVE: not in my record | mitigate
EVIDENCE:
- filed revenue from operations 169,270 million for the year to 2026-03-31 (S026, year to 2026-03-31)
- filed revenue from operations 152,617 million for the year to 2025-03-31 (S026, year to 2026-03-31, year-earlier column)

- derived growth of 10.9% from 169,270 million for the year to 2026-03-31 over 152,617 million for the year to 2025-03-31
- the like-to-like figure is the company's own adjustment, not a filed number: on Generics the record shows the stated adjustment was named and sized, about Rs 300 crore of one-time lenalidomide sales in the year to 2025-03-31 (record.md, Generics next year entry, scored on first-filed numbers)
- the third segment is named Research services to 2025-03-31, CRDMO from 2025-06-30 and Services from 2026-06-30, so segment bases move with the label (S025, deck for the quarter ended 2026-06-30)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the FY2025-26 annual report, in the part that defines like-to-like (the chairperson's or chief executive's message and the management discussion), with the cover letter to the exchanges dated 2026-07-15; or the Q4 FY26 results deck, which would give the adjusted base for the year to 2025-03-31 in Rs million.

LAWYER

Q2 Lawyer
TO: the convict
QUESTION: You do not hold the like-to-like base for the year to 2025-03-31, and the filed base gives 10.9% growth against the 14% the report leads with. Name the one document that prints the Rs million base for that year. Give its title, the page number where the base appears, and the date it was filed.
WHY I ASK: S039 and checks.md entry 7, volume against price: split growth into units and realisation, and find where that data sits, which the course places in investor presentations and calls, not on the income statement (S039). It applies here because the growth figure the report leads with is the company's own adjustment, not a filed number, and your first answer says the base is not in your record. The course gives no number for how much adjustment is acceptable, so the base has to come from a named document. I have not checked what was adjusted, or how much of the growth was volume against price and mix. DECISIVE: no
IF DEFLECTED: Then say yes or no whether the base appears in the annual report you hold, and if not, name the document you expect to hold it.

CONVICT

A2 Convict `not in my record`
ANSWER: As of the record's dates (calls to 2026-08-06, annual report to the year ended 2026-03-31), I cannot name one document with its title, page and filing date, because I do not hold the Rs million base for the year to 2025-03-31 anywhere. The filed tables I hold show filed lines only. My reading, not a filed fact: the company's results presentation for the year ended 2026-03-31 is where a reconciliation would sit. No deck I read names such a slide, and I hold neither its page nor its filing date. The nearest dated item is the annual report's cover letter to the exchanges, dated 2026-07-15. It is a letter, not the base.
MOVE: not in my record | mitigate
EVIDENCE:
- management's own adjusted figure: the company deck says Generics grew 17% like-to-like, excluding about Rs 300 crore (derived 3,000 million) of one-time lenalidomide sales in the year to 2025-03-31 (record.md, scored on first-filed numbers; the deck is not named in the file, so no id)
- filed Generics revenue growth 5.0% for the year to 2026-03-31, on first-filed numbers (record.md)
- the third segment is named Research services in the filings to 2025-03-31, CRDMO from 2025-06-30 and Services from 2026-06-30 (S033, segment tables, Definitions section)
- the filing for the quarter ended 2026-06-30 moved cross charges of common utilities from Generics to the unallocable line and restated its comparatives (S033, segment table in the filing for the quarter ended 2026-06-30)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the results presentation for the year ended 2026-03-31 (title, slide and exchange filing date, none of which I hold), or the annual report for the year ended 2026-03-31 in its management discussion, if it defines the like-to-like base in Rs million. If the Chair holds either, that document settles it.

LAWYER

Q3 Lawyer
TO: the convict
QUESTION: Biosimilars brought in 104,312 million rupees in the year to 2026-03-31. For that segment and year, what percent of its revenue growth came from units sold, as against price and mix? Give the percent and the date of the document that states it.
WHY I ASK: S039 and the volume against price check (checks.md entry 7): split growth into units and realisation. The course says "Volume is more important than value" (S039, MODULA 01:00:39), and puts the data in investor presentations and calls, not on the income statement. It applies here because your last two answers leave the like-to-like base open, so that figure cannot be tested yet; the unit and price split can be asked on its own, and Biosimilars is the largest segment in the case book. Entry 7 states no volume bar for a medicines company, so I name none. I have not checked how much of the growth was units, and the quarter ended 2025-09-30 has no clean segment result. DECISIVE: no
IF DEFLECTED: Then say yes or no whether any document you hold states Biosimilars volume growth for that year.

CONVICT

A3 Convict `not in my record`
ANSWER: As of the record's dates (calls to 2026-08-06, filed quarters to 2026-06-30, annual report to the year ended 2026-03-31), no percent is on record. On your follow-up: no, no document I hold states Biosimilars volume growth for the year to 2026-03-31. The files I read do not carry the 104,312 million for that year either, so I cannot confirm it. What I hold is filed revenue, which mixes units and price, and management's words on price erosion, which give a direction and no size.
MOVE: not in my record | mitigate
EVIDENCE:
- filed Biosimilars revenue 27,556 million for the quarter ended 2026-03-31 against 24,634 million for the quarter ended 2025-03-31 (S033, segment table in the filing for the quarter ended 2026-06-30, column preceding quarter; S033, segment table in the filing for the quarter ended 2026-03-31, column year ago quarter)
- filed Biosimilars revenue growth of 11.9% for that quarter on the year before, units and price together (record.md, scored on filed numbers)
- "price erosion is also another thing which is real in a situation in the market which will also happen." (S014, Shreehas Tambe, held 2026-08-06)
- "I think we should budget for some erosion" (S013, Kedar Upadhye, held 2026-05-08)

- "the price erosion is in line with what we had budgeted for" (S008, Kedar Upadhye, held 2025-01-31)
- the quarter ended 2025-09-30 has no clean segment source (S033, Not read section), so a full year of Biosimilars quarters cannot be added from my files
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the results presentation or the annual report management discussion for the year ended 2026-03-31, if either prints a Biosimilars volume growth figure; I hold no title, page or filing date for such a line. If the Chair holds either, that document settles it.

LAWYER

Q4 Lawyer
TO: the convict
QUESTION: You hold no Biosimilars unit growth figure for the year to 2026-03-31. The case book shows page 6 of the annual report prints 104,312 million rupees for that segment. On which page of that report does the management discussion give Biosimilars volume or unit growth, and what is the date on the report's cover letter?
WHY I ASK: S039 and the volume against price check (checks.md entry 7): split growth into units and realisation. The course says "Volume is more important than value" (S039, MODULA 01:00:39). Your last answer was not in my record, so my ladder step is to ask which document would hold the figure. You named the results presentation or the annual report management discussion but gave no page. It applies here because the report leads with a segment total and the 14% like-to-like growth, and neither is a unit count. Entry 7 states no volume bar for a medicines company, so I name none. I have not checked any page of the report for units sold. DECISIVE: no
IF DEFLECTED: Then say yes or no whether the management discussion in that report gives Biosimilars volume growth as a percent.

CONVICT

A4 Convict `not in my record`
ANSWER: As of the record's dates (calls to 2026-08-06, annual report to the year ended 2026-03-31), I cannot give a page. In the three files I read for this issue, nothing states Biosimilars volume or unit growth for the year to 2026-03-31, and none records a management discussion page number.
Yes or no on your follow-up: I cannot say yes, because I hold no such line in these files. The cover letter date I do hold: the annual report's cover letter to the exchanges is dated 2026-07-15. The letter is a cover note, not the growth figure. I also cannot confirm the 104,312 million for the year to 2026-03-31 from these files.
MOVE: cite | not in my record
EVIDENCE:
- the annual report for the year ended 2026-03-31 has a cover letter to the exchanges dated 2026-07-15 (annual report cover letter, as recorded in the seat's hot sheet; no page recorded)
- filed Biosimilars revenue 27,556 million for the quarter ended 2026-03-31 against 24,634 million for the quarter ended 2025-03-31, units and price together (S033, segment table in the filing for the quarter ended 2026-06-30, column preceding quarter; S033, segment table in the filing for the quarter ended 2026-03-31, column year ago quarter)
- filed Biosimilars segment profit 5,876 million for the year to 2026-03-31 against 11,961 million for the year to 2025-03-31 (S026, year to 2026-03-31)
- the quarter ended 2025-09-30 has no clean segment source, so I cannot add four Biosimilars quarters for the year to 2026-03-31 (S033, Not read section)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the management discussion in the annual report for the year ended 2026-03-31, read for a Biosimilars volume or unit growth line and its PDF page; the hand-read annual report pages file was not among the files I opened for this issue, so I did not check it. Also the results presentation for the year ended 2026-03-31, title and filing date not held.

LAWYER

Lawyer rest
REST: five questions are used; the method's checks are not all covered, because the like-to-like base and the Biosimilars unit growth stay not in record after A1 to A4, so I leave them open for the issue review.

LAWYER

Lawyer review
COVERED:
- Filed base of growth: revenue from operations 169,270 million for the year to 2026-03-31 against 152,617 million for the year to 2025-03-31, up 10.9% (derived), set beside the 14% like-to-like figure the report leads with (I2 Q1, I2 A1). My method (checks.md entry 7, S039, dated 2026-07-27) wants growth tested before it is trusted; the gap between the filed and the adjusted figure is now on record, even though its content is not.
- One named, sized adjustment: Generics grew 17% like-to-like by excluding about Rs 300 crore of one-time lenalidomide sales in the year to 2025-03-31, against 5.0% filed Generics growth (I2 A1, I2 A2). The convict says the deck carrying it is not named in its file, so it carries no source id.
- Segment labels and bases: the third segment was Research services, then CRDMO from 2025-06-30, then Services from 2026-06-30, and the filing for the quarter ended 2026-06-30 moved a utilities cross charge out of Generics and restated its comparatives (I2 A1, I2 A2). This matches the case book, so segment growth across those dates is not on one basis.
- Biosimilars, filed revenue only: 27,556 million for the quarter ended 2026-03-31 against 24,634 million a year earlier, up 11.9%, units and price together (I2 A3, I2 A4). Management's words on price erosion give a direction and no size (I2 A3, quotes S014 held 2026-08-06, S013 held 2026-05-08, S008 held 2025-01-31).
- Biosimilars segment profit fell from 11,961 million to 5,876 million while its revenue grew (I2 A4, matching the case book segment results table). That is a profit fact offered on a growth issue; it belongs in the record here only as context.

OPEN:
- The like-to-like base for the year to 2025-03-31 in Rs million, and what was removed to reach it beyond the Generics item: not in record (I2 Q1, I2 A1, I2 Q2, I2 A2). Document that would settle it: the results presentation for the year ended 2026-03-31, or the management discussion of the FY2025-26 annual report (cover letter dated 2026-07-15) if it defines like-to-like in Rs million.
- Volume against price and mix for Biosimilars, the largest segment, for the year to 2026-03-31: not in record (I2 Q3, I2 A3, I2 Q4, I2 A4). This is the central check of checks.md entry 7, and the course places that data in investor presentations and calls, not on the income statement (S039). Document: the same results presentation, or the annual report management discussion, read for a units or volume line.

- The 104,312 million Biosimilars figure that the case book reads from annual report page 6: the convict twice said it cannot confirm it from its files (I2 A3, I2 A4). Document: annual report page 6, plus whatever explains why the three segment figures on that page add to more than total income (the case book says the pages read do not say why).
- Organic against acquired growth: never asked. The exchange feed lists acquisition announcements dated 2025-08-07, 2025-12-06, 2026-01-05, 2026-03-03, 2026-06-10 and 2026-06-29 whose documents are not read in the case book, so whether any of them added revenue inside the year is unchecked. Document: those exchange filings and the annual report's acquisition note.
- Base effect by quarter: the Generics one-off is sized only for the full year (I2 A1, I2 A2). The case book shows Generics at 10,475 million in the quarter ended 2025-03-31 against 8,467 million a year later, and group revenue up only 2.3% on the year-ago quarter in the quarter ended 2026-03-31. How much of that 10,475 was the one-off is not in record. Document: the results deck or call for the quarter ended 2025-03-31.

WEAK QUESTION:
- I2 Q2: asked for three items at once (title, page and filing date) where my prompt allows one number and one date, and it repeated the I2 Q1 ask in a new form rather than narrowing it.
- I2 Q4: asked two things, a page in the management discussion and the cover letter date. The cover letter date was already on record from I2 A1 and I2 A2, so that half bought nothing, and the convict answered only that half (I2 A4).
- The rest turn (I2 Q5) says five questions were used; four were asked (I2 Q1 to I2 Q4).

EXTRA:
TO: the convict
QUESTION: In the quarter ended 2026-03-31, Generics revenue was 8,467 million against 10,475 million a year earlier. How many Rs million of that 10,475 million year-ago figure was the one-time lenalidomide sale, and what is the date of the document that states it?
WHY I ASK: checks.md entry 8, rate of change and base effect (sources S001 and S002 for its threshold line), which asks what base a growth figure is measured from and whether growth is speeding up or slowing; the course's line is "accelerating or is the rate of change slowing now?" (S496, SOICE5 01:34:52). Its growth bar is the screen in rules.md A1, quarterly sales growth above 15% year on year, class RULE, dated 2026-07-27 and 2026-07-28 (S454, S001, S002). It applies here because the case book shows group revenue up only 2.3% on the year-ago quarter in the quarter ended 2026-03-31, and A1 and A2 sized the one-off for the full year only, so whether that slow quarter is a base effect or a slowdown is untested.
DECISIVE: no
IF DEFLECTED: Then say yes or no whether the lenalidomide sale was booked in the quarter ended 2025-03-31.

CONSOLIDATION:
- What the method asked: split growth into units and realisation (checks.md entry 7, S039, "Volume is more important than value" (S039, MODULA 01:00:39)) and test the company's like-to-like adjustment against the filed base (I2 Q1 to I2 Q4).
- What the record answered: filed revenue growth of 10.9% (derived) against a stated 14% like-to-like; one adjustment named and sized, about Rs 300 crore of lenalidomide in Generics; Biosimilars quarterly revenue up 11.9% with units and price mixed; price erosion described with no size; segment labels and one cost allocation changed (I2 A1 to I2 A4).
- What is still open: the like-to-like base in Rs million, the Biosimilars unit against price split, confirmation of the 104,312 million segment figure, organic against acquired growth, and how much of the high Generics base sits in the quarter ended 2025-03-31 (I2 A1 to I2 A4; the last two were never asked).
- What a reader should check: the results presentation for the year ended 2026-03-31 and the annual report management discussion for a like-to-like reconciliation and a Biosimilars volume line; annual report page 6; and the acquisition filings dated from 2025-08-07 to 2026-06-29. Until then, the growth figure on this issue is a revenue figure, not a volume figure, and the course states no volume bar for a medicines company (checks.md entry 7 gives bars only for other businesses).

JUDGE

Judge note
STORY SO FAR:
- On the filed numbers, sales grew 10.9% in the year to 2026-03-31, not the 14% the report leads with (hearing I2 A1; case book ch3 full year).
- Biosimilars, the biggest business, carried most of the filed growth; Generics barely grew because the year before had a big one-time sale (case book ch3 segments; hearing I2 A2).
- Nobody on record can say how much growth was more units sold and how much was price, so growth here means rupees, not volume (hearing I2 A3, A4).

WHY-CHAIN:
- Group sales rose, because revenue from operations went from 152,617 (year to 2025-03-31) to 169,270 (year to 2026-03-31), +10.9%, filed, worked out by the convict and checked by me (case book ch3 full year; hearing I2 A1).
- Biosimilars drove it, because its four quarters add to 90,174 (year to 2025-03-31) and 104,312 (year to 2026-03-31), +15.7%, +14,138, against a group rise of 16,653; derived by me from the segment table, before eliminations (case book ch3 segments).
- Generics looked slow, because its quarters add to 30,175 then 31,681, +5.0%, and the base held 10,475 in the quarter ended 2025-03-31. Management's own adjusted figure removes about 3,000 of one-time lenalidomide sales, giving 31,681 against 27,175, +16.6%, derived by me (hearing I2 A1, A2). That 3,000 has no source id and I could not check it.
- The 14% does not match that one adjustment, because 169,270 against 152,617 less 3,000 (149,617) gives +13.1%, derived by me. So either more was removed, or the 14% sits on total income, whose year to 2025-03-31 figure is not in the record (case book ch2, AR p6).
- Growth did not turn into segment profit, because Biosimilars profit fell from 11,961 to 5,876 while its revenue rose (case book ch3 segment results; hearing I2 A4). Management named price erosion with no size; those quotes are verified by code (hearing I2 A3, S014, S013, S008). Whether erosion explains the fall: not in the record.

I DID NOT UNDERSTAND:
- Like-to-like: which items were taken out of the year to 2025-03-31, and how many rupees in total. Not in the record.
- Why the three segments add to 173,380 (104,312, 31,681 and 37,387, AR p6) while revenue is 169,270, a gap of 4,110 derived by me. The glossary

says sales between segments are usually left out; the report pages read do not say so.
- Total income 172,695 against revenue from operations 169,270: what the 3,425 difference is. Not in the record.
- Realisation, meaning the price actually received per unit. I get the word but no number for it exists here.
- A utilities cross charge: a shared cost moved between segments in the quarter ended 2026-06-30, so that quarter's segments are not on the old basis (case book ch3 segments; hearing I2 A2).
- Whether any business bought in the year (acquisition filings from 2025-08-07 to 2026-03-03) added sales. Never asked; not in the record.

STATE PROPOSED:
- Q1 partial: no like-to-like base was given, but the convict answered on a different basis, the filed base of 152,617 for the year to 2025-03-31, dated; move: not in my record, then mitigate.
- Q2 no data: no document title, page or filing date for the base; the convict named the results deck for the year ended 2026-03-31 or the annual report's management discussion as what would settle it.
- Q3 no data: no percent from units against price on any basis; quarterly revenue up 11.9% mixes the two, and the erosion words (verified by code) give a direction, no size; move: mitigate.
- Q4 no data: no management discussion page for Biosimilars volume; the cover letter date of 2026-07-15 was given, but that repeated A1 and A2.
One correction: the convict twice said it cannot confirm 104,312, yet the case book's own four quarters add to exactly 104,312 (derived by me; the quarter ended 2025-09-30 comes from a comparative column).

ASK NEXT:
- How many Rs million of the 10,475 Generics sales in the quarter ended 2025-03-31 were the one-time lenalidomide sale, and which dated document says so? Watch item: the lawyer proposed this as its EXTRA question and it was not asked (cost cap), so the slow 2.3% group quarter ended 2026-03-31 is still untested as base effect against slowdown.
- Did any acquisition between 2025-08-07 and 2026-03-03 add sales inside the year to 2026-03-31, and how many Rs million, with the document's date?

Also noted: the lawyer's rest turn says five questions were used; four were asked (hearing I2 Q1 to Q4).

CONVICT

WA1 Convict `partial`

ANSWER: As of the record's dates (calls to 2026-08-06, filed quarters to 2026-06-30), the exact Rs million inside the quarter ended 2025-03-31 is not on record. The size I hold is for the year to 2025-03-31: about Rs 300 crore, which is about 3,000 million (derived). My reading, not a filed fact: management put the spike in that one quarter, so the whole sits there. Then 10,475 million filed for the quarter ended 2025-03-31 less about 3,000 million for the year to 2025-03-31 leaves about 7,475 million for the quarter ended 2025-03-31 (derived). The dated document naming the exclusion is the Q4 FY26 deck held 2026-05-08; the amount is not recorded against it.
MOVE: cite | not in my record
EVIDENCE:
- "The exceptional revenue spike that we saw in Q4 of FY '25 was driven by the launch of Lenalidomide or gRevlimid, which should be viewed as a onetime upside." (S010, Kiran Mazumdar Shaw, held 2025-08-08)
- "excluding the onetime bonus of generic lenalidomide in Q4 FY '25" (S013, Kiran Mazumdar Shaw, held 2026-05-08)
- "Excluding one-time, generic lenalidomide sales in Q4FY25" (S024, deck), the Q4 FY26 deck held 2026-05-08
- filed Generics revenue 10,475 million for the quarter ended 2025-03-31 (S033, segment table in the filing for the quarter ended 2026-03-31, column year ago quarter)
- management's own adjusted figure: about Rs 300 crore of one-time lenalidomide sales in the year to 2025-03-31, behind the deck's 17% like-to-like Generics growth (record.md, no source id; the file does not name the deck)
- derived: 10,475 million for the quarter ended 2025-03-31 less about 3,000 million for the year to 2025-03-31 is about 7,475 million for the quarter ended 2025-03-31
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the Q4 FY25 results deck for the quarter ended 2025-03-31, or the reconciliation slide in the Q4 FY26 deck (S024), giving the lenalidomide revenue in Rs million for that quarter; I hold neither the slide number nor the amount.

CONVICT

WA2 Convict `not in my record`

ANSWER: As of the calls to 2026-08-06 and the annual report to the year ended 2026-03-31: not in my record. No file I read names an acquisition closed between 2025-08-07 and 2026-03-03, or any sales one added in the year to 2026-03-31, so I give no Rs million figure and no filing date. The one purchase my hot sheet holds is the Mylan Inc. purchase, USD 400 million in a notice whose figures stand at 2025-09-30; its date and any sales it added are not on file. The filed revenue rise is not split into organic and acquired.
MOVE: not in my record | mitigate
EVIDENCE:
- "completion of all BBLs deferred milestones under the acquisition agreement with Viatris, marking the full and final remittance of considerations towards the acquisition" (S008, Peter Bains, held 2025-01-31)
- "The strategic transformation we set in motion with Biocon Biologics’ acquisition of Viatris biosimilars business is now reaching its conclusion through the planned merger of Biocon Biologics with Biocon." (S012, Kiran Mazumdar Shaw, held 2026-02-13)
- the one other deal on record moved sales the other way: the sale of two India branded business units to Eris Lifesciences, announced on the call held 2023-11-10 (S004, Peter Bains); the amount is not repeated here because four different rupee figures attach to the Eris dealings and the record does not reconcile them
- filed revenue from operations 169,270 million for the year to 2026-03-31 and 152,617 million for the year to 2025-03-31 (S026, PDF page 347); derived by me, the rise is 16,653 million between the year to 2025-03-31 and the year to 2026-03-31, and no line in my files splits it into organic and acquired
- filed, read by hand from one notice, no tier: the Mylan Inc. purchase was USD 400 million, in a notice whose figures stand at 2025-09-30 (S035); the

purchase date and any sales it added are not on file, and I did not open the annual report pages file on it
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the business combination or acquisition note in the consolidated notes of the annual report for the year ended 2026-03-31 (cover letter dated 2026-07-15), and the exchange filings dated 2025-08-07 to 2026-03-03 that the lawyer lists (documents named, ids not on file here).

JUDGE

Judge close
STORY SO FAR:
- On filed numbers, sales grew 10.9% in the year to 2026-03-31, not the 14% the report leads with (case book ch3 full year; hearing I2 A1).
- Biosimilars carried most of the rise. Generics looked slow because a one-time lenalidomide sale sat in the quarter ended 2025-03-31 (case book ch3 segments; hearing I2 WA1).
- Nobody on record splits growth into more units against higher prices, and no bought business is shown adding sales (hearing I2 A3, A4, WA2).

WHY-CHAIN:
- Group sales rose, because revenue from operations went from 152,617 (year to 2025-03-31) to 169,270 (year to 2026-03-31), +10.9%, filed (case book ch3; hearing I2 A1). The 14% does not follow from the one named adjustment: 169,270 against 149,617 (152,617 less 3,000) is +13.1%, derived by me. So more was removed, or the 14% sits on total income (case book ch2, AR p6).
- Biosimilars drove it, because its four quarters add to 90,174 (year to 2025-03-31) and 104,312 (year to 2026-03-31), +14,138 or +15.7%, against a group rise of 16,653. Derived by me from the segment table, before eliminations; it matches the 104,312 on AR p6 (case book ch2, ch3 segments).
- Generics looked slow because of a one-off in the quarter ended 2025-03-31: "Excluding one-time, generic lenalidomide sales in Q4FY25" (S024, deck held 2026-05-08), verified by code. Its size, about 3,000, is management's own adjusted figure with no source id. Without it, Generics is 31,681 against 27,175 (30,175 less 3,000), +16.6%, derived by me (hearing I2 A2, WA1).
- The weak quarter ended 2026-03-31 (+2.3%) looks like a base effect, if the whole 3,000 sits in the year-ago quarter: 45,166 against 41,170 (44,170 less 3,000) is +9.7%, derived by me. That placement is the convict's reading; the amount inside that quarter is not in the record (case book ch3; hearing I2 WA1).
- No purchase is shown adding sales. The in-year purchase on record is more Biocon Biologics shares from Mylan Inc. (case book ch9, PDF p394, agreement of 2025-12-06; hearing I2 WA2). Biosimilars sales were already in the group total in the year to 2025-03-31 (case book ch3 segments), so this raised ownership, not sales: my reading. The 2025-08-07 and 2026-03-03 filings: not in the record.

I DID NOT UNDERSTAND:
- Group like-to-like: which items, and how many rupees, were taken out of the year to 2025-03-31. Not in the record.
- Total income 172,695 against revenue 169,270 for the year to 2026-03-31: what the 3,425 gap is (derived by me). Not in the record.
- Why the segments add to 173,380 against revenue of 169,270, a 4,110 gap (derived by me). The glossary says sales between segments are usually left out; the pages read do not confirm it.
- Realisation, meaning the price actually received per unit. I know the word, but no number for it exists here.
- The Mylan Inc. purchase: the convict cites USD 400 million in a notice at 2025-09-30 (S035); the case book prints USD 815 million for the 2025-12-06 agreement (PDF p394). I cannot reconcile them.
- Why Biosimilars segment profit fell from 11,961 to 5,876 (years to 2025-03-31 and 2026-03-31) while its sales rose. Price erosion was named with no size (S014, S013, S008, verified by code). Not in the record.

STATE PROPOSED:
- Q1 partial, unchanged: no like-to-like base was given; the convict answered on a different basis, the filed base of 152,617 for the year to 2025-03-31, dated; moves: not in my record, then mitigate.
- Q2 partial, changed from no data: WA1 now names a dated document with an id, the Q4 FY26 deck (S024, held 2026-05-08), as stating the Generics exclusion, quote verified by code. It still gives no page and no Rs million base.
- Q3 no data, unchanged: no units against price split on any basis; quarterly sales up 11.9% mix the two, and the erosion quotes (verified by code) give a direction, no size; move: mitigate.
- Q4 no data, unchanged: no management discussion page for Biosimilars volume; the 2026-07-15 cover letter date repeats A1 and A2. The 104,312 the convict could not confirm equals the case book's own four quarters (derived by me).

WATCH:
- Group like-to-like base in Rs million for the year to 2025-03-31: the FY2025-26 annual report management discussion (cover letter dated 2026-07-15), or the reconciliation slide in the Q4 FY26 deck (S024, held 2026-05-08).
- Lenalidomide sales inside the quarter ended 2025-03-31, in Rs million: the Q4 FY25 results deck. This was the lawyer's EXTRA question, not asked (cost cap). WA1 placed the sale in that quarter but did not size it there, so the +2.3% quarter is not yet settled as base effect against slowdown.
- Biosimilars units against price for the year to 2026-03-31: the results presentation for that year, or the annual report management discussion. This is the issue's central check and it is still open.
- Purchases: the exchange filings dated 2025-08-07 and 2026-03-03 (not read) and the annual report's business combination note. The 2026-06-10 and 2026-06-29 filings fall after the year and matter for the year to 2027-03-31.
- The 3,425 and 4,110 gaps: AR p6 and the segment note (PDF pages 413, 414), whose segment revenue lines were not read.
- The Mylan figures: the EGM notice (D06b, as of 2025-12-07) read beside PDF page 394.

Also noted: code ran over every I2 turn with 0 problems; every convict quote was found word for word with its id, so quotes are verified by code. I still cannot tell how far the erosion quotes explain the profit fall. My notebook held nothing for this issue.

- I3 Guidance against delivery 14 turns

LAWYER

Q1 Lawyer
TO: the convict
QUESTION: For the year to 2026-03-31, name the one numeric target you stated most firmly on a call. Give the measure, the figure you gave and the date of the call.
WHY I ASK: S066 and checks.md entry 52, guidance against outcome: compare what management said with what happened. The course puts it as "whether they are walking the talk or not" (S066, MODULE 00:19:20, lesson date 2026-07-27). It applies here because the case book holds the outcome (revenue from operations 169,270 million rupees against 152,617, profit to shareholders 3,856 against 10,133) but holds no management guidance, so the promise has to come from you first. The course states no number for how much a miss may be, and I have not checked what was guided or whether it was met. DECISIVE: yes
IF DEFLECTED: Then name any figure you gave for that year with its date, even a range, and say which filing shows the outcome on the same measure.

CONVICT

A1 Convict `answered`
ANSWER: The firmest numeric target on record for the year to 2026-03-31 is a biosimilars margin in the mid-20s, given on a full year basis on the call held 2026-02-13, about six weeks before the year ended. It is a band, not a point figure. The sentence says margins and does not name the measure, so EBITDA is my inference. Earlier, on the call held 2025-01-31, management gave an EBITDA margin of 22% to 23%, and the line I hold names no year. I hold no firmer figure for that year. The same 2026-02-13 call also declined to say how margins would improve.
MOVE: cite | concede
EVIDENCE:
"And on a full year basis, we'll of course be in the mid-20s on our margins as well." (S012, Shreehas Tambe, held 2026-02-13)
"We did say that we will have the mid-20s for the current financial year." (S012, Shreehas Tambe, held 2026-02-13)
"And we continue to have an EBITDA margin of 22% to 23%." (S008, Shreehas Tambe, held 2025-01-31)
"I'll refrain from giving any specifics on how the margins are expected to improve." (S012, Shreehas Tambe, held 2026-02-13)
management's own adjusted figure: company deck shows a biosimilars EBITDA margin of 26% for the year to 2026-03-31 (deck document not named in record.md, so no id).
Scorecard: kept, with the year and the band marked inferred (record.md, statement said 2026-02-13).
Filed biosimilars segment profit is a different measure, not a margin: 5,876 million for the year to 2026-03-31 against 11,961 million for the year to 2025-03-31 (S026, PDF page 413).
STATE I CLAIM: answered
WHAT WOULD SETTLE IT: The company deck that prints the 26%, to confirm its definition of the margin; and the Q3 FY26 call held 2026-02-13, to confirm which measure the speaker meant.

LAWYER

Q2 Lawyer
TO: the convict
QUESTION: You gave an EBITDA margin of 22% to 23% on the call held 2025-01-31 and named no year. If that covered the year to 2025-03-31, what margin did the company report for that year on the same measure? Give the figure and the date of the document that prints it.
WHY I ASK: S066 and checks.md entry 52, guidance against outcome: compare what management said with what happened, over several years, not one year only. The course puts it as "whether they are walking the talk or not" (S066, MODULE 00:19:20, lesson date 2026-07-27). It applies here because your first answer covered the year to 2026-03-31 only, and a single kept year cannot show a pattern. The course states no number for how far a miss may run, and I have not checked what was guided or delivered for the year to 2025-03-31. DECISIVE: no
IF DEFLECTED: Then say which year the 22% to 23% covered, and which deck or filing prints the margin for that year.

CONVICT

A2 Convict `not in my record`
ANSWER: The margin the company reported for the year to 2025-03-31 on that measure is not in my record. I hold no biosimilars EBITDA margin for that year and no company-wide one. Two points on the premise. My notes place the 22% to 23% under biosimilars, not the whole company (inferred from S008). And the line was given in reply to an analyst asking about the next 18 to 24 months, so it may look forward and not describe the year to 2025-03-31. The nearest later figure is management's own adjusted 24% for one quarter, not that year.
MOVE: challenge | not in my record
EVIDENCE:
"Is it not a conservative guidance? Or should we expect the margins to, let's say, over the next 18, 24 months move up from here on substantially?" (S008, analyst question)
"And the EBITDA would be in the mid-20s, so some 22%, 23%, maybe 25%." (S008, management answer)
"And we continue to have an EBITDA margin of 22% to 23%." (S008, Shreehas Tambe, held 2025-01-31)
"So you should take 24% on a normalized basis for the quarter." (S010, Kedar Upadhye, held 2025-08-08) The line does not name the quarter; the quarter ended 2025-06-30 is inferred from the call date.
filed biosimilars segment profit 11,961 million for the year to 2025-03-31 (S026, PDF page 413). This is a profit in rupees, not a margin, and the files I read hold no biosimilars segment revenue for that year to divide it by.
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: The Q4 FY25 results deck and the call held 2025-05-09 (S009), which would print the biosimilars EBITDA margin for the year to 2025-03-31 if it was stated; and the full 2025-01-31 transcript around the reply, to confirm which year the 22% to 23% covered.

LAWYER

Q3 Lawyer
TO: the convict
QUESTION: The 26% biosimilars EBITDA margin for the year to 2026-03-31 has no named document in your record. Which document prints it? Give

its title and its release date, so a reader can set it beside the mid-20s you guided on the call held 2026-02-13.
WHY I ASK: S066 and checks.md entry 52, guidance against outcome: compare what management said with what happened, and take the outcome from a document that can be found. The course puts it as "whether they are walking the talk or not" (S066, MODULE 00:19:20, lesson date 2026-07-27). It applies here because your Q2 answer left the year to 2025-03-31 not in your record, so the one guided year with an outcome rests on a deck figure that the case book does not hold and your record does not name. The course states no number for how far a miss may run, and I have not checked the deck. DECISIVE: no
IF DEFLECTED: Then say whether the 26% is a filed figure or management's own adjusted figure, and give the date of the document that shows it.

CONVICT

A3 Convict `not in my record`
ANSWER: As of the record's dates (calls to 2026-08-06, annual report to the year ended 2026-03-31), I cannot name the document, its title or its release date. The scorecard entry says only that the company deck shows 26% for the year to 2026-03-31, with no deck named. My reading, not a filed fact: it is the deck for the quarter and year ended 2026-03-31, released around the call held 2026-05-08, and the record holds a deck of that date as S024. I have not seen the 26% on it. The 26% is a deck figure, not a filed table number, and the record marks the year and the band inferred.
MOVE: not in my record | mitigate
EVIDENCE:
"And on a full year basis, we'll of course be in the mid-20s on our margins as well." (S012, Shreehas Tambe, held 2026-02-13)
"We have always directed this to say we will be in the mid-20s, and it will ramp up." (S014, Shreehas Tambe, held 2026-08-06)
deck figure, not a filed number: biosimilars EBITDA margin 26% for the year to 2026-03-31; the deck is not named in the record, so no id (record.md, Biosimilars margin entry, scored inferred, statement said 2026-02-13)
"expect gradual rebuild as revenues continue ramping up" (S024, deck), a generics line, which shows only that a deck dated 2026-05-08 is in the record; it does not show the 26%
filed biosimilars segment profit 5,876 million for the year to 2026-03-31, a rupee profit and not a margin (S026, year to 2026-03-31)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the results presentation for the quarter and year ended 2026-03-31, with its title and exchange release date (neither held), read for the slide that prints the biosimilars EBITDA margin and its definition. S024 may be that deck; unchecked.

LAWYER

Q4 Lawyer
TO: the convict
QUESTION: On the call held 2025-08-08, management guided Generics to strong double-digit growth for the year to 2026-03-31. The filed figure is +5.0%. On which call did management first say that guide would not be met? Give the growth figure it gave instead and the date of that call.
WHY I ASK: S066 and checks.md entry 52, guidance against outcome: compare what management said with what happened, over several years, and the course puts it as "whether they are walking the talk or not" (S066, MODULE 00:19:20). The check's red flag is guidance missed, and its green flag is guidance that was met. It applies here because your answers on the biosimilars margin left the outcome document and the year to 2025-03-31 not in your record, so the one guided year I can still test rests on a deck figure I cannot find. The Generics pair is already in your opening: a guide, a date and a filed outcome. The course states no number for how far a miss may run, and I have not checked whether management revised the guide.
DECISIVE: no
IF DEFLECTED: Then say yes or no whether any call you hold after 2025-08-08 restates the Generics growth guide.

CONVICT

A4 Convict `not in my record`
ANSWER: As of the calls to 2026-08-06, I find no call in my record where management said the Generics guide for the year to 2026-03-31 would not be met. So I cannot name a call, a date or a replacement growth figure. The record I read runs the other way. The call held 2025-11-12 kept "revenue growth traction" for the second half. The call held 2026-02-13 gave 18% for the nine months to 2025-12-31, as management stated it. The call held 2026-05-08 moved the stated focus to margin. I concede the size was missed: filed Generics growth was 5.0% for the year to 2026-03-31, on first-filed numbers.
MOVE: not in my record | concede
EVIDENCE:
- "And we would continue to see margin improvement and revenue growth traction in the second half of this fiscal." (S011, Siddharth Mittal, held 2025-11-12)
- "Expect Generics performance in the second half to strengthen further" (S022, deck)
- "For 9 months FY '26, generics revenue grew at 18% year-on-year, while EBITDA declined by 32%, attributable to higher costs related to the new facilities we have commissioned in the recent past." (S012, Kiran Mazumdar Shaw, held 2026-02-13)
- "The focus for us going forward is very clearly going to be on margin improvement because we built state-of-the-art facilities." (S013, Shreehas Tambe, held 2026-05-08)
- "we don't guide specifically Tushar, but like what Shreehas said, you should budget for incremental growth from new launches more towards second half." (S013, Kedar Upadhye, held 2026-05-08)
- filed Generics revenue growth 5.0% for the year to 2026-03-31, and a fall of 2.1% for the second half of FY26 (October 2025 to March 2026), both on first-filed numbers (record.md)
- management's own adjusted figure: the company deck says Generics grew 17% like-to-like for the year to 2026-03-31, excluding one-time lenalidomide sales in the year to 2025-03-31 (record.md; deck not named, no id)
- my reading, not a quote: the nine-month 18% to 2025-12-31 and the filed 5.0% to 2026-03-31 sit on different bases, and I do not reconcile them
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the full transcripts of the calls held 2025-11-12 (S011) and 2026-02-13 (S012), read for any Generics full-year growth restated in reply to an analyst, since I read my notes and not the whole of each call; and the results deck for the quarter ended 2026-03-31, with its title and release date, which I do not hold.

LAWYER

Lawyer rest

REST: I stop here because the Q5 limit is reached, not because every check is covered: the guidance against outcome check (S066, checks.md entry 52) is answered for one margin band only, and the 2025 margin outcome, the document that prints the 26% and any call restating the Generics guide stay not in the convict's record, so a reader should treat those three as open.

LAWYER

Lawyer review

COVERED:

- One guide set against one stated outcome on the same year. The biosimilars margin in the mid-20s on a full year basis, given on the call held 2026-02-13 (S012), against the 26% biosimilars EBITDA margin for the year to 2026-03-31 that the convict's scorecard takes from a company deck and scores kept, with the year and the band marked inferred (I3 A1). The method check is checks.md entry 52, "whether they are walking the talk or not" (S066, MODULE 00:19:20, lesson date 2026-07-27); the course states no number for how far a miss may run, so I apply none.
- One guide set against a filed outcome. The Generics guide of strong double-digit growth for the year to 2026-03-31, given on the call held 2025-08-08 (S010, Convict opening), against filed Generics growth of 5.0% for that year; the convict conceded the size of the miss (Convict opening, I3 A4). Entry 52 names guidance missed as its red flag.
- Whether the Generics guide was withdrawn before the year ended. The convict found no call in its record that said the guide would not be met; the call held 2025-11-12 (S011) still spoke of revenue growth traction for the second half, while filed Generics fell 2.1% for October 2025 to March 2026 on first-filed numbers; on the call held 2026-05-08 (S013) management said it does not guide specifically and moved its stated focus to margin (I3 A4). This bears on entry 52's drifting-target detection; I read it as a record of what was said, not as a finding on intent.
- The scope of the 22% to 23% margin given on the call held 2025-01-31. The convict challenged my premise: its notes place the band under biosimilars, and it was said in reply to an analyst asking about the next 18 to 24 months, so it may be forward-looking and not a guide for the year to 2025-03-31 (I3 A2).

OPEN:

- The outcome for the 22% to 23% band. Not in record (I3 A2). Settled by: the Q4 FY25 results deck and the call held 2025-05-09 (S009), and the full transcript of the call held 2025-01-31 for the year the band covered.
- The document that prints the 26%, and its margin definition. Not in record (I3 A3). Settled by: the results presentation for the quarter and year ended 2026-03-31, with its title and exchange release date; the convict names S024 as possibly that deck, unchecked. Until then the one kept item rests on a management-adjusted figure from an unnamed document, not a filed number.
- Which measure the mid-20s sentence meant. The sentence says margins; EBITDA is the convict's inference (I3 A1). Settled by: the full transcript of the call held 2026-02-13 (S012).
- Whether any call after 2025-08-08 restated the Generics full-year guide. Not in record; the convict read its notes, not whole calls (I3 A4). Settled by: the full transcripts of the calls held 2025-11-12 (S011) and 2026-02-13 (S012), and the results deck for the quarter ended 2026-03-31.
- The several-years leg of entry 52. The hearing tested two guided items, both on the year to 2026-03-31. The convict's own scorecard reads kept 14, missed 5, still open 9, with 11 of 39 resting on a reading (Convict opening); no question in I3 opened it. Settled by: the D12 scorecard of dated promises, read item by item against later filings. The case book also marks D11, which feeds the answer states, as one model's reading.
- A reconciliation the convict declined. In I3 A4 the convict said the 18% for the nine months to 2025-12-31 (S012) and the filed 5.0% for the full year sit on different bases and did not reconcile them. Derived by me from the case book's filed segment table, not printed in any filing: adding the filed Generics quarters gives roughly 18% for the first nine months and 5.0% for the year, and the difference sits in the quarter ended 2025-03-31, filed at 10,475 against 6,864 the quarter before. Unchecked: the cause of that quarter's size is not in the case book, and the 2025-09-30 row comes from a comparative column.

WEAK QUESTION:

- I3 Q2: it put a hypothetical premise (if the 22% to 23% covered the year to 2025-03-31) and asked for the outcome on it. The convict was right to challenge the premise (I3 A2). The better question was its own IF DEFLECTED line: which year did the band cover.
- I3 Q4: it presupposed that a call had withdrawn the Generics guide and asked for two things (the replacement figure and the call date). It still produced a useful answer, because the absence of any withdrawal is itself on record (I3 A4).

EXTRA:

TO: the convict

QUESTION: Your opening scored 5 of 39 dated promises as missed. Leaving out the Generics growth guide, name the missed promise with the largest gap between guide and outcome. Give the guided figure and the date of the call that gave it.

WHY I ASK: S066 and checks.md entry 52, guidance against outcome, which says to compare what management said with what happened over several years; this issue has tested only two items, both on the year to 2026-03-31, so the pattern across years is untested. The course states no number for how far a miss may run. DECISIVE: no

IF DEFLECTED: Then name any one of the 5 missed items with its call date and the filing that shows the outcome.

CONSOLIDATION:

- What the method asked: entry 52, guidance against outcome over several years, "whether they are walking the talk or not" (S066, MODULE 00:19:20), with guidance missed as the red flag and no number for an acceptable miss (I3 Q1 to Q4).
- What the record answered: one biosimilars margin guide scored kept against a deck figure (I3 A1); one Generics growth guide missed on the filed numbers and conceded, with no withdrawal call on record and a later statement that management does not guide specifically (Convict opening, I3 A4); the 22% to 23% band challenged as possibly forward-looking (I3 A2).
- What is still open: the 22% to 23% outcome (I3 A2), the document and definition behind the 26% (I3 A3), the measure behind the mid-20s sentence (I3 A1), any restated Generics guide (I3 A4), and the other items on the convict's scorecard, kept 14 and missed 5 of 39 (Convict opening).
- What a reader should check: the Q4 FY26 results deck (possibly S024, unchecked) for the 26% and its definition; the full transcripts S008, S011 and S012; the D12 scorecard item by item; and the filed Generics quarter ended 2025-03-31 at 10,475, which is where the nine-month 18% and the full-year 5.0% part (derived from the case book, I3 A4).

JUDGE

Judge note

STORY SO FAR:
- Management guided Generics to strong double-digit growth on 2025-08-08; filed growth for the year to 2026-03-31 was 5.0%, conceded (hearing I3 A4).
- The biosimilars mid-20s margin guide from 2026-02-13 is scored kept, against a 26% from a deck nobody can name (hearing I3 A1, A3).
- Whether earlier years' guides were met is untested: the 2025 margin outcome and the other missed promises stay open (hearing I3 A2, Lawyer review).

WHY-CHAIN:
- Generics missed its guide, because the year-ago quarter ended 2025-03-31 was unusually large, 10,475 against 6,864 the quarter before (case book ch3 Segments). Nine months: 23,214 against 19,700, +17.8%; full year: 31,681 against 30,175, +5.0%; both derived by me. Why that quarter was large: not in the record; the one-time sales reason is management's own, from an unnamed deck (hearing I3 A4).
- Generics shrank in the second half while management still spoke of growth traction, because 8,513 plus 8,467 is 16,980 for October 2025 to March 2026, against 6,864 plus 10,475, 17,339, a year earlier: -2.1%, derived by me (case book ch3 Segments). The traction line is verified by code (S011, held 2025-11-12, hearing I3 A4).
- The biosimilars guide counts as kept, yet filed biosimilars segment profit halved: 5,876 for the year to 2026-03-31 against 11,961 a year earlier (case book ch3, PDF p413). Over segment revenue that is 5.6% (5,876 over 104,312) against 13.3% (11,961 over 90,174), derived by me from the quarter rows. A different measure from EBITDA margin, so not proof of a miss.
- Management stopped putting a size on Generics growth, because on the call held 2026-05-08 it said it does not guide specifically and that the focus is margin (S013, verified by code, hearing I3 A4). Whether any call withdrew the double-digit guide first: not in the record; the convict read notes, not whole calls.
- The 22% to 23% band cannot be tested, because the convict says it answered an analyst asking about the next 18 to 24 months, so it may look forward (S008, verified by code, hearing I3 A2). Its outcome: not in the record.

I DID NOT UNDERSTAND:
- How a biosimilars margin can be kept near 26% while filed biosimilars segment profit halved; the bridge between the two measures is not in the record.
- What like-to-like took out to turn 5.0% into 17%, and how large the one-time sales were; I could not check the deck behind it, it has no id (hearing I3 A4).
- Which margin the 2026-02-13 sentence means: it says margins, not biosimilars or EBITDA; both are the convict's inference (hearing I3 A1).
- Where the 26% and the scorecard counts (kept 14, missed 5 of 39) come from: they rest on record.md with no source id, so I could not check them.
- Whether "first-filed numbers" would change the 5.0% if later filings restated a quarter; the 2025-09-30 row comes from a comparative column (case book ch3).

STATE PROPOSED:
- Q1 partial: a band, mid-20s, with a date (2026-02-13) and an id verified by code (S012), but the measure asked for is the convict's inference, not said in the quote; moves cite and concede.
- Q2 no data: the margin for the year to 2025-03-31 is not in the record, with settling documents named (S009, Q4 FY25 deck); the move was a fair challenge to the premise about which year the band covered.
- Q3 no data: the document that prints the 26% is not named; S024 is the convict's guess and unchecked; move mitigate.
- Q4 partial: the miss is conceded with a filed number and date (5.0%, year to 2026-03-31, matching my sum from case book ch3), but no withdrawal call or replacement figure is in the record, and only notes were read.

ASK NEXT:
- Why was the Generics quarter ended 2025-03-31 so large, 10,475 against 6,864 the quarter before, and which filing names the one-time sales?
- Leaving out Generics, which of the 5 missed promises had the largest gap, with its guided figure and call date? This is the lawyer's EXTRA, not asked because of the cost cap, so the several-years test stays a watch item.

CONVICT

WA1 Convict partial

ANSWER: As of the record's dates (calls to 2026-08-06, filed quarters to 2026-06-30), management's reason is the US launch of generic lenalidomide, sold in launch quantities in the quarter ended 2025-03-31 and later called a one-time upside. The scorecard puts the one-time sales at about Rs 300 crore, in the year to 2025-03-31, which is about 3,000 million (derived). That would cover most of the rise of 3,611 (derived) from the quarter ended 2024-12-31, if all of it fell in that quarter; the record does not say it did. The document I hold that names the one-time sales is a company deck, not a filed statement. I hold no filed result that names them.
MOVE: cite | not in my record
EVIDENCE:
"driven largely by the sale of launch quantities of Lenalidomide" (S009, Kiran Mazumdar Shaw, held 2025-05-09)
"The exceptional revenue spike that we saw in Q4 of FY '25 was driven by the launch of Lenalidomide or gRevlimid, which should be viewed as a onetime upside." (S010, Kiran Mazumdar Shaw, held 2025-08-08)
"Excluding one-time, generic lenalidomide sales in Q4FY25" (S024, deck)
"excluding the onetime bonus of generic lenalidomide in Q4 FY '25" (S013, Kiran Mazumdar Shaw, held 2026-05-08)
filed Generics 10,475 for the quarter ended 2025-03-31 against 6,864 for the quarter ended 2024-12-31, difference 3,611, derived (figures as the hearing gives them from the case book segment table, hearing I3 Judge note; I did not read the table this turn)
management's own adjusted figure: the deck says Generics grew 17% like-to-like for the year to 2026-03-31, against 5.0% first-filed, excluding about Rs 300 crore of one-time lenalidomide sales in the year to 2025-03-31 (scorecard wording in record.md; I have not seen the deck line)
filed Generics revenue was up 45.8% for the quarter ended 2025-03-31 on the same quarter a year earlier, first-filed (record.md scorecard)
STATE I CLAIM: partial

WHAT WOULD SETTLE IT: the results presentation for the quarter and year ended 2025-03-31, which would print the lenalidomide amount and the quarter it fell in (its id is not checked here); and the filed segment note for the quarter ended 2025-03-31, to see whether any filed document names the one-time sales. S024 is the later deck dated 2026-05-08, and the Rs 300 crore reaches me only through the scorecard.

CONVICT

WA2 Convict partial

ANSWER: As of the record dates (calls to 2026-08-06), leaving Generics out, the largest measured gap is bevacizumab. It was said on the call held 2025-05-09 for the first half of 2025, the window closed 2025-06-30, and the company deck dates the US launch Oct 2025. That is about 3 to 4 months late (derived; no launch day on file). The other timed misses are smaller: liraglutide US approval 55 days late, aspart approval 16 days late. Liraglutide India, said on the call held 2025-08-08, has no launch found; that miss is provisional, so its gap is unmeasured. None of the four carries a numeric target. Each guide is a date window, not a figure.
MOVE: cite | concede
EVIDENCE:
- "So, you will be seeing that sometime in the first half year of a launch." (S009, Matthew Erick, held 2025-05-09)
- scorecard entry, bevacizumab launch: US approval came 10 Apr 2025, and the company deck dates the US launch Oct 2025 (deck not named in record.md, no source id on file); so the approval was in hand before the sentence was said, and the miss is the launch (inferred)
- "you'll see this launching towards the end of the summer around the October time frame" (S010, Matthew Erick, held 2025-08-08); the October date was kept, the first-half date was not
- "And then subsequently, during the second half of year, we also expect an approval in the U.S." (S008, Siddharth Mittal, held 2025-01-31); approved 24 Feb 2026, 55 days after the window closed 2025-12-31 (record.md, NSE release)
- FDA approved aspart (Kirsty) on 16 Jul 2025, 16 days after the window closed 2025-06-30 (record.md, NSE release)
- "We will be launching liraglutide also in India this quarter through our partners." (S010, Siddharth Mittal, held 2025-08-08); India approval is in the Q1 FY26 deck, but no India launch appears in any release or deck I hold; nothing found is not proof (record.md)
- on the call held 2025-11-12 an analyst asked: "And in fact, we have been talking about the commercialization of the Bevacizumab by this time. So, any update on that?" (S011, analyst question); management's reply began "It's good that, Surya, you brought us to this product." (S011, management answer); one model's reading marks it deflected, and I do not reconcile it with the Oct 2025 deck date
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the exchange release or deck that gives the day of the US bevacizumab launch (document named, id not on file here), the full transcript of the call held 2025-11-12 (S011), and any release or deck dated after 2025-09-30 that shows the liraglutide India launch.

JUDGE

Judge close

STORY SO FAR:
- Generics was guided to strong double-digit growth on 2025-08-08. Filed growth for the year to 2026-03-31 was 5.0%, and the miss is conceded (hearing I3 A4).
- Management's reason is a one-time US lenalidomide launch in the quarter ended 2025-03-31. That made the year-ago base large (hearing I3 WA1, S010 verified by code).
- The biosimilars mid-20s margin guide is scored kept against an unnamed deck. The other guides were launch date windows, and several slipped (hearing I3 A1, A3, WA2).

WHY-CHAIN:
- Generics missed its size, because the base quarter ended 2025-03-31 was 10,475 against 6,864 the quarter before (case book ch3 Segments). Management says lenalidomide launch quantities drove it (S009, S010, verified by code, hearing I3 WA1). Take out about 3,000 million and the year is 31,681 against 27,175, +16.6%, derived by me, near the deck's 17%. The 3,000 has no source id.
- Generics shrank in the second half while management spoke of growth traction (S011, held 2025-11-12, verified by code). 8,513 plus 8,467 is 16,980, against 6,864 plus 10,475, 17,339: -2.1%, derived by me (case book ch3). Without about 3,000 in that base it is +18.4%, derived by me, only if all of it fell in that quarter. The record does not say so (hearing I3 WA1).
- No call on record withdrew the double-digit size. On 2026-05-08 management said it does not guide specifically and moved its focus to margin (S013, verified by code, hearing I3 A4). Whether an earlier call restated the guide: not in the record, because the convict read notes, not whole calls.
- The biosimilars guide counts as kept, yet filed segment profit fell from 11,961 (year to 2025-03-31) to 5,876 (year to 2026-03-31) (case book ch3, PDF p413). Over segment revenue that is 13.3% (11,961 over 90,174) against 5.6% (5,876 over 104,312), derived by me. It is a different measure from an EBITDA margin. The bridge between them: not in the record.
- Launch timing slipped and the window moved. Bevacizumab was said for the first half of 2025 on 2025-05-09 (S009, verified by code), then October on 2025-08-08 (S010, verified by code). The deck dates the US launch Oct 2025, with no source id. So the later window was kept, the first was not; about 3 to 4 months late, derived by the convict (hearing I3 WA2).

I DID NOT UNDERSTAND:
- How a biosimilars margin stays near 26% while filed biosimilars segment profit halved; the bridge is not in the record.
- Where the 300 crore, the 26%, the 17% and the scorecard counts come from: record.md with no source id, so I could not check them.
- Which margin the 2026-02-13 sentence means; biosimilars and EBITDA are both the convict's inference (hearing I3 A1).
- Why an analyst on 2025-11-12 still asked when bevacizumab would be sold, if the deck says it launched Oct 2025; the reply's state is one model's reading (S011, hearing I3 WA2).
- Whether the liraglutide India launch happened at all; the convict found nothing, and nothing found is not proof (hearing I3 WA2).
- Whether a later filing restated any first-filed Generics quarter; the 2025-09-30 row comes from a comparative column (case book ch3).

STATE PROPOSED:
- Q1 partial, unchanged: a mid-20s band with a date (2026-02-13) and an id verified by code (S012), but the measure asked for is the convict's inference; moves cite and concede. The why answers did not touch it.
- Q2 no data, unchanged: the margin for the year to 2025-03-31 is not in the record, with S009 and the Q4 FY25 deck named to settle it; the challenge

to the premise was fair.
- Q3 no data, unchanged: no document is named for the 26%. WA1 shows S024 carries a lenalidomide line, not the 26%, so S024 stays a guess; move mitigate.
- Q4 partial, unchanged: the miss is conceded with a filed 5.0% that matches my sum from case book ch3. WA1 now gives a reason verified by code (S009, S010, S013), but no withdrawal call or replacement figure is in the record.
- WA1 partial: the cause is on record with quotes verified by code and filed quarters with dates, but the amount, about 300 crore, has no id and no filed document names the one-time sales; moves cite and not in my record.
- WA2 partial: four other missed items named with dated calls verified by code, but each guide is a date window, not a figure, and the launch and approval dates have no source id; moves cite and concede.

WATCH:
- The results deck for the quarter and year ended 2026-03-31 (possibly S024, unchecked): find the 26% and its definition. Settles Q3.
- The full transcript of the call held 2026-02-13 (S012): which margin mid-20s means. Settles Q1.
- The Q4 FY25 results deck and the call held 2025-05-09 (S009): the margin for the year to 2025-03-31, and the lenalidomide amount and quarter. Settles Q2 and WA1.
- The full transcripts S008 (held 2025-01-31) and S011 (held 2025-11-12): the year the 22% to 23% band covered, and any restated Generics guide. Settles Q2 and Q4.
- The exchange release with the US bevacizumab launch day, and any release or deck after 2025-09-30 showing the liraglutide India launch. Settles WA2.
- Guidance over several years: the D12 scorecard (kept 14, missed 5, open 9, 11 of 39 on a reading, Convict opening) read item by item against filings. The lawyer's EXTRA was not asked by the lawyer (cost cap); WA2 covered its substance, but every guide tested came from 2025 calls. Years before the year to 2026-03-31 are untested.

- I4 Earnings quality and measure changes 14 turns

LAWYER

Q1 Lawyer
TO: the convict
QUESTION: The annual report prints total income of 172,695 million rupees, up 14% like-to-like. Filed revenue from operations moved from 152,617 to 169,270. What amount in Rs million separates the filed basis from the like-to-like basis, and what is the date of the document that states it?
WHY I ASK: S005 and S010, checks.md entry 6, adjusted or normalised figures: test any adjusted number for a stated basis. The green flag in that entry is an adjustment that can be traced to a filed line; the entry is class EXAMPLE and PERISHABLE for its cases and gives no haircut percentage. It applies here because the case book shows the headline growth is a like-to-like figure, which its glossary calls the company's own choice and not a filed number, and shows the third segment renamed twice (Research services, CRDMO, Services) with a utilities cross charge moved in the quarter ended 2026-06-30. I have not checked what the like-to-like basis removes; the report pages read do not say. DECISIVE: yes
IF DEFLECTED: Then name each item removed or added to reach the 14%, with its amount in Rs million and the filing that prints it.

CONVICT

A1 Convict `not in my record`
ANSWER: As of the annual report for the year ended 2026-03-31, the Rs million amount between the filed and like-to-like bases is not in my record, and the report page that defines it is not in the files I read. I hold no total income line, so I cannot test the 172,695 for the year to 2026-03-31, and I hold 13% for operating revenue, not 14%. Filed revenue from operations rose 10.9% (derived). The like-to-like 13% is management's own adjusted figure, about 2.1 points above filed (derived). What it removes is not named in my files. The report went to the exchanges under a cover letter dated 2026-07-15.
MOVE: not in my record | cite
EVIDENCE:
- "Operating revenue and EBITDA grew at 13% and 25%, respectively, on a like-to-like basis" (S027, p21, message from the chairperson or chief executive)
- filed revenue from operations 169,270 million for the year to 2026-03-31 (S026, PDF page 347)
- filed revenue from operations 152,617 million for the year to 2025-03-31 (S026, PDF page 347)
- derived growth of 10.9%: 169,270 million for the year to 2026-03-31 less 152,617 million for the year to 2025-03-31, over 152,617 million for the year to 2025-03-31
- another case of two bases in one report: the management discussion prints net research and development of 8,585 million for the year to 2025-03-31 (S027, p242, management discussion and analysis)
- filed research and development after recovery 8,788 million for the year to 2025-03-31 (S026, PDF page 387)
- filed research and development after recovery 9,821 million for the year to 2026-03-31 (S026, PDF page 387)
- derived growth of 11.8% on 9,821 million for the year to 2026-03-31 over 8,788 million for the year to 2025-03-31, against the 14% the management discussion prints on its own 8,585 million for the year to 2025-03-31
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the page of the FY2025-26 annual report that defines like-to-like and lists what it removes, in Rs million, for the year to 2025-03-31 and the year to 2026-03-31 (the cover letter to the exchanges is dated 2026-07-15, the statements are signed 2026-05-07); or the Q4 FY26 results deck, whose id I do not hold.

LAWYER

Q2 Lawyer
TO: the convict
QUESTION: You said the page that defines like-to-like is not in your record. Which one document lists what the 13% operating revenue and the 14% total income like-to-like figures remove, in Rs million? Give its name, its page and its filing date.
WHY I ASK: S005 and S010, checks.md entry 6, adjusted or normalised figures need a disclosed basis. I read the course as saying: an adjusted figure

is only as good as the filed line it can be traced to, and the entry is class EXAMPLE, PERISHABLE for its cases, with no haircut percentage stated. Your last state was not in my record, so my ladder step is to ask which document would hold it. It applies here because the case book prints 14% on total income of 172,695 and your answer holds 13% on operating revenue, two growth figures for one year, while filed revenue from operations moved from 152,617 to 169,270. I have not read any document that states the basis. DECISIVE: no
IF DEFLECTED: Then say yes or no whether any filing in your record states the amount removed to reach either like-to-like figure.

CONVICT

A2 Convict `not in my record`

ANSWER: As of the annual report for the year ended 2026-03-31, I can name no document that lists what the 13% or the 14% remove, in Rs million. The only line in my files with the words like-to-like is the 13% in the chairperson or chief executive message, and it gives no amount. My answer to your yes or no: no filing in my record states an amount removed. I hold no 14% on total income. The 14% in my files is net research and development growth, a different measure. The annual report was filed with a cover letter dated 2026-07-15.
MOVE: not in my record | cite
EVIDENCE:
- "Operating revenue and EBITDA grew at 13% and 25%, respectively, on a like-to-like basis" (S027, p21, message from the chairperson or chief executive)
- "we delivered a strong business performance with 13% operating revenue growth and a ~200-basis points improvement in EBITDA margin" (S027, p23, message from the chairperson or chief executive)
- "The net R&D expenditure for FY26 increased by 14% year-on-year" (S027, p242, management discussion and analysis)
- my reading, not a quote: a search of the annual report statements file for like-to-like finds only the p21 line, and no line there gives a rupee amount removed
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the Q4 FY26 results deck or press release, id not held, or the annual report page that defines like-to-like (for the year ended 2026-03-31, cover letter dated 2026-07-15); the 14% total income line is on page 6 of the report per the case book, and I did not read that page.

LAWYER

Q3 Lawyer
TO: the convict
QUESTION: Profit before tax and before exceptional items was 8,508 million for the year to 2026-03-31, down from 17,901, while profit to owners was 3,856 against 10,133. What total of exceptional items did the statement of profit and loss charge for the year to 2026-03-31, in Rs million? Give the date of the document that prints it.
WHY I ASK: S037 and S055, checks.md entry 5, one-offs booked in revenue, other income or exceptional items: read the results footnotes and strip the one-offs before reading growth or profit. I read the course as saying: lawsuit compensation, write-offs and impairments skew the bottom line and need a manual adjustment (S037). The entry is class EXAMPLE and PERISHABLE for its cases, and the course states no cut for how large a one-off may be. Your last state was not in my record on the like-to-like bridge, and I have asked which document holds it twice, so I apply the same ladder step to the next thing the method checks. It applies here because the case book shows the segment total equals profit before exceptional items, and does not print the exceptional line itself. The gap between 8,508 and 3,856 also includes tax and other lines, so I do not read it all as one-offs. I have not checked the statement. DECISIVE: no
IF DEFLECTED: Then say yes or no whether the statement of profit and loss at PDF page 347 prints an exceptional items line for the year to 2026-03-31.

CONVICT

A3 Convict `answered`

ANSWER: As of the annual report for the year ended 2026-03-31, the consolidated statement charged net exceptional items of a loss of 4,029 million for the year to 2026-03-31, against a gain of 965 million for the year to 2025-03-31 (filed). The document is the FY2025-26 annual report: statements signed 2026-05-07, cover letter to the exchanges dated 2026-07-15. So your gap has a stated part. Profit before tax of 4,479 million for the year to 2026-03-31 is the 8,508 million before exceptional items less that loss (derived). The report names the items but I have not reconciled them to the total.
MOVE: cite | mitigate
EVIDENCE:
- filed exceptional items, gain or (loss) net, (4,029) million for the year to 2026-03-31 and 965 million for the year to 2025-03-31 (S027, p190, Board's report; read by one reader; the segment note repeats both, S027, p413 and p414)
- filed profit before tax and before exceptional items 8,508 million for the year to 2026-03-31 and 17,901 million for the year to 2025-03-31 (S027, p190, Board's report)
- filed profit before tax 4,479 million for the year to 2026-03-31 and 18,866 million for the year to 2025-03-31 (S027, p408, notes to the financial statements)
- derived: 8,508 million for the year to 2026-03-31 less 4,029 million for the year to 2026-03-31 is 4,479 million for the year to 2026-03-31; 17,901 million for the year to 2025-03-31 plus 965 million for the year to 2025-03-31 is 18,866 million for the year to 2025-03-31
- "The Group incurred expenses towards advisory and legal consultancy services, premium paid on hedges taken for settlement of foreign currency payments, bridge financing cost in respect of commercial papers, additional finance cost towards settlement of certain lenders and settlement against outstanding receivables from Mylan Inc, aggregating Rs 2,102 for the year ended March 31, 2026." (S027, p394, notes to the financial statements)
- "During year ended March 31, 2026, BBL has recorded an exceptional provision of Rs 762 for inventories in respect of certain molecules in line with its assessment to liquidate these inventories." (S027, p395, notes to the financial statements)
- filed tax expense 791 million for the year to 2026-03-31 (S027, p408, notes to the financial statements); derived: 4,479 million for the year to 2026-03-31 less 791 million for the year to 2026-03-31 is 3,688 million for the year to 2026-03-31, the profit including non-controlling interest that the Board's report prints (S027, p190, Board's report)
- my reading, not a quote: the Board's report and the notes also list a gain from remeasuring a derivative liability, a labour code charge, integration costs and a debt cost write-off; I have not summed them, so do not read their sum as the total of 4,029 million for the year to 2026-03-31
STATE I CLAIM: answered

WHAT WOULD SETTLE IT: nothing further on the total. To see every item add up to it, the exceptional items note of the FY2025-26 annual report with each amount for the year to 2026-03-31 (cover letter dated 2026-07-15), or the Q4 FY26 results filing, whose id I do not hold.

LAWYER

Q4 Lawyer
TO: the convict
QUESTION: Additions to intangible assets under development were 1,053 million in the year to 2026-03-31, against 2,311 a year earlier. How much of the 1,053 was product development cost taken to the balance sheet instead of through research and development expense? Give Rs million and the date of the document that prints it.
WHY I ASK: S051 and S415, checks.md entry 10, expense capitalisation: read how much development cost is capitalised against how much is expensed. I read the course as treating capitalised research and development as aggressive and favouring cost expensed upfront; the entry states no numeric cut. Your last state was answered (the exceptional items total), so my ladder step is the next check on this issue. It applies here because the case book shows research and development expense after recovery of 9,821 million for the year to 2026-03-31, and shows additions to intangible assets under development without a label saying what they were. Borrowing cost capitalised is also nil against 1,782 the year before. The like-to-like bridge from my first question is still not in your record, so I cannot rest on this issue. I have not read the note that splits the additions. DECISIVE: no
IF DEFLECTED: Then say yes or no whether any filed note in your record labels the 1,053 million as research and development.

CONVICT

A4 Convict not in my record
ANSWER: As of the annual report for the year ended 2026-03-31, I cannot say how much of the 1,053 million for the year to 2026-03-31 was product development cost taken to the balance sheet. Your yes or no: no, no filed note in my record labels the 1,053 million for the year to 2026-03-31 as research and development. Expensed research and development was 9,821 million after recovery for the year to 2026-03-31. If all of the 1,053 million for the year to 2026-03-31 were development cost, which no note says, it would be 9.6% of 10,958 million before recovery for the year to 2026-03-31 (derived).
MOVE: not in my record | mitigate
EVIDENCE:
- filed additions to intangible assets under development 1,053 million for the year to 2026-03-31 and 2,311 million for the year to 2025-03-31, not labelled research and development (S026, PDF page 367)
- filed intangible assets under development at close 23,740 million at 2026-03-31 and 44,067 million at 2025-03-31 (S026, PDF page 346)
- filed movement for the year to 2026-03-31: disposals and transfers of (24,798) million for the year to 2026-03-31 and a foreign currency translation adjustment of 3,418 million for the year to 2026-03-31, no cause stated in the tables read (S026, PDF page 367); derived by me, 44,067 million at 2025-03-31 plus 1,053 million for the year to 2026-03-31 less 24,798 million for the year to 2026-03-31 plus 3,418 million for the year to 2026-03-31 equals 23,740 million at 2026-03-31, so the balance fell mainly through transfers out, not through the 1,053 million
- filed research and development after recovery 9,821 million for the year to 2026-03-31 and 8,788 million for the year to 2025-03-31, and before recovery 10,958 million for the year to 2026-03-31 (S026, PDF page 387)
- "under normal circumstances, R&D should be a Capex rather than an expense." (S003, Kiran Mazumdar-Shaw, held 2023-05-24); my reading, not a filed policy: this is a stated view that leans toward capitalising, and it does not size the 1,053 million for the year to 2026-03-31
- derived by me: 1,053 million for the year to 2026-03-31 over 10,958 million for the year to 2026-03-31 is 9.6%, a ceiling for this one line only; other places where development cost could sit on the balance sheet are not read here
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the note on intangible assets under development in the consolidated notes of the annual report for the year ended 2026-03-31 (movement table at PDF page 367, age table at PDF page 368), if it names the nature of the additions, and the accounting policy note on development cost, page not located; the cover letter to the exchanges is dated 2026-07-15. Unchecked: the hand-read annual report pages file was not among the files I opened for this issue.

LAWYER

Lawyer rest
REST: I stop here because four questions have been answered on this issue and the record has no further move for my method; the exceptional items total is answered (A3), while the like-to-like bridge (A1, A2) and the nature of the intangible additions (A4) are not in the record, and a fifth ask would only repeat the document I have already asked for twice, so those stay open for the review and the judge, with the annual report note or the Q4 results filing as the documents that would settle them.

LAWYER

Lawyer review
COVERED:
- The exceptional items total for the year to 2026-03-31. checks.md entry 5, one-offs in revenue, other income or exceptional items (S037 and S055, lesson date 2026-07-27, class EXAMPLE and PERISHABLE for its cases, no stated cut for size): the convict gave a filed net loss of 4,029 million for the year to 2026-03-31 against a filed gain of 965 million for the year to 2025-03-31, and showed profit before tax of 4,479 and 18,866 as the before-exceptional figures of 8,508 and 17,901 less or plus those items (I4 A3). So the step from 8,508 to 3,856 has a stated part, and the year to 2025-03-31 base also carried a one-off, in the other direction. Entry 5 notes one-offs run both ways.
- Growth with the one-off removed, which is entry 5's green flag test. On the filed before-exceptional line there is no growth to survive: profit before tax and before exceptional items fell from 17,901 to 8,508, about 52% (derived by me from the case book's segment table and I4 A3). I read that as the cleaner comparison of the two years; it is not a finding on why it fell.
- Whether any filing states what like-to-like removes. checks.md entry 6, adjusted figures need a disclosed basis (S005 and S010, lesson date 2026-07-14, class EXAMPLE and PERISHABLE, no haircut percentage): the convict answered no, no filing in its record states an amount removed, and the only like-to-like line it holds gives no amount (I4 A2). A clear no is an answer to the yes or no I asked; it leaves the bridge itself open.
- Whether the 1,053 million is labelled research and development. checks.md entry 10, expense capitalisation (S051, lesson date 2026-07-27, no numeric cut): the convict answered no, no filed note in its record labels the 1,053 million for the year to 2026-03-31 as research and development, and gave a ceiling of 9.6% of research and development before recovery of 10,958 million, if all of it were development cost, which no note says (I4 A4).

OPEN:
- The like-to-like bridge. Not in record (I4 A1, A2). The convict holds 13% on operating revenue against a filed 10.9% (derived, about 2.1 points apart), and the case book prints 14% on total income of 172,695 (AR p6), a page the convict did not read. Two adjusted growth figures on two measures, and no rupee amount for what either removes. Settled by: the annual report page that defines like-to-like (AR p6 and the page it points to, for the year ended 2026-03-31) or the Q4 FY26 results deck or press release, id not held. The convict's own deck figure in I3 A4, Generics up 17% like-to-like excluding one-time lenalidomide sales in the year to 2025-03-31, is the only named item on record that any like-to-like figure removes, and it was given for one segment, not the total.
- A second measure gap the convict raised itself: research and development for the year to 2025-03-31 is 8,585 million in the management discussion and 8,788 million filed after recovery, so the 14% growth printed there and the 11.8% derived on filed figures differ (I4 A1, A2). Settled by: the management discussion page (S027, p242) read beside the filed note (S026, PDF page 387) for the definition each uses.
- What the exceptional items are, item by item. The total is filed (I4 A3), but only two items carry amounts in the hearing, 2,102 million of advisory, hedge, bridge finance, lender settlement and Mylan receivable costs, and a 762 million inventory provision; together they fall well short of 4,029, and the gain on remeasuring a derivative liability, the labour code charge, integration costs and the debt cost write-off were named without amounts (I4 A3). Settled by: the exceptional items note of the FY2025-26 annual report, each amount for the year to 2026-03-31, or the Q4 FY26 results filing.
- Where the 24,798 million transferred out of intangible assets under development went. Not asked. The case book says the cause is not established, and the convict's own roll-forward shows the balance fell from 44,067 to 23,740 mainly through that transfer, not through the 1,053 (I4 A4). Whether it moved into finished intangibles that now amortise through profit, or was written off, decides what it does to later earnings. Settled by: the intangible assets note and the age table (PDF page 368), and the accounting policy note on development cost, page not located (I4 A4).
- Borrowing cost capitalised fell to nil from 1,782 million (case book, PDF pages 365 to 367; named in I4 Q4, not answered). My reading, not a course bar: entry 10 speaks of research and development and pre-operating cost, and I read borrowing cost taken to the balance sheet as close to that, so the year to 2025-03-31 finance cost line was lower by that treatment and the two years' finance costs are not on one basis. Unchecked: whether the 1,782 sat in that line. Settled by: the borrowing costs and capital work in progress notes of the FY2025-26 annual report.
- The measure changes the issue is named for. No question in I4 asked about them. The case book shows the third segment filed as Research services, then CRDMO from the quarter ended 2025-06-30, then Services from 2026-06-30, and a utilities cross charge moved out of Generics in the Q1 FY27 deck (S025), so the 2026-06-30 row is not on the same basis as the rows before it. The case book also says the three segment figures on AR p6 add to more than total income, with no reason on the pages read. checks.md entry 32 says to look below the consolidated number by segment (S040), which needs one basis across quarters. Settled by: the Q1 FY27 deck (S025) and the segment note of the quarter ended 2026-06-30 for the amount moved, and AR p6 with the segment note for the gap between the segment figures and total income.

WEAK QUESTION:
- I4 Q1: it set the 14% printed on total income of 172,695 against the filed revenue from operations of 152,617 and 169,270, two different measures, and asked for one amount that separates them. The convict held 13% on operating revenue, not 14%, so its answer split the premise before it could reach the amount (I4 A1). The better first question was one measure, one figure: what like-to-like removes from operating revenue to reach the 13%, in Rs million.
- I4 Q2: it repeated the Q1 ask in the form of which document holds it. That is the ladder step for not in my record, but its yes or no fallback was the more useful question and should have led.
- I4 Q4: it presupposed that some of the 1,053 million was development cost. The convict was right that no note says so (I4 A4). The question that would have moved the record was the 24,798 million transfer, the larger figure, which no question asked.

EXTRA:
TO: the convict
QUESTION: The Q1 FY27 deck (S025) moved a utilities cross charge out of Generics. What amount, in Rs million, did that move take out of Generics for the quarter ended 2026-06-30? Give the date of the document that prints it.
WHY I ASK: S040 and checks.md entry 32, look below the consolidated number by segment, read with entry 6 (S005, lesson date 2026-07-14), which asks that an adjustment be traced to a filed line; the course states no number for how large a reclassification may be. The issue is named for measure changes and no question in I4 asked about one, while the case book says the 2026-06-30 Generics row is not on the same basis as the rows before it. I have not checked the deck. DECISIVE: no
IF DEFLECTED: Then say yes or no whether any filing in your record restates an earlier Generics quarter on the new basis.

CONSOLIDATION:
- What the method asked: strip one-offs before reading profit (entry 5, S037 and S055; "inevitably guarantee a severe derating once the anomaly passes", S001, HOWH 00:32:09, a compiled-list quote), trace any adjusted figure to a filed line (entry 6, S005 and S010), and read what is capitalised against what is expensed, since you "never know whether R&D will be fruitful or not" (S051, MODULC 00:39:13) (I4 Q1 to Q4).
- What the record answered: the exceptional items total, a filed loss of 4,029 million for the year to 2026-03-31 against a filed gain of 965 million a year earlier, with the arithmetic to profit before tax shown (I4 A3); before-exceptional profit before tax fell from 17,901 to 8,508 (derived, about 52%); a clear no on any filed amount behind like-to-like (I4 A2) and on any note labelling the 1,053 million as research and development (I4 A4).
- What is still open: the like-to-like bridge on both the 13% and the 14% (I4 A1, A2); the itemised exceptional items beyond 2,102 and 762 (I4 A3); the 24,798 million transfer out of intangible assets under development and borrowing cost capitalised going from 1,782 to nil (I4 A4, case book); and every segment and measure change, which no question tested (case book, S025).
- What a reader should check: AR p6 and the page defining like-to-like; the exceptional items note with each amount; the intangible assets note, the age table at PDF page 368 and the development cost policy; the borrowing costs note; and the Q1 FY27 deck (S025) with the 2026-06-30 segment note for the utilities cross charge. All in the FY2025-26 annual report (cover letter dated 2026-07-15) or the quarterly filings.

JUDGE

Judge note
STORY SO FAR:
- Filed revenue rose 10.9% in the year to 2026-03-31, but management's own like-to-like 13% has no rupee bridge on record (hearing I4 A1, A2).
- Profit before tax and before exceptional items fell from 17,901 to 8,508, about 52%, while revenue grew (case book ch3, segment table, PDF p413, p414).

- One-offs ran both ways: a net exceptional loss of 4,029 for the year to 2026-03-31, against a 965 gain a year earlier (hearing I4 A3).

WHY-CHAIN:
- Profit to owners fell from 10,133 to 3,856, -61.9%, derived by me (case book ch3), because profit before exceptional items fell 17,901 to 8,508, -52.5%, derived by me, and a 4,029 exceptional loss replaced a 965 gain (hearing I4 A3). Segment profit fell: Biosimilars 11,961 to 5,876, Generics 1,755 to -1,348 (case book ch3). Why: not in the record.
- Like-to-like 13% beats filed 10.9% (169,270 against 152,617, derived by me), because something is removed (S027 p21, verified by code). The only named item is about 3,000 of one-time lenalidomide sales in the year to 2025-03-31, no source id (hearing I2 A1). Removing only that: 169,270 against 149,617, +13.1%, derived by me. No filing calls it the whole bridge.
- The 4,029 loss is only partly explained, because the two items with amounts, 2,102 of advisory, hedge, bridge finance, lender and Mylan receivable costs plus a 762 inventory provision, add to 2,864, derived by me (hearing I4 A3, both quotes verified by code). The other 1,165, and a gain named without an amount, are not in the record.
- Intangible assets under development fell from 44,067 to 23,740, because 24,798 went out as disposals or transfers, not because additions of 1,053 were small (case book ch9, PDF p367). My sum: 44,067 plus 1,053 less 24,798 plus 3,418 is 23,740. Where the 24,798 went, and what it now costs profit: not in the record.
- Borrowing cost capitalised went from 1,782 to nil (case book ch9, PDF p367), while finance costs rose from 8,974 to 9,903 (case book ch3). So the two years' finance costs may not be on one basis. Whether the 1,782 would have sat in that line: not in the record (the lawyer's reading, unchecked, hearing I4 Lawyer review).

I DID NOT UNDERSTAND:
- Why there are two like-to-like figures: 13% on operating revenue (S027 p21, verified by code) and 14% on total income of 172,695 (case book ch2, AR p6); the convict did not read p6.
- Why the three segment figures on AR p6 (104,312, 31,681, 37,387) add to 173,380, which is 685 more than total income of 172,695, derived by me; no reason on the pages read (case book ch2).
- What the 24,798 moved out of intangible assets under development became: a finished asset that now costs profit each year, or a write-off.
- Research and development growth: 14% on a base of 8,585 in the management discussion, against 11.8% on the filed 8,788 (hearing I4 A1); I do not know which definition each uses.
- How much the utilities cross charge moved out of Generics changes the 2026-06-30 row (case book ch3 Segments); no question in I4 tested any measure change.
- How profit including minority holders, 3,688 (hearing I4 A3), can be smaller than profit to owners, 3,856 (case book ch3); the minority side is not in the record.

STATE PROPOSED:
- Q1 no data: no rupee amount between the filed and like-to-like bases is on record; settling documents named (the AR page defining like-to-like, Q4 FY26 deck, no id); moves not in my record and cite, plus a premise challenge (13% held, not 14%) that rests on a page the convict did not read; the 2.1 point gap is a derived rate difference, not an amount removed.
- Q2 no data: no document is named; the convict gave a plain no to the fallback (no filing in its record states an amount removed), quotes verified by code; move not in my record and cite; it also showed the 14% in its files is research and development, a different measure.
- Q3 answered: a filed net exceptional loss of 4,029 for the year to 2026-03-31 and a 965 gain for the year to 2025-03-31, with ids (S027 p190, p413, p414) and dates (signed 2026-05-07, filed 2026-07-15); the arithmetic matches the case book's 8,508 and 17,901; moves cite and mitigate. I could not check the 4,029 itself: it is not in the case book, code checked only that it carries a date, and the convict says one reader read it.
- Q4 no data: no filed note labels the 1,053 as research and development; settling documents named (PDF p367, p368, the development cost policy note); moves not in my record and mitigate, with a fair challenge to the question's premise; the 9.6% is a derived ceiling (1,053 over 10,958), not a finding. The S003 quote is verified by code, but it is a stated view, not a policy, and does not size the 1,053.

ASK NEXT:
- Where did the 24,798 moved out of intangible assets under development in the year to 2026-03-31 go, a finished intangible that amortises or a write-off, with its amount and the filing that prints it?
- What amount did the utilities cross charge take out of Generics for the quarter ended 2026-06-30, and which filing prints it? Watch item: this was the lawyer's EXTRA and was not asked (cost cap), so the measure changes this issue is named for remain untested.

CONVICT

WA1 Convict `not in my record`

ANSWER: As of the annual report for the year ended 2026-03-31, where the 24,798 million went in the year to 2026-03-31 is not in my record. The movement table at PDF page 367 prints it only as disposals and transfers, with no destination, so I cannot say whether it became a finished intangible that amortises or a write-off. I hold no amount for either bucket. One pointer only: the impairment row on that page shows (86) million, far smaller, which is my reading and not proof. Management also spoke of commissioning new facilities, a possible route that no filing in my record links to this amount.
MOVE: not in my record | mitigate
EVIDENCE:
- filed intangible assets under development at close 23,740 million at 2026-03-31 and 44,067 million at 2025-03-31 (S026, PDF page 346)
- filed movement for the year to 2026-03-31: additions 1,053 million for the year to 2026-03-31, disposals and transfers (24,798) million for the year to 2026-03-31, foreign currency translation 3,418 million for the year to 2026-03-31; no destination or cause stated in the tables read (S026, PDF page 367)
- derived: 44,067 million at 2025-03-31 plus 1,053 million for the year to 2026-03-31 less 24,798 million for the year to 2026-03-31 plus 3,418 million for the year to 2026-03-31 equals 23,740 million at 2026-03-31
- my reading, not a quote: the impairment row in the same table at PDF page 367 shows (86) million, one reader, and I have not checked which column is the year to 2026-03-31 (S027, p367, notes to the financial statements)
- "The new facilities will be capitalized once we received approvals from the FDA, which is expected in FY '25." (S002, Siddharth Mittal, held 2023-02-

15); my reading: a stated plan to move facility cost into finished assets, which would fit a transfer out, but no filing ties it to the 24,798 million for the year to 2026-03-31
- "higher costs related to the new facilities we have commissioned in the recent past" (S012, Kiran Mazumdar Shaw, held 2026-02-13); my reading: facilities were coming into use by then, not a statement about this table
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the intangible assets note of the annual report for the year ended 2026-03-31 (cover letter dated 2026-07-15): the movement table at PDF page 367 read beside the property, plant and equipment and other intangible asset movement tables, where the same amount would show as transfers in, plus the age table at PDF page 368 and the accounting policy note on intangible assets under development, page not located. Unchecked: the hand-read annual report pages file was not among the three files I opened for this turn.

CONVICT

WA2 Convict `not in my record`
ANSWER: As of the quarter ended 2026-06-30 and the call held 2026-08-06, the amount is not in my record. My files say the move happened and print no rupee figure for it. Two documents carry it: the Q1 FY27 deck (S025) and the segment note in the filing for the quarter ended 2026-06-30. I did not read either text this turn and cannot give their filing dates. I also do not know whether the move changed the Generics revenue figure or only its profit line. What I can say is that the Generics figures for 2026-06-30 and 2025-06-30 are on different bases, so their gap is not growth.
MOVE: not in my record | mitigate
EVIDENCE:
- my reading, not a quote: numbers.md and positions.md state that the Q1 FY27 deck (S025) moved a utilities cross charge out of Generics, and neither prints an amount for it
- filed Generics segment figure 7,597 million for the quarter ended 2026-06-30, on the new basis (S033, segment table in the filing for the quarter ended 2026-06-30, Generics column)
- filed Generics segment figure 6,965 million for the quarter ended 2025-06-30, as first filed (S033, segment table in the filing for the quarter ended 2025-06-30, Generics column)
- derived: 7,597 million for the quarter ended 2026-06-30 less 6,965 million for the quarter ended 2025-06-30 is 632 million, which is 9.1% of 6,965 million for the quarter ended 2025-06-30; not a growth rate, because the bases differ
- "EBITDA stood at ₹75 crores. EBITDA margins were at 8%, improved nearly 300 basis points over Q3 of this fiscal" (S013, Kiran Mazumdar Shaw, held 2026-05-08)
- "EBITDA margin at 7% improved more than 250 basis points over Q4FY'26, driven by higher volumes and operating leverage." (S014, Kiran Mazumdar Shaw, held 2026-08-06)
- my reading, not a quote: positions.md says these two margin statements, held 2026-05-08 and held 2026-08-06, do not sit on one basis, because of the cross charge move in S025
- my reading, not a quote: the annual report for the year ended 2026-03-31 (S027) predates the move, so it cannot hold the amount
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the line in the Q1 FY27 deck (S025) that excludes the cross charge from Generics, and the segment note in the filing for the quarter ended 2026-06-30, which restates the quarter ended 2025-06-30 on the new basis. Neither filing date is in the files I read. Unchecked: segments.md and the deck lines file were not among the three files I opened for this issue.

JUDGE

Judge close
STORY SO FAR:
- Filed sales rose 10.9% in the year to 2026-03-31. Management's like-to-like 13% has no rupee bridge on record (hearing I4 A1, A2).
- Profit before tax and one-offs fell from 17,901 to 8,508, about 52%. A 4,029 one-off loss replaced a 965 gain (case book ch3; hearing I4 A3).
- Two measures shifted under the numbers: 24,798 left assets under development with no stated destination, and Generics changed basis at 2026-06-30 (hearing I4 WA1, WA2).

WHY-CHAIN:
- Profit to owners fell from 10,133 to 3,856, -61.9%, derived by me (case book ch3). Because before-one-off profit fell from 17,901 to 8,508 (case book ch3, PDF p413, p414), and a 4,029 net exceptional loss replaced a 965 gain (hearing I4 A3). Why the before-one-off profit fell: not in the record.
- Like-to-like 13% beats filed 10.9%, because something is removed (S027 p21, verified by code). The only named item is about 3,000 of one-time lenalidomide sales, with no source id (hearing I2 A1). Removing only that: 169,270 against 149,617, +13.1%, derived by me. No filing calls it the whole bridge.
- The 4,029 loss is only part explained. The two items with amounts, 2,102 of advisory, hedge, bridge finance, lender and Mylan costs plus a 762 inventory provision, add to 2,864, derived by me (hearing I4 A3, verified by code). The other 1,165, and a gain with no amount: not in the record.
- Assets under development fell from 44,067 to 23,740 because 24,798 went out as disposals or transfers (case book ch9, PDF p367). Where it went: not in the record (hearing I4 WA1). Impairment shows only (86), column unchecked. A 2023 plan to capitalise facilities on approval fits (S002, verified by code), but no filing ties it.
- Generics for the quarter ended 2026-06-30 is 7,597 against 6,965 a year earlier (case book ch3 Segments), +9.1%. But a cost was moved out of Generics, so the bases differ (hearing I4 WA2). So that gap is not clean growth. The amount moved: not in the record.

I DID NOT UNDERSTAND:
- Why there are two like-to-like figures: 13% on operating revenue (S027 p21, verified by code) and 14% on total income of 172,695 (case book ch2, AR p6).
- Why the AR p6 segments add to 173,380, 685 above total income of 172,695, derived by me; no reason on the pages read (case book ch2).
- What the 24,798 became: a finished asset that costs profit each year, or a write-off (hearing I4 WA1).
- Generics margin: 8% said on 2026-05-08 (S013), then 7% said on 2026-08-06 as more than 250 basis points above the quarter ended 2026-03-31 (S014), both verified by code. On one basis both cannot hold. That S013's 8% is Generics is the convict's reading (hearing I4 WA2).
- Research and development growth: 14% on 8,585 in the management discussion, against 11.8% on the filed 8,788 (hearing I4 A1). I do not know which definition each uses.

- How profit including minority holders, 3,688 (hearing I4 A3), is below profit to owners, 3,856 (case book ch3). The minority side is not in the record.

STATE PROPOSED:
- Q1 no data, unchanged: no rupee amount between the filed and like-to-like bases is on record; the why answers did not touch it; moves not in my record and cite.
- Q2 no data, unchanged: no document is named; a plain no to the fallback, quotes verified by code; move not in my record and cite.
- Q3 answered, unchanged: a filed 4,029 loss and 965 gain with ids (S027 p190, p413, p414) and dates (signed 2026-05-07, filed 2026-07-15); the sums match the case book's 8,508 and 17,901. The 4,029 itself is not in the case book; code checked only its date.
- Q4 no data, unchanged: no filed note labels the 1,053 as research and development; the 9.6% is a ceiling (1,053 over 10,958), not a finding; moves not in my record and mitigate.
- WA1 no data: the destination of the 24,798 is not on record; documents named (PDF p367 beside the other asset movement tables, p368, the policy note); quotes verified by code, neither tied to the amount; moves not in my record and mitigate.
- WA2 no data: the amount moved is not on record; documents named (S025, the segment note for the quarter ended 2026-06-30) without filing dates; its filed Generics figures match case book ch3; moves not in my record and mitigate.

WATCH:
- The like-to-like bridge in Rs million: AR p6 and the page defining like-to-like (FY2025-26 annual report, cover letter dated 2026-07-15), or the Q4 FY26 results deck, whose id the convict did not hold in I4. Settles Q1 and Q2.
- The exceptional items note of the same report, each amount for the year to 2026-03-31. Settles the 1,165 not explained in Q3.
- The movement table at PDF p367 read beside the property, plant and other intangible tables (transfers in), the age table at PDF p368, the development cost policy note, and the borrowing costs note (1,782 capitalised in the year to 2025-03-31, nil in the year to 2026-03-31, case book ch9). Settles WA1, Q4 and whether finance costs sit on one basis.
- The Q1 FY27 deck (S025) and the segment note for the quarter ended 2026-06-30, with the 2025-06-30 comparative restated. Settles WA2. The lawyer's EXTRA on this was not asked (cost cap); WA2 asked its substance and got not in my record, so the measure change this issue is named for stays untested.
- The management discussion page (S027, p242) beside the filed note (S026, PDF page 387) for the research and development definitions.

Also noted: code ran over every I4 turn with 0 problems; every convict quote was found word for word with its id, so quotes are verified by code, and every figure of three digits or more carries a date. I still cannot tell whether S002 and S012 bear on the 24,798. My notebook held nothing for this issue.

- I5 Cash and working capital 14 turns

LAWYER

Q1 Lawyer
TO: the convict
QUESTION: Net cash from operating activities fell from 40,612 million rupees in the year to 2025-03-31 to 19,940 million in the year to 2026-03-31, and inventories took 9,178 million of cash against 3 million the year before. How much of that 9,178 million is stock built for products not yet on sale? Give the number in Rs million and the date of the document that states it.
WHY I ASK: S001 and S348, the cash conversion check (checks.md entry 1) and the inventory build warning. The course sets the cash gate as operating cash flow against EBITDA at about 70 percent for consumer-facing businesses and 60 percent for B2B (S001, MODULB 01:58:04, RULE, dated 2026-07-28), and treats a falling trend as the early warning. It also warns: "cash flow from operations turned negative because inventories increase drastically" (S348, AGROCG 00:14:43). It applies here because operating profit before changes in working capital moved only from 35,978 to 33,688 while cash generated from operations moved from 45,208 to 22,366, so the drop sits in working capital. I have not checked the year's EBITDA, so I do not state a ratio. The course gives no receivable days bar for normal (rules.md B4 asks for a peer comparison), and receivable days are not in the record, so I cannot test that leg and ask only about stock. DECISIVE: yes
IF DEFLECTED: Then state the inventory increase of 9,178 million split into finished goods, work in progress and raw materials, with the filing that prints the split.

CONVICT

A1 Convict not in my record
ANSWER: I cannot give the share of the 9,178 million (the lawyer's figure for the year to 2026-03-31) that is stock built for products not yet on sale. No filed split and no management statement on launch stock is in my record. What I hold is the balance sheet: inventories were 60,857 million at 2026-03-31 against 49,311 million at 2025-03-31, a rise of 11,546 million between those dates (derived). The notes also show write-downs and a provision on inventory in the year to 2026-03-31, so not all of the build is saleable stock. The balance sheet movement and the cash flow line are different measures.
MOVE: not in my record | mitigate
EVIDENCE:
- filed inventories 60,857 million at 2026-03-31 (S026, PDF page 346)
- filed inventories 49,311 million at 2025-03-31 (S026, PDF page 346)
- derived: 60,857 million at 2026-03-31 less 49,311 million at 2025-03-31 is 11,546 million
- "During year ended March 31, 2026, BBL has recorded an exceptional provision of Rs 762 for inventories in respect of certain molecules in line with its assessment to liquidate these inventories." (S027, p395, notes to the financial statements (company filing))
- "Write-down of inventories to net realisable value amounted to Rs. 462 (March 31, 2025 - Rs. 359)." (S027, p305, notes to the financial statements (company filing))
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the inventories note of the annual report for the year to 2026-03-31, split into raw materials, work in progress and finished

goods, and a management statement on stock built ahead of launches; neither is in the files I read. The next quarterly filing, about mid November 2026 (date unchecked), may add to it.

LAWYER

Q2 Lawyer
TO: the convict
QUESTION: You said the split of the inventory build is not in your record. Which document would print inventories at 2026-03-31 split into raw materials, work in progress and finished goods? Give its PDF page number and the date it was filed.
WHY I ASK: S050 and S036, checks.md entry 24 (the working-capital cycle) beside entry 1 (cash conversion, S001). I read the course as saying: look at inventory days with receivable and payable days, and treat a fall in operating cash with an inventory build as a red flag (S348). The course gives no inventory days bar, only dated examples marked perishable. It applies here because your answer shows inventories at 60,857 million at 2026-03-31 against 49,311 million at 2025-03-31, a rise of 11,546 million, and also write-downs. Only the split tells a reader whether the stock is for launches or may not sell. Receivable days are not in the record, so I do not ask about that leg. DECISIVE: no
IF DEFLECTED: Then say which note of the annual report you expect to print it, or say that no filed document in your record does.

CONVICT

A2 Convict `partial`
ANSWER: The document is the annual report for the year to 2026-03-31, in the notes to the consolidated financial statements. I do not hold the page of the inventories note or any split into raw materials, work in progress and finished goods, so I cannot give that PDF page. What I hold is the balance sheet at PDF page 346, which prints one inventories line: 60,857 million at 2026-03-31 and 49,311 million at 2025-03-31. The report went to the exchanges under a letter dated 2026-07-15; the statements are signed 2026-05-07. I cannot say the filing date of the exchange stamp, only the letter date.
MOVE: not in my record | cite
EVIDENCE:
- filed inventories 60,857 million at 2026-03-31, one line with no split (S026, PDF page 346)
- filed inventories 49,311 million at 2025-03-31, one line with no split (S026, PDF page 346)
- the annual report for the year to 2026-03-31 was filed with the exchanges under a letter dated 2026-07-15, and the statements are signed 2026-05-07 (S026, cover letter)
- "The Group accordingly changed its inventory provisioning based on age from date of manufacture to provisioning based on remaining shelf-life of the products." (S027, p371, notes to the financial statements (company filing)), a note on provisioning, not a split of the balance
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the inventories note in the notes to the consolidated financial statements of the annual report for the year to 2026-03-31, which I did not locate; its page is the one thing missing. The quarterly results filings in my record do not print inventories, so I do not name them as a source.

LAWYER

Q3 Lawyer
TO: the convict
QUESTION: You gave the document but not the figure. Of the inventories of 60,857 million at 2026-03-31, how many million rupees were finished goods? Give that one number and the date of the document that prints it.
WHY I ASK: S050 and S348, the working-capital cycle (checks.md entry 24) beside cash conversion (checks.md entry 1). I read the course as saying: a fall in operating cash with an inventory build is a red flag, and only the make-up of the stock shows whether it is saleable. Your last answer was partial: you named the annual report for the year to 2026-03-31 but gave no split and no page. Inventories rose by 11,546 million between 2025-03-31 and 2026-03-31 (your own derived figure), so finished goods is the one line that bears most on whether the build is stock waiting for sale. The course gives no inventory days bar, and receivable days are not in the record, so I ask about stock only. DECISIVE: no
IF DEFLECTED: Then say in one sentence whether any filed document in your record prints a finished goods figure, yes or no.

CONVICT

A3 Convict `not in my record`
ANSWER: Not in my record. I hold no figure for finished goods inside the inventories of 60,857 million at 2026-03-31, so I give no number and will not estimate one. The only inventories line I hold is a single balance sheet line, with no split. On your fallback: no, no filed document in the files I read prints a finished goods figure for 2026-03-31. The inventories note of the annual report for the year to 2026-03-31 is where I would expect it, but I did not locate its page. I did not read every file in my brain, so that "no" is unchecked beyond the files I read.
MOVE: not in my record | cite
EVIDENCE:
- filed inventories 60,857 million at 2026-03-31, one line with no split (S026, PDF page 346)
- filed inventories 49,311 million at 2025-03-31, one line with no split (S026, PDF page 346)
- "Write-down of inventories to net realisable value amounted to Rs. 462 (March 31, 2025 - Rs. 359)." (S027, p305, notes to the financial statements (company filing)), a write-down amount, not a finished goods balance
- "During year ended March 31, 2026, BBL has recorded an exceptional provision of Rs 762 for inventories in respect of certain molecules in line with its assessment to liquidate these inventories." (S027, p395, notes to the financial statements (company filing)), a provision, not a finished goods balance
- my reading, not a quote: in the annual report statements file, every line that names finished goods is a profit and loss line name in a provisioning note (S027, p305 and p371), none is a balance
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the inventories note in the notes to the consolidated financial statements of the annual report for the year to 2026-03-31 (cover letter to the exchanges dated 2026-07-15), which prints raw materials, work in progress and finished goods; its page is the missing item. Management has not been quoted in my record on finished goods stock either.

LAWYER

Q4 Lawyer

TO: the convict
QUESTION: Increase in other assets took 6,471 million of cash in the year to 2026-03-31, against 2,057 million the year before. What was the largest single item in that 6,471 million? Give it in Rs million and the date of the document that prints it.
WHY I ASK: S050 and S055, the working-capital cycle (checks.md entry 24) beside cash conversion (checks.md entry 1). I read the course as saying: a fall in operating cash is a major red flag when profit before working capital holds up, and every working-capital line that absorbed cash must be explained, including loans slipped into operating items, which the course says are found in footnotes. It applies here because you have now said three times (A1, A2, A3) that the split of the 9,178 million inventory build is not in your record, so I do not ask a fourth time and I leave that leg open. The other large drag on cash in the year is other assets, up from 2,057 to 6,471 million, and nothing yet explains it. Receivable days are not in the record, so I do not ask about that leg. I have not checked what the item is. DECISIVE: no
IF DEFLECTED: Then say yes or no whether any filed document in your record names an item inside the 6,471 million.

CONVICT

A4 Convict `not in my record`
ANSWER: Not in my record. I cannot name the largest item inside the 6,471 million (your figure for the year to 2026-03-31, against 2,057 million for the year to 2025-03-31). The three files I read print no line called other assets and no breakdown of it, in the balance sheet or the notes. So I give no item and no document date. The note on other assets in the notes to the consolidated financial statements of the annual report for the year to 2026-03-31 should hold the split. On your fallback: no, no filed document in the files I read names an item inside it. That "no" is unchecked beyond those files.
MOVE: not in my record | cite
EVIDENCE:
- filed net cash from operating activities 19,940 million for the year to 2026-03-31, against 40,612 million for the year to 2025-03-31, a single line with no other assets split (S026, PDF page 349)
- filed inventories 60,857 million at 2026-03-31, against 49,311 million at 2025-03-31, one line (S026, PDF page 346)
- filed cash and cash equivalents on the balance sheet 24,165 million at 2026-03-31, against 32,271 million at 2025-03-31 (S026, PDF page 346)
- my reading, not a quote: my statements file for the year to 2026-03-31 has no sentence on other assets, prepayments or capital advances, so no management statement on this line is on record (S027)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the other assets note, current and non-current, in the notes to the consolidated financial statements of the annual report for the year to 2026-03-31 (cover letter to the exchanges dated 2026-07-15), and the cash flow statement at PDF page 349. I did not open the hand-read annual report pages (S039) this turn, so whether they print a split is unchecked.

LAWYER

`Lawyer rest`
REST: I asked four questions on cash conversion and the working-capital cycle (checks.md entries 1 and 24); the convict gave the document but no split for inventories (A2, A3) and named no item inside other assets (A4), so those legs stay open and a fifth question would repeat them, and receivable days are not in the record.

LAWYER

`Lawyer review`
COVERED:
- Where the cash fell. On the filed cash flow (case book section 9, PDF page 349), operating profit before working capital changes moved from 35,978 million in the year to 2025-03-31 to 33,688 million in the year to 2026-03-31, while cash generated from operations moved from 45,208 million to 22,366 million and net cash from operating activities from 40,612 million to 19,940 million (I5 Q1). The convict did not dispute these lines (I5 A1). My method (checks.md entry 1, cash conversion: RULE, S001 compiled list dated 2026-07-28, and S036, S045, S050 dated 2026-07-27) reads this as a drop that sits in working capital, not in operating profit.
- Inventory, balance sheet only. Inventories were 49,311 million at 2025-03-31 and 60,857 million at 2026-03-31, a rise of 11,546 million (derived by the convict), against the cash flow line of 9,178 million (I5 A1). On record beside it: a write-down to net realisable value of 462 (359 the year before) and an exceptional provision of 762 for certain molecules the subsidiary plans to liquidate, both as the notes print them (I5 A1), and a change from age-based to shelf-life-based inventory provisioning (I5 A2). So part of the build is stock the company itself has marked down or set aside to liquidate. The course's warning fits the shape: "cash flow from operations turned negative because inventories increase drastically" (S348, AGROCG 00:14:43), though here operating cash fell and stayed positive.
- Where the split would sit. The convict named the inventories note in the consolidated notes of the annual report for the year to 2026-03-31, cover letter dated 2026-07-15, and said it does not hold that page (I5 A2, I5 A3). It said, unchecked beyond the files it read, that no filed document it holds prints a finished goods figure (I5 A3) or names an item inside other assets (I5 A4).

OPEN:
- Inventory make-up at 2026-03-31 (raw materials, work in progress, finished goods) and how much is stock built ahead of launches: not in record (I5 Q1, I5 A1, I5 Q2, I5 A2, I5 Q3, I5 A3). Settles it: the inventories note of the FY2025-26 annual report consolidated notes; the launch part needs a management statement on a call.
- Why the balance sheet rise of 11,546 million differs from the cash flow line of 9,178 million: raised by the convict (I5 A1), never asked. Settles it: the inventories note and the cash flow statement's own notes. I have not checked the cause and do not suggest one.
- Other assets: 6,471 million absorbed in the year to 2026-03-31 against 2,057 million the year before, no item named (I5 Q4, I5 A4). The case book says page 349 prints no split. My method's footnote check, financing items slipped into working capital under operating activities (checks.md entry 24, S050), cannot be run until the other assets note, current and non-current, of the same annual report is read.
- Trade payables, other liabilities and provisions: released 5,808 million in the year to 2025-03-31 and absorbed 1,917 million in the year to 2026-03-31 (case book section 9). Never asked. It is the third large working capital drag beside inventory and other assets. Settles it: the trade payables note and the balance sheet trade payables line.
- Receivables: the case book shows trade receivables released 6,244 million in the year to 2026-03-31 and 5,482 million the year before, so receivables did not absorb cash in either year. Receivable days, ageing and the one hundred and eighty day flag (rules.md B4, RULE, S001 dated 2026-07-28, S036 and S057 dated 2026-07-27; the course gives no days bar for normal and asks for a peer comparison) are not in the record and were

not asked. Settles it: the trade receivables ageing schedule in the annual report notes.
- The conversion ratio and its trend: no operating cash to EBITDA ratio was stated or put to the convict; I said in I5 Q1 that I had not checked the year's EBITDA. The filed quarters' operating profit would supply that side; I do not compute it here. Only two years of cash flow are in the record, and checks.md entry 1 wants three to five. The course gives two bands, about 70 percent for B2C and 60 percent for B2B (S001, MODULB 01:58:04), and the brain does not say which band a medicines company takes, so I pick neither. Settles it: earlier annual report cash flow statements and an EBITDA figure on the filed basis.
- Cash after capex: net cash from operations 19,940 million against purchase of property, plant and equipment 17,979 million in the year to 2026-03-31 (40,612 and 21,366 the year before), with balance sheet cash down from 32,271 million to 24,165 million (case book section 3). How the gap is funded was never asked (checks.md entry 2, profit against cash). Settles it: the financing section of the same cash flow statement.
- The half year to 2026-09-30: the course says cash flow statements arrive with the second quarter results (S050), and nothing after the quarter ended 2026-06-30 is in the record. Settles it: the results filing for the quarter ended 2026-09-30.

WEAK QUESTION:
- I5 Q1: as the DECISIVE question it asked for stock built for products not yet on sale, a figure no filed table prints, so the only possible answers were a management claim or not in my record. It also named the S001 conversion band while stating no EBITDA, so the bar was cited but not tested. A decisive question the filings could answer was the inventory make-up or the payables swing.
- I5 Q2: asked two things, a PDF page and a filing date. The cover letter date of 2026-07-15 was already in the case book, so that half bought nothing, and the convict answered with it (I5 A2).
- I5 Q3: asked again for a split the convict had twice said it does not hold (I5 A1, I5 A2). The ladder for not in my record is to ask which document, which I5 Q2 had already done, so I5 Q3 repeated rather than moved to the next working capital line.

EXTRA:
TO: the convict
QUESTION: Trade payables, other liabilities and provisions released 5,808 million rupees of cash in the year to 2025-03-31 and took 1,917 million in the year to 2026-03-31. What were trade payables on the balance sheet at 2026-03-31? Give the number in Rs million and the date of the document that prints it.
WHY I ASK: S050 and S057, the working-capital cycle (checks.md entry 24), which tracks payable days with inventory and receivable days. The course gives no payable days bar and calls payable turnover ambiguous, since it can mean "higher bargaining power over its suppliers" (S057). It applies here because this line moved from releasing cash to absorbing it in the same year operating cash halved, and no question on this issue reached it. DECISIVE: no
IF DEFLECTED: Then say yes or no whether the balance sheet at PDF page 346 prints a trade payables line.

CONSOLIDATION:
- What the method asked: cash conversion and the working-capital cycle (checks.md entries 1 and 24; the conversion band is RULE, S001 dated 2026-07-28 with S036, S045, S050 dated 2026-07-27), namely which working capital lines absorbed the cash and whether the inventory build is saleable (I5 Q1 to I5 Q4).
- What the record answered: the fall in operating cash sits in working capital, not in operating profit (I5 Q1, filed lines undisputed in I5 A1); inventories rose 11,546 million on the balance sheet, with a write-down of 462, an exceptional provision of 762 and a move to shelf-life provisioning (I5 A1, I5 A2); no inventory split and no item inside other assets were given (I5 A3, I5 A4).
- What is still open: the inventory make-up, the items inside the 6,471 million of other assets, the payables swing from 5,808 released to 1,917 absorbed, the gap between 11,546 and 9,178, receivable ageing, a conversion ratio over three to five years, and how cash after capex was funded (I5 A1 to I5 A4; the last five were never asked).
- What a reader should check: the FY2025-26 annual report notes on inventories, other assets, trade payables and receivables ageing; earlier years' cash flow statements; and the results filing for the quarter ended 2026-09-30, which brings the half-year cash flow. Until then this issue shows where the cash went line by line, and the course's conversion band is untested because no EBITDA figure was put against it.

JUDGE

Judge note
STORY SO FAR:
- Operating cash halved, 40,612 to 19,940 (year to 2026-03-31), while profit before working capital slipped only 35,978 to 33,688 (case book ch9, p349).
- Working capital, money tied up in stock and bills, took 11,322 in FY2025-26 after releasing 9,230 in FY2024-25, derived by me (case book ch9).
- Stock rose 11,546 by 2026-03-31; no split is in the record, and notes show write-downs and a 762 provision (hearing I5 A1, A3).

WHY-CHAIN:
- Net cash from operating activities fell 40,612 to 19,940 (year to 2026-03-31 against 2025-03-31), -50.9%, derived by me, because cash generated from operations fell 45,208 to 22,366 while profit before working capital fell only 2,290 (35,978 to 33,688, -6.4%, derived by me) (case book ch9, p349). Tax paid fell 4,596 to 2,426. The drop sits in working capital.
- Working capital went from releasing 9,230 to taking 11,322 (four lines summed, derived by me, case book ch9). The big moves: inventories -3 to -9,178; payables, other liabilities and provisions +5,808 to -1,917; other assets -2,057 to -6,471. Receivables released cash both years, 5,482 then 6,244. Why each line moved: not in the record (hearing I5 A1 to A4).
- Inventories rose from 49,311 at 2025-03-31 to 60,857 at 2026-03-31 (S026 p346, case book ch3), because more stock was held; what kind is not in the record. Part is marked down: a write-down of 462 (359 a year earlier) and a 762 exceptional provision for molecules to be liquidated (hearing I5 A1, quotes verified by code).
- Cash after paying for plant was thin: 19,940 less 17,979 is 1,961 for the year to 2026-03-31, against 40,612 less 21,366, which is 19,246, a year earlier, derived by me (case book ch3). Balance sheet cash fell 32,271 to 24,165. How the gap was covered: not asked on this issue, not in the record here.
- The course's cash conversion bar cannot be scored on this issue, because no EBITDA figure for the year was put against operating cash, only two years of cash flow are on record, and the lawyer picked neither of the two bands for a medicines company (hearing I5 Q1, I5 Lawyer review). Ratio: not in the record.

I DID NOT UNDERSTAND:
- Why stock rose 11,546 on the balance sheet while the cash flow line says 9,178, a gap of 2,368, derived by me; raised in A1, never asked.
- What other assets are, and what made them take 6,471 in the year to 2026-03-31 (hearing I5 A4).
- Why payables, other liabilities and provisions turned from releasing 5,808 to taking 1,917 (case book ch9); never asked.
- What the move from age-based to shelf-life provisioning did to the numbers; no amount was given (hearing I5 A2).
- How much of the stock is good stock and how much may not sell; the 762 provision says some will be liquidated (hearing I5 A1).
- Whether the 762 inventory provision here is the same 762 inside the 4,029 exceptional loss in I4 (hearing I4 A3, I5 A1); it reads so, but no one said it.

STATE PROPOSED:
- Q1 (decisive) no data: no figure for stock built ahead of launches is on record; the inventories note and a management statement are named as what would settle it; moves not in my record and mitigate (the 11,546 rise, derived and matching the case book, a 462 write-down, a 762 provision, quotes verified by code). The question asked for a figure no filed table prints (hearing I5 Lawyer review).
- Q2 partial: the document is named, the consolidated notes of the FY2025-26 annual report, but not its PDF page; the dates given (cover letter 2026-07-15, signed 2026-05-07) were already in the case book (ch3); moves not in my record and cite; the shelf-life quote is verified by code but is about provisioning, not a split.
- Q3 no data: no finished goods figure; the fallback was a plain no, unchecked beyond the files the convict read; settling document named (the inventories note, cover letter dated 2026-07-15); moves not in my record and cite.
- Q4 no data: no item inside the 6,471 is named; the fallback was a plain no, unchecked beyond the files read; settling document named (the other assets note, current and non-current); moves not in my record and cite. The convict said it did not open S039 this turn, although the case book (ch9) prints the 6,471 line from those pages; the split is not in the case book either.

ASK NEXT:
- What were trade payables on the balance sheet at 2026-03-31 and at 2025-03-31, and which filing prints them? Watch item: this was the lawyer's EXTRA and was not asked (cost cap), so the payables swing from 5,808 released to 1,917 taken stays untested.
- Why did inventories rise 11,546 on the balance sheet between 2025-03-31 and 2026-03-31 while the cash flow statement shows 9,178, and which note prints the difference?

CONVICT

WA1 Convict `not in my record`

ANSWER: As of the annual report for the year to 2026-03-31, I hold no trade payables figure for 2026-03-31 or for 2025-03-31, so I give no number. The filing that prints both is that same annual report, sent to the exchanges under a letter dated 2026-07-15, statements signed 2026-05-07. Its balance sheet at PDF page 346 carries both dates. The files I read list only the inventories, cash and borrowings lines of that page, so whether a separate trade payables line sits there is unchecked. My reading: the cash flow line you quote also holds other liabilities and provisions, so it would not equal a balance sheet change in payables alone.
MOVE: not in my record | mitigate
EVIDENCE:
- filed inventories 60,857 million at 2026-03-31, the same balance sheet page, no payables line read (S026, PDF page 346)
- filed inventories 49,311 million at 2025-03-31, the same balance sheet page, no payables line read (S026, PDF page 346)
- filed net cash from operating activities 19,940 million for the year to 2026-03-31, against 40,612 million for the year to 2025-03-31, a total with no payables split read (S026, PDF page 349)
- "The Group believes that the working capital is sufficient to meet its current requirements, accordingly, no liquidity risk is perceived." (S027, p404, notes to the financial statements (company filing)), a company statement, not a payables figure
- my reading, not a quote: my statements file for the year to 2026-03-31 has no sentence giving a trade payables balance or payable days, so no management statement on this line is on record (S027)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the trade payables line of the consolidated balance sheet at PDF page 346 and the trade payables note, with its ageing table, in the notes to the consolidated financial statements of the annual report for the year to 2026-03-31 (cover letter dated 2026-07-15); the note's page is not located. Unchecked: the hand-read annual report pages file (S039) was not among the three files I opened for this turn, so whether it prints a payables line is not known to me.

CONVICT

WA2 Convict `not in my record`

ANSWER: Not in my record, neither the reason nor the note. The balance sheet rose 11,546 million from 2025-03-31 to 2026-03-31 (derived). The cash flow line is 9,178 million for the year to 2026-03-31, taken from the lawyer's first question on this issue; my files hold no inventories line of that statement. By my reading, the write-downs in my record lower the balance sheet figure, so they pull the other way from a balance sheet rise above the cash line. I name no item that adds to it, and no reconciling note is in my files.
MOVE: not in my record | mitigate
EVIDENCE:
- derived: inventories rose 11,546 million, being filed 60,857 million at 2026-03-31 less filed 49,311 million at 2025-03-31 (S026, PDF page 346)
- "Write-down of inventories to net realisable value amounted to Rs. 462 (March 31, 2025 - Rs. 359)." (S027, p305, notes to the financial statements (company filing)), for the year to 2026-03-31 first
- "Including the impact of change in estimates as explained in above para, net movement in provision for stock obsolescence, inventory write-off resulted in loss of Rs 1,841 (March 31, 2025: gain of Rs 753)." (S027, p371, notes to the financial statements (company filing)), a charge for the year to 2026-03-31
- "During year ended March 31, 2026, BBL has recorded an exceptional provision of Rs 762 for inventories in respect of certain molecules in line with its assessment to liquidate these inventories." (S027, p395, notes to the financial statements (company filing))
- my reading, not a quote: these three lines are charges that lower the carrying value of stock without cash, so they do not by themselves explain a balance sheet rise above the cash flow line; how the cash flow statement treats them is not in my files, so this is unchecked

- my reading, not a quote: my statements file for the year to 2026-03-31 has no sentence that ties inventories to currency translation, a business combination or a reclassification of stock
- filed foreign currency translation adjustment of 3,418 million on intangible assets under development for the year to 2026-03-31 (S026, PDF page 367), a different line, not inventories: it shows only that translation can move a rupee balance without cash
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the inventories note in the notes to the consolidated financial statements of the annual report for the year to 2026-03-31 (cover letter to the exchanges dated 2026-07-15), read beside the cash flow statement at PDF page 349 and any note to it. I cannot say that any note prints the difference; whether one does is unchecked. The hand-read annual report pages (S039) may print the cash flow inventories line, and I did not open them this turn.

JUDGE

Judge close
STORY SO FAR:
- Cash from running the business halved, 40,612 to 19,940, in the year to 2026-03-31. Profit before working capital slipped only 35,978 to 33,688 (case book ch9, p349).
- Working capital, money tied up in stock and bills, took 11,322 in FY2025-26 after releasing 9,230 in FY2024-25, derived by me (case book ch9).
- Stock rose 11,546 by 2026-03-31. What it is, and why the payables and other assets lines moved, is not in the record (hearing I5 A1 to A4, WA1, WA2).

WHY-CHAIN:
- Net cash from operating activities fell 40,612 to 19,940 (year to 2026-03-31 against 2025-03-31), -50.9%, derived by me. Because cash generated from operations fell 45,208 to 22,366 while profit before working capital fell only 35,978 to 33,688, -6.4%, derived by me (case book ch9, p349). So the drop sits in working capital.
- Working capital went from releasing 9,230 to taking 11,322, four lines summed, derived by me (case book ch9). Inventories -3 to -9,178; payables, other liabilities and provisions +5,808 to -1,917; other assets -2,057 to -6,471. Receivables released cash both years, 5,482 then 6,244. Why each line moved: not in the record (hearing I5 A1 to A4, WA1).
- Part of the stock is marked down. A write-down of 462 (359 a year earlier), a 762 exceptional provision for molecules to be liquidated, and a net provision loss of 1,841 for the year to 2026-03-31 against a 753 gain a year earlier, which includes the shelf-life change (hearing I5 A1, WA2, verified by code). The shelf-life change's own amount: not in the record.
- Stock rose 11,546 on the balance sheet but the cash line is 9,178, a gap of 2,368, derived by me. Why: not in the record. The convict says the write-downs pull the other way, its own reading, unchecked (hearing I5 WA2).
- Cash after paying for plant was thin: 19,940 less 17,979 is 1,961 for the year to 2026-03-31, against 40,612 less 21,366, which is 19,246, a year earlier, derived by me (case book ch3). Balance sheet cash fell 32,271 to 24,165. The company says "no liquidity risk is perceived" (hearing I5 WA1, verified by code), with no figure beside it. How the gap was funded: not in the record on this issue.

I DID NOT UNDERSTAND:
- Why stock rose 2,368 more on the balance sheet than the cash flow line shows; WA2 named no item that explains it (hearing I5 WA2).
- What other assets are, and what made them take 6,471 in the year to 2026-03-31 (hearing I5 A4).
- Why payables, other liabilities and provisions turned from releasing 5,808 to taking 1,917; the line bundles three things and no part is split (case book ch9; hearing I5 WA1).
- How much of the 1,841 provision loss is the shelf-life change alone (hearing I5 WA2).
- How much of the stock is good stock and how much may not sell (hearing I5 A1).
- Whether the 762 provision here is the same 762 inside the 4,029 one-off loss in I4 (hearing I4 A3, I5 A1); it reads so, but no one said it.

STATE PROPOSED:
- Q1 (decisive) no data, unchanged: no figure for stock built ahead of launches; the why answers did not touch it; moves not in my record and mitigate, quotes verified by code.
- Q2 partial, unchanged: the document is named (consolidated notes of the FY2025-26 annual report, cover letter 2026-07-15), not its PDF page; moves not in my record and cite.
- Q3 no data, unchanged: no finished goods figure; a plain no to the fallback, unchecked beyond the files read; moves not in my record and cite.
- Q4 no data, unchanged: no item inside the 6,471 is named; a plain no to the fallback, unchecked beyond the files read; moves not in my record and cite.
- WA1 no data: no trade payables figure at either date; document named (balance sheet PDF page 346 and the payables note), note page not located; the liquidity quote is verified by code but is a statement, not a payables figure; moves not in my record and mitigate.
- WA2 no data: no reason and no note for the 2,368 gap; the new 1,841 figure is verified by code but does not explain the gap, by the convict's own reading; moves not in my record and mitigate.

WATCH:
- The inventories note of the FY2025-26 annual report consolidated notes (cover letter dated 2026-07-15): raw materials, work in progress and finished goods at 2026-03-31, and any line tying 11,546 to 9,178. Settles Q1 (the stock part), Q2, Q3 and WA2. The launch part also needs a management statement on a call.
- The other assets note, current and non-current, of the same report. Settles Q4 and the course's check for loans hidden in operating lines.
- The trade payables line on the balance sheet at PDF page 346 and the payables note with ageing, same report. Settles WA1. The lawyer's EXTRA on payables was not asked (cost cap); WA1 asked its substance and got not in my record, so the swing from 5,808 released to 1,917 taken stays untested.
- The receivables ageing schedule, earlier years' cash flow statements and an EBITDA figure on the filed basis. Never asked; without them the course's cash conversion bar cannot be scored.
- The financing section of the cash flow statement for the year to 2026-03-31, and the results filing for the quarter ended 2026-09-30, which brings the half-year cash flow (expected about mid November 2026, date unchecked, hearing I5 A1). Settles how cash after plant spending was covered and whether the drain continued.

Also noted: code ran over every I5 turn with 0 problems; every convict quote was found word for word with its id, so quotes are verified by code, and every figure of three digits or more carries a date. I still cannot tell whether the liquidity quote is supported by numbers. My notebook held nothing for this issue.

- I6 Debt, maturities and covenants 14 turns

LAWYER

Q1 Lawyer
TO: the convict
QUESTION: Your annual report says the group complied with its debt covenants all year and sees no difficulty at the next test as at 2026-09-30, but prints no limit. What is the highest net debt to EBITDA ratio your lenders allow at that test?
WHY I ASK: S001 (F38 TVGP, risks first: debt against EBITDA) and S445 (checks.md 20, a debt claim must be matched to measured figures). The case book names six covenant ratios, net debt to EBITDA first, with no limit and no actual value, so "complied" cannot be checked and headroom cannot be worked out. The course gives no covenant limit of its own, so the limit has to come from the facility agreements. DECISIVE: yes
IF DEFLECTED: Which document, with its page, states that limit?

CONVICT

A1 Convict `not in my record`
ANSWER: Not in my record. The annual report for the year to 2026-03-31 names the ratios but prints no limit and no actual value, so I cannot give the highest net debt to EBITDA ratio the lenders allow. What the report does say: the company tests three ratios and the group six, net debt to EBITDA among them, tested annually and semi-annually. It says they were complied with throughout the year and that no difficulty is expected at the test as at 2026-09-30. The limit sits in the facility agreements, which are not in my record. I can add the maturity profile the report does print, and management's stated priority of reducing debt.
MOVE: not in my record | cite
EVIDENCE:
- Company covenants: three ratios, net debt to EBITDA first, no threshold printed, complied with throughout the reporting period to 2026-03-31 (S038, PDF page 309 and PDF page 310, note 15 Borrowings, a company filing, not speech).
- Group covenants: six ratios including net debt to EBITDA, no threshold printed, next test as at 2026-09-30 (S038, PDF page 377 and PDF page 378, note on borrowings).
- Filed group borrowings falling due in less than 1 year: 65,476 million at 2026-03-31 of a total 148,246 million at 2026-03-31, contractual, undiscounted (S038, PDF page 404).
- Derived: due within one year was 44.2% of the total at 2026-03-31 against 30.1% at 2025-03-31 (S038).
- "every dollar that we generate out of free cash, the first claim is going to be to reduce debt" (S013, Kedar Upadhye, held 2026-05-08)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: The facility agreements, or a lender compliance certificate stating the required level and the actual ratio. The test result as at 2026-09-30 is also later than the report and not in my record.

LAWYER

Q2 Lawyer
TO: the convict
QUESTION: You said the highest net debt to EBITDA ratio your lenders allow sits in the facility agreements, which are not in your record. Which filed document, such as a rating letter or a lender certificate, states it? Give the filing date and the page.
WHY I ASK: S445 (checks.md entry 20) and S001 (F38 TVGP, risks first: debt against EBITDA). A debt claim has to be matched to measured figures, and "no difficulty at the next test" cannot be matched without the limit and the actual ratio. Your last state was not in my record, so my ladder step is to ask which document would hold it. The case book lists credit rating events in the exchange feed, for example on 2025-12-16, only as one-line summaries; I have not checked whether any of those documents states a limit. DECISIVE: no
IF DEFLECTED: Then say yes or no whether any document filed with the exchange states that limit.

CONVICT

A2 Convict `not in my record`
ANSWER: Not in my record. As of the annual report for the year to 2026-03-31 (cover letter to the exchanges dated 2026-07-15), the only filed document in my record that speaks to the covenants is that report's own notes on borrowings. They name the ratios and say the covenants were met throughout the year. They print no limit and no actual ratio. My record holds no rating letter and no lender certificate. You name credit rating events such as 2025-12-16, but I do not hold those documents, so I cannot say whether any of them states a limit. Whether any filing made to the exchange states it is unchecked.
MOVE: not in my record | cite
EVIDENCE:
- Company covenants: three ratios, net debt to EBITDA first, no threshold printed, complied with throughout the year to 2026-03-31 (S038, PDF page 309 and PDF page 310, note 15 Borrowings, a company filing, not speech).
- Group covenants: six ratios including net debt to EBITDA, no threshold printed, no difficulty indicated for the next test as at 2026-09-30 (S038, PDF page 377 and PDF page 378, note on borrowings, a company filing, not speech).
- The same report states no committed undrawn lines; the word undrawn appears on no page of its text, as at 2026-03-31 (S038, annual report for the year to 2026-03-31).
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: The facility agreements, a lender compliance certificate for the test as at 2026-09-30, or the text of the rating letter of 2025-12-16, to see whether it states a net debt to EBITDA limit. None of these is in my record.
EXT REQUEST: Whether any rating agency letter or exchange filing dated 2025-12-16 or later states the net debt to EBITDA limit in the lenders' covenants.

LAWYER

Q3 Lawyer
TO: the convict
QUESTION: Gross borrowings fell from 177,555 to 148,247 million, yet finance costs rose from 8,974 to 9,903 million. What was the cash paid to repay borrowings, as the cash flow statement prints it for the year to 2026-03-31, in Rs million, as one number?
WHY I ASK: S445 (checks.md entry 20, deleveraging claims: interest, borrowings and repayment must agree) and S001 (F38 TVGP, risks first: debt against EBITDA). Your last two answers left the covenant limit not in your record, so I move to the check the filed figures can settle. The case book shows the debt fall and the interest rise but no repayment outflow, so the claim cannot be matched. I have not checked whether the fall came from repayment, conversion or exchange rates. DECISIVE: no
IF DEFLECTED: Then name the line in the cash flow statement, with its page, that holds the repayment of borrowings.

CONVICT

A3 Convict not in my record
ANSWER: Not in my record. As of the annual report for the year to 2026-03-31, my record holds the debt balances and finance costs but not the repayment of borrowings line from the cash flow statement, so I cannot give that one number. The fall in gross borrowings is not the same as cash repaid, because the report reclassified its 2025-03-31 comparative. On interest, your premise is right for the full year. Quarterly finance costs, though, fell from the quarter ended 2025-06-30 to the quarter ended 2026-06-30, and management said the full saving would show from FY27. The cash flow statement is on PDF page 349; my record does not print its financing lines.
MOVE: not in my record | mitigate
EVIDENCE:
- Filed finance costs 9,903 million for the year to 2026-03-31 against 8,974 million for the year to 2025-03-31, consolidated (S026, PDF page 347).
- Filed finance costs, consolidated quarterly results: 2,767 million in the quarter ended 2025-06-30, then 2,099 million in the quarter ended 2025-12-31, then 2,132 million in the quarter ended 2026-06-30.
- Derived: gross borrowings of 177,555 million at 2025-03-31 less 148,247 million at 2026-03-31 is a fall of 29,308 million over the year to 2026-03-31; the figure at 2025-03-31 is as reclassified in that report (S026, PDF page 346 and PDF page 364).
- "of which we have used roughly USD 200 million to repay Goldman Sachs." (S010, Siddharth Mittal, held 2025-08-08)
- "I think Q3 will reflect the Kotak and then Q4 should reflect the Edelweiss." (S011, Kiran Mazumdar Shaw, held 2025-11-12)
- "The full benefit, however, of this debt reduction will be visible from FY '27 with annual savings of around INR300 crores in interest costs." (S011, Kiran Mazumdar Shaw, held 2025-11-12)
- Filed cash flow figures in my record from PDF page 349 are net cash from operating activities and purchase of property, plant and equipment only (S026, year to 2026-03-31).
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: The financing section of the consolidated cash flow statement in the annual report for the year to 2026-03-31, which sits on PDF page 349; the repayment line's own page is not recorded in my files. The hand-read annual report pages file (S039) was not opened on this turn under my three-file limit, so whether it prints the line is unchecked.

LAWYER

Q4 Lawyer
TO: the convict
QUESTION: You said the repayment of borrowings line is not in your record and that the cash flow statement sits on PDF page 349. Which filed document prints the financing section of that statement for the year to 2026-03-31? Give the filing date of that document and the page number of the repayment line.
WHY I ASK: S445 (checks.md entry 20, deleveraging claims: interest, borrowings and repayment must agree) and S001 (F38 TVGP, risks first: debt against EBITDA). Your last answer was not in my record, so my ladder step is to ask which document would hold it. The fall in gross borrowings from 177,555 to 148,247 million cannot be matched to a repayment outflow without that line, and the covenant limit is also still open from your first two answers. I have not checked what the financing section prints. DECISIVE: no
IF DEFLECTED: Then say yes or no whether the annual report for the year to 2026-03-31 prints a repayment of borrowings line at all.

CONVICT

A4 Convict partial
ANSWER: Not in my record as a page number. The document is the Integrated Annual Report for the year to 2026-03-31, filed with the exchanges under a letter dated 2026-07-15, with the statements signed 2026-05-07. Its cash flow statement runs from PDF page 349 to PDF page 350, so the financing section sits on one of those two pages. That is my inference. I did not record the page of the repayment line. Whether the report prints a repayment of borrowings line at all, yes or no, is unchecked in my record. The exact date the report reached the exchange is also not recorded, only the letter date.
MOVE: not in my record | cite
EVIDENCE:
- filed net cash from operating activities 19,940 million for the year to 2026-03-31, on the first page of the cash flow statement (S026, PDF page 349)
- filed purchase of property, plant and equipment 17,979 million outflow for the year to 2026-03-31, same page (S026, PDF page 349)
- filed cash and cash equivalents at the end of the year, cash flow statement, 21,115 million at 2026-03-31 (S026, PDF page 350)
- filed: the annual report went to the exchanges under a letter dated 2026-07-15; the statements are signed 2026-05-07 (S026, annual report for the year to 2026-03-31)
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: PDF page 349 and PDF page 350 of the annual report for the year to 2026-03-31, read for the financing section; the exchange's own date stamp for that filing would give the filing date. I did not open the hand-read annual report pages (S039) this turn under my three-file limit, so whether they print the line is unchecked.

LAWYER

Lawyer rest
REST: I asked four questions on debt against EBITDA and the deleveraging claim (checks.md entry 20, F38); the covenant limit is not in the record (A1, A2), the repayment line is not in the record and its page is only inferred (A3, A4), so those legs stay open and a fifth question would repeat them,

and the undrawn lines and anything after 2026-03-31 are known gaps.

LAWYER

Lawyer review

COVERED:

- Covenants named and the compliance statement (A1, A2): the company tests three ratios and the group six, net debt to EBITDA first, tested annually and semi-annually, stated as complied with through the year to 2026-03-31, with no difficulty expected at the test as at 2026-09-30. This covers what the report says. It does not cover whether the statement can be checked, see OPEN.
- Maturity profile (A1): 65,476 million of 148,246 million falls due within one year at 2026-03-31, 44.2% of the total against 30.1% at 2025-03-31, from the filed maturity table.
- Two of the three legs of the deleveraging check, checks.md entry 20 (S445), interest, borrowings and repayment must move together (A3): gross borrowings fell from 177,555 to 148,247 million while full-year finance costs rose from 8,974 to 9,903 million, so on the full year the two legs move in opposite directions. The convict offered quarterly finance costs falling from 2,767 million (quarter ended 2025-06-30) to 2,132 million (quarter ended 2026-06-30) and management's claim that the full saving shows from FY27. That is a claim about a later year, not a filed figure for it.
- Undrawn committed lines (A2): the report states none and the word does not appear in its text. That is a statement about the report, not about the facilities.
- Where the repayment line would sit (A4): the cash flow statement runs from PDF page 349 to PDF page 350 of the annual report sent under the letter dated 2026-07-15. The convict marked the page as an inference.

OPEN:

- Covenant limit, actual ratio and headroom (A1, A2): not in record. Settled by the facility agreements, a lender compliance certificate, or the text of the credit rating documents in the exchange feed, for example 2025-12-16, which the case book holds only as one-line summaries. The course gives no general debt-to-EBITDA bar of its own (rules.md section J, only hotel guidance in S296), so this limit can only come from the company's lenders.
- Result of the test as at 2026-09-30 (A1, A2): later than the record. Settled by the half-year filing or a compliance certificate for that date.
- The repayment outflow, the third leg of checks.md entry 20 (A3, A4): not in record. Settled by the financing section of the consolidated cash flow statement, PDF pages 349 to 350. Until it is read, the fall of 29,308 million (A3) cannot be split into cash repaid, reclassification of the 2025-03-31 comparative (A3), currency movement or other causes.
- Debt cut by capital infusion (not asked): the case book (PDF page 267) lists, among the uses of the 2026-01-05 preferential issue, cash paid to Mylan Inc. including repayment of debt taken for that purchase. checks.md entry 20 names as a red flag a debt cut made by capital infusion without asking why it was needed (S513, S523). No question in this hearing asked how much of the fall came from that source. Settled by the same financing section plus the use-of-funds statement on PDF page 267.
- Debt to equity, checks.md entry 18 and rules.md A7 (not asked): no equity figure is in the case book, so the ratio cannot be computed. Settled by total equity on the consolidated balance sheet, PDF page 346. See EXTRA.
- Exact debt against EBITDA, F38 risks first (S001, a compiled-list framework) (not asked as a number): the record holds no net debt figure and no EBITDA figure, only operating profit by quarter and the segment profit table, which the case book says is not an EBITDA measure. Settled by a net debt figure and the company's own EBITDA definition from the facility agreements, since covenant EBITDA and adjusted EBITDA are named separately (case book section 5).
- Maturity table against balance sheet (not asked): the case book records that 65,476 million due within one year is 24,692 million above the 40,784 million booked as current, and that the Senior Secured Notes carried at 73,597 million sit against a two-to-five-year bucket of 69,767 million. The table is on the earliest date the group can be required to pay. Settled by note 14 (put options) and note 36, PDF pages 404 and 405.
- How the 65,476 million due within one year is met against cash of 24,165 million on the balance sheet at 2026-03-31 (not asked): not in record. Settled by a refinancing statement in a later results call or filing; with no undrawn lines stated (A2), the report itself does not answer it.

WEAK QUESTION:

- Q2: asked two things, a filing date and a page, where my method allows one ask. It also asked the convict to name documents (rating letter, lender certificate) that the case book shows the convict does not hold, so a not-in-record answer was close to certain.
- Q4: asked two things again, a filing date and a page number, and largely repeated Q3's own IF DEFLECTED line. It spent a question on locating a page rather than on an unchecked leg such as debt to equity or the maturity mismatch.

EXTRA:

TO: the convict

QUESTION: Debt to equity needs equity, and the record holds borrowings of 148,247 million at 2026-03-31 but no equity line. What was total equity, consolidated, as the balance sheet prints it at 2026-03-31, in Rs million, as one number?

WHY I ASK: S451 (checks.md entry 18, rules.md A7, RULE, lesson dates 2026-07-27 and 2026-07-28): "debt-to-equity ratio of less than 0.7 times for a healthy balance sheet" (S451, MASTEA 01:52:15), with above one treated as a caution (S456). The company is not a lender, so the bar applies; the course also counts lease liabilities as debt (S038), which the record does not hold either. The course does not say what to do between zero point seven and one. DECISIVE: no

IF DEFLECTED: Then say yes or no whether PDF page 346 of the annual report for the year to 2026-03-31 prints total equity.

CONSOLIDATION:

- What the method asked: risks first on debt (F38, S001, a compiled-list framework) and whether interest, borrowings and repayment move together (checks.md entry 20, S445), through the covenant limit (Q1, Q2) and the repayment outflow (Q3, Q4). Debt to equity (checks.md entry 18, rules.md A7) and the maturity mismatch were not asked.
- What the record answered: the covenant ratios are named and stated as complied with, with no limit and no actual value printed (A1, A2); 44.2% of borrowings fall due within one year (A1); borrowings fell while full-year finance costs rose, with a later-quarter fall and a claim of FY27 savings offered in mitigation (A3); no undrawn lines are stated (A2); the cash flow pages are named by inference (A4).
- What is still open: the covenant limit, the actual ratio and the 2026-09-30 test (A1, A2); the repayment outflow and so the cause of the 29,308 million fall, including any part paid from the preferential issue (A3, A4); debt to equity, net debt against EBITDA, the 24,692 million maturity gap and how the one-year maturities are met (none asked).

- What a reader should check: the financing section on PDF pages 349 to 350, total equity on PDF page 346, notes 14 and 36 on PDF pages 404 and 405, the use-of-funds statement on PDF page 267, and the credit rating documents of 2025-12-16 for a stated limit (A2, A4). I have not checked S445's lesson date in this turn.

JUDGE

Judge note

STORY SO FAR:
- Borrowings fell from 177,555 to 148,247 million in the year to 2026-03-31, yet yearly interest rose from 8,974 to 9,903 million (case book ch3).
- The report says every lender promise was kept, but prints no limit and no actual ratio, so I cannot check it (hearing I6 A1, A2).
- Debt due within a year was 44.2% of the total at 2026-03-31, against 30.1% a year earlier, with no unused credit lines named (case book ch3, ch5).

WHY-CHAIN:
- Borrowings fell 29,308 million, 16.5%, in the year to 2026-03-31 (case book ch3, derived by code), because of repayments management named in its own words: about USD 200 million to Goldman Sachs, then Kotak and Edelweiss with no amounts (hearing I6 A3, quotes verified by code). The total cash repaid, from the cash flow statement: not in the record.
- Most of that fall was not paid from the business's own cash, because operating cash of 19,940 less property purchases of 17,979 leaves 1,961 for the year to 2026-03-31 (derived by me, case book ch3). The report lists debt repayment among the uses of the January 2026 share issue (case book ch9, PDF page 267), but gives no amount: not in the record.
- Yearly interest rose 10.4% (9,903 for the year to 2026-03-31 against 8,974 a year earlier, derived by me) while debt fell, because: not in the record. The convict cited quarters falling from 2,767 (to 2025-06-30) to 2,132 (to 2026-06-30), but skipped the rise to 2,315 (to 2026-03-31) from 2,099 (case book ch3). The FY27 saving is a claim about a later year (hearing I6 A3).
- The company says it met its three covenant ratios and the group its six, because a company filing states it (case book ch5). No limit and no actual value are printed, so headroom and the 2026-09-30 test result are not in the record. The convict said so plainly, a cite and not a deflection (hearing I6 A1, A2).
- Borrowings due within a year grew to 65,476 at 2026-03-31 from 53,498 at 2025-03-31, on a table that counts the earliest date lenders can demand payment (case book ch9, PDF page 404). Against it sit balance-sheet cash of 24,165 at 2026-03-31 and no named unused lines (case book ch3, ch5). Why it grew, and how it will be paid: not in the record.

I DID NOT UNDERSTAND:
- Net debt, cash flow cover, gearing ratio, and how adjusted EBITDA differs from EBITDA: the report names them and the record defines none (case book ch5).
- The convict said the reclassified 2025-03-31 figure makes the fall differ from cash repaid, but moving debt from non-current to current leaves the total at 177,555 (124,054 plus 53,501, case book ch3), so I cannot follow that reason (hearing I6 A3).
- Why 65,476 due within a year is 24,692 above the 40,784 booked as current at 2026-03-31, when note (b) says the put-option debentures are nil at that date (case book ch9).
- Why the Senior Secured Notes, carried at 73,597 at 2026-03-31 (66,954 at 2025-03-31), sit against a 2-to-5-year bucket of only 69,767 (case book ch9): not in the record.
- Whether the commercial papers in the exchange feed on 2025-11-11 and 2025-12-06 sit inside the 65,476 due within a year (case book ch6): not in the record.
- Whether the January 2026 share issue paid for part of the fall; the use-of-funds sentence names debt repayment but no amount (case book ch9, PDF page 267).

STATE PROPOSED:
- Q1 no data: the covenant limit is printed nowhere in the record; the convict named the facility agreements or a lender compliance certificate as the documents that would settle it, a plain not-in-record cite with no deflection (hearing I6 A1).
- Q2 no data: no filed document in the record states the limit; the convict named the text of the 2025-12-16 rating letter as the one to read, which the case book holds only as a one-line exchange summary (hearing I6 A2, case book ch6).
- Q3 partial: the filed repayment line is not in the record (case book ch9 holds only the operating section of PDF page 349), but the convict answered on a different basis with numbers and dates, one repayment in management's words (about USD 200 million, held 2025-08-08, verified by code) and dated quarterly finance costs that match case book ch3, a mitigate move; the year's total repaid stays open.
- Q4 partial: the document is named (the annual report sent under the letter dated 2026-07-15, cash flow on PDF pages 349 to 350), but the repayment line's page is the convict's own inference and the exchange filing date is not recorded, a cite (hearing I6 A4).

ASK NEXT:
- Why did borrowings fall by 29,308 million in the year to 2026-03-31 when the business's own operating cash less property purchases was only 1,961 million for that year, and how much of the fall came from the January 2026 share issue?
- Why are 65,476 million of borrowings shown as due within one year at 2026-03-31 when only 40,784 million are booked as current borrowings at that date?

WATCH (gap, not asked under the cost cap): the lawyer's extra question on total equity at 2026-03-31 was not asked, so debt to equity cannot be worked out from the record; it would sit on PDF page 346 of the annual report for the year to 2026-03-31 (hearing I6 Lawyer review). Also open: the covenant test result as at 2026-09-30, from the half-year filing or a compliance certificate.

CONVICT

WA1 Convict partial

ANSWER: As of the year to 2026-03-31, the judge's sum holds. Derived: operating cash 19,940 million for the year to 2026-03-31 less property purchases 17,979 million for the year to 2026-03-31 leaves 1,961 million for the year to 2026-03-31. So that cash did not pay the 29,308 million fall in the year to 2026-03-31. Management's stated source is equity: a QIP of INR 4,500 crores, completed by the call held 2025-08-08, then used for Goldman Sachs, Kotak and Edelweiss. I concede my earlier reclassification reason: it leaves the total of 177,555 million at 2025-03-31 unchanged.

How much of the fall came from the share issue of January 2026 is not in my record.
MOVE: concede | not in my record
EVIDENCE:
- Derived: filed net cash from operating activities 19,940 million for the year to 2026-03-31 less filed purchase of property, plant and equipment 17,979 million for the year to 2026-03-31 is 1,961 million for the year to 2026-03-31 (S026, PDF page 349).
- Derived: filed borrowings, non-current 107,463 million at 2026-03-31 plus current 40,784 million at 2026-03-31 is 148,247 million at 2026-03-31; non-current 124,054 million at 2025-03-31 plus current 53,501 million at 2025-03-31 (as reclassified) is 177,555 million at 2025-03-31; the fall is 29,308 million over the year to 2026-03-31 (S026, PDF page 346).
- "we successfully completed a qualified institutions placement or QIP, of INR 4,500 crores" (S010, Kiran Mazumdar Shaw, held 2025-08-08)
- "of which we have used roughly USD 200 million to repay Goldman Sachs." (S010, Siddharth Mittal, held 2025-08-08)
- "the remaining funds will be used to repay Kotak and Edelweiss as their payments become due" (S010, Siddharth Mittal, held 2025-08-08)
- "we proactively addressed acquisition-related leverage through 2 successive QIPs cumulatively raising nearly $1 billion." (S012, Kiran Mazumdar Shaw, held 2026-02-13)
- Derived: INR 4,500 crores completed by the call held 2025-08-08 is 45,000 million at ten million to the crore, as of 2025-08-08; how much of it went to debt is not in my record (S010).
- Derived: filed balance sheet cash and cash equivalents 32,271 million at 2025-03-31 less 24,165 million at 2026-03-31 is a fall of 8,106 million over the year to 2026-03-31 (S026, PDF page 346).
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: The financing section of the consolidated cash flow statement in the annual report for the year to 2026-03-31 (repayment of borrowings and proceeds from issue of shares, on PDF page 349 or PDF page 350), and the use-of-funds statement for the share issue of January 2026 that the case book cites (PDF page 267). Neither is in the three files I opened this turn; the hand-read annual report pages file (S039) was not opened, so whether it prints them is unchecked. Whether the share issue of January 2026 is the second of the two QIPs in the quote of 2026-02-13 is also unchecked.

CONVICT

WA2 Convict `partial`
ANSWER: As of the annual report for the year to 2026-03-31, the reason for the gap is not in my record. The record does show where it sits. Both tables total the same debt: 148,247 on the balance sheet at 2026-03-31 and 148,246 in the maturity table at 2026-03-31. The balance sheet books 40,784 at 2026-03-31 as current; the maturity table puts 65,476 at 2026-03-31 under one year. The difference, 24,692 at 2026-03-31, is a sorting gap, not extra debt. A year earlier the two lines agreed within 3. I hold no note that explains the new gap.
MOVE: cite | not in my record
EVIDENCE:
- Filed borrowings falling due in less than 1 year: 65,476 million at 2026-03-31 and 53,498 million at 2025-03-31, contractual, undiscounted (S038, PDF page 404, note 36, a company filing, not speech).
- Filed current borrowings: 40,784 million at 2026-03-31 and 53,501 million at 2025-03-31 as reclassified, including current maturities of non-current borrowings of 5,121 million at 2026-03-31 and 18,954 million at 2025-03-31 (S026, PDF page 346 and PDF page 381).
- Filed non-current borrowings: 107,463 million at 2026-03-31 (S026, PDF page 346 and PDF page 376).
- Derived: 65,476 million at 2026-03-31 less 40,784 million at 2026-03-31 is 24,692 million at 2026-03-31.
- Derived: 107,463 million at 2026-03-31 less the 1 to 2 years bucket of 13,003 million at 2026-03-31 and the 2 to 5 years bucket of 69,767 million at 2026-03-31 leaves 24,693 million at 2026-03-31; the printed totals differ by one (148,247 and 148,246, both at 2026-03-31).
- Derived: at 2025-03-31 the current line of 53,501 million and the under one year bucket of 53,498 million differ by 3, so the gap arose in the year to 2026-03-31. The 2025-03-31 current line is as reclassified in that report (S026, PDF page 364).
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: The annual report for the year to 2026-03-31: the note on current borrowings (PDF page 381), note 14 on the put options, and note 36 (PDF page 404), read for the basis on which the under one year bucket is drawn. The hand-read annual report pages (S039) were not opened on this turn under my three-file limit, so whether they print the reconciliation is unchecked.

JUDGE

Judge close
STORY SO FAR:
- Borrowings fell 29,308 million in the year to 2026-03-31. Yearly interest still rose, from 8,974 to 9,903 million (case book ch3).
- The business's own cash did not pay for that fall. Management names share sales to big investors, QIPs, as the source (hearing I6 WA1).
- Lender promises were reported kept, with no limit printed. Debt due within a year jumped, partly debt booked as long-term (hearing I6 A1, WA2).

WHY-CHAIN:
- The debt fall was not paid from business cash, because operating cash 19,940 less property purchases 17,979 leaves 1,961 for the year to 2026-03-31 (derived by me, case book ch3). The convict conceded this and dropped the reclassification reason (hearing I6 WA1). Management names a QIP of INR 4,500 crores, call held 2025-08-08, verified by code. Amount spent on debt: not in the record.
- Money in and money out do not close from the record, because the year also paid Mylan Inc. cash of 36,242 for Biocon Biologics shares, agreement of 2025-12-06 (case book ch9, PDF p307, p373). Cash also fell 8,106, from 32,271 to 24,165 (hearing I6 WA1, matches case book ch3). Share proceeds and repayments, line by line: not in the record.
- Yearly interest rose 10.4% (9,903 against 8,974, derived by me) while debt fell, because: not in the record. Quarterly interest fell from 2,767 (to 2025-06-30) to 2,132 (to 2026-06-30), but rose to 2,315 in the quarter to 2026-03-31 (case book ch3). The FY27 saving is management's claim about a later year (hearing I6 A3, verified by code).
- The company says it kept every lender promise, because its own filing says so for the year to 2026-03-31 (case book ch5). No limit and no actual ratio are printed, so headroom is not in the record. The why answers added nothing here. The convict's plain not-in-record cite stands (hearing I6 A1, A2).
- Debt due within a year rose to 65,476 from 53,498 (case book ch3), because about 24,692 booked as long-term is counted as payable within a year: 107,463 less 13,003 and 69,767 leaves 24,693 (hearing I6 WA2, matches case book ch3). The table uses the earliest date lenders can demand

payment. Which terms allow that: not in the record.

I DID NOT UNDERSTAND:
- QIP: the case book glossary does not define it. I read it as shares sold to big investors, from the quote alone (hearing I6 WA1).
- Whether the January 2026 share issue is the second QIP: case book ch9 calls it preferential, paid in Biocon Biologics shares. Unchecked (hearing I6 WA1).
- Why about 24,692 of long-term debt can be demanded within a year, when note (b) puts the put-option debentures at nil (case book ch9).
- Why the Senior Secured Notes, carried at 73,597 at 2026-03-31, sit against a 2-to-5-year bucket of 69,767 (case book ch9): not in the record.
- Net debt, cash flow cover, gearing ratio, and adjusted EBITDA: the report names them, the record defines none (case book ch5).
- Whether the commercial papers of 2025-11-11 and 2025-12-06 sit inside the 65,476 due within a year (case book ch6): not in the record.

STATE PROPOSED:
- Q1 no data, unchanged: no limit appears anywhere in the record, and the why answers did not touch it; facility agreements or a lender certificate would settle it (hearing I6 A1).
- Q2 no data, unchanged: no filed document in the record states the limit; the 2025-12-16 rating document is held only as a one-line exchange summary (hearing I6 A2, case book ch6).
- Q3 partial, unchanged: still no filed repayment line; WA1 made the answer stronger, a concession plus a dated QIP source verified by code, but no amount used on debt (hearing I6 A3, WA1).
- Q4 partial, unchanged: the document and PDF pages 349 to 350 are named, but the repayment line's page is still the convict's own inference (hearing I6 A4).

WATCH:
- Covenant limit and actual ratio: the facility agreements, a lender compliance certificate, or the text of the rating document of 2025-12-16.
- Covenant test result as at 2026-09-30: the half-year filing for the quarter ended 2026-09-30, or a compliance certificate for that date.
- Repayments and share proceeds for the year to 2026-03-31: the financing section on PDF pages 349 to 350, and the use-of-funds statement on PDF page 267.
- Why about 24,692 of long-term debt sits under one year: note 36 (PDF page 404), note 14, and the current borrowings note (PDF page 381).
- How 65,476 due within a year is met against cash of 24,165 at 2026-03-31, with no unused lines named: a refinancing statement in a later results call or filing.
- Debt to equity: total equity on PDF page 346. This was the lawyer's EXTRA question, not asked (cost cap).
- The claimed FY27 interest saving: quarterly finance costs from the quarter ended 2026-09-30, against 2,132 for the quarter ended 2026-06-30.

Also noted: code ran over every I6 turn with 0 problems; every convict quote was found word for word with its id, so quotes are verified by code. Verified means the words are in the convict's brain, not that they settle how much debt was repaid. My notebook held nothing for this issue.

- I7 Related parties and group structure 14 turns

LAWYER

Q1 Lawyer
TO: the convict
QUESTION: Your record names approved ceilings for related party deals, but a ceiling is not an amount moved, and PDF page 396 has no total row. What was the total value of related party transactions actually made in the year ended 2026-03-31, in Rs million, as one number?
WHY I ASK: Related-party check, rules.md B2 (RULE, lesson date 2026-07-27): "Anything more than 10% should be viewed with suspicion." (S066, MODULJ 00:11:24). The bar is set against sales, and the course's second bar is against profit after tax (S068, MODULJ 00:11:01). Both need the amount actually moved. Here the record holds ceilings and revenue from operations of 169,270 but no matched amount, so the 10% test cannot be run. DECISIVE: yes
IF DEFLECTED: Give the total as filed, or name the note that would print it.

CONVICT

A1 Convict partial
ANSWER: I have no single total for related party transactions in the year ended 2026-03-31, and my record prints no total row to build one from. The annual report gives separate lines on two bases, the standalone notes and the consolidated table at PDF page 396. I will not add them: some lines are amounts moved in the year, some may be balances, and one line is far larger than the rest. The Board's report says there were no materially significant transactions. The approved ceilings are limits, not amounts moved, so the 10% test cannot be run from them.
MOVE: not in my record | mitigate
EVIDENCE:
- "There were no materially significant related party transactions entered between the company, directors, management and their relatives." (S027, p200, Board's report), said of the year to 2026-03-31, a company filing, not management speech.
- filed, standalone basis (inferred): sale of goods and other products to subsidiaries 4,521 million for the year to 2026-03-31 against 4,294 million for the year to 2025-03-31 (S027, p321, notes to the financial statements); my file prints no column headers, so current year first is my reading, unchecked.
- filed, standalone basis: loans given to subsidiaries 4,032 million in the column for 2026-03-31 against 2,862 million in the column for 2025-03-31 (S027, p321, notes to the financial statements).
- filed, standalone basis: guarantee given on behalf of related party 7,245 million in the column for 2026-03-31 against 5,980 million in the column for 2025-03-31 (S027, p321, notes to the financial statements); the row does not say whether it is a balance or issued in the year.
- filed, standalone basis: investment in equity shares of Biocon Biologics limited 105,744 million in the column for 2026-03-31 against 5,550 million in the column for 2025-03-31 (S027, p321, notes to the financial statements); the same report ties the share purchases of the year to 2026-03-31 to the buyout of minority holders in that subsidiary (S027, p307, notes to the financial statements).

- filed, consolidated basis (inferred): sale of services 1,653 million for the year to 2026-03-31 against 884 million for the year to 2025-03-31 (S027, p396, notes to the financial statements); the party on that row is not in my file.
- derived by code: ceilings approved at the 2025 AGM held 2025-08-08 add to Rs 23,873 crore across 10 items, valid until the 48th AGM held 2026-08-06; ceilings, not amounts moved (S036, 2025 AGM held 2025-08-08).
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the related party note of the annual report for the year to 2026-03-31 with its column headers and row headings, both the standalone table (PDF page 321) and the consolidated table (PDF page 396), or a total if the company prints one elsewhere (unchecked). I did not open the hand-read annual report pages (S039) in this turn.

LAWYER

Q2 Lawyer
TO: the convict
QUESTION: Mylan Inc. is on the related party list at PDF page 396 until 2026-01-21, but that table has no Mylan row. What amount in Rs million does the annual report for the year ended 2026-03-31 record as transacted with Mylan Inc. as a related party, and as of what date?
WHY I ASK: Related-party check, checks.md entry 12 and rules.md B2 (RULE, lesson date 2026-07-27): "Anything more than 10% should be viewed with suspicion." (S066, MODULJ 00:11:24). The method says to walk the related-party note line by line. Your last answer was partial: no total, and the one large line you left out of any sum is not yet tied to a named party. The Mylan Inc. purchase of 2025-12-06 is the largest flow in the record with a party the report itself names as related, and it is settled in cash of 36,242 million plus an allotment of shares. The 10% test needs the amount moved set against sales. I have not decided whether this purchase counts as a transaction for that test, and I have not checked the Mylan figure against any filing. DECISIVE: no
IF DEFLECTED: Then name the note and page that describes the Mylan Inc. deal as a related party transaction, or say it is not so described.

CONVICT

A2 Convict `partial`
ANSWER: As of the annual report for the year to 2026-03-31, I find no amount printed against Mylan Inc. in the related party note. The nearest filed figure is the share purchase from Mylan Inc.: 73,560 for the year to 2026-03-31 (printed as Rs; the report's unit is million, my reading, unchecked). That price bought 292,726,366 shares in the year to 2026-03-31. Cash within it was 36,242 for the year to 2026-03-31. The note does not call this a related party amount. Mylan Inc. is listed as related only until 2026-01-21. Whether the purchase counts for the 10% test is not mine to decide.
MOVE: mitigate | not in my record
EVIDENCE:
- filed, consolidated basis, year to 2026-03-31: Mylan Inc. is listed as a related party until 2026-01-21, described as an investor with significant influence over a subsidiary; my file holds no Mylan amount in that table (S027, PDF page 396, notes to the financial statements, year to 2026-03-31)
- filed, as the note prints it, year to 2026-03-31: purchase of 292,726,366 BBL equity shares from Mylan Inc. under the share swap and purchase agreement for 73,560 for the year to 2026-03-31 (S027, PDF page 307, notes to the financial statements, year to 2026-03-31)
- filed, same note, year to 2026-03-31: cash 36,242 for the year to 2026-03-31, and 91,967,019 company shares issued to Mylan Inc. in the year to 2026-03-31 at 405.78 per share for the year to 2026-03-31 (S027, PDF page 307, notes to the financial statements, year to 2026-03-31)
- filed, year to 2026-03-31: cash consideration of USD 400 million to Mylan Inc. in two tranches in January 2026, in the year to 2026-03-31; I have not tied it to the rupee cash figure above (S027, PDF page 191, Board's report (company filing), year to 2026-03-31)
- "There were no materially significant related party transactions entered between the company, directors, management and their relatives." (S027, p200, Board's report (company filing)), said of the year to 2026-03-31; it names directors, management and relatives, not Mylan Inc. (my reading)
- filed voting result for the meeting dated 2025-12-31, resolution 6, material related party transactions between the company and Mylan Inc.: 0.81% against at the meeting dated 2025-12-31, promoter group interested; the annex cuts the wording short, so no amount (S034, voting results for the meeting dated 31-DEC-2025, resolution 6)
- the notices file lists the Mylan Inc. purchase only as one to complete by 2026-03-31 and has no ceiling row for it, read by hand, no tier (S036, notices read by hand)
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the related party note of the annual report for the year to 2026-03-31 with column headers and row headings, to see whether any Mylan Inc. amount sits in the consolidated table at PDF page 396 for the year to 2026-03-31; and the notice for the meeting dated 2025-12-31, explanatory statement for resolution 6, which should state the amount put to shareholders (I did not open S035 this turn).

LAWYER

Q3 Lawyer
TO: the convict
QUESTION: Resolution 6 at the meeting dated 2025-12-31 put the Mylan Inc. related party transaction to a vote. What amount in Rs million did the explanatory statement in that notice give for it, and what was the date of the notice?
WHY I ASK: Related-party check, checks.md entry 12 and rules.md B2 (RULE, lesson date 2026-07-27): "Anything more than 10% should be viewed with suspicion." (S066, MODULJ 00:11:24), with the second bar against profit after tax (S068, MODULJ 00:11:01). Your last answer was partial: the filed note prints no Mylan amount, and the nearest figures are the share purchase price of 73,560 million and cash of 36,242 million. My method asks for the number and the date, and the notice is the document that should hold the amount put to shareholders. I have not read the notice, and I have not decided whether this purchase counts for the 10% test. DECISIVE: no
IF DEFLECTED: Then say yes or no: does your record hold the explanatory statement for resolution 6, and if not, name the filing that does.

CONVICT

A3 Convict `not in my record`
ANSWER: I cannot give the Rs million amount or the notice date. None of the three files I read prints the explanatory statement for resolution 6 at the meeting dated 2025-12-31, or the date of its notice. To your yes or no: my record holds a hand-read summary of that 2025-12 notice (S035), but I did not open it this call, so I cannot say it prints an amount. The nearest filed rupee figure is 73,560 for the Mylan Inc. share purchase in the year to 2026-03-31, with cash of 36,242 in the year to 2026-03-31. The report does not tie either to the notice. I will not convert the USD 400 million paid in January 2026.
MOVE: not in my record | mitigate
EVIDENCE:

- filed voting result for the meeting dated 2025-12-31, resolution 6, an ordinary resolution on material related party transactions between the company and Mylan Inc., promoter group interested: 0.81% of votes against at the meeting dated 2025-12-31; the annex cuts the wording short and prints no amount (S034, voting results for the meeting dated 31-DEC-2025, resolution 6)
- filed, same resolution: 2,888,343 votes against at the meeting dated 2025-12-31, out of 355,697,530 votes polled at the meeting dated 2025-12-31 (S034, voting results for the meeting dated 31-DEC-2025, resolution 6)
- the notices file lists the Mylan Inc. purchase only as one to complete by 2026-03-31, has no ceiling row for it, and points to the 2025-12 notice as held in S035; read by hand, no tier (S036, notices read by hand)
- my hot sheet's summary of the hand-read 2025-12 notice mentions USD 400 million for the Mylan Inc. purchase, as of the 2025-12 notice; it gives no rupee figure and no notice date, and I did not open the file this call, so I do not claim this is the explanatory statement amount (S035, read by hand, no tier)
- filed in the Board's report for the year to 2026-03-31, said of January 2026: "against cash consideration of USD 400 million, in 2 (two) tranches." (S027, p191, Board's report), a company filing for the year to 2026-03-31, not management speech
- filed, year to 2026-03-31: purchase of 292,726,366 BBL shares from Mylan Inc. for Rs 73,560 in the year to 2026-03-31, and cash of Rs 36,242 in the year to 2026-03-31; the note prints no word million, so million is my reading, unchecked (S027, p307, notes to the financial statements, year to 2026-03-31)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the notice for the meeting dated 2025-12-31 with its explanatory statement for resolution 6 and its notice date, filed with the exchanges; my S035 file may hold it, but I did not open it this call (unchecked).

LAWYER

`Q4 Lawyer`
TO: the convict
QUESTION: The approvals you listed ran out at the 48th AGM held 2026-08-06, and you named no document for what replaced them. Which filing holds the related party ceilings in force after that meeting, and what is its date?
WHY I ASK: Related-party check, checks.md entry 12 and rules.md B2 (RULE, lesson date 2026-07-27): "Anything more than 10% should be viewed with suspicion." (S066, MODULJ 00:11:24). The method walks the related-party record line by line, and the 10% test needs a ceiling and an amount moved that are both in force. Your last answer was not in my record for the Mylan Inc. amount, so I ask which document would hold the next gap: the ceilings that followed the ones that ended on 2026-08-06. I have not seen that document and I have not decided what it shows. DECISIVE: no
IF DEFLECTED: Then say yes or no: is a notice or voting result dated on or after 2026-08-06 in your record that approves related party ceilings, and if not, which filing would?

CONVICT

`A4 Convict` `not in my record`
ANSWER: Not in my record. As of the meeting held 2026-08-06, no filing in the three files I opened holds related party ceilings in force after that date, so I cannot name one or give its date. The 2025 approvals ran to the 48th AGM, held 2026-08-06, and the voting result for that meeting shows nine resolutions, none on related party transactions. The latest approvals I hold are the ones that ended on 2026-08-06. The annual report for the year to 2026-03-31 says approvals were obtained as the policy requires, but names no instrument and no date. To your follow-up: no, nothing dated on or after 2026-08-06 in these three files approves ceilings.
MOVE: not in my record | cite
EVIDENCE:
- filed, 2025 AGM held 2025-08-08: ceilings on 10 items, valid from 2025-08-08 until the 48th AGM; derived by code, they add to Rs 23,873 crore as at the 2025 AGM held 2025-08-08, ceilings and not amounts moved (S036, notices read by hand, no tier)
- the notices file says the 48th AGM was held on 2026-08-06 and its nine resolutions included no related party resolution, so by the notices' stated tenure the 2025 AGM approvals ran out on 2026-08-06; it adds that the record does not show whether another approval route was used afterwards (S036, notices read by hand, no tier)
- filed voting result for the meeting dated 2026-08-06: resolutions 1 to 9 cover the accounts, the dividend, a director, the auditor, incentive plans, a trust and cost auditors' pay; none is a related party resolution (S034, voting results for the meeting dated 2026-08-06, resolutions 1 to 9)
- derived from the related party table in the votes file: its latest meeting row is 2025-12-31, and no row after it lists a related party resolution (S034, voting results to the meeting dated 2026-08-06)
- "whenever required the Company has obtained necessary approvals as per the policy of the Company on related party transactions" (S027, p200, Board's report (company filing)), said of the year to 2026-03-31, so it cannot name an approval made after 2026-08-06
- the annual report lists the company's policy on related party transactions as a document and prints no ceiling after the year to 2026-03-31 (S027, p223, Board's report (company filing), one reader)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: a notice and voting result dated on or after 2026-08-06 for a general meeting or postal ballot with a related party resolution, or an exchange filing of an approval for transactions in the year after 2026-08-06; I do not know which route the company used, and I hold no filing dated after the 2026-08-06 voting result that does this (unchecked). The announcements to 2026-10-25 are in changes.md, which I did not open this call.

LAWYER

`Lawyer rest`
REST: I stop at the fifth question because my method's related-party checks (checks.md entry 12 and rules.md B2) are asked and recorded: no total of amounts moved (A1), no Mylan Inc. amount in the note (A2), no resolution 6 explanatory statement amount (A3), no filing for ceilings after the 2026-08-06 AGM (A4); what is still open, and which documents would settle it, is listed in those answers, and a further question would only repeat them.
DECISIVE: no

LAWYER

`Lawyer review`
COVERED:
- That no total of related party transactions moved in the year to 2026-03-31 exists in the record: the convict holds separate lines on two bases

(standalone note, PDF page 321; consolidated table, PDF page 396), will not add them, and agrees the approved ceilings (Rs 23,873 crore across 10 items, 2025 AGM held 2025-08-08) are limits, not amounts moved (I7 Q1, I7 A1). My method's bar, rules.md B2 (RULE, lesson date 2026-07-27): "Anything more than 10% should be viewed with suspicion." (S066, MODULJ 00:11:24), set against sales. The convict's own answer is that the test cannot be run from this record.
- The line-by-line walk that checks.md entry 12 asks for, as far as the record allows: standalone sale of goods to subsidiaries 4,521 million against 4,294 million, loans given to subsidiaries 4,032 million against 2,862 million, guarantee given on behalf of a related party 7,245 million against 5,980 million, investment in Biocon Biologics equity 105,744 million against 5,550 million, and a consolidated sale of services row of 1,653 million against 884 million with its party not named (I7 A1). Column order and the balance or flow nature of several rows are the convict's own reading, unchecked.
- Mylan Inc.: on the related party list at PDF page 396 until 2026-01-21, with no Mylan row in that table; the nearest filed figures are the share purchase of 292,726,366 Biocon Biologics shares for 73,560 and cash of 36,242, plus 91,967,019 company shares issued at 405.78 (I7 Q2, I7 A2, matching case book PDF pages 307, 373 and 394). Shareholders voted on resolution 6 at the meeting dated 2025-12-31 with 0.81% against, promoter group interested (I7 A2, I7 A3).
- That no filing in the convict's files holds related party ceilings in force after the 48th AGM held 2026-08-06, whose nine resolutions include none on related parties (I7 Q4, I7 A4). This matches the case book's own known gap for I7.

OPEN:
- The total amount actually moved with related parties in the year to 2026-03-31, on one stated basis (I7 Q1, I7 A1: partial). Document: the related party notes at PDF pages 321 and 396 read with their column headers and row headings. Without it, B2's 10% of sales test and its second bar, "companies routing 35% to 40% of their profit after tax (PAT) through related parties are generally considered uninvestable" (S068, MODULJ 00:11:01), are both untested.
- The base for the 10% test: the standalone sale to subsidiaries (4,521 million) sits on a standalone basis, while the only revenue in the case book is consolidated (169,270 million), and intra-group sales drop out of a consolidated total. Standalone revenue from operations for the year to 2026-03-31 is not in the case book. Document: the standalone statement of profit and loss in the same annual report. Never asked.
- The amount put to shareholders for the Mylan Inc. transaction under resolution 6 at the meeting dated 2025-12-31, and the notice date (I7 Q3, I7 A3: not in my record). Document: the notice and explanatory statement for that meeting, which the convict says may sit in its S035 file, unopened in that turn. Whether a share purchase from a related party counts toward the 10% of sales test: B2 and checks.md entry 12 do not say, and I have not decided it (I7 Q2, I7 Q3).
- What approval route replaced the ceilings that ran out on 2026-08-06 (I7 Q4, I7 A4: not in my record). Document: a notice and voting result, or postal ballot, dated on or after 2026-08-06 with a related party resolution; the convict names its announcements file (changes.md) as unopened in that turn.
- Guarantees and loans to group companies: the 7,245 million guarantee and 4,032 million loans appeared in I7 A1 but were never pressed, and the convict says the guarantee row does not show whether it is a balance or issued in the year. checks.md entry 12 lists heavy guarantees and advances to a group as a red flag (S364, lesson date 2026-07-26) and names corporate guarantees as where the data is. Document: the standalone related party note at PDF page 321 with headings, and the contingent liabilities note.
- Group structure, the second half of this issue, was never asked: the listed subsidiary Syngene (AR p13), the buyout of minority holders in Biocon Biologics (I7 A1, PDF page 307), and the 2026-01-05 allotment of 171,279,553 shares to four parties for 261,917,480 Biocon Biologics shares, which the case book says is not reconciled with the 91,967,019 shares issued to Mylan Inc. (case book PDF pages 267 and 307). The exchange feed also shows the statutory auditors of a material subsidiary resigning with effect from 2026-08-06; checks.md entry 12 names subsidiaries audited by secondary auditors as a red flag (S054, lesson date 2026-07-27), though the auditor itself belongs to I9. Documents: the annual report's note on subsidiaries and the share capital note, and the 2026-08-06 resignation filing.

WEAK QUESTION:
- I7 Q3: it asked for an amount held in a file the convict had already said in I7 A2 it had not opened (S035), so a not in my record answer was close to certain. The ladder allowed it, but asking the convict to open that file or name its page would have bought more.
- I7 Q4: on record against the case book's gap, but off the B2 measure. A ceiling in force after 2026-08-06 tells nothing about amounts moved against sales, which is what the 10% test needs, and it left the Mylan amount and the group structure half unasked.
- The rest turn says I stopped at the fifth question; four were asked (I7 Q1 to I7 Q4). It also says a further question would only repeat earlier ones, which is not right while guarantees and group structure were never asked.

EXTRA:
TO: the convict
QUESTION: Your standalone note shows a guarantee given on behalf of a related party of 7,245 million in the column for 2026-03-31. How many Rs million of guarantees given on behalf of related parties were outstanding as a balance at 2026-03-31?
WHY I ASK: S364 (lesson date 2026-07-26) and checks.md entry 12, the related-party check, which lists heavy guarantees and advances to a group as a red flag and names corporate guarantees as where the data is. A1 left open whether the 7,245 million row is a balance or issued in the year, and only the outstanding balance shows what the parent stands behind for its group. DECISIVE: no
IF DEFLECTED: Then name the note and PDF page that prints guarantees given for related parties as a balance at 2026-03-31.

CONSOLIDATION:
- What the method asked: walk the related party note line by line and run rules.md B2 (RULE, 2026-07-27), amounts moved against sales at 10% and against profit after tax at 35% to 40% (S066, S068), then check the approvals behind them (I7 Q1 to I7 Q4).
- What the record answered: no total and no basis-matched sales figure, so neither B2 bar can be run; separate standalone and consolidated lines exist; Mylan Inc. is a related party until 2026-01-21 with no amount in the note, its purchase sized at 73,560 with cash of 36,242; resolution 6 passed with 0.81% against; ceilings of Rs 23,873 crore lapsed on 2026-08-06 with no replacement on record (I7 A1 to I7 A4).
- What is still open: the total moved, the standalone sales base, the resolution 6 amount and notice date, the approval route after 2026-08-06, whether the 7,245 million guarantee is a balance, and the whole group structure half of the issue (I7 A1 to I7 A4; guarantees and group structure never asked).
- What a reader should check: the related party notes at PDF pages 321 and 396 with headings, the standalone profit and loss statement, the notice

for the meeting dated 2025-12-31, any approval dated on or after 2026-08-06, and the share capital and subsidiaries notes. Until then this issue is untested on the course's bar, not passed and not failed.

JUDGE

Judge note

STORY SO FAR:
- No total of related party deals in the year to 2026-03-31 is on record, so the course's 10% of sales test cannot run (hearing I7 A1).
- Mylan Inc. was a related party until 2026-01-21; Biocon bought subsidiary shares from it for 73,560 million, yet the table shows no Mylan row (case book ch9).
- Ceilings approved at the 2025-08-08 meeting ran out on 2026-08-06, and no later approval is on record (hearing I7 A1, A4; case book ch8).

WHY-CHAIN:
- The standalone row for investment in Biocon Biologics shares reads 105,744 million for 2026-03-31 against 5,550 for 2025-03-31 (hearing I7 A1, S027 p321, not in the case book, I could not check it), because Biocon bought out minority holders. Mylan Inc. got cash of 36,242 plus 91,967,019 shares at Rs 405.78, about 37,318 (derived by me): together 73,560 filed for the year to 2026-03-31 (case book ch9).
- Guarantees given on behalf of a related party read 7,245 million for 2026-03-31 against 5,980 for 2025-03-31, up 21.2%, and loans to subsidiaries 4,032 against 2,862, up 40.9% (derived by me; hearing I7 A1, S027 p321, I could not check them). Why they rose, and whether 7,245 is a balance or an amount issued in the year: not in the record.
- Sales of goods to subsidiaries read 4,521 million for the year to 2026-03-31 against 4,294 a year earlier, up 5.3%, and an unnamed consolidated services row 1,653 against 884, up 87.0% (derived by me; hearing I7 A1). Who the services party is and why it nearly doubled: not in the record. I will not divide 4,521 (standalone) by revenue of 169,270 (consolidated, year to 2026-03-31, case book ch3): different bases.
- The Board's report says there were no materially significant related party deals, but its own words cover only the company, directors, management and their relatives (hearing I7 A1, A2, quote verified by code; case book ch9, PDF page 200). Shareholders still voted on material related party deals with Mylan Inc. at the 2025-12-31 meeting, 2,888,343 of 355,697,530 votes against, 0.81% (derived by me; hearing I7 A3, S034, I could not check it).
- Ten ceilings adding to Rs 23,873 crore were approved at the 2025-08-08 meeting and ran to the 48th AGM held 2026-08-06, whose nine resolutions had none on related parties (hearing I7 A1, A4; derived by code from hand-read files S036 and S034, which I could not check). What covers deals after 2026-08-06: not in the record, the case book's own known gap (case book ch8).

I DID NOT UNDERSTAND:
- Why 171,279,553 shares went to four parties for 261,917,480 Biocon Biologics shares on 2026-01-05, while Mylan alone sold 292,726,366 for 91,967,019 shares plus cash (case book ch9, PDF pages 267, 307).
- Why the stake row rose by 100,194 million (105,744 less 5,550, derived by me) when the Mylan purchase is 73,560 for the year to 2026-03-31: what the other 26,634 was is not in the record.
- What "an investor with significant influence over a subsidiary" means, and why that link ended on 2026-01-21 (case book ch9; ch6, update on acquisition of 2026-01-21).
- Whether the PDF page 321 rows are year-end balances or amounts in the year; the convict's file has no column headers (hearing I7 A1).
- Whether buying shares from a related party counts toward the 10% of sales test; the lawyer said it had not decided (hearing I7 Q2, Q3).
- Why approved ceilings of Rs 23,873 crore, about 238,730 million (derived by me, 1 crore is 10 million), sit above consolidated revenue of 169,270 for the year to 2026-03-31 (case book ch3), and what the ten items are.

STATE PROPOSED:
- Q1 partial: the decisive question asked for one total and none exists in the record, but the convict answered on a different basis, separate dated standalone and consolidated lines, a mitigate move; column order and balance or flow are its own unchecked reading, and the page 321 lines are not in the case book (hearing I7 A1).
- Q2 partial: the note prints no Mylan amount, which the case book confirms (no Mylan row on PDF page 396, case book ch9); the convict gave the purchase on a different basis, 73,560 and cash 36,242 for the year to 2026-03-31, matching case book ch9, a mitigate move (hearing I7 A2).
- Q3 no data: neither the resolution 6 amount nor the notice date is in what the convict read; it named the notice and its own unopened S035 file, though the case book lists that EGM notice as on file (D06b, as of 2025-12-07, case book ch8), so the gap is in what was opened (hearing I7 A3).
- Q4 no data: a plain not-in-record cite that matches the case book's known gap; the convict named the kind of filing that would settle it, a notice and vote on or after 2026-08-06, and said its announcements file was unopened (hearing I7 A4, case book ch8).

ASK NEXT:
- Why does the related party table at PDF page 396 show no Mylan Inc. row, when Mylan was a related party until 2026-01-21 and was paid 36,242 million in cash plus shares in the year to 2026-03-31?
- Why did guarantees given on behalf of related parties go from 5,980 million at 2025-03-31 to 7,245 million at 2026-03-31, and is 7,245 the balance outstanding at that date?

WATCH (gap, not asked under the cost cap): the lawyer's extra question on the guarantee balance outstanding at 2026-03-31 was not asked; it would sit in the standalone related party note on PDF page 321 with headings, or the contingent liabilities note (hearing I7 Lawyer review). Also never asked: the group structure half of this issue, meaning Syngene, the reconciliation of the 2026-01-05 allotment, and the resignation of the statutory auditors of a material subsidiary with effect from 2026-08-06 (case book ch6, ch9); and the standalone revenue for the year to 2026-03-31, the base the 10% test needs, which is not in the case book.

CONVICT

WA1 Convict not in my record

ANSWER: The record does not say why. In the annual report for the year to 2026-03-31, the PDF page 396 table lists Mylan Inc. as a related party until 2026-01-21, an investor with significant influence over a subsidiary. My file holds no Mylan row from that table, but it is a one-reader extract, so I cannot say the row is absent. The deal sits in the share notes: 73,560 for the year to 2026-03-31, with cash within it of 36,242 for the year to 2026-03-31. Shareholders voted on it as a related party deal: 0.81% against at the meeting dated 2025-12-31.

MOVE: not in my record | mitigate
EVIDENCE:
- filed, consolidated basis (inferred), year to 2026-03-31: Mylan Inc. is listed as a related party until 2026-01-21, described as an investor with significant influence over a subsidiary; my file has no Mylan amount from that table (S027, p396, notes to the financial statements, one reader, year to 2026-03-31)
- filed voting result for the meeting dated 2025-12-31, resolution 6, material related party transactions between the company and Mylan Inc., promoter group interested: 0.81% of votes against at the meeting dated 2025-12-31 (S034, voting results for the meeting dated 31-DEC-2025, resolution 6)
- filed, year to 2026-03-31: the note prints the Mylan Inc. share purchase at Rs 73,560 for the year to 2026-03-31; it prints no word million, so million is my reading, unchecked (S027, p307, notes to the financial statements)
- said in the notes for the year to 2026-03-31: "paid cash consideration of Rs. 36,242." (S027, p307, notes to the financial statements (company filing)), a company filing, not management speech
- filed in the Board's report for the year to 2026-03-31, said of January 2026: "against cash consideration of USD 400 million, in 2 (two) tranches." (S027, p191, Board's report (company filing)); the tranche dates are not in my file, so I cannot say whether they fell before 2026-01-21
- filed, corporate governance report for the year to 2026-03-31: shares were allotted on 2026-01-05 to Mylan Inc. and three other holders, 16 days before 2026-01-21 (derived) (S027, p267, corporate governance report)
- "There were no materially significant related party transactions entered between the company, directors, management and their relatives." (S027, p200, Board's report (company filing)), said of the year to 2026-03-31; it names directors, management and relatives, not Mylan Inc. (my reading)
- the notices file lists the Mylan Inc. purchase only as one to complete by 2026-03-31 and has no ceiling row for it, read by hand, no tier (S036, notices read by hand)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the related party note of the annual report for the year to 2026-03-31, PDF page 396 with its column headers and row headings, to see whether a Mylan Inc. row or amount exists there and what the note says it covers; and any text explaining why Mylan Inc. stopped being a related party on 2026-01-21 (unchecked). I did not open S035 or S039 this call.

CONVICT

WA2 Convict `not in my record`
ANSWER: The record does not say why, and I cannot call 7,245 million at 2026-03-31 a balance. Filed standalone, the row reads 7,245 million in the column for 2026-03-31 against 5,980 million in the column for 2025-03-31, a rise of 1,265 million between 2025-03-31 and 2026-03-31 (derived), or 21.2% over the 2025-03-31 column. My files name no beneficiary, no new guarantee and no reason. Shareholders twice voted to raise the limit for guarantees and loans, at the meetings dated 2025-08-08 and 2025-12-31, but a limit is not use of it. Column order and balance or flow are my reading, unchecked.
MOVE: not in my record | mitigate
EVIDENCE:
- filed, standalone basis: guarantee given on behalf of related party 7,245 million in the column for 2026-03-31 against 5,980 million in the column for 2025-03-31 (S027, PDF page 321, notes to the financial statements, year to 2026-03-31); my file prints no column headers, so current year first is my reading, unchecked.
- derived by me: 7,245 million at 2026-03-31 less 5,980 million at 2025-03-31 is 1,265 million, a rise between 2025-03-31 and 2026-03-31, and 21.2% on the 2025-03-31 column.
- "The corporate guarantees given are at arm’s length prices." (S027, p324, notes to the financial statements), said of 2026-03-31, a company filing, not management speech; it names no beneficiary and no amount.
- filed, standalone basis: the put option obligation row says outstanding in its label, with a dash in the column for 2026-03-31 and 14,186 million in the column for 2025-03-31 (S027, PDF page 321, year to 2026-03-31); the guarantee row carries no such word, which is why I cannot call 7,245 million at 2026-03-31 a balance, my reading, unchecked.
- filed voting result for the meeting dated 2025-08-08, resolution 16, a special resolution to raise the limits for investments, loans, guarantees and securities: 6.83% of votes against at the meeting dated 2025-08-08; a limit, not an amount used (S034, voting results for the meeting dated 08-AUG-2025, resolution 16).
- filed voting result for the meeting dated 2025-12-31, resolution 2, a special resolution to raise the same kind of limits: 15.67% of all votes against at the meeting dated 2025-12-31 and 48.24% of public institutions' votes against at the meeting dated 2025-12-31 (S034, voting results for the meeting dated 31-DEC-2025, resolution 2).
- the notices file says the postal ballot with results dated 2024-04-23, item 6, covered guarantees on behalf of Biocon Biologics Limited within the limits then approved, and that guarantees run for the life of the contracts; read by hand, no tier, and it gives no amount for any guarantee, so I do not tie it to the row above (S036, notices read by hand).
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the related party note of the annual report for the year to 2026-03-31 with its column headers and the notes under the PDF page 321 table, to show whether 7,245 million at 2026-03-31 is a balance or issued in the year; the contingent liabilities note and the loans, guarantees and investments disclosure in the standalone statements for 2026-03-31, to name the beneficiary and any new guarantee; and the notice and explanatory statement for the meeting dated 2025-12-31, resolution 2, which should state what the raised limit was for. I did not open the hand-read annual report pages (S039, read 2026-10-31) this call (unchecked).

JUDGE

Judge close
STORY SO FAR:
- No total of related party deals for the year to 2026-03-31 is on record. So the course's 10% of sales test cannot run (hearing I7 A1, Lawyer review).
- Mylan Inc. was a related party until 2026-01-21. Biocon bought subsidiary shares from it for 73,560 million, filed, yet the table has no Mylan row (case book ch9).
- Guarantees for a related party read 7,245 million at 2026-03-31, up from 5,980. Who they cover, and why they rose: not in the record (hearing I7 WA2).

WHY-CHAIN:
- The Mylan deal is on record, but not as a related party amount, because it sits in the share notes: 73,560 million for the year to 2026-03-31, cash 36,242 within it, filed (case book ch9, PDF pages 307, 394). Shares went to Mylan on 2026-01-05, 16 days before the link ended (hearing I7 WA1, PDF page 267). Why the table leaves it out: not in the record.
- Guarantees given for a related party rose 1,265 million, 5,980 at 2025-03-31 to 7,245 at 2026-03-31, +21.2% (derived; hearing I7 WA2, S027 p321, standalone, not in the case book, I could not check it). Why: not in the record. No beneficiary is named. The arm's length sentence (S027 p324) is verified by code, but it gives no amount.
- Shareholders twice voted to raise limits for loans and guarantees: 6.83% against on 2025-08-08, then 15.67% against on 2025-12-31, with 48.24% of public institutions against (hearing I7 WA2, S034, dated by code, not in the case book). A limit is not use of it. Why the institutions objected: not in the record.
- The Board's report says no materially significant related party deals, but its words cover only the company, directors, management and relatives (hearing I7 A2, WA1, quote verified by code; case book ch9, PDF page 200). Shareholders still voted on the Mylan deal as a material related party deal, 0.81% against on 2025-12-31 (hearing I7 A3, S034). So that sentence does not settle Mylan.
- Ten ceilings adding to Rs 23,873 crore, approved 2025-08-08, ran to the 48th AGM held 2026-08-06. Its nine resolutions had none on related parties (hearing I7 A1, A4; hand-read S036 and S034, sum derived by code). What covers deals after 2026-08-06: not in the record, the case book's own known gap (case book ch8).

I DID NOT UNDERSTAND:
- Why 171,279,553 shares went to four holders on 2026-01-05 for 261,917,480 Biocon Biologics shares, while Mylan alone got 91,967,019. The pages do not reconcile them (case book ch9, PDF pages 267, 307).
- Why the standalone stake row rose 100,194 million (105,744 less 5,550, derived by me) when the Mylan price is 73,560. The other 26,634 is not in the record (hearing I7 A1).
- "Investor with significant influence over a subsidiary": I take it as a big holder with a say in Biocon Biologics. Why that ended on 2026-01-21 is not in the record (case book ch6, ch9).
- Whether the PDF page 321 rows are year-end balances or amounts in the year. The put option row says outstanding; the guarantee row does not (hearing I7 WA2).
- Whether buying shares from a related party counts toward the 10% of sales test. The lawyer has not decided (hearing I7 Q2, Q3, Lawyer review).
- Whether the two USD 400 million tranches in January 2026 fell before or after 2026-01-21 (hearing I7 WA1).

STATE PROPOSED:
- Q1 partial, unchanged: the decisive question. No total exists; the convict gave separate dated lines on two bases, a mitigate move. The why answers add no total (hearing I7 A1).
- Q2 partial, unchanged: no Mylan amount in the note. The purchase came on a different basis, 73,560 and cash 36,242 for the year to 2026-03-31, matching case book ch9. WA1 will not call the row absent; case book ch9 says it is.
- Q3 no data, unchanged: no resolution 6 amount and no notice date. The EGM notice is on file (D06b, as of 2025-12-07, case book ch8) but was not opened, so the gap is in what was read.
- Q4 no data, unchanged: a plain not-in-record cite that matches the case book's known gap; the kind of filing that would settle it was named (hearing I7 A4, case book ch8).
- WA1 no data: why the table has no Mylan row is not in the record; mitigated with the 2025-12-31 vote and the 2026-01-05 allotment date (hearing I7 WA1).
- WA2 no data: no reason, no beneficiary, and balance or flow unsettled; the figures were already given in A1. Mitigated with the arm's length sentence and two limit votes (hearing I7 WA2).

WATCH:
- The related party notes at PDF pages 321 and 396 of the annual report for the year to 2026-03-31, read with column headers and row headings. Settles Q1's total, Q2's Mylan row, and whether 7,245 is a balance. The lawyer's EXTRA on the guarantee balance at 2026-03-31 was not asked (cost cap); WA2 touched it but did not settle it.
- The contingent liabilities note and the loans, guarantees and investments disclosure in the standalone statements for 2026-03-31: who the guarantees cover, and any new one.
- The notice for the meeting dated 2025-12-31 (D06b, as of 2025-12-07): the explanatory statements for resolution 6, the Mylan amount, and resolution 2, what the raised limit was for. Settles Q3.
- Any notice, postal ballot or vote dated on or after 2026-08-06 with a related party resolution, in the exchange feed to 2026-10-29. Settles Q4.
- Standalone revenue and profit for the year to 2026-03-31, the base the 10% and 35% to 40% tests need. Not in the case book, never asked.
- The group structure half, never asked: Syngene (AR p13), the 2026-01-05 allotment against the Mylan count (PDF pages 267, 307), the 2026-01-21 update on acquisition, and the material subsidiary's statutory auditors resigning with effect from 2026-08-06 (case book ch6). The auditor point belongs to I9.

Also noted: CHECKS FROM CODE ran over every turn of I7 with 0 problems. Every quotation in the convict's turns is verified by code against its brain with its id, and every figure of three digits or more is dated. Verified means the words exist, not that they support the claim; where that matters (the Board's sentence and Mylan), I say so above. The lawyer's course quotes (S066, S068, S364, S054) come from its own brain, which code did not check here and I cannot.

- I8 Promoter holding, pledge, dilution and pay 14 turns

LAWYER

```
Q1 Lawyer
```

TO: the convict
QUESTION: The promoter group's stake fell from 60.64% on 2025-03-31 to 44.91% on 2026-03-31, with its share count unchanged at 728,024,176. How many shares did the promoter group buy or subscribe for in cash in the 2026-01-05 preferential issue or the 2026-01-14 qualified institutional placement? Give the number and the date.
WHY I ASK: S467 and the course's check on promoter buying, selling, warrants and incentives (checks.md entry 34). The course reads a promoter taking part in a raise as a favourable sign: "to show confidence in the company and to infuse more money" (S467, SOICD3 01:06:17). It applies here because the case book shows the promoter percentage falling only because the total share count grew, and the 171,279,553 shares allotted on 2026-01-05 went to four named holders. The pledge part is already covered: the pledged flag reads false in all 25 filings that carry one, and the annual declarations for FY2023 to FY2026 say no encumbrance. The course states no cut for a stake change and treats participation as a green flag, not a requirement. I have not checked any route other than these two raises, the FY2022 declaration has no readable text, and FII and DII flows are not in the record. DECISIVE: yes
IF DEFLECTED: Then say yes or no whether the promoter group put any cash into the company in the year to 2026-03-31, and give the date of the latest such payment.

CONVICT

A1 Convict `answered`

ANSWER: The filed counts show the promoter group added no shares in either raise. Its holding was 728,024,176 shares at 2025-12-31, 728,024,176 at 2026-01-05, 728,024,176 at 2026-01-14 and 728,024,176 at 2026-03-31. Its percentage fell because the total grew: 54.45% at 2025-12-31, 48.27% at 2026-01-05, 44.91% at 2026-01-14. So the number asked for is zero shares, from filed counts, not from any statement by management. My record does not name who received the shares in either raise, and the filed pattern shows shares, not warrants or other instruments.
MOVE: cite | not in my record
EVIDENCE:
- filed promoter shares 728,024,176 at 2025-12-31 and 728,024,176 at 2026-01-05 (S032, shareholding filing for the quarter ended 31-DEC-2025; S032, shareholding filing dated 05-JAN-2026)
- filed promoter shares 728,024,176 at 2026-01-14 and 728,024,176 at 2026-03-31 (S032, shareholding filing dated 14-JAN-2026; S032, shareholding filing for the quarter ended 31-MAR-2026)
- filed promoter percentage 54.45 at 2025-12-31, 48.27 at 2026-01-05 and 44.91 at 2026-01-14 (S032, shareholding filings for the quarter ended 31-DEC-2025 and dated 05-JAN-2026 and 14-JAN-2026)
- derived implied total shares 1,337,050,828 at 2025-12-31 and 1,621,073,650 at 2026-01-14, back-calculated from the filed percentage (S032, shareholding filings for the quarter ended 31-DEC-2025 and dated 14-JAN-2026)
- filed pledged flag false at 2026-03-31 (S032, shareholding filing for the quarter ended 31-MAR-2026)
- promoter group's declaration signed 2026-04-01: no encumbrance in the year ended 2026-03-31, read by hand, no tier (S037, annual declaration for the year ended 2026-03-31)
- filed voting result of 2025-12-31: resolution 3 was a special resolution to issue equity shares on a preferential basis for consideration other than cash; whether the 2026-01-05 allotment is that issue is not stated in my record (S034, voting results for the meeting dated 2025-12-31, resolution 3)
STATE I CLAIM: answered
WHAT WOULD SETTLE IT: The allotment return for the preferential issue allotted on 2026-01-05 and the placement document for the issue closed on 2026-01-14, each naming the allottees and share counts; and the shareholding pattern's table of warrants and convertible instruments for the quarter ended 2026-03-31, which this record does not hold.

LAWYER

Q2 Lawyer
TO: the convict
QUESTION: The case book names Kiran Mazumdar-Shaw, a promoter, as Executive Chairperson. What was her total remuneration for the year to 2026-03-31, in Rs million, and on what date was the document that prints it filed?
WHY I ASK: S434 and checks.md entry 34, promoter buying, selling, warrants and incentives: read the promoter's pay beside the stake. The course lists pay tied to market cap as a red flag that can lead to "fudging of numbers" (S434). It applies here because your last answer shows the promoter group put in no shares in either raise, so its stake fell to 44.91% by dilution alone, and what keeps it aligned is its pay, which the case book does not hold. The course states no cut for pay. I have not checked the pay, how it is set, or FII and DII flows (E13, not in the record). DECISIVE: no
IF DEFLECTED: Then say yes or no whether any part of her pay is linked to the share price or market capitalisation, and name the filing that states it.

CONVICT

A2 Convict `not in my record`

ANSWER: Not in my record. The three files I opened hold no amount of her pay for the year to 2026-03-31, so I cannot give the Rs million figure or the date the document that prints it was filed. What I do hold is a shareholder vote on a revision of her remuneration, taken after that year closed. The filed result for the meeting dated 2026-06-08 shows 8.02% of all votes against and 21.30% of institutions' votes against. The result prints no amount, and it does not show the pay the revision replaced. The annual report for the year to 2026-03-31 should print the figure; I did not open it this turn.
MOVE: not in my record | mitigate
EVIDENCE:
- filed votes against 95,571,206 at the meeting dated 2026-06-08, resolution 1, a special resolution to approve revision in the remuneration of Ms. Kiran Mazumdar-Shaw, Executive Director (designated Executive Chairperson) (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- filed votes polled 1,192,359,030 at the meeting dated 2026-06-08, resolution 1 (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- filed share of all votes against 8.02% at the meeting dated 2026-06-08, resolution 1 (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- filed share of institutions' votes against 21.30% at the meeting dated 2026-06-08, resolution 1 (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- filed promoter group votes polled 721,793,134 at the meeting dated 2026-06-08, resolution 1, although the same table flags the promoter group as interested in it; the file's own note says an interested promoter group does not vote, so the two do not agree and I cannot reconcile them (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- the file does not say whether 2026-06-08 is a meeting date or, for a postal ballot, the date the results were filed, so it is not the filing date of any pay

document (S034, voting results for the meeting dated 2026-06-08, resolution 1)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the remuneration table in the annual report for the year to 2026-03-31 (its cover letter to the exchanges is dated 2026-07-15; whether the table sits in that filing is unchecked), or the notice of the vote dated 2026-06-08 with its explanatory statement. I did not open the annual report statements (the board section) in this turn.

LAWYER

Q3 Lawyer
TO: the convict
QUESTION: You said Kiran Mazumdar-Shaw's total pay for the year to 2026-03-31 is not in your record. Name the one document that prints it, with the section or page where the table sits, and give the date that document was filed with the exchange.
WHY I ASK: S434 and checks.md entry 34, promoter buying, selling, warrants and incentives: the course lists pay tied to market cap as a red flag that can lead to "fudging of numbers" (S434). Your last answer was not in my record, so my method asks which document would hold it. It applies here because the promoter group's stake fell by dilution alone, so pay is the one alignment signal still open. The case book names the annual report, with a cover letter dated 2026-07-15, and the vote of 2026-06-08, but I have not read either. The course states no cut for pay. FII and DII flows are not in the record, and the FY2022 declaration has no readable text. DECISIVE: no
IF DEFLECTED: Then say whether the annual report for the year to 2026-03-31 or the notice of the vote dated 2026-06-08 would print the figure first, and why.

CONVICT

A3 Convict partial
ANSWER: The one document is the annual report for the year to 2026-03-31. The director-wise remuneration table for the Executive Chairperson sits in its Board's report or its corporate governance report. I did not open either part in the three files I read, so I cannot give the page or the amount. The cover letter that sent the report to the exchanges is dated 2026-07-15. Whether that is the date the exchange received it is unchecked, and I hold no exchange feed category for it. The vote on her revised pay, results dated 2026-06-08, prints no amount, so its notice is a second place to look.
MOVE: not in my record | mitigate
EVIDENCE:
- filed cover letter to the exchanges dated 2026-07-15, covering the annual report for the year ended 2026-03-31 (S026, cover letter dated 2026-07-15)
- filed result at the meeting dated 2026-06-08, resolution 1, a special resolution to approve revision in the remuneration of Ms. Kiran Mazumdar-Shaw, Executive Director (designated Executive Chairperson): share of all votes against 8.02% and share of institutions' votes against 21.30% (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- the voting file prints counts and percentages only, no pay amount, and does not say whether 2026-06-08 is a meeting date or the date the results were filed (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- the promoter group's annual declarations cover encumbrance only and hold no pay figure, read by hand, no tier (S037, annual declarations for the years ended 2023-03-31 to 2026-03-31)
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: The remuneration table for the year to 2026-03-31 in the annual report (S026, S027), with its PDF page, and the exchange's own receipt date for that report. The notice of the postal ballot with results dated 2026-06-08, with its explanatory statement, would give the revised amount.

LAWYER

Q4 Lawyer
TO: the convict
QUESTION: You named the annual report for the year to 2026-03-31 as the place for Kiran Mazumdar-Shaw's pay, but gave no amount. The shareholder vote dated 2026-06-08 revised that pay. What is the revised amount of her remuneration, in Rs million, and what is the date of the notice that states it?
WHY I ASK: S434 and checks.md entry 34, promoter buying, selling, warrants and incentives: read the promoter's pay beside the stake. The course lists pay tied to market cap as a red flag that can lead to "fudging of numbers" (S434). Your last answer was partial: you named the document but gave no amount, so my method asks for the number and the date. It applies here because the promoter group put no shares into either raise and its stake fell by dilution alone, so pay is the one alignment signal still open. The course states no cut for pay or for a stake change. I have not read the notice or the annual report. FII and DII flows are not in the record, and the FY2022 declaration has no readable text. DECISIVE: no
IF DEFLECTED: Then say yes or no whether your record holds the notice of the vote dated 2026-06-08, and if not, name the filing that would.

CONVICT

A4 Convict not in my record
ANSWER: Not in my record. The three files I opened hold no revised amount of her remuneration, in Rs million or any unit, and no notice for the vote. The only record of that vote is its filed result for the meeting dated 2026-06-08, which prints counts and percentages and no amount. So I cannot give the number, and I cannot give the date of the notice. The notice, with its explanatory statement, is the document that would state the revised amount. The annual report for the year to 2026-03-31 should also print her pay for that year.
MOVE: not in my record | cite
EVIDENCE:
- filed votes against 95,571,206 and votes polled 1,192,359,030 at the meeting dated 2026-06-08, resolution 1, a special resolution to approve revision in the remuneration of Ms. Kiran Mazumdar-Shaw, Executive Director (Designated as Executive Chairperson) (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- filed share of all votes against 8.02% and share of institutions' votes against 21.30% at the meeting dated 2026-06-08, resolution 1 (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- the voting file prints no pay amount, and no notice date; its date is the meeting date, or for a postal ballot the date the results were filed (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- the promoter group's annual declarations for the years ended 2023-03-31 to 2026-03-31 cover encumbrance only and hold no pay figure, read by hand, no tier (S037, annual declarations for the years ended 2023-03-31 to 2026-03-31)
- the shareholding filings hold counts and percentages of shares only, and no pay figure (S032, shareholding filings, 2021-09-30 to 2026-09-30)

STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: The notice of the meeting or postal ballot whose results are dated 2026-06-08, with its explanatory statement to resolution 1, as filed with the exchanges; its filing date is the date asked for. The remuneration table in the annual report for the year to 2026-03-31 would give the pay for that year. To your follow-up: no, the three files I opened do not hold that notice, and I did not check my other files for it this turn.

LAWYER

Lawyer rest
REST: my method's checks on promoter holding, pledge, dilution and pay are covered as far as this record goes (promoter shares unchanged in both raises, pledge flag false, no encumbrance in the declarations), and the pay figure is not in the record after two asks, so a further question would not move it; the open items are the annual report pay table, the notice of the 2026-06-08 vote, the allottee names, the FY2022 declaration and FII and DII flows.

LAWYER

Lawyer review
COVERED:
- Pledge (checks.md entry 33; rules.md J says the course gives no pledge cut, S470, lesson date 2026-07-27): the pledged flag is false in all 25 filings that carry one, and the declarations for the years ended 2023-03-31 to 2026-03-31 state no encumbrance (put in I8 Q1, confirmed with S032 and S037 in I8 A1). The declarations were read by eye, no tier.
- Promoter participation in the two January 2026 raises (checks.md entries 21 and 34, S035, S467): promoter shares 728,024,176 at 2025-12-31, 2026-01-05, 2026-01-14 and 2026-03-31, so zero shares added in either raise, while the percentage went 54.45 to 48.27 to 44.91 (I8 Q1, I8 A1, answered, from filed counts). The course lists participation as a green flag, not a requirement, and states no stake-change cut (checks.md entry 34).
- Promoter selling (checks.md entry 34 red flags, S001, S456, S068): no fall in the promoter count on the four dates in I8 A1. The rest of the series, including the rise of 57,119 shares by 29-JUN-2026, is in the case book only and was not put to the convict.
- The vote on the Executive Chairperson's pay: results dated 2026-06-08, special resolution to revise her remuneration, 8.02% of all votes against and 21.30% of institutions' votes against (I8 A2, repeated in I8 A3 and I8 A4). This is a fact about the vote, not about the pay.

OPEN:
- Her pay for the year to 2026-03-31 (checks.md entry 15 and rules.md B3: RULE, lesson date 2026-07-27, S066 MODULF 00:28:56, the maximum remuneration a company can normally take is 11 percent of PAT; checks.md entry 34, pay tied to market cap, which can lead to "fudging of numbers" (S434)): not in record after I8 Q2, I8 Q3 and I8 Q4 (I8 A2 not in my record, I8 A3 partial, I8 A4 not in my record). Settled by the remuneration table in the annual report for the year to 2026-03-31 (cover letter dated 2026-07-15, S026, S027), with its PDF page. The case book prints profit to shareholders of 3,856 (Rs million, FY2025-26) as the base a B3 test would need; whether that is the PAT the rule means is unchecked.
- The revised amount and whether any part is linked to the share price or market capitalisation (the IF DEFLECTED of I8 Q2, never answered; I8 A2, I8 A4). Settled by the notice of the vote with results dated 2026-06-08, explanatory statement to resolution 1.
- The voting table conflict the convict raised itself: promoter group votes polled 721,793,134 on a resolution where the same table flags the promoter group as interested (I8 A2). Settled by the scrutiniser's report for that vote.
- The 19-JUN-2025 step: promoter percentage 60.64 to 54.45 and implied total shares 1,200,567,573 to 1,337,050,828 with the promoter count unchanged at 728,024,176 (case book section 4). No turn asked about it, although I8 Q1 framed the fall from 2025-03-31. The exchange timeline in the case book lists no Allotment of Securities between 2023-05-19 and 2026-01-05. Settled by the shareholding filing for 19-JUN-2025 (filed 23-JUN-2025) and the filing that created those shares.
- The 2026-01-14 placement of 11,26,64,585 securities (as printed): allottees, amount raised and use of proceeds (checks.md entry 21, red flag a large QIP raised for a purpose not executed, S343, PERISHABLE). The case book (PDF page 267) lists cash consideration to Mylan Inc., including repayment of debt, among the uses of funds raised, and PDF pages 307 and 373 give cash consideration of 36,242, but no turn matched use to proceeds. Settled by the placement document named in I8 A1.
- The 2026-06-29 preferential allotment of 8786362 securities and the route of the promoter's extra 57,119 shares (case book sections 4, 6 and 9). Not asked. Settled by the allotment return for 2026-06-29; the case book says its allottees are not in the annual report.
- FII and DII flows (rules.md E13, RULE as a screen, S467): not in record, a known gap. Free float and public holders above 1 percent (checks.md entry 36): not in record, not asked. Settled by the full shareholding pattern with its public category tables.
- The FY2022 declaration: no readable text, a known gap (case book D05b). Settled by the declaration letter itself.
- Correction: I8 A1 said the record does not name who received the shares in either raise, but the case book (PDF page 267) names four allottees for the 2026-01-05 issue (Mylan Inc., Serum Institute Life Sciences, Tata Capital Growth Fund II, Activ Pine LLP) for 261,917,480 Biocon Biologics shares, and my own I8 Q1 cited that. So my rest line (I8 Q5, REST) was wrong to list allottee names as open without limit: only the placement's allottees are open, and the two share counts on those pages are not reconciled.

WEAK QUESTION:
- I8 Q1: one number across two different raises, with an in-cash qualifier that did not fit the preferential issue, which the case book shows as a share swap for Biocon Biologics shares (PDF pages 267 and 307). Its premise ran from 2025-03-31, yet it asked only about January 2026, which left the June 2025 step unasked.
- I8 Q2, I8 Q3 and I8 Q4: each said the course states no cut for pay. That was wrong: rules.md B3 gives eleven percent of PAT (RULE, 2026-07-27, S066). The method's question was pay as a share of PAT, not the bare amount.
- I8 Q3: asked three things in one question (the document, the section or page, and the filing date).

EXTRA:
TO: the convict
QUESTION: Your filed promoter shares stayed at 728,024,176 while the implied total rose from 1,200,567,573 at 2025-03-31 to 1,337,050,828 at 19-JUN-2025. How many new equity shares did the company allot in that window, and on what date?
WHY I ASK: S452 and checks.md entry 21, equity dilution, rights, QIPs and buybacks: track share capital across years and who takes part, with frequent dilution to fund operations that do not generate cash as the red flag. It applies here because this first step of the promoter's fall has no allotment in the case book's exchange timeline and no turn has explained it. The course states no dilution cut. DECISIVE: no

IF DEFLECTED: Then name the filing that created those shares and give its date.

CONSOLIDATION:
- What the method asked: pledge, promoter participation and selling, dilution, and pay against profit (checks.md entries 15, 21, 33, 34; rules.md B3), in I8 Q1 to I8 Q4.
- What the record answered: no pledge in 25 filings and no encumbrance for the years ended 2023-03-31 to 2026-03-31, and zero promoter shares added in the January 2026 raises (I8 A1); a pay revision vote with 21.30% of institutions' votes against (I8 A2).
- What is still open: her pay amount and its link to market value (I8 A2 to I8 A4), the 19-JUN-2025 step, the placement's allottees and use of proceeds, the 2026-06-29 allotment, FII and DII flows and the FY2022 declaration (I8 Q5 REST, corrected above).
- What a reader should check: the annual report remuneration table and profit for the year to 2026-03-31, the notice for the 2026-06-08 vote, the 19-JUN-2025 shareholding filing and the placement document; and read the 2026-01-05 allottees in the case book (PDF page 267), not in I8 A1.

JUDGE

Judge note
STORY SO FAR:
- The promoter group held 728,024,176 shares through the year to 2026-03-31; its slice fell 60.64% to 44.91% only because new shares were created (case book ch4; hearing I8 A1).
- No pledge shows: the flag is false in all 25 filings, and declarations for the years to 2023-03-31 to 2026-03-31 say no encumbrance (case book ch4; hearing I8 A1).
- The Executive Chairperson's pay for the year to 2026-03-31 is not in the record; only a vote revising it, results dated 2026-06-08, is (hearing I8 A2 to A4).

WHY-CHAIN:
- The promoter percentage fell, because the total share count grew while the promoter count stayed at 728,024,176: implied total 1,200,567,573 at 2025-03-31 against 1,621,073,650 at 2026-01-14, +35.0%, derived by me. The promoter added zero shares in the 2026-01-05 and 2026-01-14 raises, filed counts (case book ch4; hearing I8 A1).
- The first step is unexplained, because the percentage went 60.64 to 54.45 at 19-JUN-2025 as the implied total rose 1,200,567,573 to 1,337,050,828, +136,483,255 shares, derived by me, yet the case book's filtered exchange timeline shows no Allotment of Securities between 2023-05-19 and 2026-01-05 (case book ch4, ch6). Why: not in the record.
- The January steps roughly match the allotments, because 1,508,233,221 less 1,337,050,828 is 171,182,393 against 171,279,553 allotted 2026-01-05, and 1,621,073,650 less 1,508,233,221 is 112,840,429 against 112,664,585 allotted 2026-01-14, derived by me (case book ch4, ch6). The small gaps may come from two-decimal percentages; not in the record.
- The 2026-01-05 issue was a share swap, not cash, because case book PDF page 267 says 171,279,553 shares went to Mylan Inc., Serum Institute Life Sciences, Tata Capital Growth Fund II and Activ Pine LLP for 261,917,480 Biocon Biologics shares (case book ch9). So Q1's "in cash" premise did not fit, and A1 missed that page (hearing I8 Lawyer review).
- The pay test could not run, because her pay is not in the record (hearing I8 A2, A4). The lawyer cites a course rule of 11% of PAT (rules.md B3, S066); against profit to shareholders of 3,856 for the year to 2026-03-31 (case book ch3, filed) that is about 424, derived by me. I could not check the rule or which profit it means.

I DID NOT UNDERSTAND:
- Encumbrance: I take it as any claim on shares, wider than a pledge; the glossary defines pledge only.
- Special resolution: I take it as a vote needing more than a simple majority; the record does not say how much more.
- How promoter group votes polled were 721,793,134 on resolution 1 of 2026-06-08 when the same table flags the promoter group as interested (hearing I8 A2). The convict could not reconcile it either.
- Why Mylan Inc. got 91,967,019 shares for consideration other than cash (case book ch9, PDF pages 307, 373) while page 267 lists 171,279,553 shares to four holders. The pages do not reconcile them.
- Whether the promoter's extra 57,119 shares by 29-JUN-2026 came from the 8,786,362 allotted that day (case book ch4, ch6). Not asked; not in the record.
- What the employee trust line is and why it fell from 0.21% at 31-MAR-2025 to 0.09% at 31-MAR-2026 (case book ch4). Not asked.

STATE PROPOSED:
- Q1 answered: zero promoter shares added in either raise, from filed counts with four dates (S032), which match the case book table exactly (ch4); move: cite. One correction: A1 said the record names no allottees, but case book PDF page 267 names four for the 2026-01-05 issue.
- Q2 no data: no pay amount and no filing date; the convict named the annual report for the year to 2026-03-31 as the settling document and mitigated with the 2026-06-08 vote, 8.02% of all votes and 21.30% of institutions' votes against (S034). That vote is not printed in the case book, so I could check its figures only through code's dating check.
- Q3 partial: the document was named (the annual report's Board's report or corporate governance report) with its cover letter dated 2026-07-15 (S026, case book ch3), but no page, no amount, and the exchange receipt date is unchecked; move: not in my record, then mitigate.
- Q4 no data: no revised amount and no notice date; the convict named the notice of the 2026-06-08 vote, with its explanatory statement, as the settling document; move: not in my record, then cite.

ASK NEXT:
- What created the roughly 136,483,255 extra shares between 2025-03-31 and 19-JUN-2025 (derived by me), and which dated filing records it? Watch item: the lawyer proposed this as its EXTRA question and it was not asked (cost cap), so the largest single step of the promoter's fall, 6.19 points (60.64 to 54.45, derived by me), is untested.
- Is any part of Kiran Mazumdar-Shaw's pay linked to the share price or market capitalisation, and which dated filing states it? This was Q2's follow-up and was never put.

Also noted: CHECKS FROM CODE ran over every turn of I8 with 0 problems. The convict's four answers carry no quotations, so there was nothing to

mark verified by code; every figure of three digits or more is dated. The lawyer's course quotes (S467, S434, S066) come from its own brain, which code did not check here and I cannot. Still open beyond the two asks: the placement's allottees and use of proceeds, the 2026-06-29 allotment, FII and DII flows, free float, and the FY2022 declaration, which has no readable text (case book ch8; hearing I8 Lawyer review).

CONVICT

WA1 Convict `partial`

ANSWER: Not in my record as a cause; the record shows only when the shares first appear. The shareholding filing dated 2025-06-19 (filed 2025-06-23) implies 1,337,050,828 shares at 2025-06-19, against 1,200,567,573 at 2025-03-31 and at every filing since 2021-09-30. That is 136,483,255 more shares between those two dates, derived. The promoter count was 728,024,176 at 2025-03-31 and at 2025-06-19, so its stake fell from 60.64 to 54.45 by dilution alone. The filing gives no reason, and I hold no allotment return. The vote dated 2025-06-04 on raising funds by issuing equity shares is the nearest record; nothing in my record ties it to these shares.
MOVE: cite | not in my record
EVIDENCE:
- filed promoter shares 728,024,176 at 2025-03-31 and 728,024,176 at 2025-06-19 (S032, shareholding filing for the quarter ended 31-MAR-2025; S032, shareholding filing dated 19-JUN-2025)
- filed promoter percentage 60.64 at 2025-03-31 and 54.45 at 2025-06-19; filed public percentage 39.15 at 2025-03-31 and 45.37 at 2025-06-19 (S032, shareholding filing for the quarter ended 31-MAR-2025; S032, shareholding filing dated 19-JUN-2025)
- derived implied total shares 1,200,567,573 at 2025-03-31 and 1,337,050,828 at 2025-06-19, back-calculated from the filed percentage (S032, shareholding filing for the quarter ended 31-MAR-2025; S032, shareholding filing dated 19-JUN-2025)
- derived difference: 1,337,050,828 at 2025-06-19 less 1,200,567,573 at 2025-03-31 is 136,483,255 shares (S032, shareholding filing dated 19-JUN-2025)
- derived implied total shares 1,200,567,573 at each of the 15 filings from 2021-09-30 to 2025-03-31, so 2025-06-19 is the first filing with a different total (S032, shareholding filing for the quarter ended 31-MAR-2025)
- the filing dated 2025-06-19 was filed on 2025-06-23; a filing dated between quarter ends is an event-driven pattern, not a quarter end, and it prints no reason for the change (S032, shareholding filing dated 19-JUN-2025)
- filed vote of 2025-06-04, resolution 2, a special resolution on raising of funds in one or more tranches by issuance of equity shares and/or other securities: 0.50% of all votes against and 2.05% of institutions' votes against at 2025-06-04; the file prints votes, not any allotment (S034, voting results for the meeting dated 2025-06-04, resolution 2)
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: The allotment return or exchange announcement of allotment of securities that created the shares first counted in the pattern dated 2025-06-19, with its date, and the share capital note in the annual report for the year to 2026-03-31 (S026). I did not open S027 or S026 this turn.

CONVICT

WA2 Convict `not in my record`

ANSWER: Not in my record. The three files I opened hold no term of her pay, so I cannot say whether any part is linked to the share price or market capitalisation, and I cannot name a filing that states it. The only pay record is the vote on revising it, results dated 2026-06-08, which prints counts and percentages and no terms. Share-linked employee plans were also put to a vote at the meetings dated 2024-08-09 and 2026-08-06, but the printed wording does not say whether she takes part, so I draw no link from them.
MOVE: not in my record | mitigate
EVIDENCE:
- filed share of all votes against 8.02% and share of institutions' votes against 21.30% at the meeting dated 2026-06-08, resolution 1, a special resolution to approve revision in the remuneration of Ms. Kiran Mazumdar-Shaw, Executive Director (Designated as Executive Chairperson); the file prints no terms of the pay (S034, voting results for the meeting dated 2026-06-08, resolution 1)
- filed share of institutions' votes against 46.36% at the meeting dated 2024-08-09, resolution 7, a special resolution on a Restricted Stock Unit Long Term Incentive Plan for eligible employees; the printed wording is cut short and does not say whether she takes part (S034, voting results for the meeting dated 2024-08-09, resolution 7)
- filed share of institutions' votes against 51.12% at the meeting dated 2026-08-06, resolution 5, a special resolution on the Biocon Unity Long Term Incentive Plan 2026; the printed wording is cut short and does not say whether she takes part (S034, voting results for the meeting dated 2026-08-06, resolution 5)
- the promoter group's annual declarations for the years ended 2023-03-31 to 2026-03-31 cover encumbrance only and hold no pay term, read by hand, no tier (S037, annual declarations for the years ended 2023-03-31 to 2026-03-31)
- the shareholding filings from 2021-09-30 to 2026-09-30 hold share counts and percentages only, and no pay term (S032, shareholding filings)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: The notice of the meeting or postal ballot whose results are dated 2026-06-08, with its explanatory statement to resolution 1, as filed with the exchanges; and the remuneration table and the remuneration policy in the annual report for the year to 2026-03-31 (S026, S027), which I did not open this turn.

JUDGE

Judge close

STORY SO FAR:
- The promoter group held 728,024,176 shares from 2025-03-31 to 2026-03-31. Its slice fell 60.64% to 44.91% because new shares were created (case book ch4; hearing I8 A1, WA1).
- No pledge shows. The flag is false in all 25 filings, and declarations for the years to 2023-03-31 to 2026-03-31 say no encumbrance (case book ch4; hearing I8 A1).
- The Executive Chairperson's pay is not in the record. So the test of pay against profit could not run (hearing I8 A2 to A4, WA2).

WHY-CHAIN:
- The promoter slice fell in three steps, because the promoter count stayed flat while the total grew. Implied totals: 1,200,567,573 at 2025-03-31, 1,337,050,828 at 2025-06-19, 1,621,073,650 at 2026-01-14 (case book ch4). The promoter added zero shares in the January 2026 raises, filed counts

(hearing I8 A1).
- The first step is dated but has no cause. About 136,483,255 shares, +11.4% on 1,200,567,573, derived by me, first appear in the pattern dated 2025-06-19, filed 2025-06-23 (hearing I8 WA1; case book ch4). That pattern gives no reason. The nearest record is a 2025-06-04 vote to raise funds (S034). Why the shares exist: not in the record.
- That step took 6.19 points off the promoter, 60.64 to 54.45, derived by me, and public went 39.15 to 45.37 (case book ch4). The case book's timeline is filtered to 83 of 892 announcements (ch6). So its missing allotment line does not prove there was none.
- The 2026-01-05 issue was a share swap, not cash: 171,279,553 shares for 261,917,480 Biocon Biologics shares (case book ch9, PDF page 267). So Q1's "in cash" premise did not fit, as the lawyer's review says.
- The pay link test came back empty, because the record holds no pay terms (hearing I8 WA2). It holds votes on two staff share plans: 46.36% of institutions against on 2024-08-09 and 51.12% on 2026-08-06 (S034). The wording does not say she takes part. Whether either passed: not in the record.

I DID NOT UNDERSTAND:
- What created the shares first counted on 2025-06-19. Neither the filing nor the convict says (hearing I8 WA1).
- How promoter votes polled were 721,793,134 on the 2026-06-08 pay vote when the table flags the promoter as interested (hearing I8 A2).
- Why Mylan Inc. got 91,967,019 shares (PDF pages 307, 373) while page 267 lists 171,279,553 to four holders (case book ch9).
- Encumbrance: I take it as any claim on shares, wider than a pledge. The glossary defines pledge only.
- A long term incentive plan: I take it as shares given to staff later for staying or performing. Not defined in the record.
- Why the employee trust line fell 0.21% at 31-MAR-2025 to 0.05% at 29-JUN-2026, then rose to 0.19% at 30-SEP-2026 (case book ch4). Not asked.

STATE PROPOSED:
- Q1 answered, unchanged: zero promoter shares added, filed counts with four dates (S032) matching case book ch4; move cite. WA1 adds the earlier step but does not change Q1. A1 missed that page 267 names four allottees.
- Q2 no data, unchanged: no amount and no filing date; annual report named; mitigated with the 2026-06-08 vote, 21.30% of institutions against (S034). That vote is not in the case book; I could check it only through code's dating check.
- Q3 partial, unchanged: document named, cover letter dated 2026-07-15 (S026, case book ch3), but no page and no amount; moves not in my record, then mitigate.
- Q4 no data, unchanged: no revised amount and no notice date; the notice of the 2026-06-08 vote is named to settle it; moves not in my record, then cite.
- WA1 partial: the size and date of the first step are on record, filed counts and derived totals with dates (S032), but no cause and no allotment filing; moves cite and not in my record.
- WA2 no data: no pay terms, so no answer on a share price or market value link; mitigated with two staff plan votes whose wording does not name her (S034).

WATCH:
- The full exchange feed, not the filtered 83 of 892, and the share capital note in the annual report for the year to 2026-03-31 (S026): what created the shares first counted on 2025-06-19. Settles WA1. The lawyer's EXTRA was not asked (cost cap); WA1 covered its question, but no allotment filing was named.
- The remuneration table in the annual report for the year to 2026-03-31, cover letter dated 2026-07-15 (S026, S027), with its PDF page. Set it against profit to shareholders of 3,856 for that year (case book ch3). Which profit the 11% rule means is unchecked. Settles Q2 and Q3.
- The notice of the vote with results dated 2026-06-08 and its explanatory statement: the revised amount, any share price link, and its date. The scrutiniser's report should explain the promoter vote count. Settles Q4 and WA2.
- The texts of the 2024-08-09 and 2026-08-06 staff share plans: whether she can take part and whether each passed.
- The placement document for 2026-01-14 (allottees, use of proceeds) and the allotment return for 2026-06-29 (8,786,362 shares) with the promoter's +57,119 shares (case book ch4, ch6). Not asked.
- FII and DII flows and the FY2022 declaration, which has no readable text: known gaps (case book ch8).

Also noted: CHECKS FROM CODE ran over every turn of I8 with 0 problems. The convict's six answers carry no quotations, so nothing needed marking verified by code; every figure of three digits or more is dated. The lawyer's course quotes (S467, S434, S066) come from its own brain, which code did not check here and I cannot.

- I9 Board, auditors and independent directors 14 turns

LAWYER

Q1 Lawyer
TO: the convict
QUESTION: Give the written reason B S R & Co. LLP gave when it resigned as statutory auditor of the material subsidiary, effective 2026-08-06, and the date your audit committee received that letter.
WHY I ASK: S052, the auditor and key-management exits check (checks.md entry 13, rules.md B6): a mass exodus of auditors or key managers is an "amber flag" (S052, MODULE 00:01:10). Class RULE for the flag colour; the entry I read gives no lesson date and no count. Here the record shows the parent's own auditor term ending at the 48th AGM, a new auditor proposed, a CEO, CFO and company secretary all changed in the last year, and now this exit on the same date as the AGM. The course says to read the cause, so this reason decides how far the board's oversight can be trusted. I have not checked the letter itself. DECISIVE: yes
IF DEFLECTED: Name the filing or document that holds the auditor's letter, and its date.

CONVICT

A1 Convict `not in my record`

ANSWER: Not in my record. The annual report I hold covers the year to 2026-03-31 and the latest call I hold was held 2026-08-06, so neither the auditor's written reason nor the date the audit committee received the letter is on file here. I also cannot confirm which subsidiary you mean: the filed governance table names B S R & Co. LLP at two subsidiaries. What the record does hold is the parent's own auditor change, a scheduled end of a second term, with a replacement put to the meeting dated 2026-08-06.
MOVE: not in my record | mitigate
EVIDENCE:
- "Accordingly, their second term ends at the ensuing 48th AGM." (S027, p201, Board's report (company filing), report for the year to 2026-03-31)
- Filed table in the governance report for the year to 2026-03-31 lists B S R & Co. LLP as auditor of Biocon Biologics Limited (from 2022-07-26) and of Syngene International Limited (from 2021-07-21): it does not say which one resigned (S027, p268, corporate governance report).
- "There has been no resignation of the statutory auditors during the year." (S027, p278, independent auditor's report (the auditor's words), year to 2026-03-31, so it cannot cover an exit effective 2026-08-06)
- Filed voting result for the meeting dated 2026-08-06, resolution 4, appointment of S.R. Batliboi & Associates LLP as statutory auditor: 0.49% of votes against (S034, voting results for the meeting dated 2026-08-06, resolution 4).
- qa-states.md, covering the calls held to 2026-08-06, has no analyst question on an auditor, the audit committee or a resignation.
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the company's exchange filing of the subsidiary auditor's resignation letter and the audit committee minute that records its receipt, both dated on or after 2026-08-06.

LAWYER

Q2 Lawyer
TO: the convict
QUESTION: You said the auditor's letter and the audit committee minute are not in your record. Name the one exchange filing that would hold the resignation letter of B S R & Co. LLP: its category as the exchange feed lists it, and its filing date.
WHY I ASK: S052, the auditor and key-management exits check (checks.md entry 13, rules.md B6): an exit is an "amber flag" (S052, MODULE 00:01:10), class RULE for the flag colour, no count given. Your last answer was not in my record, so my method asks which document would hold it. The case book lists two entries dated 2026-08-06 on this exit, one under Change in Auditors and one under Resignation, and the resignation entry names only a material subsidiary. I have not read either filing. DECISIVE: no
IF DEFLECTED: Say which of the two 2026-08-06 entries you would open first, and why.

CONVICT

A2 Convict `not in my record`
ANSWER: Not in my record. The record I hold runs to the call held 2026-08-06 and the annual report for the year to 2026-03-31. The three files I read for this issue hold no exchange feed category and no filing date for the resignation letter, so I cannot name the filing, and I cannot choose between the two 2026-08-06 entries you describe: I have not read the case book. What I can add: the filed governance table lists the auditor at two subsidiaries, so the entry's subsidiary name decides which exit it is.
MOVE: not in my record | mitigate
EVIDENCE:
- "Accordingly, their second term ends at the ensuing 48th AGM." (S027, p201, Board's report (company filing), report for the year to 2026-03-31)
- "There has been no resignation of the statutory auditors during the year." (S027, p278, independent auditor's report (the auditor's words), year to 2026-03-31, so it cannot cover an exit effective 2026-08-06)
- Filed governance table, year to 2026-03-31: B S R & Co. LLP is auditor of Biocon Biologics Limited (from 2022-07-26) and of Syngene International Limited (from 2021-07-21) (S027, p268, corporate governance report).
- Filed voting result for the meeting dated 2026-08-06, resolution 4: 0.49% of votes against the appointment of S.R. Batliboi & Associates LLP as statutory auditor (S034, voting results for the meeting dated 2026-08-06, resolution 4).
- Grep of statements-ar-fy26.md, votes.md and qa-states.md for resign and Change in Auditors found no exchange category or filing date for any auditor resignation effective 2026-08-06.
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the exchange announcement list for the week of 2026-08-06, opened at the entry that names the subsidiary auditor's resignation (announcements to 2026-10-25 are logged in changes.md, which I did not open this call), and then the letter attached to that entry. Nothing in my files names the category or the filing date.

LAWYER

Q3 Lawyer
TO: the convict
QUESTION: Count the people who held the CFO role from the resignation filing of 2024-03-14 to 2026-04-01, and give the date the first of them took over.
WHY I ASK: S052 and S116, the auditor and key-management exits check (checks.md entry 13, rules.md B6): track resignations of the auditor, CFO, MD and independent directors over several years; an exit pattern is an "amber flag" (S052, MODULE 00:01:10), and a CFO resigning three times in a year plus an auditor resignation was called "very risky" (S116, FRAMEA 00:48:05). Class RULE for the flag colour; the entry gives no count and no lesson date. Your last two answers were not in my record on the auditor's letter, and you named the exchange announcement list as the place it sits, so I leave that open and move to the next thing my method checks. The case book shows a CFO resignation filed on 2024-02-08, another on 2024-03-14, an interim CFO who stepped down on 2026-03-31, and a new CFO from 2026-04-01. I am not saying the S116 case matches this one. DECISIVE: no
IF DEFLECTED: Name the filing that holds the date the interim CFO took over.

CONVICT

A3 Convict `partial`
ANSWER: Partial. The files I read name two people in the parent's CFO role, and give dates for the end of one and the start of the other. I count at least two between the resignation filing of 2024-03-14 and 2026-04-01. I cannot give the full count, and I cannot give the date the first of them took over: no file I read names who held the role on 2024-03-14, or who followed, or when the interim began. The report is for the year to 2026-03-31 and says nothing on the 2024 filings.
MOVE: cite | not in my record

EVIDENCE:
- "Mukesh Kamath resigned from the position of Interim Chief Financial Officer and Key Managerial Personnel of the Company with effect from the close of business hours of March 31, 2026, to take up another role within the Biocon Group." (S027, p199, Board's report (company filing), report for the year to 2026-03-31)
- "Kedar Narayan Upadhye, Chief Financial Officer and Key Managerial Personnel of BBL, was appointed as the Chief Financial Officer and Key Managerial Personnel of the Company with effect from April 01, 2026." (S027, p199, Board's report (company filing), report for the year to 2026-03-31)
- The governance report lists Mukesh Kamath as Interim Chief Financial Officer, with no start or end date in the cell (S027, p260, corporate governance report, year to 2026-03-31).
- votes.md, covering meetings from 2024-04-23 to 2026-08-06, and qa-states.md, covering the calls to 2026-08-06, hold no CFO appointment, resignation or interim start date.
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the company's exchange filings of the CFO resignations dated 2024-02-08 and 2024-03-14 and of the interim CFO's appointment, each with its effective date, and the annual report for the year to 2025-03-31, which would list key managerial personnel for that year. Nothing in my three files names them.

LAWYER

`Q4 Lawyer`
TO: the convict
QUESTION: The annual report shows Mukesh Kamath as Interim CFO until 2026-03-31, after the CFO resignation filed on 2024-03-14. Name the document that states the date he took the interim role, and give that start date.
WHY I ASK: S052 and S116, the auditor and key-management exits check (checks.md entry 13, rules.md B6): the course reads a run of senior exits as an amber flag, class RULE for the flag colour, and sets a CFO leaving repeatedly beside an auditor exit as a case it called very risky. The entry gives no count and no lesson date. Your last answer was partial: you gave the end of the interim term but not its start, so my method asks for the date in my own words. The start date fixes how long the CFO seat was filled on an interim basis, which is the part of the pattern still open. I am not saying the S116 case matches this one. I have not read any filing. DECISIVE: no
IF DEFLECTED: Say yes or no whether your record holds any filing dated between 2024-03-14 and 2026-03-31 that names who held the CFO role.

CONVICT

`A4 Convict` `not in my record`
ANSWER: Not in my record. As of the annual report for the year to 2026-03-31, the three files I opened give the end of Mukesh Kamath's interim term, not its start. They name no document that states the start date, and no start date. The report prints him as Interim Chief Financial Officer with an empty date cell, and says he resigned from the role with effect from the close of business on 2026-03-31. Nothing I read ties him to the resignation filed on 2024-03-14, so I do not confirm that he followed it. That link is your case book's, not mine.
MOVE: not in my record | cite
EVIDENCE:
- "Mukesh Kamath resigned from the position of Interim Chief Financial Officer and Key Managerial Personnel of the Company with effect from the close of business hours of March 31, 2026, to take up another role within the Biocon Group." (S027, p199, Board's report (company filing), report for the year to 2026-03-31)
- The governance report table for the year to 2026-03-31 lists him as Interim Chief Financial Officer in row 9 with an empty date cell: the start date is not printed there (S027, p260, corporate governance report, one reader)
- The same table gives dates for another interim post, the Company Secretary: appointed with effect from 2025-07-10 and ceased with effect from 2025-09-09. So the table does print dates when it has them, and prints none for him (S027, p260, corporate governance report, one reader)
- "Kedar Narayan Upadhye, Chief Financial Officer and Key Managerial Personnel of BBL, was appointed as the Chief Financial Officer and Key Managerial Personnel of the Company with effect from April 01, 2026." (S027, p199, Board's report (company filing), report for the year to 2026-03-31)
- Grep of votes.md (meetings from 2024-04-23 to 2026-08-06) and qa-states.md (calls held to 2026-08-06) for Kamath, Chief Financial, CFO and Interim found no match in either file
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: The exchange filing that appointed him interim CFO, with its effective date, and the annual report for the year to 2025-03-31 (S030, statements-ar-fy25.md), which I did not open this call and which may list who held the role at that date. To your follow-up: no. None of the three files I opened holds a filing dated between 2024-03-14 and 2026-03-31 that names who held the CFO role. The one filing that names him is the annual report for the year to 2026-03-31, covered by the letter dated 2026-07-15 (S026, cover letter dated 2026-07-15), which is later than that window.

LAWYER

`Lawyer rest`
REST: five questions are used; the checks my method sets for this issue were put and the record answered or marked what is not in it, and the one open item, who held the CFO role between 2024-03-14 and 2026-03-31, is already named with the documents that would settle it (A4).

LAWYER

`Lawyer review`
COVERED:
- The parent's own auditor change. My method (checks.md entry 13, rules.md B6, S052) asks whether an auditor left and why. For the parent, the record answers: B S R & Co. LLP's second term ended at the 48th AGM, S.R. Batliboi & Associates LLP was put to that meeting, and 0.49% of votes were cast against it (I9 A1, I9 A2). The case book agrees on the term end (AR p201). I read this as a scheduled end of term, not an exit under the B6 flag. The convict did not say anything to change that reading.
- The FY26 CFO handover at its two ends. The interim CFO's term ended at the close of 2026-03-31 and the new CFO started on 2026-04-01 (I9 A3, I9 A4). This matches the case book (AR p188).
- The parent auditor's own report. The convict cited the auditor's statement that no statutory auditor resigned during the year to 2026-03-31, and noted that it cannot cover an exit effective 2026-08-06 (I9 A1, I9 A2).

OPEN:
- The reason for the subsidiary auditor's exit, and which subsidiary it was. The convict said this was not in its record twice (I9 Q1 to A1, I9 Q2 to A2). The convict also noted that the governance table lists B S R & Co. LLP at two subsidiaries, Biocon Biologics Limited and Syngene International Limited, so the record does not show which one is the material subsidiary. Two documents would settle it: the exchange filing dated 2026-08-06 under the Resignation category (case book section 6), with the auditor's letter attached, and the audit committee minute recording when the letter was received. The case book's section 9 also lists this reason as not in the annual report. This was my decisive question, and it is still not in the record.
- How many people held the CFO role from 2024-03-14 to 2026-04-01, and when the interim CFO started. The convict's answer was partial (I9 A3), then not in its record (I9 A4). Three sources would settle it: the exchange filings on the CFO resignation dated 2024-02-08 and 2024-03-14, the filing that appointed the interim CFO, and the annual report for the year to 2025-03-31 (named in I9 A4).
- Not asked, though my method's check covers it:
 - Independent director exits over several years. The case book's exchange feed shows cessations on 2022-07-27 (two directors), 2023-07-26 and 2024-07-25. It also shows Peter Bains resigning as an independent director on 2023-09-18 and being appointed Group CEO the same day.
 - The CEO and MD role. It was filled from 2024-12-01, the holder stepped down at the close of 2026-03-31, and a new CEO took over on 2026-04-01 (AR p188).
 - The company secretary role. There was a resignation effective 2025-04-14, an interim holder from 2025-07-10 to 2025-09-09, and a new holder from 2025-09-10.
 - The audit opinion. It is unmodified, and the auditor's report pages carry no Emphasis of Matter (AR p201, p272 to p273, p338 to p341). Under B6 a qualified opinion is a "yellow flag" (S470, SOICC2 00:29:50). The record answers this point without a question.

WEAK QUESTION:
- I9 Q1 asked for two things, the auditor's written reason and the date the audit committee received the letter. One ask would have been cleaner.
- I9 Q4 stated as fact that the interim CFO came after the resignation filed on 2024-03-14. The case book lists both events but does not show that one person directly followed the other. The convict correctly declined that link (I9 A4).
- The rest turn said five questions were used. Only four were asked (I9 Q1 to Q4).

EXTRA:
TO: the convict
QUESTION: The exchange feed records five independent director exits from 2022-07-27 to 2024-07-25. As of 2026-03-31, how many of those five left before their term ended?
WHY I ASK: S052 and S005, the auditor and key-management resignations check (checks.md entry 13, rules.md B6). This check tracks independent director exits over several years, and S005 names waves of key-manager and independent-director resignations. A mass exodus is an "amber flag" (S052, MODULE 00:01:10, lesson dated 2026-07-27 in positions.md). That is a RULE for the flag colour only: the course states no count. My four questions covered the auditor and the CFO and never reached the independent directors. I am not saying any of these exits was early. DECISIVE: no
IF DEFLECTED: Name the document that states each of the five directors' appointed term.

CONSOLIDATION:
- What the method asked: my method (B6, checks.md entry 13, S052, S116) asks for the auditor's exit and its reason, then a count of CFO and other key-management changes over several years (I9 Q1 to Q4).
- What the record answered: the parent's auditor change was a scheduled end of term, with 0.49% of votes against the new auditor (I9 A1, I9 A2). The FY26 CFO handover dates are on record (I9 A3, I9 A4).
- What is still open: the subsidiary auditor's reason and which subsidiary it was (I9 A1, I9 A2), and the CFO count and interim start date (I9 A3, I9 A4). Independent director, CEO and company secretary exits were never put to the convict.
- What a reader should check: the 2026-08-06 Resignation filing and its attached letter; the CFO filings dated 2024-02-08 and 2024-03-14, and the annual report for the year to 2025-03-31; and the feed's independent director exits from 2022-07-27 to 2024-07-25, read against each director's term. Under the course, these readings set an amber flag colour only: it gives no count that turns them into a verdict.

JUDGE

Judge note
STORY SO FAR:
- The parent's auditor, B S R & Co. LLP, ended its second five-year term at the 48th AGM; members voted in a new firm. (case book 4, AR p201; hearing I9 A1)
- On 2026-08-06 the same firm also resigned as auditor of a material subsidiary. Which subsidiary, and why, is not in the record. (case book 6, 2026-08-06 Resignation; hearing I9 A1)
- The CFO, CEO and company secretary seats all changed between 2025-04-14 and 2026-04-01. When the interim CFO started is not in the record. (case book 4, AR p188; hearing I9 A4)

WHY-CHAIN:
- The parent's auditor change looks planned, because the annual report says the second term ran from the 43rd AGM (2021-07-23) to the 48th, the board named S. R. Batliboi before the meeting, and 0.49% of votes went against it at the meeting dated 2026-08-06. (case book 4, AR p201; hearing I9 A1, S034 resolution 4)
- The subsidiary exit is the open worry, because it is dated the same day as the AGM, the feed says only "the material subsidiary", and the firm audits two subsidiaries: Biocon Biologics (from 2022-07-26) and Syngene (from 2021-07-21). The reason is listed as not in the annual report. (case book 6; case book 9, Still not in the annual report; hearing I9 A1, S027 p268)
- The accounts for the year to 2026-03-31 got a clean report, because the auditor's opinion is unmodified, with no qualification, and the words Emphasis of Matter do not appear on the audit pages. This was not put to the convict. (case book 4, AR p201, p272 to p273, p338 to p341; hearing I9 Lawyer review)
- The CFO seat was filled on an interim basis for some time, because Mukesh Kamath stepped down as Interim CFO at the close of 2026-03-31 and

Kedar Narayan Upadhye started 2026-04-01. Who held the seat after Indranil Sen left in March 2024, and from when: not in the record. (case book 4, AR p188; case book 6; hearing I9 A3, A4)
- Senior people changed often, because the feed shows five independent director exits from 2022-07-27 to 2024-07-25 (2 + 1 + 1 + 1, counted by me), a Group CEO from 2023-09-18 who ceased 2025-04-01, an MD and CEO from 2024-12-01 to 2026-03-31, and a company secretary resignation effective 2025-04-14. Why each left: not in the record. (case book 4 and 6; hearing I9 Lawyer review)

I DID NOT UNDERSTAND:
- Material subsidiary: the record does not define it or say which subsidiary it is. (case book 6; hearing I9 A2)
- Why Indranil Sen's CFO resignation is in the feed twice, filed 2024-02-08 (effective 2024-03-15) and 2024-03-14 (effective 2024-03-14). One person, so I read it as one exit with a changed date, not two CFOs; nothing in the record says which. (case book 6)
- Cessation against resignation for an independent director: does cessation mean the term simply ran out? Not in the record. (case book 6)
- What the 2026-05-07 Change in Auditors entry covers: the feed line gives no detail. (case book 6)
- Amber flag, and the source ids S052 and S116 in the lawyer's questions: they are not in the case book and code did not check them, so I could not check them.

STATE PROPOSED:
- Q1 (decisive, the auditor's written reason and when the audit committee got the letter): no data. Convict said not in its record and named the exchange filing and the committee minute; its move was mitigate, pointing to the parent's planned term end, which is a different auditor change.
- Q2 (the exchange filing's category and date): no data. Convict named only the announcement list for the week of 2026-08-06; the case book itself shows the entry under Resignation dated 2026-08-06, which the convict had not read.
- Q3 (how many people held the CFO role and when the first took over): partial. Two names with an end date (close of 2026-03-31) and a start date (2026-04-01), quotes verified by code, but no full count and no first start date.
- Q4 (the interim CFO's start date and its document): no data. Convict named the appointment filing and the annual report for the year to 2025-03-31; it also challenged the question's link to the 2024-03-14 filing, a fair challenge, since the case book does not show who followed whom.

ASK NEXT:
- Why did B S R & Co. LLP resign from the subsidiary on the same day its term at the parent ended: was that a planned change of firm across the group, or an exit for a reason of its own?
- Why does Indranil Sen's resignation appear twice in the feed with two different effective dates, and who held the CFO seat from 2024-03-14 until Mukesh Kamath?

WATCH: the lawyer's EXTRA question was not asked (cost cap), so whether any of the five independent directors who left from 2022-07-27 to 2024-07-25 left before their term ended is not in the record; each director's appointed term in the feed's appointment filings would settle it.

CONVICT

WA1 Convict `not in my record`

ANSWER: Not in my record. As of the annual report for the year to 2026-03-31 and the call held 2026-08-06, nothing I hold says whether the subsidiary exit was a planned change of firm across the group or an exit for a reason of its own. What I can place is the parent. Its second term was set to end at the 48th AGM, and the board recommended the new firm before the meeting dated 2026-08-06. That is a planned change at the parent only. I take the same-day premise from your question: I have not read the case book. The filed table gives each subsidiary's appointment date for the firm, not a term length, so I cannot call the subsidiary exit planned.
MOVE: not in my record | mitigate
EVIDENCE:
- "Accordingly, their second term ends at the ensuing 48th AGM." (S027, p201, Board's report (company filing), report for the year to 2026-03-31)
- "the Audit Committee and the Board of Directors have recommended the appointment of S. R. Batliboi & Associates LLP, Chartered Accountants" (S027, p201, Board's report (company filing), report for the year to 2026-03-31)
- Filed voting result for the meeting dated 2026-08-06, resolution 4, appointment of S.R. Batliboi & Associates LLP as statutory auditor: 0.49% of votes against (S034, voting results for the meeting dated 2026-08-06, resolution 4).
- Filed governance table, year to 2026-03-31: B S R & Co. LLP is auditor of Biocon Biologics Limited since 2022-07-26 and of Syngene International Limited since 2021-07-21; no term length or end date is printed for either (S027, p268, corporate governance report).
- "There has been no resignation of the statutory auditors during the year." (S027, p278, independent auditor's report (the auditor's words), year to 2026-03-31, so it cannot cover an exit effective 2026-08-06)
- Grep of statements-ar-fy26.md, votes.md and qa-states.md for auditor, Syngene and material subsidiary found no statement on a subsidiary auditor change, its reason or whether it was coordinated with the parent.
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the exchange filing under the Resignation category dated 2026-08-06 with the subsidiary auditor's letter attached, and the audit committee or board minute of that subsidiary on the change of firm, both dated on or after 2026-08-06.

CONVICT

WA2 Convict `not in my record`

ANSWER: Not in my record, on both parts. As of the annual report for the year to 2026-03-31, none of the three files I opened names Indranil Sen. I hold no exchange feed, so I cannot say why one resignation shows twice with two effective dates, and I cannot say who held the CFO role after the filing of 2024-03-14. I also cannot confirm that Mukesh Kamath followed directly: the report gives the end of his interim term, not its start. What I can add: the FY26 handover has no gap, the interim term closed on 2026-03-31 and the new CFO started on 2026-04-01.
MOVE: not in my record | mitigate
EVIDENCE:
- "Mukesh Kamath resigned from the position of Interim Chief Financial Officer and Key Managerial Personnel of the Company with effect from the close of business hours of March 31, 2026, to take up another role within the Biocon Group." (S027, p199, Board's report (company filing))
- "Kedar Narayan Upadhye, Chief Financial Officer and Key Managerial Personnel of BBL, was appointed as the Chief Financial Officer and Key

Managerial Personnel of the Company with effect from April 01, 2026." (S027, p199, Board's report (company filing))
- The governance report table for the year to 2026-03-31 lists Mukesh Kamath as Interim Chief Financial Officer with an empty date cell (S027, p260, corporate governance report, one reader)
- Grep of statements-ar-fy26.md, votes.md and qa-states.md for Indranil, Kamath, Chief Financial, Interim and CFO found no mention of Indranil Sen, and no CFO appointment or resignation dated between 2024-03-14 and 2026-03-31.
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the exchange filings of the CFO resignation dated 2024-02-08 and the one dated 2024-03-14, read side by side for the effective dates, then the filing that appointed the interim CFO with its effective date, and the annual report for the year to 2025-03-31 (S030, statements-ar-fy25.md), which I did not open this call and which may list who held the role at that date.

JUDGE

Judge close
STORY SO FAR:
- The parent's auditor, B S R & Co. LLP, ended its second term at the 48th AGM. Members voted in a new firm. (case book 4, AR p201; hearing I9 A1, WA1)
- On 2026-08-06 the same firm quit as auditor of a material subsidiary. Which one, and why, is not in the record. (case book 6; hearing I9 A1, WA1)
- The CFO, CEO and company secretary seats all changed from 2025-04-14 to 2026-04-01. When the interim CFO started is not in the record. (case book 4, AR p188; case book 6; hearing I9 A4, WA2)

WHY-CHAIN:
- The parent's auditor change looks planned, because its second term ran from the 43rd AGM (2021-07-23) to the 48th. The audit committee and board named S. R. Batliboi before the meeting. 0.49% of votes went against it at the meeting dated 2026-08-06. The why answer kept this reading. (case book 4, AR p201; hearing I9 A1, WA1, quotes verified by code)
- The subsidiary exit is still the open worry, because it is dated the same day as the AGM and the feed names only a material subsidiary. The firm audits two: Biocon Biologics (from 2022-07-26) and Syngene (from 2021-07-21), with no term end printed. Planned or not: not in the record. (case book 6; case book 9; hearing I9 A1, WA1)
- The accounts for the year to 2026-03-31 got a clean report, because the auditor's opinion is unmodified. The words Emphasis of Matter do not appear on the audit pages. This was never put to the convict. (case book 4, AR p201, p272 to p273, p338 to p341; hearing I9 Lawyer review)
- The CFO seat ran on an interim basis for an unknown time, because Mukesh Kamath stepped down as Interim CFO at the close of 2026-03-31 and Kedar Narayan Upadhye started 2026-04-01, with no gap. Who held the seat after Indranil Sen left in March 2024, and from when: not in the record. (case book 4, AR p188; case book 6; hearing I9 A3, A4, WA2)
- Senior people changed often, because the feed shows five independent director exits from 2022-07-27 to 2024-07-25 (2 + 1 + 1 + 1, counted by me). It also shows a Group CEO from 2023-09-18 who ceased 2025-04-01, an MD and CEO from 2024-12-01 to 2026-03-31, and a company secretary resignation effective 2025-04-14. Why each left: not in the record. (case book 4 and 6; hearing I9 Lawyer review)

I DID NOT UNDERSTAND:
- Material subsidiary: the record does not define it or say which subsidiary is meant. (case book 6; hearing I9 A2, WA1)
- Why Indranil Sen's resignation shows twice: filed 2024-02-08 (effective 2024-03-15) and 2024-03-14 (effective 2024-03-14). I read it as one exit with a changed date; the why answer could not say. (case book 6; hearing I9 WA2)
- Cessation against resignation for an independent director: does cessation mean the term simply ran out? Not in the record. (case book 6)
- What the 2026-05-07 Change in Auditors entry covers. The feed line gives no detail. A board meeting sits on the same date, but nothing links them. (case book 6)
- Amber flag, and the ids S052 and S116 in the lawyer's questions: they are the lawyer's own sources, not in the case book. Code checked only the convict's quotes, so I could not check them.

STATE PROPOSED:
- Q1 (decisive: the auditor's written reason and when the audit committee got the letter): no data, unchanged. Convict said not in its record and named the 2026-08-06 Resignation filing and the committee minute; WA1 added only the parent's planned term end, a mitigate about a different auditor change.
- Q2 (the filing's category and date): no data, unchanged. Convict named only the announcement list for the week of 2026-08-06; the case book itself lists the entry under Resignation dated 2026-08-06, which the convict had not read.
- Q3 (how many held the CFO role and when the first took over): partial, unchanged. Two names with an end (close of 2026-03-31) and a start (2026-04-01), quotes verified by code; WA2 added no count and no first start date.
- Q4 (the interim CFO's start date and its document): no data, unchanged. Convict named the appointment filing and the annual report for the year to 2025-03-31 (S030), and fairly challenged the question's link to the 2024-03-14 filing; WA2 confirmed it holds no CFO filing in that window.

WATCH:
- Which subsidiary, and why the auditor left: the exchange filing under Resignation dated 2026-08-06 with the auditor's letter attached, and the audit committee minute recording its receipt, both on or after 2026-08-06. (case book 6 and 9; hearing I9 A1, WA1)
- The CFO run from 2024-03-14 to 2026-04-01: the filings dated 2024-02-08 and 2024-03-14 read side by side, the filing that appointed the interim CFO with its effective date, and the annual report for the year to 2025-03-31. (hearing I9 A4, WA2)
- Independent directors: the lawyer's EXTRA question was not asked (cost cap). So whether any of the five who left from 2022-07-27 to 2024-07-25 left before their term ended is not in the record. Each director's appointment filing, with its term, would settle it. (case book 6; hearing I9 Lawyer review)
- The 2026-05-07 Change in Auditors entry: open it to see whether it is the board's recommendation of the parent's new auditor. The CEO and company secretary exits were also never put to the convict. (case book 6; hearing I9 Lawyer review)

- I10 What management declines, defers or will not disclose 14 turns

LAWYER

Q1 Lawyer
TO: the convict
QUESTION: On the calls up to 2026-08-06, name the one analyst question where management gave no number, though a number was asked for. State the figure the analyst asked for, in Rs million or per cent, and the date of that call.
WHY I ASK: S283 and S417, checks.md entry 53, disclosure gaps: notice what the company stopped saying or would not say. The course says to "take everything that the management says with the bucket full of salt" (S283), so a declined number counts for more than a given one. It applies here because the case book shows the annual report prints no covenant threshold and no undrawn committed line, so I want to know what was asked and not answered on the calls. The course states no count for how many declined answers is too many. I have not checked any call text; the case book holds no management answer, and the answer states in the record are one model's reading. DECISIVE: yes
IF DEFLECTED: Then name any analyst question from those calls that went without a number, with the call date.

CONVICT

A1 Convict `partial`
ANSWER: As of the record to 2026-08-06, I cannot name "the one". The states table counts 30 declined and 18 deferred answers across the 14 calls. The cleanest ask for a per cent figure is Nitin Agarwal's on the call held 2025-08-08: he asked for typical sustainable margins going forward, and management would not guide. He named no figure, so I cannot state one; the ask was a margin in per cent, and the row shows none given. Which business he meant is not in the row. These states are one model's reading: a second blind model agreed on 23 of 30 sampled items, under the bar of 24.
MOVE: challenge | cite
EVIDENCE:
- "what are the typical sustainable margins that we can hit in the business going forward?" (S010, analyst question)
- "we don't want to guide specifically at this stage" (S010, Kedar Upadhye, held 2025-08-08)
- "Is there a way to characterize the inherent profitability of the business?" (S010, analyst question), answered by "we don't specifically guide for any range, Nitin." (S010, management answer), same call held 2025-08-08
- Derived from the states table: 30 declined and 18 deferred across the calls S001 to S014, held 2022-11-15 to 2026-08-06
- A numeric range was given elsewhere: "And the EBITDA would be in the mid-20s, so some 22%, 23%, maybe 25%." (S008, management answer), call held 2025-01-31
- Another ask for an amount: "Would it be possible to share the amount which you think could be liable to be put back within this year or FY 2026?" (S008, analyst question), met by "I cannot break it down and give you a quantification on that." (S008, management answer), call held 2025-01-31; the currency is not in the row
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: The call transcript of the Q1 FY26 call held 2025-08-08, for the words around the analyst's question and the business he meant. The states table carries only the question itself, and no rupee figure was named by any analyst in the rows I read.

LAWYER

Q2 Lawyer
TO: the convict
QUESTION: On the 2025-01-31 call an analyst asked for the amount that could be put back within FY 2026, and management gave no quantification. State the unit and any figure the analyst named in that question, and give the call date.
WHY I ASK: S283 and S417, checks.md entry 53, disclosure gaps: notice what management would not say. Your last answer was partial, so my method asks for the number and the date. The course states no count of declined answers that is too many. The case book shows borrowings that were tied to lender put options, 20,913 at 2025-03-31 and nil at 2026-03-31, but I do not know whether the analyst meant those, and I have not read the call text. DECISIVE: no
IF DEFLECTED: Say yes or no: did the analyst's question name any figure at all?

CONVICT

A2 Convict `partial`
ANSWER: As of the record to 2026-08-06: no. On the call held 2025-01-31 the analyst, Love Sharma, named no figure and no unit. He named a period, the current year or FY 2026, on the call held 2025-01-31, and asked for an amount. The row for that pair shows no currency and no number in his words, so I cannot say whether he meant the lender put options the case book shows, and I will not guess. Management gave no quantification, and on the pair before it said it would be inappropriate to go into details individually. The state is one model's reading.
MOVE: cite | not in my record
EVIDENCE:
- "Would it be possible to share the amount which you think could be liable to be put back within this year or FY 2026?" (S008, analyst question), call held 2025-01-31, pair 18
- "I cannot break it down and give you a quantification on that." (S008, management answer), call held 2025-01-31, state declined
- "Could you elaborate what kind of other such options are still available with those investors?" (S008, analyst question), call held 2025-01-31, pair 17
- "I think it would be inappropriate to go into details individually here" (S008, management answer), call held 2025-01-31, state declined
- Derived from the states table: the analyst's words in pair 18 and pair 17 hold no numeral and no currency word, call held 2025-01-31
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: The transcript of the call held 2025-01-31, for the full question around pair 18, and for any currency or figure said before it. The states table carries only the question sentence. Whether the analyst meant the lender put options is not in my record.

LAWYER

Q3 Lawyer
TO: the convict
QUESTION: Management gave no quantification on the call held 2025-01-31. On which later call, up to 2026-08-06, did management first state any

figure for borrowings that lenders could require back early under put options? Give the figure in Rs million and the call date.
WHY I ASK: S283 and S417, checks.md entry 53, disclosure gaps: notice what the company stopped saying, and whether a gap was later closed. Your last two answers were partial, so my method asks for the number and the date. The case book shows borrowings tied to lender put options of 20,913 at 2025-03-31 and nil at 2026-03-31, which are filed annual report figures, not management words. The course states no count of declined answers that is too many. I have not read any call text. DECISIVE: no
IF DEFLECTED: Say yes or no: did any call after 2025-01-31 and up to 2026-08-06 carry a management figure for those borrowings?

CONVICT

A3 Convict `not in my record`

ANSWER: As of the record to 2026-08-06: no. On your fallback, no call after the call held 2025-01-31 carries a management figure labelled as borrowings lenders could require back under put options. The nearest are repayments named on the call held 2025-08-08: roughly USD 200 million (call held 2025-08-08) to Goldman Sachs, from an equity raise of INR 4,500 crores (call held 2025-08-08). Whether those instruments are the put option borrowings in the case book is not in my record, so I do not offer them as that figure. I do not convert them to Rs million.
MOVE: not in my record | mitigate
EVIDENCE:
- "I cannot break it down and give you a quantification on that." (S008, management answer), the call held 2025-01-31, the answer to the put-back amount question, state declined
- "we've raised INR 4,500 crores" (S010, Siddharth Mittal, held 2025-08-08), the equity raise on the call held 2025-08-08
- "we have used roughly USD 200 million to repay Goldman Sachs" (S010, Siddharth Mittal, held 2025-08-08), the repayment on the call held 2025-08-08
- "Q2 will definitely go down for Goldman Sachs, which had the 5% coupon on USD 180 million" (S010, Siddharth Mittal, held 2025-08-08)
- "the remaining funds will be used to repay Kotak and Edelweiss as their payments become due" (S010, Siddharth Mittal, held 2025-08-08), no amount given for either
- "I think Q3 will reflect the Kotak and then Q4 should reflect the Edelweiss." (S011, Kiran Mazumdar Shaw, held 2025-11-12), no amount given
- my reading, not a quote: a search of the states table and the dated statements for put, put back and lender finds only the one declined pair of the call held 2025-01-31, so no later call is on record with a put option figure (inferred)
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: the transcript of the call held 2025-01-31 around the analyst's question, to show who the investors were and what the options were; and the borrowings note of the annual report for the year ended 2026-03-31, which would say whether the Goldman Sachs, Kotak and Edelweiss instruments carried lender put options. Neither is in the files I read.

LAWYER

Q4 Lawyer
TO: the convict
QUESTION: You say no call up to 2026-08-06 carries a management figure for borrowings that lenders could require back under put options. Which one document would hold that figure: its name, its exact date, and the figure in Rs million that it should show?
WHY I ASK: S283 and S417, checks.md entry 53, disclosure gaps: notice what the company stopped saying, and where a gap could be closed. Your last answer was not in my record, so my method asks which document would hold it. You named the transcript of the call held 2025-01-31 and the borrowings note of the annual report for the year ended 2026-03-31. I want the one you would open first, and its date. The case book prints 20,913 at 2025-03-31 and nil at 2026-03-31 for debentures tied to lender put options, as filed figures and not as management words. The course states no count of declined answers that is too many. I have not read any call text. DECISIVE: no
IF DEFLECTED: Name the document by type and period only, for example call transcript or annual report note, and give its date.

CONVICT

A4 Convict `not in my record`

ANSWER: As of the record to 2026-08-06, I cannot give the figure, so I name the document only. I would open the borrowings note of the annual report for the year ended 2026-03-31 first (S026, cover letter to the exchanges dated 2026-07-15). It is a filed table, not management speech. It can show a balance, but not why management declined on the call held 2025-01-31. What it should show is not in my record. The 20,913 at 2025-03-31 and the nil at 2026-03-31 are your case book figures, not ones I have read. The page and the unit are not in my record either.
MOVE: not in my record | mitigate
EVIDENCE:
- "I cannot break it down and give you a quantification on that." (S008, management answer), call held 2025-01-31, state declined
- "Would it be possible to share the amount which you think could be liable to be put back within this year or FY 2026?" (S008, analyst question), call held 2025-01-31, pair 18
- Derived from a search of positions.md, record.md and qa-states.md for put option and put back: one match, the declined pair 18 of the call held 2025-01-31, and no later management figure (inferred)
- The hot sheet lists hand-read borrowings notes (b) and (d) among further annual report pages (S039, read by hand 2026-10-31). I did not open that file this call, so I do not know whether those pages show a put option figure.
- The annual report is a filed table (S026, year to 2026-03-31), never something management said, and it moves nothing on the scorecard
STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: The borrowings note of the annual report for the year ended 2026-03-31, with its PDF page, and the hand-read borrowings pages of the annual report for the year ended 2026-03-31 (S039), to see whether they label any balance as lender put option borrowings. The transcript of the call held 2025-01-31 would show what the analyst meant, but not a figure, because management declined to give one.

LAWYER

Lawyer rest
REST: I stop here because Q5 is the last question the ladder allows. My disclosure-gap check (S283 and S417, checks.md entry 53) found the declined put-back amount on the call held 2025-01-31 and no later call figure for it. One item stays open, and it is not a management answer: the borrowings note of the annual report for the year ended 2026-03-31 is the document that would settle it. DECISIVE: no

LAWYER

Lawyer review
COVERED:
- That management declines numbers on the calls. My method (checks.md entry 53, S283, S417) asks what the company would not say. The record names concrete declines: the amount that could be put back within FY 2026, asked on the call held 2025-01-31, met with no quantification, and the other options held by those investors, declined as inappropriate to detail on the same call (I10 A1, I10 A2); and sustainable margins, which management would not guide on the call held 2025-08-08 (I10 A1). I3 A1 adds that the call held 2026-02-13 also declined to say how margins would improve.
- The size of the pattern, with its limit stated. The convict counts 30 declined and 18 deferred answers across 14 calls held 2022-11-15 to 2026-08-06 (I10 A1). The convict and the case book (section 8, I10 row) both say these states are one model's reading, with a second blind model agreeing on 23 of 30 sampled items against a bar of 24. So the counts are unchecked, and the issue is thin.
- Whether the put-back gap was later closed on a call. The convict says no later call up to 2026-08-06 carries a management figure for borrowings that lenders could require back under put options, from a search of its states table (I10 A3, I10 A4, inferred). The nearest figures are repayments named on the call held 2025-08-08: roughly USD 200 million to Goldman Sachs, from an equity raise of INR 4,500 crores, with no amounts for Kotak and Edelweiss (I10 A3).
- The filed balance is already in the case book. The convict said in I10 A4 that it had not read it and that the page was not in its record, but the case book's section 9 (S039 pages, PDF page 404, note (b)) prints non-convertible debentures tied to lender put options of 20,913 at 2025-03-31 and nil at 2026-03-31. That is a filed table, not management speech, so it answers the balance and not the decline.

OPEN:
- Whether the instruments the analyst asked about on the call held 2025-01-31 are the debentures in note (b), and what the put options were. Partial, then not in record (I10 Q2 to I10 A4). Settled by the transcript of the call held 2025-01-31 around that question, and by note 14 of the annual report for the year to 2026-03-31, which note (b) points to and which the case book does not carry.
- Whether the Goldman Sachs, Kotak and Edelweiss borrowings carried lender put options, and the Kotak and Edelweiss amounts (I10 A3). Settled by the borrowings notes of the same annual report.
- Which business the margin question on the call held 2025-08-08 meant (I10 A1). Settled by that call's transcript.
- Not asked, though checks.md entry 53 covers them:
  - The 18 deferred answers. A deferral is a promise to say later, and my method asks whether a gap was later closed. No turn asked how many came back with a figure. Settled by the later call transcripts against the states table.
  - What the 30 declines were about, by topic. Settled by the states table, then the transcripts.
  - The calls for the June 2023 and September 2024 quarters, which the case book (section 8) lists as having no recorded position. The course's red flags include a conference call closed early (S283) and investor presentations that stopped (S158). I have not checked whether those calls were held. Settled by the exchange feed for those quarters.
  - Segment margins by geography or product, also listed as no recorded position (case book section 8).
  - The covenant thresholds and undrawn committed lines the annual report does not print (case book section 5, D09a). No turn asked whether any analyst asked for them on a call.

WEAK QUESTION:
- I10 Q1: it asked for the one declined question, when the states table holds 30 declined and 18 deferred, so the premise of a single item was wrong. It also asked for the figure the analyst asked for, and an analyst usually asks for a figure without naming one. Its stated reason leaned on the annual report's missing covenant terms, which is I6's record, not the calls.
- I10 Q2: it re-asked whether the analyst named a figure, after I10 A1 had already said no analyst named a rupee figure in the rows read.
- I10 Q3 and I10 Q4: both narrowed the issue to one debt item, which belongs to I6, and left the wider pattern of declines and deferrals untested. I10 Q4 asked three things (the document, its exact date, and the figure) and asked what a figure should show, which invites a guess.
- I10 Q5 (REST): it said the borrowings note would settle the open item. The case book already prints that balance (PDF page 404, note (b)). The rest line should have named note 14 and the call transcript instead, and should not have treated the check as covered with the deferrals unasked.

EXTRA:
TO: the convict
QUESTION: Your states table marks 18 answers deferred on the calls held 2022-11-15 to 2026-08-06. How many of those 18 did management later answer with a figure on a later call, and what is the date of the latest call you checked?
WHY I ASK: S283 and S417, checks.md entry 53, disclosure gaps: notice what the company stopped saying, and whether a gap was later closed. A deferral that never comes back is a gap the company left open. My four questions stayed on one declined amount and never reached the deferrals. The course states no count of deferred answers that is too many, so I name none, and the states are one model's reading. DECISIVE: no
IF DEFLECTED: Name one deferred answer from those calls and the later call, if any, where management gave the figure.

CONSOLIDATION:
- What the method asked: what management would not say, and whether a gap was later closed (checks.md entry 53, S283, S417), in I10 Q1 to I10 Q4; the issue is thin because the answer states are one model's reading, below its own agreement bar.
- What the record answered: declines on the calls held 2025-01-31 (the put-back amount, the investors' other options) and 2025-08-08 (margins); 30 declined and 18 deferred across 14 calls, unchecked; no later call figure for the put-option borrowings; repayments named on the call held 2025-08-08 without a put-option label (I10 A1 to I10 A4).
- What is still open: whether the analyst meant the note (b) debentures and what note 14 says, the Goldman Sachs, Kotak and Edelweiss terms, the business behind the margin question, and the 18 deferrals, the topics of the 30 declines and the two quarters with no recorded call, which were never asked (I10 A2 to I10 A4, I10 Q5 REST).
- What a reader should check: the case book's PDF page 404 note (b) for the filed balance (nil at 2026-03-31), not I10 A4; then note 14 of the annual report for the year to 2026-03-31, the transcripts of the calls held 2025-01-31 and 2025-08-08, and the later transcripts against the deferred items.

JUDGE

Judge note

STORY SO FAR:
- On calls, management sometimes would not give a number: a put-back amount on 2025-01-31, and sustainable margins on 2025-08-08. (hearing I10 A1, A2)
- A states table counts 30 declined and 18 deferred answers over 14 calls, but that is one model's reading, below its check bar. (case book 8, I10 row; hearing I10 A1)
- Filed put-option debentures went from 20,913 at 2025-03-31 to nil at 2026-03-31. Why is not in the record. (case book 9, PDF page 404, note (b))

WHY-CHAIN:
- Management gave no put-back figure, because on the call held 2025-01-31 it said it could not break the amount down or quantify it, and called the investors' other options inappropriate to detail. Both quotes verified by code. What the analyst meant: not in the record. (hearing I10 A2, S008 pairs 17 and 18)
- The put-option debentures fell from 20,913 at 2025-03-31 to nil at 2026-03-31, filed. The feed shows early full redemption of NCDs on 2025-11-11 and 2026-01-05, but nothing ties those lines to these debentures, so the reason is not in the record. (case book 9, PDF page 404 note (b); case book 6)
- Debt was being repaid with new equity, because on 2025-08-08 management named INR 4,500 crores raised and roughly USD 200 million to repay Goldman Sachs, then Kotak and Edelweiss with no amount. Quotes verified by code. Whether any carried put options: not in the record. (hearing I10 A3, S010, S011)
- Management gave a margin range once, then declined, because on 2025-01-31 it said EBITDA some 22% to 25%, and on 2025-08-08 would not guide (verified by code). Which business each meant is not in the record, so no comparison with filed operating margins, 24.4% (quarter to 2025-03-31) and 19.0% (quarter to 2025-06-30). (hearing I10 A1, S008, S010; case book 3)
- The decline count is weak evidence, because a second blind model agreed on 23 of 30 sampled items against a bar of 24. So 30 declined and 18 deferred are unverified counts, not facts. (case book 8, I10 row; hearing I10 A1)

I DID NOT UNDERSTAND:
- Put option on a debenture: I read it as the lender's right to ask for money back early. Note 14, which describes them, is not in the case book.
- Declined against deferred: the record does not define the two states, so I cannot tell a refusal from a promise to answer later.
- The case book lists Analyst questions as a subject with no recorded position, yet the convict cites a states table of them. I do not see how both hold. (case book 8)
- Crores, USD and Rs million are mixed across answers; nobody converted them, and I did not.
- S026 (cover letter dated 2026-07-15) and the lawyer's S283 and S417 are not in the case book and code did not check them, so I could not check them.
- 14 calls: quarters ended 2022-09-30 to 2026-06-30 are 16, less the 2 with no recorded call is 14, derived by me. That fits, but the record does not list the calls.

STATE PROPOSED:
- Q1 (decisive, the one declined analyst question, the figure asked and the call date): partial. The convict challenged the premise of a single item (30 declined, unverified) and cited a dated example, 2025-08-08, verified by code; no figure, since the analyst named none.
- Q2 (the unit and any figure in the 2025-01-31 put-back question): partial. A plain no, backed by the quoted question, verified by code, and dated; but only the question sentence is on record, so a figure said before it cannot be ruled out.
- Q3 (the first later call with a management figure for put-option borrowings): no data. Convict said not in its record and named the transcript and the borrowings note; its move was mitigate, offering dated repayment figures it said it could not tie to put options, so not a different-basis answer.
- Q4 (the one document, its date and its figure): no data. Convict named the borrowings note of the annual report for the year to 2026-03-31 but no figure; the case book already prints that balance, nil at 2026-03-31, on PDF page 404, which the convict had not read.

ASK NEXT:
- Were the NCDs redeemed early on 2025-11-11 and 2026-01-05 the same debentures as the 20,913 at 2025-03-31 with lender put options, and why were they redeemed early?
- Why did management give an EBITDA range of 22% to 25% on 2025-01-31 but decline to guide margins on 2025-08-08: a policy change, or a different business?

WATCH: the lawyer's EXTRA question was not asked (cost cap), so how many of the 18 deferred answers came back later with a figure is not in the record; the later call transcripts read against the states table would settle it. Also open: what the 30 declines were about by topic, and whether calls were held for the June 2023 and September 2024 quarters (case book 8; exchange feed for those quarters).

CONVICT

WA1 Convict not in my record

ANSWER: As of the record to 2026-08-06: not in my record. I hold no line on early redemption of debentures, and none that ties the Kotak or Edelweiss repayments to lender put options. The two exchange dates, 2025-11-11 and 2026-01-05, come from the exchange feed in the case book, not from a file I read this call. I can add what management said. On the call held 2025-08-08 it said the rest of the equity money would repay Kotak and Edelweiss as their payments become due, which is due-date wording, not early wording. On the call held 2025-11-12 it placed Kotak in Q3 and Edelweiss in Q4. Whether that fits your two dates is my reading, inferred.
MOVE: not in my record | mitigate
EVIDENCE:
- "the remaining funds will be used to repay Kotak and Edelweiss as their payments become due" (S010, Siddharth Mittal, held 2025-08-08)
- "I think Q3 will reflect the Kotak and then Q4 should reflect the Edelweiss." (S011, Kiran Mazumdar Shaw, held 2025-11-12)
- "Biocon Limited has entered into definitive agreements with Kotak Strategic Situations Fund, for a structured funding of up to ₹1,200 Crores." (S002, Kiran Mazumdar-Shaw, held 2023-02-15); the instrument type is not in the row

- "every dollar that we generate out of free cash, the first claim is going to be to reduce debt" (S013, Kedar Upadhye, held 2026-05-08)
- "The full benefit, however, of this debt reduction will be visible from FY '27 with annual savings of around INR300 crores in interest costs." (S011, Kiran Mazumdar Shaw, held 2025-11-12)
- "we've kept 1/3rd open to allow for early prepayment" (S004, M.B. Chinappa, held 2023-11-10), said of the US$1.2 billion loan, not of debentures
- Derived from a search of qa-states.md, positions.md and record.md for redeem, redemption, debenture, NCD and put option: no match on the first four, and put back matches only the declined pair on the call held 2025-01-31 (inferred)
- Your case book figure, not read by me: debentures tied to lender put options, 20,913 at 2025-03-31 and nil at 2026-03-31, filed

STATE I CLAIM: not in my record
WHAT WOULD SETTLE IT: The exchange announcements of 2025-11-11 and 2026-01-05 (the redemption notices, name them without an id), and note 14 of the annual report for the year to 2026-03-31, which would say whether those debentures are the put option ones and the terms of redemption. The transcript of the call held 2026-02-13 would show what management said about the Kotak and Edelweiss repayments. I did not open the hand-read borrowings notes (S039) this call.

CONVICT

WA2 Convict `partial`

ANSWER: As of the record to 2026-08-06, the record does not settle it, and it does not show a plain policy change either. On the call held 2025-01-31 management gave a range of 22% to 25% when asked about margins. On the call held 2025-08-08 it refused a range but gave a normalised 24% for the quarter. Neither analyst question names a business, and my positions file lists both under biosimilars margin (inferred), so I cannot show a different business. Later calls kept saying mid-20s while saying management had not guided. Why the wording changed: not in my record.
MOVE: challenge | not in my record
EVIDENCE:
- "Is it not a conservative guidance? Or should we expect the margins to, let's say, over the next 18, 24 months move up from here on substantially?" (S008, analyst question), call held 2025-01-31, pair 24, no business named in the row
- "And the EBITDA would be in the mid-20s, so some 22%, 23%, maybe 25%." (S008, management answer), call held 2025-01-31, state partial
- "And we continue to have an EBITDA margin of 22% to 23%." (S008, Shreehas Tambe, held 2025-01-31), worded as a level that continues, not as a new target
- "what are the typical sustainable margins that we can hit in the business going forward?" (S010, analyst question), call held 2025-08-08, pair 34, answered by "we don't want to guide specifically at this stage." (S010, management answer), state declined, no business named in the row
- "So you should take 24% on a normalized basis for the quarter." (S010, Kedar Upadhye, held 2025-08-08), management's own normalised figure; the row does not show which question it answered
- "we've refrained from giving specific guidance for the future. We did say that we will have the mid-20s for the current financial year." (S012, Shreehas Tambe, held 2026-02-13)
- "We have always directed this to say we will be in the mid-20s, and it will ramp up." (S014, Shreehas Tambe, held 2026-08-06)
- my reading, not a quote: positions.md files the 2025-01-31, 2025-08-08, 2026-02-13 and 2026-08-06 margin lines under one topic, biosimilars margin and the core EBITDA lens, and the earlier mid-30s wording of 2023-11-10 was a core EBITDA measure, so a change of measure is as likely as a change of business (inferred)

STATE I CLAIM: partial
WHAT WOULD SETTLE IT: The transcripts of the calls held 2025-01-31 and 2025-08-08 around pair 24 and pair 34, to show which business and which margin measure each analyst meant, and whether management gave a reason for no longer guiding a range. The states table carries only the question sentences.

JUDGE

Judge close

STORY SO FAR:
- On calls, management declined a put-back amount on 2025-01-31 and a forward margin range on 2025-08-08. (hearing I10 A1, A2, WA2)
- A states table counts 30 declined and 18 deferred answers over 14 calls. It is one model's reading, below its check bar. (case book 8, I10 row; hearing I10 A1)
- Filed put-option debentures fell from 20,913 at 2025-03-31 to nil at 2026-03-31, Rs million. Why is still not in the record. (case book 9, PDF page 404, note (b); hearing I10 WA1)

WHY-CHAIN:
- Management gave no put-back figure, because on the call held 2025-01-31 it said it could not quantify the amount. It also called detail on the investors' other options inappropriate. Quotes verified by code. What the analyst meant: not in the record. (hearing I10 A2, S008 pairs 17 and 18)
- The put-option debentures went to nil, reason not in the record. The feed shows early full redemption of NCDs on 2025-11-11 and 2026-01-05. Management said Kotak and Edelweiss would be repaid as payments became due, Kotak in Q3 and Edelweiss in Q4 (verified by code). The dates may fit, but the convict calls that inferred. (case book 6 and 9; hearing I10 WA1, S010, S011)
- Debt was being paid down with new equity, because on 2025-08-08 management named INR 4,500 crores raised and roughly USD 200 million used to repay Goldman Sachs. On 2025-11-12 it said the cut saves around INR300 crores a year in interest, in full from FY '27. Both are management's words, verified by code. Whether any loan had put options: not in the record. (hearing I10 A3, WA1, S010, S011)
- Management stopped giving a range but kept giving numbers. On 2025-01-31 it said EBITDA some 22% to 25%. On 2025-08-08 it refused a range, yet said take 24% on a normalised basis for the quarter. Calls on 2026-02-13 and 2026-08-06 still said mid-20s (verified by code). Why the wording changed: not in the record. (hearing I10 WA2, S008, S010, S012, S014)
- I cannot compare the 24% with the filings. It is management's own adjusted figure, while the filed group operating margin for the quarter to 2025-06-30 is 19.0%. Which business and which measure the 24% uses is not in the record. (hearing I10 WA2, S010; case book 3)

I DID NOT UNDERSTAND:
- Put option on a debenture: I read it as the lender's right to ask for money back early. Note 14, which describes them, is not in the case book.
- Early full redemption (the feed) against repaid as payments became due (management, 2025-08-08): I cannot tell if the company paid early or on time. (case book 6; hearing I10 WA1)

- Q3 and Q4 in the 2025-11-12 quote: I read them as the quarters to 2025-12-31 and 2026-03-31, but the record does not say which year's quarters. (hearing I10 WA1, S011)
- Declined against deferred: the record does not define the two states, so I cannot tell a refusal from a promise to answer later.
- The case book lists Analyst questions as a subject with no recorded position, yet the convict cites a states table of them. I do not see how both hold. (case book 8)
- Crores, USD and Rs million are mixed and nobody converted them. S026 and the lawyer's S283 and S417 are not in the case book and code did not check them, so I could not check them.

STATE PROPOSED:
- Q1 (decisive, the one declined analyst question, the figure asked and the call date): partial, unchanged. WA2 sharpened it: the 2025-08-08 decline was of a forward range, while the same call gave a normalised 24% for the quarter (verified by code). Still no single item, and no figure named by the analyst.
- Q2 (the unit and any figure in the 2025-01-31 put-back question): partial, unchanged. The why answers did not return to that question; only its question sentence is on record.
- Q3 (the first later call with a management figure for put-option borrowings): no data, unchanged. WA1 found no management figure tied to put options. It offered due-date repayment wording for Kotak and Edelweiss with no amounts, a mitigate, not an answer on a different basis.
- Q4 (the one document, its date and its figure): no data, unchanged. The convict still names only the borrowings note and has not read the case book's note (b), which prints nil at 2026-03-31, or the hand-read pages S039.

WATCH:
- Were the redeemed NCDs the put-option debentures, and were they paid early? The exchange notices dated 2025-11-11 and 2026-01-05, and note 14 of the annual report for the year to 2026-03-31, would settle it. The same note would say whether the Kotak structured funding of up to ₹1,200 crores (2023-02-15) is one of them. (case book 6 and 9; hearing I10 WA1)
- Which business and which measure each margin question meant, and any reason given for dropping a range: the transcripts of the calls held 2025-01-31 and 2025-08-08, around pairs 24 and 34. The 2025-01-31 transcript around pair 18 would also show what the put-back question meant. (hearing I10 A2, WA2)
- Deferrals: the lawyer's EXTRA question was not asked (cost cap). So how many of the 18 deferred answers later came back with a figure is not in the record. The later call transcripts read against the states table would settle it. (hearing I10 Lawyer review)
- Also never asked: what the 30 declines were about by topic, and whether calls were held for the June 2023 and September 2024 quarters. The states table and the exchange feed for those quarters would settle them. (case book 8; hearing I10 Lawyer review)

- Cross 8 turns

LAWYER

X1 Lawyer
TO: the convict
QUESTION: In I4 A1 and A2 you said you hold no id for the Q4 FY26 deck and no like-to-like line beyond the 13%, yet in I2 WA1 you named that deck as S024, held 2026-05-08, excluding one-time lenalidomide sales. Which stands, and what Rs million does S024 remove from the year to 2025-03-31?
WHY I ASK: I4 A1 and I4 A2 against I2 WA1. I4 A1 and A2 put the Q4 FY26 results deck outside the record (id not held) and said the only like-to-like line held is the 13% on operating revenue, with no amount; I2 WA1 cites S024 as the Q4 FY26 deck held 2026-05-08, carrying an exclusion of one-time lenalidomide sales, and sizes it at about Rs 300 crore for the year to 2025-03-31 from record.md with no source id (also I2 A1). The SOIC check this breaks is checks.md entry 6, normalised against reported figures needs a disclosed basis (S005 and S010, lesson date 2026-07-14, class EXAMPLE, PERISHABLE for its cases, no haircut percentage stated): I read its green flag as an adjustment that traces to a filed line, and its red flag as an adjusted figure taken at face value. Today the like-to-like 13% has no traced amount, and the one named item rests on a deck the convict both cites and says it does not hold. I have not read S024; whether it prints an amount is unchecked. DECISIVE: no
IF DEFLECTED: Then say yes or no whether S024 prints the lenalidomide amount in Rs million beside its like-to-like line.

CONVICT

XA1 Convict `partial`
ANSWER: As of the calls to 2026-08-06, I2 WA1 stands on the id and I4 A1 and A2 do not. S024 is the deck of 2026-05-08, and positions.md carries its lenalidomide line, so saying I held no id was my error. What I do not hold is any rupee amount printed by S024. Its line names Q4FY25, the quarter ended 2025-03-31, not the year. The about Rs 300 crore, about 3,000 million, for the year to 2025-03-31 came from record.md with no id, and I did not re-read it this call. I cannot say yes or no whether the slide prints an amount.
MOVE: concede | not in my record
EVIDENCE:
- "Excluding one-time, generic lenalidomide sales in Q4FY25" (S024, deck), the deck of 2026-05-08; no amount sits beside it in my files
- "excluding the onetime bonus of generic lenalidomide in Q4 FY '25" (S013, Kiran Mazumdar Shaw, held 2026-05-08)
- "absence of certain one-off benefits recorded in FY25, including income from Lenalidomide" (S027, p241, management discussion and analysis); it names the item and gives no amount
- "Operating revenue and EBITDA grew at 13% and 25%, respectively, on a like-to-like basis" (S027, p21, message from the chairperson or chief executive); it gives no amount removed
- my reading, not a quote: the S024 line is about Generics sales in the quarter ended 2025-03-31, and I cannot tie it to the group 13% by any amount
- my reading, not a quote: I4 A2 said the 13% was the only like-to-like line in my files; that was too wide, because I2 WA1 relied on a 17% Generics line from record.md, which I did not re-read this call and have not checked
- my reading, not a quote: the about 3,000 million for the year to 2025-03-31 is management's own adjusted figure from record.md, not an S024 amount
STATE I CLAIM: partial

WHAT WOULD SETTLE IT: the reconciliation slide of the S024 deck of 2026-05-08, giving the lenalidomide amount in Rs million for the quarter ended 2025-03-31 beside its like-to-like line; or the record.md entry behind the about 3,000 million for the year to 2025-03-31, read with its source.

LAWYER

X2 Lawyer
TO: the convict
QUESTION: In I6 A3 you took the rise in finance costs from 8,974 to 9,903 as interest on debt; the case book prints borrowing cost capitalised at 1,782 for the year to 2025-03-31 and nil a year later. Which reading stands? Give the group's total borrowing cost capitalised that year, in Rs million, and its filing date.
WHY I ASK: I6 A3 against the case book's chapter 9 line on intangible assets under development (borrowing cost capitalised nil for the year to 2026-03-31, 1,782 for the year to 2025-03-31, PDF pages 365 to 367), read with I4 A4. In I6 A3 you accepted the full-year rise from 8,974 to 9,903 as real interest and put the saving in FY27; in I4 A4 you answered only on the 1,053 of additions, and the 1,782 that I4 Q4 named was not addressed. The SOIC check this gap breaks is checks.md entry 20 (S445, note dated 2026-07-27, class EXAMPLE for its one stated case, no number given for the test itself): a deleveraging reading needs interest cost, borrowings and repayment to move the same way, and that comparison only works if the two years' interest lines are on one basis. If part of the year to 2025-03-31 interest went to the balance sheet, the 8,974 understates that year's cost, and the year-on-year rise is partly a change in treatment, not in debt. The same reading sits under checks.md entry 10 (S051 and S415, notes dated 2026-07-27 and 2026-07-26), which flags profit lifted by moving cost to the balance sheet and states no numeric cut; that entry names research and development and pre-operating cost, not borrowing cost, so applying it here is my reading, not a course line. A second reason the bases differ: in I4 A3 you quoted a note placing bridge financing cost and additional finance cost to settle lenders inside the 2,102 of exceptional items, outside the finance costs line, with no amount for those two parts. I have not read the borrowing costs note or the capital work in progress note, so whether any borrowing cost was capitalised outside intangibles under development is unchecked. DECISIVE: no
IF DEFLECTED: Then say yes or no whether any filing in your record prints borrowing cost capitalised for the year to 2025-03-31 other than the 1,782 under intangible assets under development, and give its page.

CONVICT

XA2 Convict partial
ANSWER: As of the annual report for the year to 2026-03-31, your direction stands and my I6 A3 reading does not. The note prints borrowing cost capitalised of 5,884 for the year to 2025-03-31 (filed), against 1,782 for the year to 2025-03-31 under intangible assets under development alone. Group basis is inferred, not labelled. Derived: capitalisation fell from 5,884 (year to 2025-03-31) to 1,597 (year to 2026-03-31), so the rise in finance costs from 8,974 (year to 2025-03-31) to 9,903 (year to 2026-03-31) is mostly less cost moved to the balance sheet. I concede I6 A3. Filing date: cover letter 2026-07-15; the note prints no date.
MOVE: concede | challenge
EVIDENCE:
- "Interest expense on financial liabilities is net of borrowing cost capitalisation amounting to Rs 1,597 (March 31, 2025 - Rs 5,884)." (S027, p386, notes to the financial statements (company filing)); 1,597 is the year to 2026-03-31, 5,884 the year to 2025-03-31
- "primarily due to higher interest expense arising from lower capitalisation of interest" (S027, p242, management discussion and analysis (management speech)); management's own cause for finance costs rising from 8,974 for the year to 2025-03-31 to 9,903 for the year to 2026-03-31
- "(a) Borrowing cost capitalised during the year amounted to Nil (March 31, 2025: Rs 1,782)." (S027, p367, notes to the financial statements (company filing)); intangible assets under development only, 1,782 for the year to 2025-03-31
- "Borrowing costs capitalised during the year amounted to Rs. 262 (March 31, 2025 - Rs. 470)" (S027, p299, notes to the financial statements (company filing)); by page order a company-only note, 262 for the year to 2026-03-31 and 470 for the year to 2025-03-31, so not the group
- my reading, not a quote: finance costs of 9,903 for the year to 2026-03-31 and 8,974 for the year to 2025-03-31 are filed (S026, PDF page 385); whether the note above is the note to that table is inferred from page order, unchecked
- my reading, not a quote: outside intangible assets under development the group capitalised 4,102 for the year to 2025-03-31 (derived: 5,884 for the year to 2025-03-31 less 1,782 for the year to 2025-03-31); where the 1,597 for the year to 2026-03-31 sits, I have not located
- my reading, not a quote: capitalisation fell by 4,287 between the year to 2025-03-31 and the year to 2026-03-31 (derived: 5,884 for the year to 2025-03-31 less 1,597 for the year to 2026-03-31)
- my reading, not a quote: if the whole capitalised amount is netted from the line, gross interest fell by about 3,358 between the year to 2025-03-31 and the year to 2026-03-31 (derived: the 4,287 fall in capitalisation between those years less the 929 rise in finance costs between the year to 2025-03-31 and the year to 2026-03-31); I have not tied the note to the table
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the consolidated finance costs note for the year to 2026-03-31, stating its basis and showing interest, amount capitalised and any exceptional element side by side; and the capital work in progress note, stating borrowing cost capitalised for the year to 2026-03-31 and the year to 2025-03-31.

LAWYER

X3 Lawyer
TO: the convict
QUESTION: In I2 A3 you quote Kedar Upadhye on the call held 2025-01-31, yet in I9 A4 and WA2 you say no file you hold names who held the CFO role between 2024-03-14 and 2026-03-31. Which stands? Give the role your call record prints for him, the number of calls you hold him on, and the earliest call date.
WHY I ASK: I2 A3 against I9 A4 and I9 WA2. I2 A3 cites S008 with Kedar Upadhye speaking on the call held 2025-01-31, and I3 A2 and I10 A1 cite him on the call held 2025-08-08. I9 A4 says none of its files names who held the CFO role in that window, and I9 WA2 says no CFO appointment or resignation is dated in it. The SOIC check this gap breaks is checks.md entry 13 with rules.md B6: track the CFO, MD, auditor and independent directors over several years; a run of exits is an "amber flag" (S052, MODULE 00:01:10), class RULE for the flag colour only, note dated 2026-07-27, and the course states no count. The same entry's green flag is a stable CFO and senior directors across a decade (S298, note dated 2026-07-28, no number given). Both tests need the CFO run, and I9 Q3 stayed partial for want of it. If your own call record puts a finance officer on the calls inside that window, the window is not empty in your record. I am not saying he held the parent's CFO role: I9 A3 quotes the report naming him CFO of BBL when he was appointed to the parent's role from 2026-04-01. I have not read any call text or its speaker list.

IF DEFLECTED: Say yes or no: does any call in your record held before 2026-04-01 name Kedar Upadhye as a speaker, and give the date of the first one.

CONVICT

XA3 Convict partial

ANSWER: Both stand, because they answer different things. Yes, calls name Kedar Upadhye as a speaker: I quote him from the call held 2025-01-31 (S008), the call held 2025-08-08 (S010) and the call held 2026-05-08 (S013). A name on a call is not an office. I9 asked who held the parent's CFO role between 2024-03-14 and 2026-03-31, and the report names him CFO of BBL until the parent's role began on 2026-04-01. I concede I9 should have said he spoke on calls. The role printed beside him on the calls: not in my record. Calls: at least three verified; earliest verified 2025-01-31, and an earlier call may exist.
MOVE: challenge | concede
EVIDENCE:
- "the price erosion is in line with what we had budgeted for" (S008, Kedar Upadhye, held 2025-01-31)
- "we don't want to guide specifically at this stage" (S010, Kedar Upadhye, held 2025-08-08)
- "every dollar that we generate out of free cash, the first claim is going to be to reduce debt" (S013, Kedar Upadhye, held 2026-05-08)
- "How would you address this, Kedar?" (S007, analyst question) on the call held 2024-08-09: an analyst's words only, and the management answer shown carries no speaker name, so it does not prove he answered
- "Kedar Narayan Upadhye, Chief Financial Officer and Key Managerial Personnel of BBL, was appointed as the Chief Financial Officer and Key Managerial Personnel of the Company with effect from April 01, 2026." (S027, p199, Board's report (company filing), report for the year to 2026-03-31)
- In the three files I opened, no line prints a role beside a call speaker's name: the call quotes above carry the name only.
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: the participant list at the head of each call transcript for the 14 calls held 2022-11-15 to 2026-08-06, which prints the role and the full count, and the exchange filing that named his role at BBL before 2026-04-01.

LAWYER

X4 Lawyer

TO: the convict
QUESTION: In I9 A2 you say your changes.md logs announcements to 2026-10-25; in I9 WA2 you say you hold no exchange feed. Which stands? If changes.md stands, how many auditor entries does it list from 2026-05-07 to 2026-08-06, and on what date was the subsidiary auditor's resignation filed?
WHY I ASK: I9 A2 against I9 WA2, and I7 A4 beside them. In I9 A2, under WHAT WOULD SETTLE IT, you place the announcement list in your own changes.md, unopened that call, and I7 A4 says the same of the announcements to 2026-10-25. In I9 WA2 you say you hold no exchange feed, and in I9 WA1 you take the same-day premise from my question. The SOIC check this gap breaks is checks.md entry 13 with rules.md B6 (S052, note dated 2026-07-27): track auditor, CFO, MD and independent director exits over several years, and read an exit pattern as an "amber flag" (S052, MODULE 00:01:10). Class RULE for the flag colour only; the course states no count. The same entry names exchange filings as where the data is, so if your own file holds the feed, I9 Q1 and Q2 were not empty in your record, only unread. The case book lists a Change in Auditors entry on 2026-05-07, another on 2026-08-06, and a Resignation entry on 2026-08-06 naming a material subsidiary. I have not read changes.md, and I am not saying the subsidiary exit was early or unplanned. DECISIVE: no
IF DEFLECTED: Say yes or no: does changes.md hold an entry dated 2026-08-06 under the Resignation category, and if yes, which subsidiary does it name?

CONVICT

XA4 Convict partial

ANSWER: As of the exchange announcements to 2026-10-25, I9 A2 stands and I9 WA2 falls. My hot sheet places those announcements in changes.md, so saying I hold no exchange feed was my error. I did not open changes.md this call, so I have read no entry in it. I give no count of auditor entries from 2026-05-07 to 2026-08-06, no filing date for the subsidiary auditor's resignation, and no yes or no on a Resignation entry dated 2026-08-06: not in my record this call. I know the case book entries only from your question.
MOVE: concede | not in my record
EVIDENCE:
- my reading, not a quote: the hot sheet says exchange announcements to 2026-10-25 are in changes.md; I have not counted or read any entry in it
- "There has been no resignation of the statutory auditors during the year. Accordingly, clause 3(xviii) of the Order is not applicable." (S027, p278, independent auditor's report (the auditor's words)), in the report for the year to 2026-03-31; my reading is that it speaks of the company's own auditors, not a subsidiary's, and it does not reach 2026-05-07 to 2026-08-06
- "recommended the appointment of S. R. Batliboi & Associates LLP, Chartered Accountants" (S027, p201, Board's report (company filing)), in the report for the year to 2026-03-31
- filed (S034, voting results for the meeting dated 2026-08-06, resolution 4): the appointment of S.R. Batliboi & Associates LLP as statutory auditors drew 0.49 percent of all votes polled against and 1.25 percent of public institutions' votes against, for the meeting dated 2026-08-06; this is a vote, not an announcement, and I cannot tie it to any changes.md entry
- my reading, not a quote: a search of statements-ar-fy26.md for resignation found three lines in the report for the year to 2026-03-31, and none names a subsidiary auditor
- my reading, not a quote: a search of qa-states.md for auditor and resignation found no match, so no analyst question on the 14 calls held 2022-11-15 to 2026-08-06 is recorded there on an auditor change; this was a search, not a full read
STATE I CLAIM: partial
WHAT WOULD SETTLE IT: changes.md read in full for entries dated 2026-05-07 to 2026-08-06 under Change in Auditors and Resignation, with the filing date printed on the subsidiary's entry; then the exchange filing that entry points to.

- Closing 2 turns

CONVICT

Convict closing

As of calls to 2026-08-06, filed quarters to 2026-06-30, annual report year ended 2026-03-31.

Defended: two points the judge scored answered. The filed 4,029 loss for the year to 2026-03-31 (I4 Q3, S027), and zero promoter shares added across the filed counts (I8 Q1, S032). Everything else stayed partial or no data, my cross answers included.

Conceded: generics filed +5.0% for FY26 against "strong double-digit" (S010, held 2025-08-08). Profit to owners 3,856 for the year to 2026-03-31, against 10,133 for the year to 2025-03-31. In cross I also corrected three slips of my own.

Unsettled: borrowing cost capitalised for the year to 2025-03-31. My cross answer and the case book differ. I state neither as settled. The finance costs note and the capital work in progress note of the annual report for the year to 2026-03-31 would settle it.

Not in my record: the covenant limit (facility agreements); the auditor's reason (the exchange filing dated 2026-08-06).

LAWYER

Lawyer closing

Answered, by the judge's states, only two: I4 Q3, a filed 4,029 net one-off loss against a 965 gain, and I8 Q1, no promoter shares added. In cross, XA2 conceded I6 A3: finance costs are net of capitalised interest, 1,597 against 5,884; the convict claims partial.

Partial: I1 Q1 to Q3, I3 Q1, I6 Q3, I7 Q1 (decisive), I10 Q1 (decisive). No data: I5 Q1 (decisive, stock built for launches), I9 Q1 (decisive, the subsidiary auditor's reason), I6 Q1 and Q2 (covenant limit), I2 Q3 (units against price), I4 Q1 (like-to-like bridge). XA1, XA3 and XA4 were concessions, each claimed partial; changes.md stayed unread (XA4).

Check: the inventories note (I5); the related party notes (I7); the Resignation filing dated 2026-08-06 (I9).

Most useful: S445 (checks.md entry 20), behind X2. Least: S283 (entry 53), which kept I10 on one declined debt item.

The storyline and the words I had to learn

Ten plain lines, each ending in an evidence id or "not in the record".

Storyline

1. Biocon makes biosimilars and generic medicines and, through its listed subsidiary Syngene, sells research and manufacturing services (case book ch1, AR p13).
2. In the year to 2026-03-31 sales rose 10.9% on filed numbers, to 169,270, against the 13% management calls like-to-like (case book ch3; hearing I4 A1).
3. Biosimilars carried most of that rise, and Generics looked flat because a one-time lenalidomide sale sat in the year-ago quarter (hearing I2 Judge close, I3 WA1).
4. Profit to owners fell from 10,133 to 3,856, because profit before one-offs fell and a 4,029 one-off loss replaced a 965 gain (case book ch3; hearing I4 A3).
5. Part of that fall is a base effect from 11,345 of other income in the quarter ended 2024-06-30, which has no source id (hearing I1 WA1).
6. Cash from running the business halved to 19,940 because stock, other assets and payables tied up money, and part of the stock is written down (case book ch9; hearing I5 Judge close).
7. Borrowings fell 29,308 to 148,247, paid by share sales to investors rather than by business cash, which left only 1,961 after plant spending (hearing I6 WA1; case book ch3).
8. The company says it kept every lender promise, but no limit is printed, and 65,476 falls due within a year (case book ch5, ch9).
9. Biocon bought out Mylan Inc.'s stake in Biocon Biologics for 73,560, and the promoter's slice fell from 60.64% to 44.68% only because new shares were created (case book ch4, ch9; hearing I8 A1).
10. The parent's auditor change was a planned end of term, but the same firm's exit from a material subsidiary on 2026-08-06 has no stated reason (case book ch4, ch6; hearing I9 WA1).

Glossary

exceptional items	gains or costs the company says will not repeat, shown on their own line so normal profit can be read without them
like-to-like	a growth figure the company adjusts itself so two years look comparable; the adjustment is its own choice
segment result	the profit the annual report prints for each business before tax and before one-offs, not a margin
working capital	money tied up in stock, unpaid customer bills and other day-to-day items; when it grows, cash goes out
capitalised borrowing cost	interest added to the cost of a building project on the balance sheet instead of being charged to profit that year
covenant	a promise to a lender, such as keeping debt below some multiple of profit
maturity table	a table of when loans must be paid back; this one uses the earliest date lenders can demand payment
put option on a debenture	as I read it, the lender's right to ask for its money back early
QIP	new shares sold to big investors such as funds, as I read it from the quote
share swap	new Biocon shares given in exchange for shares of Biocon Biologics instead of cash
related party	a person or company closely tied to the company, such as a big investor with

	influence over a subsidiary
corporate guarantee	a promise to pay a related company's debt if it cannot
material subsidiary	a subsidiary large enough to matter; the record does not say which one is meant
derivative liability	an amount owed tied to a contract, here linked to Mylan Inc.'s stake in Biocon Biologics
dilution	an owner's percentage falling because more shares were created, not because the owner sold

Checks and gaps

What the code checks found, and what the record does not hold.

Checks that need a look

- warn reading-level I3 Judge note: sentences average 27 words (a 15-year-old reads about 18)
- warn reading-level I4 Judge note: sentences average 28 words (a 15-year-old reads about 18)
- warn reading-level I5 Judge note: sentences average 26 words (a 15-year-old reads about 18)
- warn reading-level I6 Judge note: sentences average 32 words (a 15-year-old reads about 18)
- warn reading-level I7 Judge note: sentences average 35 words (a 15-year-old reads about 18)
- warn reading-level I9 Judge note: sentences average 26 words (a 15-year-old reads about 18)
- warn reading-level Judge final: sentences average 58 words (a 15-year-old reads about 18)

Not in the record

- D05b Promoter annual encumbrance declarations, FY2022 to FY2026 (read by eye): scanned letters read by eye, no tier; FY2022 has no readable declaration
- D06 Related parties: policy, approvals, material transactions: annual report notes only; there is no separate related party filing in the exchange feed after 2023-11-10; see D06a and D06b for the votes and the latest approved values
- D06b Approved limits and the Mylan Inc. related party transaction (EGM notice, read by hand): read by hand from one notice, no tier
- D06c Earlier intra-group related party approvals: parties, ceilings, validity (notices, read by hand): read by hand from five notices, no tier; the transactions actually made against these ceilings are not matched to them, and whether any approval was replaced after the 48th AGM (2026-08-06) is not in the record
- D09 Debt, leverage, refinancing and rating (words): the report gives no covenant thresholds and states no undrawn committed lines (see D09a); nothing is later than 2026-03-31
- D09a Covenants, borrowings maturity and facilities (annual report FY2025-26, read by hand): read by hand, no tier; no covenant thresholds and no undrawn committed lines are stated in the report
- D10 Segment profit by quarter on a stated basis: quarter ended 2025-09-30 has no clean source (its filing is a scan with a corrupted text layer); the result measure and the segments changed over the period, and each row names the filing it is printed in
- D11 Analyst questions on the calls and how each was answered: states are one model's reading (a second blind model agreed on 23 of 30 sampled items, bar 24); only the not-fully-answered items are listed in qa-states.md
- Subject with no recorded position in the convict's record: Share buybacks
- Subject with no recorded position in the convict's record: Executive pay and succession planning
- Subject with no recorded position in the convict's record: Dividend policy
- Subject with no recorded position in the convict's record: Segment margins by geography or product
- Subject with no recorded position in the convict's record: Calls for the June 2023 and September 2024 quarters
- Subject with no recorded position in the convict's record: Analyst questions
